

Four Year Plans

Four-year plans are designed to help full-time degree-seeking undergraduate students to determine the best way to select a major and progress through coursework required to complete their bachelor's degree.

Students are encouraged to review their major's four-year plan, and to work with their academic advisor to ensure they meet the degree requirements, can plan for distinctive education engagement experiences such as internships, and successfully complete their program of study for graduation.

Four-year plans:

- Specify degree requirements for each major
- Provide semester-based course schedule models to complete in four years
- Incorporate Essential Studies and elective course requirement progressions
- Allow departments and advisors to create graduation progression benchmarks and review progress with student

The plans for each major can be found for each of the colleges and schools. Please use the links in the left navigation.
