**UND 2019-2020 Academic Catalog** ................................................. 11  
**Notices** ........................................................................... 12  

**Undergraduate Academic Information** ........................................... 14  
  New Undergraduate Student Information .............................................. 14  
    Admission of Freshman (Non-Degree and Early Entry) ...................... 14  
    Admission of Transfer Students ..................................................... 16  
    Orientation Programs for New Students ............................................ 17  
    Readmission of Former Undergraduate Students ............................... 17  
  Undergraduate Academic Information ................................................ 17  
    Degrees Granted ........................................................................... 18  
    The Purposes of a University Education ....................................... 18  
    The North Dakota University System Transfer Agreement ............... 18  
    University Graduation Requirements ............................................ 18  
    Major Declaration Policy, Common Course Numbers, Special Exams ... 19  
    Cooperative Education .................................................................. 20  
    Registration ................................................................................. 20  
    The Grading System ...................................................................... 21  
  Transcripts of Academic Records ....................................................... 23  
  Students in Debt to the University ..................................................... 23  
  University Attendance Policy and Procedure .................................... 23  
  Final Examination Policy .................................................................. 23  
  Undergraduate Probation, Suspension and Dismissal Policy ............... 23  
    Conduct in General ........................................................................ 24  
    Scholastic Honesty ........................................................................ 24  
    Academic Honors ......................................................................... 24  

**Undergraduate Programs and Courses** ............................................. 26  
  Accountancy (Acct) .......................................................................... 26  
    Bachelor of Accountancy ............................................................... 27  
    Bachelor of Business Administration with Major in Information Systems .......................................................................................... 28  
    Bachelor of Business Administration with Major in Managerial Finance and Accounting .......................................................... 28  
    Minor in Information Systems ......................................................... 28  
  Aerospace Studies (AS) ...................................................................... 29  
  Aerospace Studies ............................................................................ 29  
  American Indian Studies (IS) .............................................................. 30  
    Bachelor of Arts in American Indian Studies .................................... 31  
    Minor in American Indian Studies .................................................... 32  
  Anatomy and Cell Biology (Anat) ....................................................... 32  
  Anthropology (Anth) ......................................................................... 32  
    Bachelor of Arts in Anthropology ..................................................... 33  
    Minor in Anthropology ................................................................... 34  
  Art and Design (Art) ......................................................................... 34  
    B.A. with Major in Visual Arts ......................................................... 35  
    B.F.A. with a Major in Graphic Design ............................................. 36  
  B.F.A. with a Major in Visual Arts ..................................................... 36  
  Bachelor of Arts with Major in Visual Arts ....................................... 37  
  Bachelor of Fine Arts with Major in Graphic Design ........................... 37  
  Bachelor of Fine Arts with Major in Visual Arts ................................ 37  
  Minor in Art History and Museum Studies ........................................ 38  
  Minor in Graphic Design .................................................................. 38  
  Minor in Visual Arts (Studio) ............................................................. 38  
  Arts and Sciences (A & S) .................................................................. 38  
    Certificate in Diversity and Inclusion .............................................. 39  
    Minor in Canadian Area Studies .................................................... 40  
  Athletic Training .............................................................................. 40  
  Atmospheric Sciences (AtSc) ............................................................. 40  
    Bachelor of Science in Atmospheric Sciences ................................. 41  
    Minor in Atmospheric Sciences ...................................................... 42  
  Aviation (Avit) .................................................................................. 42  
    Bachelor of Science in Aeronautics with a Major in Air Traffic Management ..................................................................................... 47  
    Bachelor of Science in Aeronautics with a Major in Aviation Studies ......................................................................................... 48  
    Bachelor of Science in Aeronautics with a Major in Commercial Aviation ....................................................................................... 48  
    Bachelor of Science in Aeronautics with a Major in Flight Education .......................................................... 49  
    Bachelor of Science in Aeronautics with a Major in Unmanned Aircraft Systems Operations ...................................................... 49  
    Minor in Aviation Management ....................................................... 50  
    Minor in Professional Flight ............................................................. 50  
    Minor in Unmanned Aircraft Systems .............................................. 50  
    Safety Specialization ...................................................................... 50  
    Specialization in Business Aviation ................................................ 50  
  Banking and Financial Economics ....................................................... 50  
  Biochemistry and Molecular Biology (BMB) ..................................... 51  
  Biology (Biol) .................................................................................. 51  
    Bachelor of Science with Major in Biology ..................................... 53  
    Bachelor of Science with Major in Biology (Professional Health Sciences Emphasis) ................................................................. 55  
    Bachelor of Science with Major in Fisheries and Wildlife Biology .... 57  
    Bachelor of Science with Major in Molecular and Integrative Biology ......................................................................................... 57  
    Minor in Biology ............................................................................ 59  
  Biomedical Science (BIMD) ............................................................... 59  
  Business Administration (BAdm) ....................................................... 59  
    Minor in Chinese Studies: Culture and Business ................................ 60  
    Minor in International Business (for Business majors only) ............. 60  
    Minor in Sport Business ................................................................. 60  
  Chemical Engineering (ChE) ............................................................. 61  
    Bachelor of Science in Chemical Engineering .................................. 62  
  Chemistry (Chem) ............................................................................ 64  
    Bachelor of Science in Chemistry (ACS Certified Program) ............. 66  
    Bachelor of Science with Major in Chemistry ................................ 66
Bachelor of Science in Environmental Geoscience .......................... 108
Bachelor of Science with Major in Forensic Science .... 108
Bachelor of Science with Major in Environmental Studies ............... 111
Bachelor of Science with Major in Business Economics .................. 112
Bachelor of Science with a Major Geography ................................. 112
Minor in Geography .................................................................... 113
Minor in Geospatial Technologies .................................................. 113
Harold Hamm School of Geology and Geological Engineering (Geol and GeoE) ................................................................. 114
Bachelor of Science in Earth Science .............................................. 118
Bachelor of Science in Environmental Geoscience ................. 118
Bachelor of Science in Geological Engineering .................. 119
Bachelor of Science in Geology ...................................................... 120
Minor in Geology .................................................................... 121
History (Hist) .............................................................................. 121
Bachelor of Arts with Major in History ........................................ 124
Minor in History .................................................................... 124
Histotechnician Program ................................................................. 124
Histotechnician Certificate ............................................................ 125
Honors Program (Hon) ................................................................. 125
Honors ..................................................................................... 125
Humanities (Hum) ..................................................................... 126
Interdisciplinary Health Studies (IDS) ............................................ 127
International Studies (A&S) ............................................................ 127
Bachelor of Arts with Major in International Studies .................. 127
Minor in International Studies ....................................................... 128
Kinesiology and Public Health Education (KPHE) .................... 128
Bachelor of Science in Kinesiology ............................................... 133
Bachelor of Science in Public Health Education (B.S.P.H.E.) ........ 135
Minor in Athletic Coaching ......................................................... 135
Minor in Public Health ................................................................. 135

Minor in Chemistry ................................................................. 68
Civil Engineering (CE) ......................................................... 68
Bachelor of Science in Civil Engineering ................................. 69
Communication Program (Comm) ............................................ 70
Bachelor of Arts with Major in Communication ...................... 71
Minor in Communication .......................................................... 72
Specialization in International/Intercultural Communication ....... 72
Communication Sciences and Disorders (CSD) ......................... 72
Bachelor of Arts with Major in Communication Sciences and Disorders .......................... 73
School of Electrical Engineering and Computer Science (EECS) .... 74
Bachelor of Arts with Major in Computer Science .................... 77
Bachelor of Science in Data Science ........................................... 77
Bachelor of Science with a Major in Computer Science .......... 78
Minor in Computer Science ....................................................... 78
Minor in Cyber Security ............................................................. 78
Optional Specializations .............................................................. 78
Counseling Psychology and Community Services (Coun) ........... 79
Combined Program in Counseling with a Rehabilitation Emphasis .................. 79
Criminal Justice Studies (CJ) ...................................................... 80
Bachelor of Science in Criminal Justice Studies ....................... 81
Minor in Criminal Justice Studies ............................................... 81
Earth System Science and Policy (ESSP) ...................................... 81
Minor in Sustainability Studies .................................................... 82
Economics (Econ) ................................................................. 82
Bachelor of Economics ............................................................. 84
Bachelor of Business Administration with Major in Banking and Financial Economics ................................................ 85
Bachelor of Business Administration with Major in Business Economics ..................................................... 85
Certificate in Applied Economics ................................................ 86
Minor in Economics ................................................................. 86
Education and Human Development (EHD) ................................. 87
Educational Leadership (EDL) ..................................................... 87
School of Electrical Engineering and Computer Science (EECS) .... 87
Bachelor of Science in Cyber Security ....................................... 91
Bachelor of Science in Electrical Engineering .......................... 91
Bachelor of Science in Electrical Engineering with Aerospace Focus ................................................ 92
Bachelor of Science in Electrical Engineering with Biomedical Engineering Focus ................................................ 93
Bachelor of Science in Electrical Engineering with Computer Science Focus ................................................ 95
Minor in Aviation - Professional Flight ....................................... 95
Minor in Biomedical Engineering ............................................... 96
Minor in Electrical Engineering .................................................. 96
Engineering (Engr) ................................................................. 96
Minor in Engineering Science .................................................... 97
English Language and Literature (Engl) .................................... 97
Bachelor of Arts with Major in English ...................................... 98
Certificate in Writing and Editing ............................................... 99
Minor in English .................................................................... 100
Entrepreneurship (ENTR), School of ........................................... 100
Bachelor of Business Administration with Major in Entrepreneurship ................................................ 103
Bachelor of Science in Industrial Technology ......................... 104
Minor in Graphic Design Technology ........................................ 104
Environmental Studies (Geog) .................................................... 109
Finance (Fin) ........................................................................... 104
Bachelor of Business Administration with Major in Managerial Finance and Accounting .................. 106
Fine Arts (FA) ........................................................................... 106
Forensic Science .................................................................... 106
Bachelor of Science with Major in Forensic Science .............. 108
General Studies ..................................................................... 109
Bachelor of General Studies with a Major in General Studies .... 109
Geography and Geographic Information Science (Geog) ........... 109
Bachelor of Arts with Major in Environmental Studies .......... 111
Bachelor of Science with Major in Environmental Studies ...... 112
Bachelor of Science with a Major Geography .......................... 112
Minor in Geography ................................................................. 113
Minor in Geospatial Technologies ................................................ 113
Harold Hamm School of Geology and Geological Engineering (Geol and GeoE) ................................................................. 114
Bachelor of Science in Earth Science .............................................. 118
Bachelor of Science in Environmental Geoscience ................. 118
Bachelor of Science in Geological Engineering .................. 119
Bachelor of Science in Geology ...................................................... 120
Minor in Geology .................................................................... 121
History (Hist) .............................................................................. 121
Bachelor of Arts with Major in History ........................................ 124
Minor in History .................................................................... 124
Histotechnician Program ................................................................. 124
Histotechnician Certificate ............................................................ 125
Honors Program (Hon) ................................................................. 125
Honors ..................................................................................... 125
Humanities (Hum) ..................................................................... 126
Interdisciplinary Health Studies (IDS) ............................................ 127
International Studies (A&S) ............................................................ 127
Bachelor of Arts with Major in International Studies .................. 127
Minor in International Studies ....................................................... 128
Kinesiology and Public Health Education (KPHE) .................... 128
Bachelor of Science in Kinesiology ............................................... 133
Bachelor of Science in Public Health Education (B.S.P.H.E.) ........ 135
Minor in Athletic Coaching ......................................................... 135
Minor in Public Health ................................................................. 135
Languages: Department of Modern and Classical Languages & Literatures (Lang) .......................................................... 136
Bachelor of Arts with a Major in Chinese Studies .......................................................... 140
Bachelor of Arts with a Major in Classical Studies .......................................................... 140
Bachelor of Arts with a Major in French .......................................................... 141
Bachelor of Arts with a Major in German Studies .......................................................... 142
Bachelor of Arts with a Major in Languages .......................................................... 142
Bachelor of Arts with a Major in Languages/Teacher Certification ................................ 142
Bachelor of Arts with a Major in Norwegian .......................................................... 143
Bachelor of Arts with a Major in Spanish .......................................................... 143
Certificate in Chinese .......................................................... 143
Certificate in Classical Studies .......................................................... 143
Certificate in French .......................................................... 143
Certificate in German .......................................................... 143
Certificate in Norwegian .......................................................... 144
Certificate in Spanish .......................................................... 144
Minor in Chinese Studies: Language and Culture .......................................................... 144
Minor in Classical Studies .......................................................... 144
Minor in French .......................................................... 144
Minor in German .......................................................... 145
Minor in Norwegian .......................................................... 145
Minor in Spanish .......................................................... 145
Leadership Minor (Lead) .......................................................... 145
Leadership Minor .......................................................... 145
Linguistics (Ling) .......................................................... 146
Minor in Linguistics .......................................................... 146
Management (Mgmt) .......................................................... 147
Bachelor of Administration with Major in Airport Management .................................... 148
Bachelor of Business Administration with Major in Aviation Management ....................... 149
Bachelor of Business Administration with Major in Operations and Supply Chain Management .......................................................... 149
Bachelor of Business Administration with a Major in Human Resource Management .......................................................... 150
Bachelor of Business Administration with a Major in Management .................................. 150
Minor in Operations and Supply Chain Management .......................................................... 151
Marketing (MRKT) .......................................................... 151
Bachelor of Business Administration with Major in Marketing .................................... 152
Mathematics (Math) .......................................................... 153
Bachelor of Science with Major in Mathematics .......................................................... 155
Minor in Mathematics .......................................................... 155
Minor in Mathematics for Elementary Education .......................................................... 156
Minor in Statistics .......................................................... 156
Mechanical Engineering (ME) .......................................................... 156
Bachelor of Science in Mechanical Engineering .......................................................... 158
Medical Laboratory Science (MLS) .......................................................... 159
Bachelor of Science in Medical Laboratory Science .......................................................... 161
Certificate in Medical Laboratory Science Program (4+1 Track) ...................................... 162
Medicine (Med) .......................................................... 163
Microbiology and Immunology (MBio) .......................................................... 163
Military Science (MS) .......................................................... 163
Minor in Military Science .......................................................... 164
Music (Musc) .......................................................... 165
Bachelor of Arts with a Major in Music .......................................................... 168
Bachelor of Music with Major in Music Education .......................................................... 169
Bachelor of Music with Major in Performance .......................................................... 170
Minor in Music .......................................................... 170
Minor in Music .......................................................... 171
Nonprofit Leadership Program (NLP) .......................................................... 171
Certificate in Nonprofit Leadership .......................................................... 171
Minor in Nonprofit Leadership .......................................................... 171
Nursing (Nurs) .......................................................... 172
Bachelor of Science in Nursing On-Campus Program .......................................................... 174
Bachelor of Science in Nursing Online Program .......................................................... 176
Nutrition and Dietetics (N&D) .......................................................... 177
Bachelor of Science in Human Nutrition .......................................................... 178
Bachelor of Science in Dietetics .......................................................... 179
Minor in Nutrition .......................................................... 179
Occupational Therapy (OT) .......................................................... 180
Peace Studies (PS) .......................................................... 180
Petroleum Engineering (PteE) .......................................................... 180
Bachelor of Science in Petroleum Engineering .......................................................... 182
Certificate in Petroleum Engineering .......................................................... 182
Pharmacology, Physiology and Therapeutics (PPT) .......................................................... 183
Philosophy and Religious Studies (Phil) .......................................................... 183
Bachelor of Arts with Major in Philosophy and Religious Studies: Philosophy Concentration .......................................................... 185
Bachelor of Arts with Major in Philosophy and Religious Studies: Pre-Law Concentration .......................................................... 185
Bachelor of Arts with Major in Philosophy and Religion: Religious Studies Concentration .......................................................... 186
Minor in Ethics .......................................................... 186
Minor in Philosophy and Religious Studies: Philosophy Concentration .......................................................... 186
Minor in Philosophy and Religious Studies: Religious Studies Concentration .......................................................... 186
Physical Therapy (PT) .......................................................... 187
Physics and Astrophysics (Phys) .......................................................... 187
Bachelor of Science with Major in Physics .......................................................... 189
Five-Year Bachelor of Science-Master of Science Degree Program in Physics .......................................................... 189
Minor in Astrophysics .......................................................... 190
Minor in Physics .......................................................... 190
Political Science (Pols) .......................................................... 190
Bachelor of Arts in Political Science .......................................................... 192
Minor in Political Science .......................................................... 192
Psychology (Psyc) .......................................................... 192
Bachelor of Arts/Bachelor of Science with Major in Psychology ...................................... 194

Notices

Satisfactory Progress

Any time you drop a course or withdraw from the University, you may be jeopardizing your federally funded student financial aid, now or in the future. You must successfully complete at least two-thirds of all the courses in which you enroll. Dropping after the first day of class may not affect your academic standing, but it may affect your ability to receive financial aid. Please review this policy and others pertaining to your financial aid in the Code of Student Life in the appendix section titled “A Summary of the Standards of Satisfactory Progress for Financial Aid Eligibility,” or contact the Student Financial Aid Office.

Notice of Nondiscrimination

The University of North Dakota (UND) is committed to the principle of equal opportunity in education and employment. UND does not discriminate on the basis of race, color, national origin, religion, sex, age, disability, sexual orientation, gender identity, genetic information, creed, marital status, veteran's status, political belief or affiliation or any other status protected by law. Equal opportunity and access to facilities shall be available to all. This policy is applicable in employment, admissions and University-sponsored or approved programs and activities.

Pursuant to Title IX of the Education Amendments of 1972, UND does not discriminate on the basis of sex in its educational programs and activities, employment and admission. UND will promptly and equitably investigate reports of discrimination or harassment and take disciplinary action as appropriate. Information regarding sexual violence and Title IX can be found at http://UND.edu/affirmative-action/title-ix/.

Sexual and Gender-Based Discrimination and Harassment, including Sexual Violence

UND prohibits discrimination and harassment of students, faculty staff and visitors based upon sex and gender. Sexual harassment is a form of sex discrimination and includes sexual violence, such as rape, dating violence, domestic violence, stalking, sexual abuse, sexual assault, and sexual coercion. Prohibited harassment also includes:

- Acts of verbal, nonverbal or physical aggression, intimidation or hostility based on sex, even if those acts do not involve conduct of a sexual nature
- Sex-based harassment by those of the same sex
- Discrimination and harassment of LGBTQ+ individuals
- Sexual violence

If you have experienced sexual violence or other sex or gender-based discrimination or harassment, you are encouraged to report the incident at http://UND.edu/affirmative-action/incident-report.cfm or to contact UND’s Title IX Coordinator at 701.777.4171 or by email at donna.smith@UND.edu. UND will take prompt action to eliminate the harassment, prevent its recurrence, and eliminate its effects.

Under Title IX, most UND employees are required to share complaints of sexual violence and sexual harassment with the Title IX Coordinator. They are not allowed to keep a report of sexual violence completely confidential. This is because UND has resources and support available to help. We are concerned for the safety and well-being of the victim as well as the campus and community. This does not mean an investigation or other process will occur against the complainant’s wishes.

Respecting a complainant’s privacy is important to UND. Information will only be shared with individuals who need to know to provide resources for the complainant, to protect the safety of the campus community or for investigative needs. If a complainant does not want his or her name revealed to the respondent, UND will do its best to honor that request. Our ability to fully respond may be limited.

A confidential report of sexual violence can be made on-campus at University Counseling Center, Student Health Services, Community Violence Intervention Center, and UND’s Employee Assistance Program. These offices will not report incidents of sexual violence to the Title IX Coordinator in a way that identifies the complainant without the complainant’s consent. You can make a confidential report and still receive counseling or other services through these departments.

More information about sexual and gender-based violence and Title IX at UND can be found at http://UND.edu/affirmative-action/title-ix/ or by contacting UND’s Title IX Coordinator at 701.777.4171 or donna.smith@UND.edu.

UND Statement on Institutional Diversity and Pluralism

Approved by University Senate December 7, 2006

The University of North Dakota takes pride in its mission to meet the individual and group needs of a diverse and pluralistic society through education, research, and service. The peoples served by and associated with the University vary widely; all must be valued for the richness their different cultures, heritages, perspectives, and ideas bring to the community. The University is in part, a conduit through which individual perspectives and global interrelationships are enhanced by a learning and teaching environment that is aware of and sensitive to the diversity of its constituents. Diversity in the University is constituted by the full participation of persons of different racial and ethnic heritage, age, gender, socio-economic background, religion, and sexual orientation; of persons with disabilities; and of people from other countries. Of special and particular importance is the University’s longstanding commitment to the education of American Indian students and the cultures and traditions of the American Indian people. In addition, the University’s commitment to diversity extends to historically underrepresented populations such as African Americans, Latino Americans, and Asian Americans. Furthermore, the University embraces our international student population as they enhance the culturally rich learning environment of campus. The University is committed to providing learning and teaching experiences which enhance all students’ self-determination, educational advantages, and professional opportunities. Policies and procedures of the University oblige its students, faculty, staff, and alumni to foster the awareness and sensitivity necessary for acceptance and understanding of all people in society. The University of North Dakota strongly disapproves and does not tolerate acts of racism, sexism, bigotry, harassment, and violence in any form and actively uses its human and other resources to provide opportunities for its constituents and public to learn and appreciate the values of a diverse and multicultural world.

Disability Access On Campus

The University of North Dakota is committed to providing access to all people using its facilities, programs and services. UND is responsible for making reasonable accommodations and adjustments to ensure there is no discrimination on the basis of disability, as established under Section 504 of the Rehabilitation Act and the Americans with Disabilities Act.

For building access or other physical barriers, contact the Facilities Department 24-hour call line at 701.777.2591 or use Relay 711.

For student accommodations, contact Disability Services for Students at 701.777.3425 und.dss@UND.edu or register with DSS at http://UND.edu/disability-services/.
For employee accommodations, requests should be directed to the employee’s supervisor or the ADA Coordinator at 701.777.4171. An ADA Accommodation request form and related information is located at http://und.edu/affirmative-action/ada.cfm.

**Code of Student Life**

The University of North Dakota Code of Student Life (Code) outlines the rights and responsibilities enjoyed by the students who make up the University community. The purpose of the information contained in the Code of Student Life is to promote and maintain a learning environment appropriate for an institution of higher education and to serve as a basic guide to help prevent abuse of the rights of others. Members of the University community are expected to be familiar with the policies and processes contained within the Code and to act in compliance with them at all times. The Code is intended to be a general handbook to give guidance and direction to members of a very diverse University community. Although it is not possible to cover every conceivable situation that might arise, specific questions relating to the Code may be directed to the Office of Student Rights and Responsibilities or the Office of the Vice President for Student Affairs.

Nothing within the Code is intended to limit or restrict freedom of speech or peaceful assembly. You can access the Code at: http://und.edu/code-of-student-life/.

**Required Immunization & Tuberculosis Screening Documentation**

Students enrolled in a course offered for credit at any North Dakota University System (NDUS) institution must provide documentation of certain vaccines received and appropriate Tuberculosis (TB) screening as described in North Dakota State Board of Higher Education (SBHE) Policy 506.1. The University of North Dakota requires documentation of the following:

1. 2 doses of MMR (measles, mumps, and rubella) vaccine.
2. 1 dose of Meningitis (Menactra/Menveo) vaccine given after the 16th birthday.
3. Completion of the Tuberculosis (TB) screening form. If a student qualifies as “high risk” according to the screening form, he/she will be required to have TB testing done or provide documentation of TB testing done with the past 6 months performed within the United States.

For more information please contact UND Student Health Services at (701) 777-4500, 1.800.CALL.UND.5000, or visit the UND Student Health Services web page at: http://und.edu/immunizations.

**Security Compliance**

The University of North Dakota is in compliance with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act) formerly known as the Crime Awareness and Campus Security Act of 1990. The University of North Dakota publishes an Annual Security and Fire Safety Report. The report includes the university’s policies, procedures, and programs concerning safety and security, as well as three years’ of crime statistics for our campus. As a community member, you are entitled to a copy of this report. The report and statistical data can be found online at http://und.edu/discover/files/docs/annual-security-report.pdf. You may also request a paper copy of the report from the UND Police Department located at 3851 Campus Road, Grand Forks, ND, 58202. For more information, contact the UND Department of Public Safety at (701) 777-3491, visit the UND Department of Public Safety web page at: http://und.edu/public-safety/, or e-mail: und.police@email.und.edu (undpolice@und.edu).

**Email Policy**

Electronic mail or “email” is considered an official method for communication at UND because it delivers information in a convenient, timely, cost effective, and environmentally aware manner.

A University assigned student email account shall be the University’s official means of communication with all students on the UND campus. Students can expect to receive official information regarding deadlines, policy/procedure changes, changes in degree requirements, special events, course schedule changes, regulatory changes, emergency notifications, as well as other useful information from the Registrar, Office of Financial Aid, Student Account Services, the Provost’s Office, Dean of Students, the School of Graduate Studies, academic departments, and other entities affiliated with the University. Students are responsible for all information sent to them via their University email account. For additional information, please visit the CIO website at: http://cio.und.edu/.

**Tobacco-Free Campus Policy**

The University of North Dakota is a tobacco-free campus. Tobacco use is prohibited within University buildings, parking structures, walkways, arenas, in University or state vehicles, and on UND property. UND provides comprehensive tobacco cessation and prevention services. See http://www.tobaccofree.und.edu for more information.

**Catalog Content Non-Binding, Subject-to-Change Statement**

Catalogs and bulletins of educational institutions are usually prepared by faculty committees or administrative officers for the purpose of furnishing prospective students and other interested persons with information about their institution. Information contained in such printed material is subject to change without notice, and it is not to be interpreted as creating a binding obligation on the institution and the State. In times of changing conditions, it is especially necessary to have this understood.

**Suggestions and Complaints**

The University welcomes suggestions and/or complaints from students, faculty, and staff, which should be directed to the unit or personnel most directly involved. It is only in this way that the institution can become aware of potential problems and take appropriate action. Also available are anonymous hot lines which deal with general concerns and scientific or ethical misconduct. The URLs are respectively: http://www.und.edu/dept/fraudhotline/index.html and http://www.und.edu/dept/dc/reporting%20ScientificMisconduct.html. The University may review with accrediting agencies a log of anonymously tracked written student complaints.

**Access to Records (Family Educational Rights and Privacy Act)**

In compliance with the Family Educational Rights and Privacy Act of 1974 as amended, the University of North Dakota has developed policy guidelines for access to the education record with respect to the rights of eligible students and parents of dependent eligible students. All information contained in University records is considered confidential, except for directory information, which may be released publicly in printed, electronic, or other form. Directory information is defined in the Code of Student Life in “Section X: Student Records/Directory Information.” Students who wish to restrict their directory information from public release should restrict their information as early in the term as possible.

To insure restriction of directory information from the printed material, the process should be completed by the tenth day of classes in the fall semester. To restrict directory information, students should go to the Office of the Registrar, Room 203, Twamley Hall.

**UND Graduation Rate Information**

The University of North Dakota graduation rate information is available online at: www.und.edu/academics/registrar/graduation-rates.cfm. A paper copy of this report is also available by calling the Office of the Registrar at (701) 777-2711.

THIS CATALOG was published by the University of North Dakota Office of the Registrar, Scott Correll, Registrar, and the UND School of Graduate Studies, Grant McGimpsey, Dean.

New Undergraduate Student Information

Enrollment Information About UND

The following pages of the catalog contain information about admission policies, costs, student financial aid, and housing. The Office of Admissions serves as the central contact point for enrollment information about the University. It provides information to prospective students through printed materials, visits to high schools and college fairs, tours of the UND campus, and personal contact over the telephone, by email or on a face-to-face basis. The mailing address is: Gorecki Alumni Center, 3501 University Avenue, Stop 8357, Grand Forks, ND 58202-8357. The online application can be accessed at go.UND.edu. The office telephone number is 701.777.3000. UND will accept applications up to one year in advance of the semester the student plans to start.

Admission of Freshman (Non-Degree and Early Entry)

Undergraduates may be admitted to the University in one of two categories: Regular Admission (full-time or part-time); and Non-Degree Seeking Admission. See below for definitions of these admission categories. For provisions governing admission to the School of Graduate Studies, Law School and the School of Medicine and Health Sciences, applicants should consult the respective sections for those schools.

Types of Admission

Regular Admission

Regular Admission is granted to a student who has been determined to be eligible and is duly enrolled as a candidate for a degree.
A student who has not graduated from high school may be admitted to the University by completing the test of General Educational Development (GED). Beginning January 2014 the new GED minimum test score of 145 is required for admission. A minimum score of 410 or above on each exam and an overall average of 500 on the entire test for those tested in 2002 or later. For students testing prior to 2002, an average of 45 and subject scores no lower than 40 are required. For more information regarding GED test content and registration, contact UND Testing Services at (701) 777-4157. GED testing scores are posted on the Admissions website.

The University is approved under Federal law to admit non-immigrant alien students. Students whose education has been outside the United States should make early contact with the Office of Admissions for questions concerning admission.

International students

International students applying for undergraduate admission and all students whose first language is not English are required to earn a score of at least 195 computer-based or 71 Internet-Based on the Test of English as a Foreign Language (TOEFL) and/or 6.0 on the International Language Testing System (IELTS) to be considered for admission to UND as outlined in SBHE policy. The International Programs Office provides assistance and counseling to students from countries other than the United States.

Canadian students

Canadian students are required to complete Grade XII and to meet high school core curriculum admission requirements. They must also complete the ACT or SAT and request that the official results be sent to UND to be eligible to enter the University as freshmen. All students who graduate from high school, and who are age 25 or older on the first day of class, are exempt from meeting the required core college readiness curriculum before entering any four-year North Dakota University System institution.

Early Entry High School Students

Early Entry High School Students are applicants who have taken college-level coursework while in high school. Students may receive credit for courses taken at an accredited university/college while in high school if those courses are acceptable for credit at the University of North Dakota. Courses applied toward College requirements must be approved by the Dean of the College. Courses applied toward major requirements must be approved by the Departmental Chair.

Admission Tests

It is required that each applicant for admission who completes the ACT request that official scores be sent directly from ACT to the Office of Admissions. Students who complete the SAT I: Reasoning Test (SAT) may request official test scores be mailed to the Office of Admissions. The University prefers the ACT report since it provides information, in addition to test results, which is helpful in advising students. It is to the student’s advantage to take the test at the earliest possible test date during the latter part of the junior year.

Information on test dates may be secured from the high school principal, counselor, or the UND Testing Center or any of the colleges in the state.

Advanced Placement

A student from a high school which offers college-level courses through the College Entrance Examination Board Advanced Placement Program may be given University credit and/or advanced standing in individual subjects. This may be especially desirable if he or she wishes to proceed to the next higher level. Under this plan the student takes an advanced placement examination given at his or her school by the College Board. These examinations are scored by the College Board and are forwarded to the college of the student’s choice. The amount of credit given will then be determined by the department best qualified to evaluate the material. Students with special preparation in academic areas (foreign language, etc.) are urged to take advantage of the Special Examinations for credit available in selected disciplines. See the Special Examinations for Credit (p. 19) section.

International Baccalaureate Diploma

The International Baccalaureate Diploma is recognized for the purpose of admission to the University of North Dakota. Specific course credit for advanced standing will be evaluated and determined by the department and college in which the course is offered.

Note to students intending to enroll in mathematics courses: Students planning to take entry-level mathematics courses at UND MATH 92 Algebra Prep II*, MATH 93 Algebra Prep III*, MATH 103 College Algebra, MATH 105 Trigonometry, MATH 146 Applied Calculus I, MATH 165 Calculus I, MATH 208 Discrete Mathematics shall be enrolled in their beginning mathematics courses only after taking a math placement test or receiving a sufficiently high score on the ACT Mathematics test. Students who have received college mathematics credit need not take the placement exam. UND’s Mathematics Department strongly advises all transfer students who plan to take courses in or major in math, to take UND’s Math Placement Exam and to consult with their advisor at UND to help determine the best starting point in UND’s math curriculum.

The mathematics placement tests are used for placement purposes only. Passing these tests does NOT grant credit. Credit for MATH 103 College Algebra and/or MATH 105 Trigonometry without taking the course(s) is available only through CLEP examinations. Two placement exams are used. Students planning to take MATH 165 Calculus I should take the Trigonometry and Elementary Functions Exam. All other students should take the Algebra Exam. Placement test results will determine beginning placement in MATH 92 Algebra Prep II*, MATH 93 Algebra Prep III, MATH 103 College Algebra, MATH 105 Trigonometry, MATH 146 Applied Calculus I, MATH 208 Discrete Mathematics, MATH 165 Calculus I, or MATH 246 Calculus II.

Credit by Examination Through CLEP

CLEP stands for College-Level Examination Program of the College Board. It is a national program that offers the opportunity for a student to obtain recognition for college-level achievement based on intensive reading in a particular field, adult school courses, correspondence courses, television or radio courses, courses on tape, or other means of formal or informal preparation. UND accepts credit on CLEP subject examinations only. See the section on CLEP (p. 19) for additional information.

Enrollment in the University

All students will be enrolled, based on their declared major, in one of UND’s academic colleges. Students who have an undeclared major will receive assistance from the Student Success Center. Once a student declares a major, he/she will be enrolled in the appropriate academic college. Enrollment in an academic college does not guarantee admission to the college or specific academic programs. (For more information regarding additional requirements for admission to colleges and programs, see the listings for individual colleges).

How to Apply:

1. The online application for admission can be located on the web at: go.UND.edu (http://und.edu/admissions). The application priority deadline is March 1.
2. All applicants are required to complete the online application and submit the non-refundable $35 application fee. In addition, freshmen must request their high school send an official transcript of their records directly to the Office of Admissions.
3. The freshman applicant is required to take the ACT or SAT and request that the official scores be sent to 3501 University Avenue, Stop 8357, Grand Forks, ND 58202. ACT Scores = UND Code #3218. SAT Scores = UND Code #6878
4. All applicants are required to complete the safety and security questions on the online application.
5. Each applicant must provide the Health History & Immunization Form completed by his or her family physician or mailed from his/her high school. This form is provided online to each accepted student and should be returned to the Student Health Service before enrollment.
6. Beginning fall 2016, all new admitted full-time students who wish to enroll at the University are required to submit a non-refundable $200 confirmation deposit, by May 1 (set by the National Association for College Admission
Admission of Transfer Students

Specific admission requirements for transfer students are based on the total number of transferable college credits completed from a regionally accredited institution at the time of application.

Transfer students who have completed 24+ transferable semester credits must meet the following criteria to be admitted to UND:

- Have a minimum of a 2.0 cumulative transferable college GPA
- Be in good standing at all college(s) previously attended

If transfer students have less than 24 transferable semester credits (including in-progress work), they must verify high school graduation by submitting all official high school transcripts directly to the UND Office of Admissions.

Eligibility

Students transferring from outside the state of North Dakota to the University must have maintained at least a “C” average at the colleges or universities which they previously attended. Some colleges in the University require higher averages in selected major programs. These requirements are described in the specific college listing in this catalog.

Transfer Credit

An official transcript from each of the student’s former institutions must be submitted for review. Upon receipt of the student’s transcripts, the Office of the Registrar will determine which credits will transfer as well as how those credits will be applied toward the University of North Dakota’s General Education requirements and/or Essential Studies requirements. How the accepted courses may be used toward the student’s major is determined by the individual college or department from which the student plans to receive his/her degree. Students should read specific information about their school or college requirements in this catalog and should contact an advisor in their major to determine course applicability.

A credit summary, indicating only the number of credits transferred and the institution of origin, will be posted to the student’s University of North Dakota transcript after the student has been admitted to the University. A detailed listing of transferred courses will be available to both student and advisor. All of the student’s previous undergraduate work becomes part of the student’s permanent UND record. All transfer work shown on the student’s official transcript will be summarized in semester credits. Work transferred from institutions that use quarter or other systems will be converted to semester credits.

The University of North Dakota participates in the General Education Requirements Transfer Agreement (GERTA) with other North Dakota institutions. Students who have completed their general education requirements at another North Dakota institution recognized by GERTA should request proof of this completion be sent to the UND Office of the Registrar. Students who have completed an Associates of Arts degree or who have completed their general education requirements at another North Dakota University System (NDUS) institution will be deemed to have completed the general education requirements at UND.

In general, all college-level credit attempted at institutions accredited by a regional or national accrediting organization recognized by the Council for Higher Education Accreditation (CHEA) http://www.chea.org/ including the American Council on Education (ACE) www.acenet.edu (http://www.acenet.edu) will be posted in transfer by UND. There are certain exceptions to this rule, and those exceptions include, but may not be limited to, the following:

1. Remedial or preparatory courses
2. Credit granted for life experience by other institutions
3. Institution-based credit by examination
4. Non-degree continuing education courses

Credit for military courses and training may be granted, but students requesting this credit must produce an official training record. Students should consult the military branch under which they served to have an official copy of this record sent to UND. The American Council on Education’s (ACE) Guide to the Evaluation of Educational Experiences in the Armed Forces will be used to determine whether or not credit is granted and only credit listed as either lower division baccalaureate or upper division baccalaureate credit will be considered.

Students transferring college credit from all institutions outside of the United States, with the exception of Canadian institutions, must have their transcripts evaluated by an international transcript evaluation company prior to being admitted to UND. Students who need more information about how this

Eligibility

Students in good academic standing may apply for admission after completing 24 credits from a regionally accredited institution that they are currently attending. Students who have less than two full-time semesters or less than 24 credits and who are not in good academic standing at their current institution can petition the eligibility for admission after four years of not attending an institution. The transfer student is not at liberty to disregard any part of his or her previous college record. Former students of other institutions may not enter as new freshmen on the basis of secondary school records. Violation of this regulation will be regarded as a serious offense and may result in the student’s dismissal from the University.

Students transferring from outside the state of North Dakota to the University must have maintained at least a “C” average at the colleges or universities which they previously attended. Some colleges in the University require higher averages in selected major programs. These requirements are described in the specific college listing in this catalog.
Evaluation is performed may go online at: http://www.wes.org. Canadian students' work will be evaluated on-site in the Office of the Registrar.

Credits not successfully completed (grades of F) that would transfer if successfully completed will also transfer to the University and will affect the students' cumulative grade point average. Transfer students from two-year colleges (junior or community colleges) are required to complete a minimum of 60 semester hours at a four-year college. The last 30 credits toward the degree must be institutional credit at the University of North Dakota.

To qualify for a degree a student must achieve a minimum 2.00 (C) average on all University work. For transfer students, it is required that the overall average (including transfer work) be 2.00 (C) and that the average of work taken at the University of North Dakota be 2.00 (C). Some colleges require a higher grade point average for graduation and this requirement is indicated in the specific college description in this catalog.

How To Apply: The online application for admission can be located on the web at: go.UND.edu (http://www.und.edu/admissions).

1. All applicants are required to complete the online application and submit the non-refundable $35 application fee.
2. Although an applicant's records from several institutions may be summarized on one transcript, an application will not be considered until official transcripts from each college attended are received direct from the college or testing center to the Office of Admissions. These transcripts are required even though no credit may have been earned at an institution.
3. Students who have earned fewer than 60 transferable semester credits must submit a high school transcript. Students with fewer than 24 transferable semester credits are required to submit their official ACT UND school code (#3218) or SAT UND school code (#6878) to UND. If students are 25 years of age or older on the first day of class, they are not required to submit their ACT or SAT scores. However, if they've taken either exam, it's highly recommended that they submit their official scores for proper placement into English and math courses. All official documents should be mailed directly from the high school and college and testing center to the Office of Admissions at 3501 University Avenue, Stop 8357, Grand Forks, ND 58202.
4. All applicants are required to complete the safety and security questions on the online application.
5. Each applicant must provide the Health History & Immunization Form completed by his or her family physician or mailed from his/her high school. This form is provided online to each accepted student and should be returned to the Student Health Services before enrollment.
6. Beginning fall 2016, all new admitted full-time students who wish to enroll at the University are required to submit a non-refundable $200 confirmation deposit, by May 1 (set by the National Association for College Admission Counseling) to reserve their seat. The deposit will be applied to their tuition bills. Students can still confirm after May 1 priority deadline, space permitting.

When to Apply: A transfer applicant may submit an application as soon as he or she has registered for the last term she he is attending at the current institution. Transfer students who are accepted to the University will receive follow-up information about registration.

Orientation Programs for New Students

The University of North Dakota holds orientation programs for new students (freshman and transfer students) each semester. The emphasis is on acquainting students with people, programs and resources at UND and the surrounding community, along with an opportunity to register for courses and interact with academic colleges and departments. New students will be informed of the dates, times and specific details. Orientation information can also be found at: www.und.edu/orientation.

Readmission of Former Undergraduate Students

Undergraduate students who leave the University for at least one complete semester (excluding summer terms) are required to submit an application for readmission to the Office of the Registrar. (Returning graduate students should refer to the Graduate (p. 305) section.) Readmission to the University does not guarantee readmission to a particular degree program at UND. The Request for Readmission form is available from the UND Office of the Registrar website or upon request from the Office of the Registrar. Students who were previously suspended from the University must be reinstated by the dean of the school or college to which they wish to be admitted before applying for readmission. Students who were previously dismissed from the University must petition for reinstatement to the Student Academic Standards Committee. Submit the petition to the Office of the Registrar, 201 Twamley Hall.

Students who have enrolled in courses from other institutions during their time away from UND must have official transcripts sent from each institution attended. Failure to declare attendance at another institution is cause for dismissal and may result in cancellation of registration or any earned degrees to be revoked. Students whose institutional and cumulative GPA's are below 2.00 based on all post-secondary work accepted by the University may be denied readmission or may be readmitted on probation. Students whose GPA is under 2.00 will be allowed readmission to UND only upon the approval of the dean of their prospective school or college.

Undergraduate Academic Information

Introduction and Background

This section of the catalog summarizes many of the academic policies and procedures which will apply to the student during his or her undergraduate years at UND. Particularly important are the passages describing the University’s essential studies program. Since institutional policies may change between catalog publication dates, students are encouraged to consult with their academic advisor whenever appropriate. Students with questions also should request information from their academic department, the dean's office of their college, and the various administrative offices on campus.

Before utilizing the information found in this catalog, it may be useful to review the following basic patterns of undergraduate education at the University of North Dakota.

The student's place in the University organization

New students are admitted, according to the major they wish to pursue, to one of UND's undergraduate degree granting colleges, e.g., Arts and Sciences. All students who have an “undeclared” major under General Studies in the College of Arts and Sciences will receive assistance from the Student Success Center. Once a student declares a major they will be enrolled in the undergraduate degree granting colleges for that major. Each college is made up of a group of academic departments and/or program areas (e.g., history). Courses in the student's major will normally be taken in a specific department, although UND offers many interdisciplinary majors as well. It should be noted that course work in one's major field normally makes up only a fraction of the total credits required for graduation (typically about one-fourth). Thus, throughout their undergraduate days, students have the opportunity to take courses in many departments outside their home college. Indeed, this diversity is one of the advantages of attending a multipurpose university such as UND.

As an institution of higher education, the university is committed to ongoing assessment of student learning at all levels and in all programs. Assessment of student learning is essential in order for the university to improve educational programs and the experiences of students. Students are urged to respond positively when asked to participate in assessment activities. Students are also encouraged to collaborate in the planning and development of assessment activities and to make suggestions for improvements.
University, college and departmental requirements

Undergraduate students must meet three sets of requirements to graduate from the University of North Dakota:

1. University graduation requirements,
2. requirements of the UND college or school granting the student’s degree, and
3. the requirements of the student’s major department or program area.

Which catalog to use

The graduation requirements of the University and its colleges, schools, and departments, as published in the catalog in effect at the beginning of the first semester the student is enrolled at the University, are those which must be met for completion of an undergraduate degree program. Subsequent changes in policies and requirements, as published in the catalog or amended by the University Senate and the Board of Higher Education, may be substituted.

The faculty reserves the right to make changes in curricula at any time when in its judgment such changes are for the best interests of the students. Courses listed in this catalog are subject to change through normal academic channels. New courses and changes in existing course work are initiated by the responsible departments or programs and are approved by the appropriate dean and college or school curriculum committee, the University Curriculum Committee, the University Senate, the Vice President for Academic Affairs, and the Board of Higher Education.

Advisement

The University encourages continuing communication between faculty and students to enhance the advisement process. The student has final responsibility to meet the stated requirements for the degree sought, as listed in the appropriate catalog or bulletin. Every student is held accountable for complying with the information contained in this catalog and the Schedule of Courses for each term. The University provides an electronic degree audit for each student as a guide and for discussion with the academic advisor. Registration is the student’s personal responsibility.

Academic Advising Philosophy Statement

Academic Advising is an integral component of undergraduate education at the University of North Dakota. The focus of all academic advising is to assist students in taking responsibility for developing meaningful educational plans which are compatible with their life goals. It is a decision-making process by both student and academic advisor. The sharing of information occurs in a caring and comfortable environment which promotes responsible and appropriate academic choices. Through a quality advising process, academic advisors strive to facilitate a successful academic experience for students.

Successful advising is an interactive relationship in which both student and advisor must take responsibility for a successful outcome.

Degrees Granted

The University of North Dakota offers both undergraduate and graduate courses of study leading to degrees in many academic disciplines. See the section of undergraduate majors and minors (p. 26) for specific listings. Curricula for specific majors will be found in the Courses of Instruction section of this catalog.

See the section about the School of Graduate Studies (https://und.edu/academics/graduate-school) for a description of graduate degrees and a listing of the fields of study open to graduate students. Sections of the graduate professional Schools of Law and Medicine also are included. The two professional schools publish separate bulletins, which are available upon request.

The Purposes of a University Education

UND’s Philosophy of Essential Studies

As a Liberal Arts institution, UND believes that the Essential Studies (General Education) program is the foundation of a student’s degree, regardless of their specific major. While completing their Essential Studies courses, students are encouraged to explore a range of content areas and to develop broad learning abilities. Students’ Essential Studies courses should anchor their future university work and provide a model for lifelong learning. Students are encouraged to consult with their academic advisor when choosing Essential Studies courses and to be particularly mindful of the ES program’s special emphasis on specific learning skills. (These courses are designated on the website.) Finally, all UND Students will complete an Essential Studies Capstone course, to be taken no earlier than the second semester of their junior year. By choosing courses that complement each other, students can reinforce and enhance the knowledge and abilities acquired in each course, as well as develop the ability to recognize relationships.

Oversight of the Essential Studies Program is the responsibility of the Senate Essential Studies Committee, a committee of the University Senate comprising student, faculty, and administrative representatives from across campus. UND’s full philosophy of Essential Studies, the specific requirements of the program, as well as the current and archival lists of courses (http://und.edu/academics/essential-studies/approved-courses.cfm) that satisfy the requirements, can be found at the ES committee website: http://und.edu/academics/essential-studies/.

The North Dakota University System Transfer Agreement

The University of North Dakota participates in the General Education Requirements Transfer Agreement (GERTA) with other North Dakota institutions and the NDUS transfer agreements with Washington, Oregon, the South Dakota system, the Montana University system, MnSCU institutions, Wyoming Community Colleges, and California Community Colleges. For more information, details, and qualifications for the state articulation agreements, check: www.ndus.edu/makers/transferagreements/ndus Transfer Agreements, 400s Academic Affairs.

University Graduation Requirements

A minimum of 120 semester hours of credit is required for a baccalaureate degree. Thirty credits must be UND institutional credit. Institutional credit is academic credit awarded by the University. The following sections describe the requirements which must be met by all students seeking the baccalaureate degree. These include regulations concerning majors, minors, grade point average, upper division courses, and residence.

I. Essential Studies Program Requirements

An overview of the philosophy guiding the Essential Studies portion of the University’s graduation requirements is provided in the immediately preceding section of the catalog. The complete philosophy statement and the specific goals of the Essential Studies program are found at http://und.edu/academics/essential-studies/. The courses that can be used to satisfy the Essential Studies graduation requirements can be found at: http://und.edu/academics/essential-studies/approved-courses.cfm.

II. Upper Division Courses Required

A minimum of 36 semester credit hours must be completed in upper division courses by all undergraduate degree recipients. All courses numbered 300 and above and taken at a four-year institution are defined as upper division.
III. Majors

The specific requirements of a major or related fields concentration are determined by the department or program responsible for the major or concentration subject to approval by the University Curriculum Committee. A major requires at least 32 credit hours related to an academic area.

IV. Program Sub-plans

A sub-plan is a group of courses within an approved academic degree program or major which is identified in the institutional catalog. Sub-plans are either transcriptable or non-transcriptable. Transcriptable sub-plans (options, specialization, emphases, concentrations or tracks) require a minimum of 16 undergraduate distinct credit hours or a minimum of 9 graduate distinct credit hours.

V. Minors

Minors shall consist of a minimum of 16 semester hours of coursework with the course distribution established by the appropriate department or departments with the approval of the University Curriculum Committee. Minors may consist of courses associated with a department or discipline, e.g., chemistry; a specialty within a department, e.g., office administration, etc.; or a collection of courses which cross disciplines, e.g., international studies. A minor is not required by the University but may be required in some programs for an undergraduate degree. A student may declare a minor in the office of the dean of the college in which the minor is offered.

VI. Program Certificate

A program certificate is a specialized course of study requiring at least 9 credit hours at the undergraduate level.

VII. Double Use of Courses

1. Courses within a major or required by a program may, at the same time, fulfill Essential Studies Requirements for the University. (There are a few exceptions to this general rule. These exceptions are stated under departmental requirements, for example under the Communication program.)

2. In certain cases courses may count toward a major (or minor) and, at the same time, fulfill “Extradepartmental Requirements” for another major or program. Consult college or departmental offices for more information.

VIII. Grade Point Average

To qualify for a degree a student must achieve a minimum 2.00 (C) average on all University work. For students with transfer work, it is required that the overall average (including transfer work) be 2.00 (C) and that the average work taken at the University of North Dakota be 2.00 (C). Some undergraduate colleges require higher averages. (See requirements under specific college information.)

All UND coursework applied to the major or minor must average 2.0 or above; all coursework applied to the major or minor including transfer work must also average 2.0 or above. Certain colleges or majors/minors may require a higher GPA.

IV. Residence Requirements

A candidate for the bachelor’s degree who enters with transfer credit must obtain from the University a minimum of 30 semester hours of institutional credit. Fifteen semester credits in the student’s major and three semester credits in the minor, if a minor is declared, must be institutional credit. Some colleges of the University may require more than 15 hours of institutional credit in the major.

Institutional Credit includes degree credit courses:

1. taken in residence;
2. taken through Continuing Education.

Credits earned by examination, e.g., Foreign Language Placement and Special Examination for Credit, do not count as Institutional Credit.

Exceptions to General Graduation Requirements

Any exception to the above general degree requirements must be requested by the student at least six weeks prior to his or her expected graduation date. Petitions must be initiated in the office of the student’s dean.

Formal Application for the Degree Sought

Candidates for degrees should make online application within the first four weeks of the semester in which the student expects to receive the degree. The application is available in Campus Connection. Students applying for two or more degrees to be awarded simultaneously must apply separately for each degree and receive approval from each college granting the degrees.

Confering of Additional Baccalaureate Degrees

Second baccalaureate degrees may be earned by completing the requirements for the degree without regard to previous baccalaureate degrees earned at UND.

Early Graduation Policy

Students meeting all of the requirements for graduation except approval by the University Senate who: 1) complete an internship or co-op which is required for the degree at a time inconsistent with the normal academic calendar, and 2) need an official transcript certifying the awarding of a degree for official licensure or certification as a condition of employment, may appeal to the Senate Executive Committee to obtain a transcript reflecting graduation. If granted, the Registrar’s Office posts both the degree and a graduation date different from the one graduation date established by the University as required by the State Board of Higher Education on the academic record.

Major Declaration Policy, Common Course Numbers, Special Exams

Major Declaration Policy

In order to progress toward the timely and successful completion of an undergraduate degree, it is in the best interest of students at the University of North Dakota to declare a major early in their academic career. During the semester in which a General Studies: Undeclared student will reach 45 undergraduate credit hours (typically the third semester), a Major Declaration notice will be added to the student’s To Do list in Campus Connection. In addition, the Student Success Center will use multiple means of communication and connect a student to resources to assist in exploring program of study options. This notification will prompt a student to take the necessary steps to move from General Studies: Undeclared, and begin working with an advisor in the program of study the student plans to pursue.

Upon reaching 60 credit hours in a General Studies: Undeclared status, a negative service indicator hold will be placed on a student’s account prohibiting registration for the following semester until a program of study other than General Studies: Undeclared is chosen. The Student Success Center will further assist the student through additional communication and contact to prompt major declaration. Once a major is declared, the negative service indicator hold will be removed by the Student Success Center, allowing the student to register for courses based on the intended program of study. A student who has reached 60 or more credit hours would be allowed to retain or move to General Studies: Undeclared status only with permission from the Student Success Center.

Common Course Numbers

All universities and colleges in the North Dakota University System (NDUS) have agreed on Common Course Numbers (CCNs) for many of the courses they have in common. A list of the common courses can be found on the North Dakota University System website at: www.ndus.edu/system (http://www.ndus.edu/system).
Special Examinations for Credit

A regularly enrolled student may apply to take “special” (challenge or validating) examinations to establish credit for approved University courses. Requests to take an examination must be made to the chair of the department offering the course. Approval of the department chair, the instructor of the course and the dean of the college offering the course(s) are required. A petition with the appropriate signatures must be submitted to the Office of the Registrar prior to examinations. A committee of three appointed by the chair of the department offering the course will administer and evaluate the examinations, a majority being necessary to award a grade. Special examinations must be searching and comprehensive. Grades of “Satisfactory” or “Unsatisfactory” will be recorded on the student’s permanent record upon recommendation of the committee, but will not be used to compute scholastic average.

The fee per credit hour for a validating challenge examination is one-half the regular credit hour fee for the course to be challenged. Receipt of payment must be presented to the instructor prior to examination.

Students may apply to take challenge or validating examinations to establish credit in University of North Dakota courses that correspond to work taken at institutions that are not regionally accredited, or for courses in which they have superior preparation or knowledge gained through prior learning or independent study. These exams are offered for courses which have no equivalent CLEP subject exams. Students who have audited a course, or who have previously enrolled in a course and then dropped it, will not ordinarily be permitted to take a special examination in that course.

College-Level Examination Program

The University of North Dakota offers the opportunity to submit the results of CLEP for credit in most of the Subject Examinations.

CLEP Subject Examinations currently accepted by UND for transfer credits with minimum acceptable standard scores can be found at: www.ndus.edu/students/earn-credit-by-exam (http://www.ndus.edu/students/earn-credit-by-exam). Credit earned through CLEP Subject Exams may be used to fulfill University Essential Studies requirements, to fulfill specific course requirements, or to be used as elective credits. CLEP credit will not satisfy Essential Studies Special Emphasis requirements. As soon as they become available, new examinations will be reviewed by University departments to determine their suitability for credit at UND.

The following guidelines have been established for utilization of the Subject Examinations:

1. A CLEP Subject Examination may not be taken to establish credit for a course in which a student has earned credit in a higher level sequential course.
2. Regarding CLEP Subject Examinations which offer a maximum of six to eight credits, a student with previously earned credit in one semester of a two-semester sequence must petition the CLEP Advanced Placement Committee for exception to this policy prior to taking the CLEP Subject Examination for the balance of the credit.
3. A Subject Examination may be repeated no sooner than six months after date of the last testing. Students should submit a petition to the UND CLEP Committee for permission to repeat an examination.
4. A Subject Examination may not be taken to establish credit in a subject in which the student has been enrolled, but from which he or she has withdrawn after the last day to add a course, until six months from the last class day of the term in which he/she was enrolled for the course.
5. A Subject Examination may not be used to establish credit in a subject which the student has previously failed. In addition, a Subject Exam may not be used to repeat a course.
6. CLEP credit is considered as equivalent to credit earned at another institution. UND students must earn 30 credits at UND. UND uses the ACE Recommended Credit-Granting Score as a guide to determine whether credit is granted.
7. For a listing of approved examinations, required scores, and transfer equivalents, go to: www.ndus.edu/students/earn-credit-by-exam (http://www.ndus.edu/students/earn-credit-by-exam).

Foreign Language Placement & Credit Test

Students with a background in a foreign language may receive credit by taking a test in that language through the University of North Dakota Testing Center. UND strongly recommends that students take this test during pre-registration or registration. Students who are enrolled in a language course and wish to take the Foreign Language Placement & Credit Test in that language must take it during the first two weeks of the semester. Credits earned through the Foreign Language Placement & Credit Test do not satisfy any Essential Studies Special Emphasis requirements.

Credit earned through College Level Examination Program (CLEP) tests may be recognized by UND (see CLEP (p. 14) listing), and students who have completed French, German, Latin, or Spanish Advanced Placement (AP) courses with appropriate scores may also receive credit. This credit is normally equivalent to Levels I and II in that language (see Advanced Placement (p. 14) listing). Neither CLEP credit nor AP credit will satisfy any Essential Studies Special Emphasis requirements.

Native speakers of a language other than English who wish to take classes in that language may enroll without special permission in any 400-level course, or in any 300-level course that emphasizes literary or cultural topics. Incoming students whose native language (as indicated on their TOEFL exam) is one offered at UND should consult the Chair of the Department of Modern & Classical Languages & Literature about an automatic waiver of the language placement examination.

Cooperative Education

Cooperative Education is an academic program that provides students with opportunities to both integrate and combine their course learning with practical, professional work experience in their chosen field of study. Cooperative Education experiences allow students to secure salaried, career-related work experiences under the supervision of both a sponsoring employer and the appropriate academic department, while at the same time receiving academic credit. The program is based on the belief that learning extends beyond the classroom and that the combination of course learning and practical work experience provides an innovative and comprehensive education.

Students spend from 3-9 months on Cooperative Education assignment. Academic credit is granted by the participating academic department through the student’s enrollment in the department’s course titled, Cooperative Education 397. For part-time coop where the student works a minimum of 20 hours per week, the student will enroll in Cooperative Education 397 for 1 academic credit but will be considered half-time for financial aid and enrollment reporting purposes. For full-time coop, where the student works full-time, usually a minimum of 40 hours per week, the student will enroll in 2 academic credits but will be considered full-time for financial aid and enrollment reporting purposes.

The Cooperative Education Program, a part of Career Services, is located in McCannel Hall, Room 280. For information, call 777-4105.

Registration

The academic year calendars giving the dates of registration appear at the beginning of the catalog. Details concerning the registration procedure are given in the Semester Information, which is available at: www.und.edu/academics/registrar. The University of North Dakota complies with NDUS Policy 402.1.2. for placement into Math and English. Students must be registered to attend a class. A student accepts responsibility for payment of tuition and fees when he/she registers in classes at the University of North Dakota.

Change of Registration

After a student has registered, he or she should consult with his or her advisor before changing the registration. Students should be aware that all drops after the first day of class could affect their ability to have financial aid in that term. The last day to drop a full-term course for all students is on the Friday four weeks preceding the last class day of each term. (See also Summer Sessions deadlines on the academic year calendar (https://und.edu/one-stop/academic-
Instructor's Drop Policy

An instructor may submit a list of students to be deleted from class roles who have neither attended class nor notified the instructor of withdrawal within the first five days from commencement of University instruction. The Registrar will delete from the class rolls the names of students and will send a notice to each student dropped from a course in this manner.

Not all instructors follow this policy since it is not mandatory. Students, therefore, are strongly advised not to assume that they have been dropped from a course. Students should review their registration status in a course in question through Campus Connection.

Withdrawal from University

A student wishing to withdraw from the University before the end of a semester must complete a Cancellation/Withdrawal Form located at: und.edu/academics/registrar/forms.cfm. Questions regarding the process can be directed to the Office of the Registrar.

The last day a student may withdraw registration without grades, but with a “W,” is the Friday four weeks preceding the last class day of the term. (See also Summer Sessions deadlines (https://und.edu/one-stop/academic-calendar)). After that time a student should continue classes to completion. An exception to this rule is that a student may have his or her registration withdrawn without grades, but with a “W,” for cause (major mental or physical illness or other significant incapacity) providing both the student’s Academic Dean and the Associate Vice President for Student Services agree to this course of action. Please note: Any withdrawal within the first ten calendar days of the semester reflects on the transcript as “withdrew” and the date. Anytime a student withdraws after the first ten calendar days of the semester, a “W” grade for each course, indicating the withdrawal, will appear on the student’s transcript. All courses in which the student was enrolled on the first day of the term will be considered when assessing satisfactory progress for financial aid purposes.

A student who leaves the University without obtaining an official withdrawal is given an “F” in all courses.

The Grading System

At the close of a session or upon the completion of a course, each instructor reports a letter grade indicating the quality of a student’s work in the course. Grade points are assigned for each semester hour of credit earned, according to the following grading system:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Explanation</th>
<th>Grade Pts. Per Sem. Hr.</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Marked Excellence</td>
<td>4</td>

Auditors

Students wishing to enroll in University classes as auditors must seek and receive the prior written consent of the instructor. They must also, at that time, learn from the instructor what will be expected of them or allowed as an auditor. The earliest date to add an audit is the first day of class. The regular deadline for adding a class will also be the deadline for all of the following:

Verifying student participation for dropped courses, official withdrawals, and unofficial withdrawals:

Students who drop courses, officially withdraw, or unofficially withdraw will have their financial aid eligibility reviewed due to their change in enrollment. Federal regulations require that students who receive federal financial aid must attend or academically participate in the number of credits for which they received financial aid for.

A new requirement for faculty has been added to the grade roster program pursuant to Federal Financial Aid monitoring regulations that will affect any final grade rosters in which a grade of F or U is assigned.

There are now 3 varieties of F and U grades:

1. A grade entered as F (or U) means that the student finished the course but earned a failing grade.
2. A grade entered as FNN (or UNN) means that the student never participated in the class and never dropped it and must therefore receive a failing grade.
3. A grade entered as FN (or UN) means that the student did participate in the class, but stopped attending/participating at some point. In this case, the system will require you to enter a date of last participation for the student, and will not let you change the status of the roster to “approved” unless you do so. Please keep this in mind for any classes where you will be entering a failing grade for any student who is failing because they stopped attending/participating.

Note that FN and FNN will print as a grade of F on the student’s transcript (and the UN and UNN will print as U), but the different types of F and U grades will remain on the roster record to allow Financial Aid to obtain “attendance” information that they are required to monitor.

Some examples of “attendance” or “attendance at an academically-related activity” include:

- Physical class attendance where there is an opportunity for direct interaction between instructor and students
- Submission of an academic assignment
- Taking an exam, completing an interactive tutorial, or participating in computer-assisted instruction
- Attending a study group that is assigned by the school
- Participation in an online discussion about academic matters
- Initiating contact with a faculty member to ask a question about the academic subject studied in the course

Please advise students to contact the Financial Aid Office before they drop a course or officially withdraw from the University as we can discuss how it may negatively impact their financial aid.

calendar. Thereafter, a student may not cancel from individual courses but must carry them to completion.

The last day to drop a class of less than the full semester in length (a mini-course) is a day two-thirds of the duration of the class.

If a course is dropped within the first 10 calendar days of the semester, no indication of enrollment is made on the student’s permanent academic record. If a course is dropped after the first 10 calendar days of the semester, the enrollment is recorded on the student’s permanent academic record and a “W” is entered in the grade column. However, all courses for which the student is enrolled after the tenth day of the term will count toward their satisfactory progress for financial aid.

No change in registration involving addition of a new course or a change of sections is permitted after the tenth calendar day of instruction of the semester (except during Summer Session). Changes to or from credit to audit is the last day to add. Changes to or from S-U grading are permitted until the last day to drop the course. The specific deadlines for the various types of changes of registration are published in the Semester Information each semester at: www.und.edu/academics/registrar.

The earliest date to add an audit is the first day of class. The regular deadline for adding a course roles who have neither attended class nor notified the instructor of withdrawal within the first five days from commencement of University instruction. The Registrar will delete from the class rolls the names of students and will send a notice to each student dropped from a course in this manner.

Not all instructors follow this policy since it is not mandatory. Students, therefore, are strongly advised not to assume that they have been dropped from a course. Students should review their registration status in a course in question through Campus Connection.

Withdrawal from University

A student wishing to withdraw from the University before the end of a semester must complete a Cancellation/Withdrawal Form located at: und.edu/academics/registrar/forms.cfm. Questions regarding the process can be directed to the Office of the Registrar.

The last day a student may withdraw registration without grades, but with a “W,” is the Friday four weeks preceding the last class day of the term. (See also Summer Sessions deadlines (https://und.edu/one-stop/academic-calendar)). After that time a student should continue classes to completion. An exception to this rule is that a student may have his or her registration withdrawn without grades, but with a “W,” for cause (major mental or physical illness or other significant incapacity) providing both the student’s Academic Dean and the Associate Vice President for Student Services agree to this course of action. Please note: Any withdrawal within the first ten calendar days of the semester reflects on the transcript as “withdrew” and the date. Anytime a student withdraws after the first ten calendar days of the semester, a “W” grade for each course, indicating the withdrawal, will appear on the student’s transcript. All courses in which the student was enrolled on the first day of the term will be considered when assessing satisfactory progress for financial aid purposes.

A student who leaves the University without obtaining an official withdrawal is given an “F” in all courses.

The Grading System

Auditors

Students wishing to enroll in University classes as auditors must seek and receive the prior written consent of the instructor. They must also, at that time, learn from the instructor what will be expected of them or allowed as an auditor. The earliest date to add an audit is the first day of class. The regular deadline for adding a class will also be the deadline for all of the following:

Verifying student participation for dropped courses, official withdrawals, and unofficial withdrawals:

Students who drop courses, officially withdraw, or unofficially withdraw will have their financial aid eligibility reviewed due to their change in enrollment. Federal regulations require that students who receive federal financial aid must attend or academically participate in the number of credits for which they received financial aid for.

A new requirement for faculty has been added to the grade roster program pursuant to Federal Financial Aid monitoring regulations that will affect any final grade rosters in which a grade of F or U is assigned.

There are now 3 varieties of F and U grades:

1. A grade entered as F (or U) means that the student finished the course but earned a failing grade.
2. A grade entered as FNN (or UNN) means that the student never participated in the class and never dropped it and must therefore receive a failing grade.
3. A grade entered as FN (or UN) means that the student did participate in the class, but stopped attending/participating at some point. In this case, the system will require you to enter a date of last participation for the student, and will not let you change the status of the roster to “approved” unless you do so. Please keep this in mind for any classes where you will be entering a failing grade for any student who is failing because they stopped attending/participating.

Note that FN and FNN will print as a grade of F on the student’s transcript (and the UN and UNN will print as U), but the different types of F and U grades will remain on the roster record to allow Financial Aid to obtain “attendance” information that they are required to monitor.

Some examples of “attendance” or “attendance at an academically-related activity” include:

- Physical class attendance where there is an opportunity for direct interaction between instructor and students
- Submission of an academic assignment
- Taking an exam, completing an interactive tutorial, or participating in computer-assisted instruction
- Attending a study group that is assigned by the school
- Participation in an online discussion about academic matters
- Initiating contact with a faculty member to ask a question about the academic subject studied in the course

Please advise students to contact the Financial Aid Office before they drop a course or officially withdraw from the University as we can discuss how it may negatively impact their financial aid.
1. adding a class as an audit;
2. changing from grade to audit; and
3. changing from audit to grade.

Auditors have no claim on the time or service of the instructor. Normally, auditors will be expected to attend, but not required to participate in the oral or written work of the class. If they are allowed to take examinations, the exams would normally not be graded. It is up to the instructor, however, to determine the appropriate requirements or restrictions for auditors for any given course. If students fulfill the expected requirements, their transcript will show no credit for the class, but a designation of “AU.” If they do not meet expectations, a grade of “W” will be entered on their transcript. Auditors are identified to the instructor on the official class list. An auditor may not later establish credit in that course by taking a special examination. The course must be repeated to earn credit. Audited courses do not count toward class load for financial aid or other purposes.

Incomplete Grades

It is expected that students will complete all requirements for a course during the time frame of the course. For reasons beyond a student’s control, and upon request by the student or on behalf of the student, an incomplete grade may be assigned by the instructor when there is reasonable certainty the student will successfully complete the course without retaking it. The mark “I,” Incomplete, will be assigned only to the student who has been in attendance and has done satisfactory work up to a time within four weeks of the close of the semester, including the examination period, and whose work is incomplete for reasons satisfactory to his or her instructor.

Incompletes are entered on the final grade roster, and instructors must submit by email a “Report of Incomplete Grade” form to the Office of the Registrar. The instructor may choose any one of the following options for the deadline to complete the course:

1. The default date as stated in the “UND Schedule of Courses.”
2. Extend to 12 calendar months after the end of the course.
3. A date the instructor’s choosing no later than 12 months after the end of the course.

Incomplete grades will convert to a grade of “FI” if a grade or incomplete extension is not submitted by the instructor to the Office of the Registrar or before the deadline written on the “Report of Incomplete Grade” form.

The instructor of the course and the dean of the college offering the course for undergraduates or the dean of the School of Graduate Studies for graduate students must approve and sign the “Report of Incomplete Grade” form for any extension of incomplete beyond the default date listed in the “UND Schedule of Courses.” An incomplete grade must be changed by 12 calendar months from the ending date of the class. It is the student’s responsibility to contact their instructor about an incomplete grade posted on the final grade report.

An “I” may be converted as indicated above but cannot be expunged from the record. Students may not register in courses in which they currently hold grades of incomplete, except for courses that allow repeated enrollment. A student will not be allowed to graduate with an unconverted incomplete grade on the academic record.

In Progress Grades

The School of Graduate Studies, Honors Program, or specially approved classes, may assign a grade of “SP,” Satisfactory Progress or “UP” Unsatisfactory Progress to courses such as Honors Thesis (489), Thesis (998), Dissertation (999), Independent Study (997), ENGL 591 Readings for Ph.D. Comprehensive Examinations, Professional Exhibition (ART 599 Professional Exhibition), or Research (leading to the thesis or dissertation). The “SP” or the “UP” grade for these activities, which usually span several sessions, must remain on the record or may be replaced at the conclusion of the activity, usually a student’s final semester. Grades of “SP” or “UP” are not calculated into term or cumulative GPA values and may be expunged from the record upon submission of final grades in some cases.

Grade Changes

Grade changes must be submitted to the Registrar’s Office no later than twelve months after the course has ended and are to be signed by the instructor and dean or dean designee. Grade changes after twelve months or grade changes resulting from student request are to be approved by the Administrative Procedures Committee. All other grade changes are processed upon receipt by the Registrar’s Office.

S-U Grades

Grades of S or U rather than the traditional grades of A through F are used by the University under regulations specified. A grade of S grants credit toward graduation but does not affect a student’s grade point average except as outlined below in item number 4. A grade of U also does not affect the grade point average and does not grant credit toward graduation.

Elective S-U Enrollment

A student of sophomore, junior or senior standing (as determined by the Registrar) may elect to enroll in one or more courses per semester for S-U grading subject to the following regulations. Students with fewer than 24 completed credits may elect S-U grading only with the permission of their advisor and dean.

1. A maximum of 30 semester hours of credit of elected S-U grades may be counted toward his or her baccalaureate degree.
2. Students may not elect S-U grading for courses in their major. (This restriction does not apply to those courses that have only S-U grading.) In the event a student wishes to major in a field in which he/she has taken a required course for an S-U grade, the department, with the approval of the Academic Dean, may (a) accept the S-U grade, (b) select an additional class to substitute or (c) request the Registrar’s Office to change the S or U to the letter grade submitted by the instructor.
3. A student may take extra-departmental major requirements for an S-U grade with the approval of the major department chair and his/her Academic Dean.
4. Repeating a course by S-U registration will eliminate the effects of the earlier grade from a student’s grade point average if the achieved result is an S. Repetition, which results in a U, will leave the effects of the earlier grade intact.

Class rolls and grade sheets will not identify students who are enrolled for S-U grading. Grades of A, B, and C will be converted by the Office of the Registrar to a grade of S. Grades of D and F will be converted to U. Changes in registration to or from S-U grading may, with the approval of the advisor, be made up to the last day to drop the course.

Students who utilize the S-U grading system are cautioned that they may encounter difficulty in having such credit accepted or evaluated, should they attempt to transfer credit to another university, change majors, or make application for graduate or professional study.

Required S-U Courses

Some courses, as approved by the University Curriculum Committee, will be offered by S-U grading only. The restrictions on Elective S-U courses do not apply to these Required S-U courses. These courses may be taken in excess of the 30 hour limitation.

Repetition of Courses

Students generally may repeat courses to attempt to receive a better grade, but restrictions may apply. Individual colleges may limit the number of times that a course may be taken, and may not allow repeats of C or better grades. Examinations for credit, e.g., CLEP, AP, IB, DSS and Foreign Language Placement and Credit Test, may not repeat course grades.

If a course repetition is taken for traditional A through F letter grading, the highest grade achieved in the course will be used in calculating the student’s grade point average. Repeating an approved course with S-U grading will eliminate the effects of previous credits from the student’s GPA if the achieved result is an S, but repetition which results in a U will leave the effects of the earlier grade intact.

Please note: New Federal regulations may not permit financial aid to be used to pay for a repeat of an already passed course. Please contact the Financial Aid Office regarding questions.
While courses may be taken again after a student has graduated, these will not serve to repeat older grades: the older grades will still be counted in the Grade Point Average.

If a student has previously passed the course twice with a “D” or higher, that course will not be counted for federal financial aid.

Raising a “D” Grade

To raise a D grade, a student may have the alternative of retaking a final examination at the time of the first regularly scheduled final examination in the subject if it meets with the approval of the department and dean of the course and the student’s advisor, except in the School of Graduate Studies, School of Law, the School of Medicine and Health Sciences, and the College of Nursing and Professional Disciplines. If a student decides to retake the final examination, approval must be obtained from the instructor and department chair of the course and the dean of the college offering the course. No re-examination will be given except at the time of the regularly scheduled examinations at the end of each semester.

Grade Forgiveness

Currently enrolled undergraduate students who have interrupted their college/university education for a period of seven years or more, may petition to exclude all previous grades from GPA calculations. The student may not select certain courses to be part of the seven-year rule, but must include all courses which are seven years or older. Such courses and their actual grades would appear on the student’s academic record, but letter grades would not be calculated for GPA purposes. Excluded courses could not be used to satisfy any academic requirement.

A student requesting this option must have a written petition approved by the student’s academic advisor, department chairperson, and Dean of the college from which the degree is sought. If the student changes degree college after approval of this petition, the student would be required to petition again.

Deficiency Reports

Individual mid-term reports of unsatisfactory work (i.e., D, F, and U) of students are made by all instructors at the end of the first eight weeks of the semester. A grade of D is considered unsatisfactory although it is a passing grade. The Registrar sends deficiency reports to students who have been reported deficient. Reports of deficiency are also sent to the academic deans and advisors to be used for advisement purposes. Deficiency grades do not appear on the student’s permanent record. It is also the student’s responsibility to keep informed of his/her own performance in a class.

Semester Grade Reports

Grade reports are available to students by accessing their records after term grades are posted through UND CampusConnection. Grade reports are not mailed, but a printed copy is available upon written request.

Transcripts of Academic Records

Official transcript requests must now be submitted via the web. The web service is available 24/7 and provides online tracking and messaging. All transcript ordering information, including a link to the website, is located at: www.und.edu/dept/registrar/trans/requestonline. The cost per transcript is $12. There is an additional charge for services such as Federal Express delivery. Each transcript includes the student’s entire academic record to date and current academic status. Partial transcripts are not issued. Questions should be directed to the Office of the Registrar.

A request for a transcript of credits by a student who is in debt to the University will not be honored until the indebtedness has been paid.

A transcript covering a student’s previous secondary and postsecondary education that has been submitted to the University as a requirement for admission becomes part of the official file and cannot be returned to the student. Any student who desires transcripts of work earned elsewhere must order official transcripts from the institution at which the work was taken. The University of North Dakota does not issue nor certify copies of transcripts from other institutions.

Students in Debt to the University

A student who is in debt to the University shall not be permitted to early register or register in the University and shall not be entitled to receive a transcript of credits or a diploma until the indebtedness has been paid in full.

University Attendance Policy and Procedure

Attendance and participation in class activities are considered integral parts of a university education. It is the University policy that attendance in classes is expected of all students. If attendance and/or participation are required and will impact grading, it is the responsibility of the instructor to communicate clearly that policy to students during the first week of class in the course syllabus.

Even in situations where an instructor might excuse a class absence, e.g., severe medical situations, family emergencies, military service, or authorized University activities, it is the responsibility of the student, whenever possible, to inform the instructor ahead of time.

Final Examination Policy

An examination is held at the end of most courses according to the published examination schedule. Alternate evaluation methods and schedules may be used when recommended by the departmental faculty and approved by the dean of the college offering the course. Any change in time from the published schedule requires the recommendation of the chairperson of the department and approval of the dean of the college offering the course. Any student who would be disadvantaged by such a change should report this in advance to the dean of the college offering the course, who will ensure that satisfactory alternate arrangements will be made by the instructor. Final exams for all courses, on-campus and semester based online, will conclude on or prior to the end of the final exam period. No final exams shall extend beyond the final exam period.

A student who is absent from a regularly scheduled examination without an excuse considered valid by the instructor is normally given an F for the course. If the excuse is valid, the policy on incomplete will apply.

No undergraduate student should be obliged to write three or more finals on the same day. If the student has three or more finals scheduled the same day, the student wishing an accommodation regarding final exams should contact his/her instructors to establish a mutually acceptable time to reschedule one or more of the exams. Any student request for the rescheduled final exam must be presented to the instructor before the end of the tenth week of the semester, otherwise, the student’s rescheduling right is forfeited. If an accommodation cannot be reached, he or she should contact the department chair(s) to find a mutually agreeable time. If no agreement is reached, the appropriate dean(s) should be contacted. The final appeal, if no mutually convenient time has been found, will be to the Vice President of Academic Affairs.

Transcripts of Academic Records

While courses may be taken again after a student has graduated, these will not serve to repeat older grades: the older grades will still be counted in the Grade Point Average.

If a student has previously passed the course twice with a “D” or higher, that course will not be counted for federal financial aid.

Raising a “D” Grade

To raise a D grade, a student may have the alternative of retaking a final examination at the time of the first regularly scheduled final examination in the subject if it meets with the approval of the department and dean of the course and the student’s advisor, except in the School of Graduate Studies, School of Law, the School of Medicine and Health Sciences, and the College of Nursing and Professional Disciplines. If a student decides to retake the final examination, approval must be obtained from the instructor and department chair of the course and the dean of the college offering the course. No re-examination will be given except at the time of the regularly scheduled examinations at the end of each semester.

Grade Forgiveness

Currently enrolled undergraduate students who have interrupted their college/university education for a period of seven years or more, may petition to exclude all previous grades from GPA calculations. The student may not select certain courses to be part of the seven-year rule, but must include all courses which are seven years or older. Such courses and their actual grades would appear on the student’s academic record, but letter grades would not be calculated for GPA purposes. Excluded courses could not be used to satisfy any academic requirement.

A student requesting this option must have a written petition approved by the student’s academic advisor, department chairperson, and Dean of the college from which the degree is sought. If the student changes degree college after approval of this petition, the student would be required to petition again.

Deficiency Reports

Individual mid-term reports of unsatisfactory work (i.e., D, F, and U) of students are made by all instructors at the end of the first eight weeks of the semester. A grade of D is considered unsatisfactory although it is a passing grade. The Registrar sends deficiency reports to students who have been reported deficient. Reports of deficiency are also sent to the academic deans and advisors to be used for advisement purposes. Deficiency grades do not appear on the student’s permanent record. It is also the student’s responsibility to keep informed of his/her own performance in a class.

Semester Grade Reports

Grade reports are available to students by accessing their records after term grades are posted through UND CampusConnection. Grade reports are not mailed, but a printed copy is available upon written request.

Final Examination Policy

An examination is held at the end of most courses according to the published examination schedule. Alternate evaluation methods and schedules may be used when recommended by the departmental faculty and approved by the dean of the college offering the course. Any change in time from the published schedule requires the recommendation of the chairperson of the department and approval of the dean of the college offering the course. Any student who would be disadvantaged by such a change should report this in advance to the dean of the college offering the course, who will ensure that satisfactory alternate arrangements will be made by the instructor. Final exams for all courses, on-campus and semester based online, will conclude on or prior to the end of the final exam period. No final exams shall extend beyond the final exam period.

A student who is absent from a regularly scheduled examination without an excuse considered valid by the instructor is normally given an F for the course. If the excuse is valid, the policy on incomplete will apply.

No undergraduate student should be obliged to write three or more finals on the same day. If the student has three or more finals scheduled the same day, the student wishing an accommodation regarding final exams should contact his/her instructors to establish a mutually acceptable time to reschedule one or more of the exams. Any student request for the rescheduled final exam must be presented to the instructor before the end of the tenth week of the semester, otherwise, the student’s rescheduling right is forfeited. If an accommodation cannot be reached, he or she should contact the department chair(s) to find a mutually agreeable time. If no agreement is reached, the appropriate dean(s) should be contacted. The final appeal, if no mutually convenient time has been found, will be to the Vice President of Academic Affairs.

Undergraduate Probation, Suspension and Dismissal Policy

Academic Probation. Students at the University of North Dakota are expected to make progress toward attaining their degrees. Students who have earned fewer than 90 total hours will be considered in Good Academic Standing if they maintain a UND Grade Point Average (GPA) of C (2.00) or higher. Students who have earned 90 or more total hours will be in Good Academic Standing only with a 2.00 or higher GPA on both UND and cumulative hours. Students who do not maintain minimum academic requirements will, at the end of the fall, spring, or summer term in which they fail to meet minimum standards, be placed on Academic Probation. Students on Academic Probation may remove this status by attaining Academic Good Standing. Students will be continued on Academic Probation if they earn at least a 2.00 term GPA at the end of the semester of probation.

Suspension. A student on Academic Probation who earns less than a 2.00 term GPA at the end of the semester of probation is considered not to be making academic progress and will be suspended. A suspended student may apply to return to the University after one semester’s absence. In order to return
to UND, all suspended students must seek reinstatement from the Dean of the college in which they intend to enroll and readmission from the Office of the Registrar. If reinstatement is granted, the student will return to UND on probationary status. In addition, Deans may specify enrollment stipulations at the time of reinstatement. A request for reinstatement after suspension must be made at least 30 days prior to the semester in which the student seeks to return.

Under extenuating circumstances, suspended students may seek immediate reinstatement from the Dean of the college in which they intend to enroll without leaving the University for one academic semester. A request for immediate reinstatement must be made by the Monday, one week prior to the first week of school, of the semester in which the student seeks to return.

If the Dean does not reinstate the student after suspension, (whether a request for immediate reinstatement is made or the student sits out a term) the student may appeal the Dean’s decision. The appeal is requested through the University Senate Student Academic Standards Committee.

In all cases, if requesting reinstatement, suspended students must provide evidence of academic potential and a plan for significant academic success. Students are eligible to request reinstatement from suspension once within the duration of their undergraduate career at the University.

Separate from the request for reinstatement process following suspension, if the student feels the suspension has occurred based on circumstances beyond the student’s control, a request to appeal the suspension may be made. The request for an appeal following suspension must be made within 30 days to the University Senate Student Academic Standards Committee.

Dismissal. After the first suspension, failure to achieve minimum academic standards will result in the student being dismissed from the University. Dismissed students may apply to return to the University after a minimum of one year separation from the Institution along with evidence of academic potential and a plan for significant academic success.

An application for readmission after dismissal must be made at least 30 days prior to the beginning of the semester in which the student seeks to return. The request for readmission is acted upon by the University Senate Student Academic Standards Committee. If readmission is granted, the student will return to UND on probationary status. Students are eligible to request readmission from dismissal once within the duration of their undergraduate career at the University.

Separate from the request for readmission following dismissal, if the student feels the dismissal was as a result beyond the student’s control, a request to appeal the dismissal may be made. The request for an appeal following dismissal must be made within 30 days to the University Senate Student Academic Standards Committee.

Suspension and dismissal are permanently recorded on the student’s transcript. (NOTE: It is possible to be in Good Academic Standing at the University, and, yet not to be in Good Academic Standing in certain University programs which require a GPA higher than 2.00.)

**Conduct in General**

A student is expected to show, both within and outside of the University, respect for law and order, personal honor, and the rights of others. To further strengthen the sense of community at the University of North Dakota, we affirm the following:

1. That everyone be allowed to work, learn, and live in a safe, caring environment;
2. That everyone learn about, understand, appreciate, and respect varied cultures;
3. That everyone matters;
4. That all individuals be respected and treated with dignity and civility;
5. That everyone continue to share in the responsibility of making UND a better place.

Within the University, the student is subject to specific policies, rules and regulations promulgated by student governing groups, student-faculty committees, University Senate and the State Board of Higher Education. The student is subject to civil law and civil authority.

It outlines the rights and responsibilities and expected levels of conduct of citizens in the University community. The purpose of the rules outlined is to prevent abuse of the rights of others and to maintain an atmosphere in the University community appropriate for an institution of higher education.

Materials included will be helpful to student organizations and to members of the University community to gain a better understanding of responsibilities of various boards and committees, and to understand student rights and responsibilities. Appendix B in the Code covers academic concerns (grievances and standards) and Section III covers student conduct regulations and procedures.

The Code of Student Life is published annually. Interpretation of sections within the Code may be requested by contacting the Office of Student Rights & Responsibilities, the Vice President for Student Affairs, or through direct consultation with the Student Policy Committee.

**Scholastic Honesty**

Students are expected to maintain scholastic honesty. Scholastic dishonesty includes but is not limited to cheating on a test, plagiarism, and collusion.

1. Cheating on a test includes, but is not restricted to:
   a. Copying from another student’s test.
   b. Possessing or using material during a test not authorized by the person giving the test.
   c. Collaborating with or seeking aid from another student during a test without authority.
   d. Knowingly using, buying, selling, stealing, transporting, or soliciting in whole or in part the contents of an unadministered test.
   e. Substituting for another student or permitting another student to substitute for oneself to take a test.
   f. Bribing another person to obtain an unadministered test or information about an unadministered test.

2. Plagiarism means the appropriation, buying, receiving as a gift, or obtaining by any means another person’s work and the unacknowledged submission or incorporation of it in one’s own work. This includes appropriation of another person’s work by the use of computers or any other electronic means.

3. Collusion means the unauthorized collaboration with another person in preparing written work offered for credit.

Instructors choosing to treat a case of scholastic dishonesty as a scholastic matter have the authority to decide how the incident of dishonesty will affect the student’s grade in the course. If, before the drop date, an instructor is considering such action (or still investigating a possible case of dishonesty), the instructor may, with the concurrence of the dean of the course, place a hold on the student’s registration to prevent the student dropping the course. If the student has already dropped the course, the dean of the course may void that drop and have the Registrar re-enroll the student in the class.

For detailed policy statements and procedures dealing with scholastic dishonesty, see the Code of Student Life, Appendix B-2, Academic Dishonesty.

**Academic Honors**

**President’s Honor Roll**

At the end of each semester, a list of undergraduate honor students is published and designated as the President’s Honor Roll. To qualify, a student must have a cumulative UND grade point average of 3.80 or higher. The student must also have earned a minimum of 24 semester hours at UND and have completed a minimum of 12 hours at the close of the semester, eighth of which must be for traditional letter grades. The President’s Honor Roll is noted on the student’s official transcript.

**Dean’s List**

The Dean’s List, published at the end of each semester, contains the names of students who are ranked in the top 15 percent of their college, based on the
grade point average earned by students in UND coursework for the semester. The students must have completed a minimum of 12 semester hours at the close of the semester, eight of which must be for traditional letter grades.

**General Honors**

Candidates for honors with their baccalaureate degree must have earned at least 50 graded hours at UND. Honors will be awarded on the basis of the student’s UND grade point average.

<table>
<thead>
<tr>
<th>Honor</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cum laude</td>
<td>3.5</td>
</tr>
<tr>
<td>Magna cum laude</td>
<td>3.7</td>
</tr>
<tr>
<td>Summa cum laude</td>
<td>3.9</td>
</tr>
</tbody>
</table>

Honors awards for the commencement ceremony and for publication purposes are made on the basis of UND GPA at the end of the previous semester. Actual honors will be based on the GPA of all completed work at the time the degree is granted.
Undergraduate Programs and Courses

In the menu to the left, is an alphabetical list of undergraduate programs and courses.

The University publishes electronically an official Schedule of Courses before the beginning of each academic term. It lists the class period, building, and room assigned to each course offered that semester or summer session.

Enrollment Restrictions

Enrollment in some University of North Dakota classes is restricted to students who have been admitted into specific major concentrations, who have achieved specific classification status, or who have completed course prerequisites. In some high demand areas, not all students who request a particular course may be admitted in a given semester because of staffing or other University limitations. Generally, the University registers undergraduate students in order of their classification; nevertheless, the University does not guarantee that a student will be able to enroll in a specific course during any given semester. Students must be registered to attend a class session.

Course Numbers

Courses numbered in the 100s are intended primarily for freshmen; in the 200s for sophomores; in the 300s for juniors; in the 400s for seniors and in the 500s for graduates.

The numbers 199, 299, 399 and 499 are reserved for Honors Program Courses.

Credit

Academic units are expressed in terms of semester credit hours at the University of North Dakota. For face-to-face courses, one semester credit hours represents one 50-minute class period (lecture or structured student/faculty interaction) or 2-3 hours of laboratory session for each week of the semester.

For online or distance courses, UND academic units are assigned according to the classification of the distance course:

- **Type 1**: Distance course sections taught synchronously with face-to-face sections with equivalent student learning objectives and expectations for student effort – The distance section is assigned the same credit hours as the face-to-face section.
- **Type 2**: Distance course sections taught asynchronously with face-to-face sections with equivalent student learning objectives and expectations for student effort – The distance section is assigned the same credit hours as the face-to-face section.
- **Type 3**: Distance courses not classified as Type 1 or 2 that share equivalent student learning objectives and expectations for student effort as face-to-face sections of the course at UND – The distance section is assigned the same credit hours as the face-to-face section.
- **Type 4**: Distance courses not classified as Type 1 or 2 that do not have corresponding face-to-face sections at UND and providing the course must document the expected level of student effort, expected student/faculty interactions, course assessment plan, and student learning objectives for the course. This information will be reviewed by the appropriate Department, College/School, and University curriculum committees for assignment of appropriate credit hours.

Undergraduate Student Classification

- Freshman: 0-23 credits completed
- Sophomore: 24-59 credits completed
- Junior: 60-89 credits completed
- Senior: 90+ credits

Frequency of Offerings

The following symbols at the end of the course description indicate when and how often a class is usually available for registration.

- **F** usually every Fall semester
- **S** usually every Spring semester
- **SS** usually every Summer session
- **F/2** usually every other Fall semester
- **S/2** usually every other Spring semester

Accountancy (Acct)

Bachelor of Accountancy (p. 27)

B.B.A. with Major in Managerial Finance and Accounting (p. 28)

Courses

- **ACCT 160. Intro to Accounting Careers. 1-3 Credits.**
  An introduction to accounting careers and the accounting profession. Students develop skills and resources that will help them launch a career in accounting. Prerequisite or Corequisite: ACCT 200 or declared or pre accountancy major or consent of CoBPA academic advisor. F,S.
- **ACCT 200. Elements of Accounting I. 3 Credits.**
  Basic principles of the complete accounting cycle. F.S.
- **ACCT 201. Elements of Accounting II. 3 Credits.**
  Special emphasis on partnership, corporate accounting, and the uses of accounting information by managers. Prerequisite: ACCT 200 or ACCT 275. F,S.
- **ACCT 218. Advanced Spreadsheet Applications. 3 Credits.**
  Advanced techniques in computer spreadsheet applications. Prerequisite: ISBC 117 or ISBC 217. Prerequisite or Corequisite: ACCT 201. F,S.
- **ACCT 275. Accounting for Pre-MBA. 3 Credits.**
  No credit allowed to students who have completed ACCT 201. Financial and managerial accounting concepts and practices oriented towards the decision maker. F,S.
- **ACCT 301. Intermediate Accounting I. 3 Credits.**
  Concepts, time value of money, current assets, current liabilities, plant and equipment, and intangibles. Prerequisite: ACCT 201. Prerequisite or Corequisite: ACCT 218. F,S.
- **ACCT 302. Intermediate Accounting II. 3 Credits.**
  Corporations, long-term liabilities, investments, statement analysis, and cash flow statement. Prerequisites: ACCT 301 with a grade of “C” or better or permission of the Department Chair and Junior or Senior Standing; declared CoBPA majors only. F,S.
- **ACCT 309. Accounting Information Systems. 3 Credits.**
  The application of systems design and use from the accountant’s perspective. Coverage includes computerized and manual accounting systems, elements of internal control, flowcharting, and the interface of accounting and management information systems. Prerequisites: ACCT 301 and Junior or Senior Standing; declared CoBPA majors only. F,S.
- **ACCT 312. Fund Accounting. 3 Credits.**
  Financial accounting, control, and reporting for governmental and not-for profit entities. Prerequisites: ACCT 201 and ACCT 218; Junior or Senior Standing; declared CoBPA majors only. F,S.
- **ACCT 315. Business Law I. 3 Credits.**
  The legal environment of business, governmental regulation, contracts, and property. Prerequisite: Sophomore, Junior or Senior Standing. F,S.
- **ACCT 316. Business Law II. 3 Credits.**
  Commercial paper, secured transactions, business organizations, and liability of professionals. Prerequisites: ACCT 315; Junior or Senior Standing; declared CoBPA majors only. F,S.
- **ACCT 320. Cost Accounting. 3 Credits.**
  Principles and techniques used to account for and analyze costs incurred to produce products or services. Prerequisite: ACCT 201. Prerequisite or Corequisite: ACCT 218. F,S.
ACCT 380. International Accounting. 3 Credits.
Topics include comparative accounting systems, environmental influences on accounting, international financial statement analysis, foreign currency transactions, international standards harmonization, international taxation, transfer pricing, and multinational performance evaluation. Prerequisites: ACCT 201; Junior or Senior Standing; declared CoBPA majors only. S.

ACCT 397. Cooperative Education. 1-2 Credits.
Compensated work experience in various areas of accounting. Enrollment in 1 credit grants half-time status; 2 credits grants full-time status (See catalog description of Cooperative Education.) Repeatable to 12 credits cumulative from ACCT 397, ACCT 497, ACCT 597. Prerequisites: ACCT 201, minimum GPA of 2.50, and approval of the Accounting Co-operative/Internship Coordinator. Repeatable to 12 credits. S/U grading. F.S.SS.

ACCT 401. Advanced Accounting. 3 Credits.
Special problems in accounting including consolidated statements, partnerships, and foreign exchange. Prerequisites: ACCT 302; Junior or Senior Standing; declared CoBPA majors only. F.S.

ACCT 403. Contemporary Accounting Theory. 3 Credits.
A study of the emerging issues and the problems facing the accounting profession with special emphasis on the authoritative pronouncements as designated by the American Institute of CPAs and the Financial Accounting Standards Board. S-U grading not allowed. Prerequisite or Corequisite: ACCT 401 or consent of instructor; declared CoBPA majors only. F.S.

ACCT 405. Assurance Services. 3 Credits.
Explores methods of improving the quality of information or its context for decision makers. Examples include assurances on the reliability of financial statements, the processes and controls used to manage and operate businesses, assertions and agreements made to third parties, and regulatory compliance. Prerequisites: ACCT 302, ACCT 309, ECON 210; Junior or Senior Standing; declared CoBPA majors only. F.S.

ACCT 406. Independent Assurance. 3 Credits.
Auditing and assurance theory as applied by independent accountants. Prerequisites: ACCT 405 or consent of instructor; declared CoBPA majors only. S.

ACCT 410. Federal Individual Income Tax. 3 Credits.
Federal income tax relating to individuals to include the more complex tax situations. A computerized individual income tax preparation is used as a part of the course. Prerequisites: ACCT 201; Junior or Senior Standing; declared CoBPA majors only. F.S.

ACCT 411. Business Income Taxation. 3 Credits.
Federal income tax relating to corporations and partnerships. Introduction to estate and gift tax and fiduciary income tax. Prerequisites: ACCT 302; Senior Standing; declared CoBPA majors only. F.S.

ACCT 412. Advanced Tax. 3 Credits.
Unified transfer tax, trusts and estates, other contemporary topics as appropriate, and techniques of tax research. Prerequisites: Consent of the instructor, open to declared CoBPA majors only. S.

ACCT 416. Business Law for Accountants. 3 Credits.
Both foundational and advanced topics in business law relevant for the practice of public accountancy including agency law, contracts, negotiable instruments, ethics, legal representation in business, and the impact of selected governmental regulations on businesses. Prerequisites: Declared CoBPA majors or students admitted to the Master of Accountancy program, only. F.S.SS.

ACCT 450. Contemporary Issues in Accounting. 3 Credits.
A critical analysis of contemporary issues in accounting. Written and oral presentations are required. Prerequisites: ACCT 302; Senior Standing; declared CoBPA majors only. Prerequisite or Corequisite: ACCT 405.

ACCT 454. The Literature of Accounting. 1-3 Credits.
Directed studies in the recognized journals, periodicals, and professional publications of the field. Prerequisites: Consent of the instructor, open to declared CoBPA majors only. Repeatable to 6 credits.

ACCT 494. Special Topics in Accounting. 1-3 Credits.
Specially arranged courses/seminars. Topics will vary. Courses will offer specialized knowledge in a specific area related to accounting. Prerequisites: Minimum of junior standing and approval of the instructor or department chair. Repeatable to 12 credits. On demand.

ACCT 497. Accounting Internship. 1-6 Credits.
Compensated work experience in various areas of accounting. Repeatable to 12 credits cumulative from ACCT 397, ACCT 497, ACCT 597. Prerequisites: ACCT 201; minimum GPA of 2.50; approval of the Accounting Co-operative/Internship Coordinator. Repeatable to 12 credits. S/U grading. F.S.SS.

Bachelor of Accountancy

Required 120 credit hours (36 of which must be numbered 300 or above) including:

I. Essential Studies Requirements (see University ES listing).

II. Choose one of the following: MATH 103, MATH 146, or MATH 165

V. College of Business & Public Administration Graduation Requirements:

1. Earn a minimum cumulative GPA of 2.50
2. Earn a minimum UND GPA of 2.50
3. Earn a minimum cumulative major GPA of 2.50 (business administration courses that apply toward the degree and major)
4. Earn a minimum UND major GPA of 2.50 (business administration courses that apply toward the degree and major)
5. At least half of the business courses that apply toward the degree and major must be from UND

Please note: Graduation with 120 credits does NOT satisfy all eligibility requirements for taking the CPA exam (150 credit hours are required)! Students interested in pursuing the CPA certification are encouraged
to pursue the combined Bachelor/Master of Accountancy program. Specific requirements to sit for the CPA exam vary by jurisdiction. Students are thus encouraged to check requirements in the jurisdiction in which they plan to sit for the exam and choose electives and degree options accordingly.

Aerospace Studies (AS)

Courses

AS 110. Air Force ROTC Fitness. 1 Credit. Introduction to various AFROTC team sports. Promotes benefits of being physically fit and maintaining Air Force fitness standards. Repeatable. F.S.

AS 111. Heritage and Values of the United States Air Force I. 1 Credit. Survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Corequisite: AS 210. F.

AS 112. Heritage and Values of the United States Air Force II. 1 Credit. Continuation of AS 111. Provides an overview of the basic characteristics, missions, and organization of the Air Force. Corequisite: AS 210 or AS 410. S.

AS 211. Team and Leadership Fundamentals I. 1 Credit. Focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Corequisite: AS 210. F.

AS 212. Team and Leadership Fundamentals II. 1 Credit. Continuation of AS 211. Focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Corequisite: AS 210. S.

AS 321. Leading People and Effective Communication I. 3 Credits. Teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Corequisite: AS 410. F.

AS 322. Leading People and Effective Communication II. 3 Credits. Continuation of AS 321. Teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Corequisite: AS 410. S.

AS 410. Leadership Laboratory. 1 Credit. Development of leadership skills in a practical, supervised laboratory. Students must instruct, supervise, and lead junior cadets participating in AS 210, and perform high level management functions within the cadet corps organization. Repeatable. Repeatable. S/U grading. F.S.

AS 441. National Security Affairs/Preparation for Active Duty I. 3 Credits. Designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. Corequisite: AS 410. F.

AS 442. National Security Affairs/Preparation for Active Duty II. 3 Credits. A continuation of AS 441. Continued application of the complex social and political issues facing the military profession and will provide information that will prepare the cadets for Active Duty. Corequisite: AS 410. S.

Aerospace Studies

UND students may participate in the Air Force Reserve Officer Training Corps program through an agreement between UND, North Dakota State University and the Air Force. The purpose of this program is to enable qualified students (undergraduate and graduate) to become commissioned officers in the United States Air Force. Upon completion of the program and graduation from UND, students are commissioned as second lieutenants in the United States Air Force.

The program is conducted by North Dakota State University faculty on the UND campus. Students interested in participating in the program should contact: Air Force ROTC Detachment 610, 255 Centennial Drive, Armory Building, Room 2. Stop 8360, University of North Dakota, Grand Forks ND 58202, (701) 777-0437.

The program is conducted in two phases: the General Military Course for first year students and sophomores, and the Professional Officer Course for juniors and seniors. Each student must register for the appropriate leadership laboratory course (AS 210 Leadership Laboratory for freshman and sophomore or AS 410 Leadership Laboratory for juniors and seniors) during each term. Students must complete a field training course before entry into the Professional Officer Course.

General Military Course (GMC)

The four-year program begins with the General Military Course.

AS 111 Heritage and Values of the United States Air Force I 1
AS 112 Heritage and Values of the United States Air Force II 1
AS 211 Team and Leadership Fundamentals I 1
AS 212 Team and Leadership Fundamentals II 1

The GMC covers the mission and structure of the Air Force, examines life in the Air Force, and includes the study of strategy, doctrine, and missions of aerospace power from balloons to the space age. Instruction is provided in Air Force career opportunities, educational benefits, and life and work as an Air Force officer.

Field Training

Air Force ROTC Field Training is offered during the summer months at Maxwell AFB, Alabama. Students in the four-year program participate in four weeks of field training during the summer after their sophomore year.

The major areas of study in the four-week field training program include junior officer training, aircraft and aircrew indoctrination, survival training, base functions, the Air Force environment, and physical training.

Leadership Laboratory

(AS 210 Leadership Laboratory, 1 credit and AS 410 Leadership Laboratory, 1 credit; repeatable). Instruction is conducted within the framework of a cadet organization and includes a progression of experiences designed to develop each student’s leadership potential. Leadership laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities in the Air Force, and the life and work of an Air Force junior officer. Students develop their leadership potential in a practical and supervised laboratory, which can include field trips to Air Force installations throughout the United States.

AS 210 Leadership Laboratory is a corequisite of:

AS 111 Heritage and Values of the United States Air Force I 1
AS 112 Heritage and Values of the United States Air Force II 1
AS 211 Team and Leadership Fundamentals I 1
AS 212 Team and Leadership Fundamentals II 1

AS 410 Leadership Laboratory is a corequisite of:

AS 321 Leading People and Effective Communication I 3
AS 322 Leading People and Effective Communication II 3
Professional Officer Course (POC)

The Professional Officer course (below) taken during the student's junior and senior years, concentrates on four main themes: communication skills, national security studies, and the principles and practices of management and leadership in the U.S. Air Force.

American Indian Studies (IS)

B.A. in American Indian Studies (p. 31)

Minor in American Indian Studies (p. 32)

Courses

IS 121. Introduction to American Indian Studies. 3 Credits.
Introduction to main concepts, methods, and theories in American Indian Studies, designed to provide a background for further studies. This course approaches American Indian Studies from a perspective grounded in the humanities. F,S,SS.

IS 122. American Indians and Tradition. 3 Credits.
This course provides an introduction to the American Indian experience, as well as to methodological concepts of American Indian Studies. It places emphasis both on understanding how American Indians fit into various representations of the past and on how American Indians have used and continue to use the past to shape their own identities. F, S, SS.

IS 123. American Indians and Culture. 3 Credits.
This course provides an introduction to the American Indian experience, as well as to methodological concepts of American Indian Studies. It places an emphasis on understanding Native cultures and the challenges they are facing, exploring contemporary issues and Native communities in their cultural contexts. F, S, SS.

IS 151. Popular Culture and American Indians. 3 Credits.
European settlers had firm notions of what tribal peoples on the American continent were like before even leaving Europe. This course will show how these stereotypes and ethnocentrism were perpetuated in various genres and fields, e.g. captivity tales, fiction, film, advertisements, and social media. Finally, students will analyze some recent examples of these stereotypes and ethnocentrism in print and film. SS.

IS 171. Hollywood Indians. 3 Credits.
A summer class exploring the portrayal and roles of American Indians in feature films from the early 20th century to the early 21st century, and what we can learn from these films. SS.

IS 181. Native North America to 1600. 3 Credits.
This course introduces students to thinking historically about North America's pre-Columbian and early Columbian pasts and the relationship between the two both topically and methodologically. This will require students to consider the various sources and methods of anthropology and history while trying to understand the continuities and discontinuities that link the experiences of Native Americans before and after the arrival of Europeans and Africans. It will introduce students to close reading, research skills, college writing, and participatory classroom experiences. S.

IS 200. American Indians in a Multicultural Context. 3 Credits.
This course provides an introduction to multicultural and diversity issues, focusing primarily on the United States and with an emphasis on American Indian societies. It explores common experiences of Native and other minority groups, and discusses the integration of these ethnicities in a globalized world. F, S.

IS 201. History of the Siouxs. 3 Credits.
This course explores the history of the Siouan speakers, predominantly the Dakota and Lakota nations, from their origins to today. It focuses primarily on the last two hundred years. The course gives a timeline for this history, explores the context of events, and discusses appropriate methodologies. S.

IS 202. Cultures of the Siouxs. 3 Credits.
This class introduces the cultures of the Siouan speakers, predominantly the Lakota and Dakota nations, since the 19th century. The course addresses social organization, economies, religion, kinship, diplomacy, and the reasons, motivations, and consequences for cultural change. S.

IS 203. History of the Ojibwe. 3 Credits.
This course explores the history of the Anishinabe, predominantly the Chippewa or Ojibwe nations, from their origins to today. It focuses primarily on the last two hundred years. The course gives a timeline for this history, explores the context of events, and addresses some cultural issues. F.

IS 204. Cultures of the Ojibwe. 3 Credits.
This class introduces the cultures of the Anishinabe, predominantly the Chippewa or Ojibwe nations, since the 19th century. The course addresses social organization, economies, religion, kinship, diplomacy, and the reasons, motivations, and consequences for cultural change. On demand.

IS 207. History of the Three Affiliated Tribes. 3 Credits.
This course explores the history of the Mandan, Hidatsa, and Arikara nations, from their origins to today. It focuses primarily on the last two hundred years. The course gives a timeline for this history, explores the context of events, and discusses appropriate methodologies. S.

IS 208. Cultures of the Three Affiliated Tribes. 3 Credits.
This course introduces the cultures of the Mandan, Hidatsa, and Arikara nations since the 19th century. The course addresses social organization, economies, religion, kinship, diplomacy, and the reasons, motivations, and consequences for cultural change. S.

IS 221. North American Indians before 1815. 3 Credits.
This is a survey of the history of Native North America to 1815 that will study the diverse experiences of American Indians from arrival of Europeans until 1815. Topics that will be addressed include the development of cultural traditions, Indian responses to colonialism, and Indian influences on the emergence of Euroamerican communities in North America. F.

IS 222. North American Indians since 1815. 3 Credits.
This is an introductory survey of the history of Native North America since 1815. It will study the diverse experiences of American Indians since the era of Removal. Topics that will be addressed include the development of the reservation system, Western expansion and the Indians of the Trans-Mississippi West, and persistence and adaptation in the Twentieth Century. S.

IS 230. Approaches to Native Cultures. 3 Credits.
This course provides students with the background to an understanding of how Native cultures can be approached - how cultures have been and should be studied, described, conceptualized, invented, and imagined. The course focuses on North America, but might involve examples from other regions. F.

IS 240. Research and Writing in Indian Studies. 3 Credits.
The course will introduce students to professional writing in Indian Studies. The final goal is for students to turn out a 20-25 page research paper in an area of interest to them. S.

IS 250. Lakota Language I. 3 Credits.
This is the first of two Lakota language classes for beginning speakers. On demand.

IS 251. Lakota Language II. 3 Credits.
This is the second of two Lakota language classes for beginning speakers. Prerequisites: IS 250 or permission. On demand.

IS 311. Health and American Indian Cultures. 3 Credits.
The course investigates cultural perceptions of health as well as specific historic and contemporary health problems in indigenous communities in Canada and the United States. F.

IS 320. Native Cultural Landscapes. 3 Credits.
This course engages the notion of landscape - the environment as made meaningful by cultural perspectives on interactions and responsibilities. It investigates how American Indian cultures create, imagine, construct, map, and interact with landscapes and how they render them meaningful. F.
IS 344. Education and American Indians. 3 Credits.
Throughout the centuries of American Indian and white contact, American Indian education advocated by the colonial and federal governments as well as by various denominations has reflected the changing attitudes, stereotypes, and ethnocentrism of Europeans and Euroamericans toward American Indian peoples. This course will examine the changing policies of the federal government, the attitudes of the various denominations, and some of the contemporary changes in the educational system. S.

IS 346. Gender in American Indian Cultures. 3 Credits.
This class will look at the ways American Indian cultures define various genders and their roles and contributions in historical and contemporary times. S.

IS 348. Beyond the Reservation. 3 Credits.
This is an advanced course that introduces students to the scholarship on American Indians living and working in places beyond their traditional communities. The course will look at issues such as work and labor, urban Indian communities, pan-Indian identities, and contributions to American institutions and public life. S.

IS 350. Native American Languages. 3 Credits.
This course provides an overview of Native American languages, the connection of culture to language, an introduction to socio-linguistics, and other discussions of language structure and linguistics as they pertain to Native North America. F.

IS 352. Native Philosophies and Religions. 3 Credits.
Introduces students to the complex and rich religions of Native Americans, from traditional religions to the Native American Church and the American Indian Religious Freedom Act. Both traditional and contemporary belief systems are discussed. F.

IS 354. Dynamics of Conquest and Resistance. 3 Credits.
This course is an advanced course on the experiences of Indian peoples in colonial Latin America and to the historical methods used to study them. The course will cover the period from late pre-Columbian times through Latin American Independence and will address topics including the conquest of core Indian civilizations, the creation of colonial Indian identities in the republica de Indios, the persistence of Indios barbaros on the frontiers, and the meaning of Latin American independence for Indians. F.

IS 356. Law, Culture, and Communities. 3 Credits.
This course explores in what ways laws impact indigenous communities, and how different communities use, construct, and perceive laws. It explores the cultural construction and meaning of law through its implementation in and on Native communities. F.

IS 358. American Indians and Sovereignty. 3 Credits.
This course is an historical inquiry into the colonial imposition of sovereignty onto Native America and the resulting American Indian tribal claims to sovereignty and the concomitant development of "Indian law" within the legal frameworks of modern North American nation states (Canada, United States, and Mexico). It will examine the initial colonial encounters between indigenous and imperial legal cultures, the 19th century United States policies and judicial findings that established precedents for continued Indian sovereignty, and the expansion of those precedents and how over the course of the 20th century Indian nations have used these to establish federally recognized tribal governments and established the place of "Indian common law" as the law in Indian country. We will also look at how issues of sovereignty impact issues such as gaming, natural resource management, and economic development. S, even years.

IS 360. Oral Traditions in American Indian Cultures. 3 Credits.
Despite all predictions that they would disappear, American Indian oral traditions are as strong today as ever before. This course will introduce students to the complexities, richness, and conventions of different oral traditions as well as to the collecting process. F.

IS 362. Resource Extraction and Indigenous Peoples. 3 Credits.
This course takes a critical look at the impacts of resource extraction and its consequences on indigenous peoples and their communities, how indigenous peoples have participated in and resisted resource extraction, and at the economic, ecological, political, and cultural consequences of resource extraction. S, odd years.

IS 379. Special Topics. 1-3 Credits.
Topics and credits will vary with availability of staff, and with student interests. Repeatable when topics vary. Repeatable.

IS 385. Sustainable Communities. 3 Credits.
This course discusses how societies can build sustainable communities, focusing on indigenous communities in North America and through comparison around the globe. F.

IS 395. Ethnohistory of North America. 3 Credits.
This course introduces students to the historical study of Indian peoples of North America during the colonial and early national periods, particularly in situations where their voices or perspectives are not easily or explicitly captured in historical documentation of their own making. It will focus on key historiographic issues concerning the nature of frontiers and Indian agency as well as on historical method.

IS 410. Indigenous Identities. 3 Credits.
This course looks at issues of indigenous identity: how do people define themselves and others, and what criteria do they use to construct, invent, and imagine their identities? The course focuses on North America, but also looks at global indigenous identities. S.

IS 430. Internship in American Indian Studies. 3 Credits.
Internships provide the opportunity for students to have a meaningful experience related to their field of interest within Indian Studies. Internship placements are with Native American related public or private sector sponsors such as tribal programs, businesses including tribal businesses on a reservation, and various state or private agencies serving Indian populations and causes. Individual learning agreements approved by the Indian Studies faculty and sponsoring supervisors specify student goals, objectives, and methods of assessment. It is expected that students will be of service to the sponsor. Internships may be paid. Prerequisites: Upperclass standing and instructor permission. F,S,SS.

IS 492. Directed Readings in American Indian Studies. 1-3 Credits.
Under the direction of American Indian Studies faculty, students will select readings in subjects not covered in sufficient detail in other American Indian Studies classes. IS 492 and IS 494 combined may be taken for a maximum of 9 credits; must be taken from at least two different faculty if above 6 credits. Prerequisites: Upperclass standing and consent of instructor. Repeatable to 9 credits. F,S,SS.

IS 494. Independent Study in American Indian Studies. 1-3 Credits.
Under the direction of American Indian Studies faculty, students will engage in independent research projects in American Indian Studies subjects. IS 492 and IS 494 combined may be taken for a maximum of 9 credits; must be taken from at least two different faculty if above 6 credits. Prerequisites: Upperclass standing and instructor permission. Repeatable to 9 credits. F,S,SS.

Bachelor of Arts in American Indian Studies

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum:

A. 36 credit hours in the Major

Of these, the following courses are required:

IS 230 Approaches to Native Cultures 3
IS 240 Research and Writing in Indian Studies 3
IS 395 Ethnohistory of North America 3 or IS 354 Dynamics of Conquest and Resistance IS 410 Indigenous Identities 3
Electives from the American Indian Studies curriculum in accordance with advisor recommendations

The maximum combined credit hours counting toward the accumulation of credits for the major in IS 430, 492, and 494 is nine. Any student taking more than a combined six credit hours in IS 430, 492, and 494 has to take these courses from at least two different faculty members. Only one course from each of the following pairs will count toward the accumulation of credits for the major:

IS 122 American Indians and Tradition or IS 123 American Indians and Culture
Minor in American Indian Studies

21 credit hours in American Indian Studies, at least 12 of which are 300-level or above.

The maximum combined credit hours taken from any one instructor to be counted towards the minor is twelve; to fulfill the requirements of the minor, a student has to take courses from at least three different instructors.

Anatomy and Cell Biology (Anat)

Courses

ANAT 204. Anatomy for Paramedical Personnel. 3 Credits.
Two lectures per week presenting a system-based study of human gross anatomy. Prerequisite: Must have 12 or more credits. F.S.

ANAT 204L. Anatomy for Paramedical Personnel Laboratory. 2 Credits.
Laboratory exploration of human gross anatomy to complement Anatomy 204. Prerequisite or Corequisite: ANAT 204. F.S.

Anthropology (Anth)

B.A. in Anthropology (p. 33)

Minor in Anthropology (p. 34)

Courses

ANTH 100. Introduction to Anthropology. 3 Credits.
An introduction to the breadth of inquiry pursued by anthropologists, including the origins and biological evolution of humans, the prehistoric development of world cultures, and the interplay of biological, social, and cultural factors in present day societies. On demand.

ANTH 170. Introduction to Biological Anthropology. 3 Credits.
An introduction to the field of biological or physical anthropology. This course will provide a general background in human evolutionary biology. F.S.

ANTH 171. Introduction to Cultural Anthropology. 3 Credits.
Examination of diversity and similarities across contemporary world societies. Topics: fieldwork and ethnographic description; theoretical approaches; communication/human language; interrelationships between environment, technology, social and political organization and worldview; sociocultural change; applied anthropology. Films and case studies illustrate intricacies of culture and how an anthropological perspective provides insights about our own society/culture. F.S.

ANTH 172. Introduction to Archaeology. 3 Credits.
This course looks at how we investigate past cultures using the artifacts that people have left behind. What questions do archaeologists ask about the past? How do archaeologists find and record archaeological sites? What field and laboratory techniques are used to collect evidence and gather data, and how do these methods work? How do we interpret and understand the past using archaeological hypotheses, explanations, models and theories? Case studies will be drawn from different regions, cultures, and time periods to illustrate course concepts. F.S.

ANTH 200. World Prehistory. 3 Credits.
In this course we explore the extraordinary five million year-long record of human cultural achievements, as reconstructed by scientific archaeology. We will focus on prehistoric societies (those that existed before the advent of writing and written history), on what happened in the past, and how the major milestones in the development of world cultures came about. These milestones include the cultural evolution of our earliest hominid ancestors from almost 5 million years ago, the two million year-long persistence of the hunting and gathering lifeway, the origins of agriculture and farming societies, and the rise and collapse of prehistoric civilizations. F.S.

ANTH 209. Special Topics. 1-4 Credits.
Repeatable when topics vary. Repeatable. F.S.

ANTH 270. Introduction to Forensic Anthropology. 3 Credits.
Forensic anthropology is the study of skeletal remains in a medico-legal context for the purpose of identification and trauma analysis. This course covers the history of this field, its relevance to death investigation in the United States, and the theories and techniques applied to skeletal identification. On demand.

ANTH 300. Archaeological Laboratory Methods. 3 Credits.
A hands-on introduction to the basic processing, organizing, and analytical techniques used in the archaeological laboratory. Excavated materials from prehistoric sites will be used for lab exercises and demonstrations. Includes lecture and lab. Prerequisites: ANTH 172 and permission of instructor. S.

ANTH 309. Special Topics. 1-4 Credits.
Repeatable when topics vary. Repeatable. F.S.

ANTH 325. Human Origins. 3 Credits.
A description of the fossil evidence for primate and human evolution with an emphasis on the origins and evolution of the hominid and human lines. Prerequisite: ANTH 170 or consent of instructor. On demand.

ANTH 330. Human Variation. 3 Credits.
An examination of the range of human physical variation, with a special emphasis on its adaptive nature. Prerequisite: ANTH 170 or consent of instructor. On demand.

ANTH 335. Primates. 3 Credits.
A survey of the biology and behavior of the living primates, with a special emphasis on similarities and differences to humans. On demand.

ANTH 340. Medical Anthropology. 3 Credits.
An examination of the human biological and cultural responses to health and disease as seen from an anthropological perspective. F.

ANTH 350. Ethnographic Methods. 3 Credits.
Introduction to fieldwork methods and analytic approaches used by cultural anthropologists in their ethnographic research; class discussion topics will include ethical issues, framing of research problems, the writing of ethnographic accounts, and modes of presentation of research results. Prerequisite: ANTH 171 or by special permission. On demand.

ANTH 360. Environmental Change & Culture. 3 Credits.
This course uses an anthropological lens to understand how humans have responded to and/or caused environmental changes and how differing cultural values and behaviors have shaped this relationship. By the end of the course students should be able to (1) explore how power and privilege impact us and others and how this relates to race, ethnicity, cultural identity, economic class, and environmental discrimination and (2) use wordview as a tool to understand different cultural responses to environmental challenges. Present and past cultural examples from around the world are examined to provide background for class discussions and exploration of hot topics and challenges that currently face us and how this relates to our diverse beliefs and levels of local and global power. F, odd years.

ANTH 370. Language and Culture. 3 Credits.
Fundamentals of modern linguistics; utility of linguistic concepts of culture analysis; interaction of language with other cultural subsystems. Prerequisite: ANTH 171 or consent of instructor. S.

ANTH 371. Cultural Dynamics. 3 Credits.
Focus on sociocultural change along a selected theme, such as "the local and the global," "ethnic minorities and nation-states," or "ethnographer as researcher and writer." Also considered are theoretical orientations in the study of society/culture, fieldwork, ethics, and anthropologists' roles with respect to public policy. Repeatable to 9 credits if topics vary. Prerequisite: ANTH 171. Repeatable to 9 credits. F.

Total Credits 36
ANTH 372. Culture Theory. 3 Credits.
An overview of the ideas and approaches that have played a role in the
development of anthropological studies of societies and cultures. Focus on the
contributions of major figures in anthropology, in the past and at present,
as well as current issues within the discipline. Prerequisite: ANTH 171.

ANTH 373. Indians of Latin America. 3 Credits.
Examination of traditional and modern Indian cultures of Latin America. Focus
on the adaptation to cultural change, the impact of world economy, and the
impact of resource exploitation on indigenous peoples. Prerequisite: ANTH 171.

ANTH 375. Women in Prehistory. 3 Credits.
This course will explore recent research that explicitly illuminates women's
roles, behaviors and ideologies in the ancient past, and will examine
methodological and theoretical attempts to understand how gender can be
retrieved from the archaeological record. On demand.

ANTH 376. The Aztec, Maya and Inca. 3 Credits.
An examination of the high civilizations of Latin America with focus on the
Aztec, Maya and Inca. On demand.

ANTH 377. North American Archaeology. 3 Credits.
Explores the fascinating cultural developments that have taken place
throughout prehistory in North America (north of Mexico), ranging from the first
peopling of the Americas to the emergence of complex chiefdoms, and from
hunting and gathering to the development of intensive agriculture. On demand.

ANTH 378. Physical Anthropology Method and Theory. 1-4 Credits.
A discussion of current theoretical arguments within the field of physical
anthropology and the techniques used to examine them. Prerequisite:
ANTH 170. S.

ANTH 379. Culture Area Studies. 3 Credits.
A survey of peoples and cultures of selected areas. Selections based upon staff
and student interest. May be repeated to maximum of 6 credits. Repeatable to
6 credits. F.S.

ANTH 380. Field Techniques in Archaeology. 1-6 Credits.
Prerequisites: ANTH 172 and permission of instructor. SS.

ANTH 385. Antiquities, Culture and Law. 3 Credits.
This course is an exploration of the complex cultural, ideological and legal
issues involved in contemporary views of the ancient past and its material
record. Students will examine how antiquities, archaeological sites, landscapes
and monuments are defined and shaped by current cultural identities, notions
of patrimony, human rights, power and prestige, and global conflicts. National
and international laws that regulate the antiquities trade and address the illegal
trafficking of artifacts will also be explored in the context of ethics and social
problems. On demand.

ANTH 388. Method and Theory in Archaeology. 3 Credits.
This course explores how archaeologists reconstruct the past: how they
formulate research problems and conduct field work; what field and laboratory
analytical tools they employ; and how they use data, models, and theory to
explain culture change. Techniques, methods, and theoretical frameworks
used in modern prehistoric archaeology are examined. Readings in the
professional literature, case studies, and guest lecturers provide vivid examples
of archaeologists in thought and action. Prerequisite: ANTH 172 or consent of
instructor. S.

ANTH 420. Archaeological Origins of Plant and Animal Use. 3 Credits.
This course uses archaeological information to examine the relationships
between humans and the plant and animal resources we exploit and will focus
on specific examples of economic uses of both wild and domestic species,
covering both prehistoric and modern consequences of how we interact
with biological resources. Basic issues in floral and faunal analysis such as
the recovery, quantification, analysis, and interpretation of plant and animal
remains from archaeological sites will be presented in depth. Prerequisite:
ANTH 172. On demand.

ANTH 426. Lithic Technology. 3 Credits.
Study of prehistoric stone tool technology and examination of the analytical
methods used by archaeologists in lithics research. Prerequisite: ANTH 172 or
consent of instructor. F, odd years.

ANTH 439. Human Osteology. 4 Credits.
This course is an intensive examination of human skeletal anatomy, covering
the features of the entire human skeleton and the relationship of human
osteology to other fields, including paleoanthropology, palaeopathology,
forensic anthropology, and vertebrate anatomy. Prerequisite: ANTH 170 or
ANTH 270 or ANAT 204 or consent of instructor. F.

ANTH 441. Forensic Anthropology Field School. 1-6 Credits.
This course is a hands-on exposure to the field and laboratory methods of
forensic anthropology. Prerequisite: Consent of instructor. SS.

ANTH 465. Culture, Illness and Health. 3 Credits.
Examination of culturally-based beliefs and practices involved in maintenance
of health and the handling of illness in non-Western and modern societies.
Prerequisite: ANTH 171 or consent of instructor. SS.

ANTH 480. Senior Seminar. 3 Credits.
The seminar will examine current debates or an area of study involving two
or more subfields of anthropology. The seminar will provide an opportunity
for students to integrate knowledge and skills obtained in anthropology.
Prerequisites: Senior major status and completion of two of the three method
and theory requirements (cultural, archaeology, physical); or departmental
permission. S.

ANTH 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits.
Repeatable to 9 credits. F,S,SS.

ANTH 490. Independent Studies. 1-4 Credits.
Independent research conducted under advisement with department faculty.
Research is student originated and developed. Prerequisite: Consent of the
instructor. Repeatable to 16 credits. F.S.

ANTH 494. Readings in Anthropology. 1-5 Credits.
Designed for students who want instruction in subjects not covered adequately
in usual course offerings. Special arrangements must be made with an
instructor prior to registration. Prerequisite: Consent of the instructor.
Repeatable to 5 credits. F.S.

ANTH 497. Forensic Science Internship. 1-12 Credits.
Students may enroll in this course after they have secured an intern position
in a law enforcement agency, crime laboratory or other institution providing
procedural and/or analytical processing of evidence from criminal or civil
proceedings. Credits obtained will be determined based on length and content
of the internship and course responsibilities. Prerequisites: Junior or Senior
status, satisfactory completion of CHEM 122 and BIOL 151, and instructor
consent. S/U grading, F,S,SS.

Bachelor of Arts in Anthropology
Required 120 credits (36 of which must be numbered 300 or above, and 30 of
which must be from UND) including:

Minors in Art above.

College of Education and Human Development

Minor in Visual Arts Education (Middle or Secondary)

See Minor in Art above.

ART 100. Introduction to the Visual Arts. 3 Credits.
Study and analysis of artistic methods and meaning in the visual arts. Films, original works, slides, discussions, demonstrations. Structure and meaning of visual art forms as revealed through the analysis of psychological applications of art media. F.S.

ART 111. Two & Three Dimensional Design. 3 Credits.
This is a foundation studio course which introduces design principles, aesthetic considerations, and basic techniques of working as they relate to the creation of two-dimensional and three-dimensional art. Appropriate art safety instruction will be included. F.S.

ART 112. Visual Persuasion. 3 Credits.
An introduction to basic principles of visual perception and interpretation, with emphasis on visual theories, cultural influences, historical and ethical perspectives. This course will provide an overview of ways in which visual elements are used to communicate and influence meaning, as well as provide students analytical tools to advance visual literacy. F.S.

ART 200. Intro to Sculpture. 3 Credits.
Introduction to philosophy, aesthetics, history, and processes of sculpture. Demonstration in the use of metals, stone, clay, plaster, wood, etc. Appropriate art safety instruction will be included. F.S.

ART 204. Intro to Jewelry & Metalsmithing. 3 Credits.
This studio course is an investigation into the tools, techniques, and processes fundamental to the design and fabrication of contemporary wearable and non-wearable art executed predominantly in precious/semi-precious metal. The principles will be practiced and studied through individual projects, leading to proficiency for the making of body adornments, holloware, and simple fabricated objects. Appropriate art safety instruction will be included. F.S.

ART 210. History of Art I. 3 Credits.
Introductory survey of art history from Paleolithic to Renaissance. F.

ART 211. History of Art II. 3 Credits.
Introductory survey of art history from Renaissance to present. S.

ART 220. Intro to Painting. 3 Credits.
Experimentation with oil painting and associated media with emphasis upon creative compositions, using figure models, still-life subjects and imaginative contemporary expressions. Appropriate art safety instruction will be included. F.S.

ART 230. Intro to Drawing. 3 Credits.
Study and application of different drawing media, methods and techniques. Appropriate art safety instruction will be included. F.S.

ART 240. Intro to Printmaking. 3 Credits.
Introduction to basic traditional printmaking processes including relief, etching, lithography, and silkscreen printing. Appropriate art safety instruction will be included. F.S.

ART 245. Intro to Black and White Photography. 3 Credits.
Introduction to black and white photography in a visual arts environment. Emphasis is placed on developing an understanding of fine art photography through the practice of visualization and print making. Coursework includes an introduction to basic black and white film and paper processing. Appropriate art safety instruction will be included. F.S.

ART 250. Intro to Ceramics: Handbuilding. 3 Credits.
Introduction to ceramics techniques. A beginning course for majors. Proficiency in the basic hand forming processes and glazing techniques and an understanding of the clay and firing processes are achieved through lectures, discussions, demonstrations, and readings. Appropriate art safety instruction will be included. F.S.

ART 253. Intro to Ceramics: Throwing. 3 Credits.
Throwing is the process by which a form is made on the potter's wheel. During the semester emphasis is placed on centering the clay on the wheel and mastering basic forms, shaping techniques and glaze applications as well as firing processes. This is achieved through lectures, demonstrations, discussions, and readings. Appropriate art safety instruction will be included. F.S.

ART 260. Intro to Color Photography. 3 Credits.
A beginning non-darkroom oriented class in color photography emphasizing the aesthetic, design and compositional aspects of this artistic medium. Appropriate art safety instruction will be included. F.S.
ART 272. Digital Foundations. 3 Credits.
Introduction to the principles, techniques and history of digital media. This course will instruct in the application of computer software. Appropriate art safety instruction will be included. F,S.

ART 273. Intro to Graphic Design. 3 Credits.
An introduction to the art, language, key elements, theory and practice of graphic design. This course will focus on the integration of type, imagery and spatial relationships in design. Students will be introduced to the conceptual design process, communicating with clients, high quality crafting and production. Appropriate art safety instruction will be included. F,S.

ART 400. Advanced Sculpture. 3-6 Credits.
Continued study of advanced sculpture process and concepts and emphasis on the development of individual artistic direction. Appropriate art safety instruction will be included. May be repeated for credit without limitation. Prerequisite: ART 200. Repeatable. F,S.

ART 401. Advanced Jewelry and Metalsmithing. 3-6 Credits.
A continuation and expansion of Introduction to Jewelry and Metalsmithing. Specialized techniques and processes utilized in metal fabrication will produce works ranging from body adornment to small sculpture. Emphasis will be placed on the theoretical and conceptual growth of the student and the development of a self-directed personal aesthetic expression. Appropriate art safety instruction will be included. May be repeated for credit without limitation. Prerequisites: ART 204. Repeatable. F,S.

ART 403. Advanced Printmaking. 3-6 Credits.
Advanced work in all traditional and experimental print media, including photo-based printing, non-toxic printing processes, computer-generated printmaking and exploration of collaborative printing and construction of non-traditional multiples. Appropriate art safety instruction will be included. May be repeated for credit without limitation. Prerequisite: ART 240. Repeatable. F,S.

ART 404. Advanced Ceramics. 3-6 Credits.
This course will have specific technical ceramic applications, applicable to the exploration of advanced level hand building and/or throwing techniques. The conceptual development of the student's work is essential and may include both ceramic work and/or readings. Appropriate art safety instruction will be included. May be repeated for credit without limitation. Prerequisites: ART 245 or ART 260. Repeatable. F,S.

ART 405. Advanced Photography. 3-6 Credits.
Refinement of conceptual and formal qualities in silver or non-silver process photographic projects using color, black and white, and/or digital techniques. The scope of work and media will be determined by contractual arrangements between the student and instructor. Appropriate art safety instruction will be included. May be repeated for credit without limitation. Prerequisites: ART 245 or ART 260. Repeatable. F,S.

ART 410. Advanced History of Art. 3-6 Credits.
Study of varied topics in the history of art and architecture. May be repeated as title changes. Possible subjects may include but are not limited to: Non-Western Traditions, 20th 21st Century Art, late 18th through 19th Century Art, Renaissance Baroque Art and Feminist Art. Prerequisites: ART 210 and ART 211. Repeatable. F,S.

ART 417. History of Art: Museum Studies Practicum. 3-6 Credits.
Experience working in an art exhibition setting involving practical experience, research, a written paper and presentation. Prerequisites: ART 210 and ART 211. Repeatable to 36 credits. F,S.

ART 430. Advanced Painting & Drawing. 3-6 Credits.
A continuation of both Introduction to Painting and Introduction to Drawing. Further development of painting and drawing concepts, comprehension and research of various media and styles. The course stresses the focus on one's attitudes towards developing a more personal visual statement in areas of personal interest. Appropriate art safety instruction will be included. May be repeated for credit without limitation. Prerequisite: ART 220 or ART 230. Repeatable. F,S.

ART 460. Methods, Materials and Philosophy: Art in the Elementary Classroom. 3 Credits.
The study of art material methods, philosophy and projects applicable for special education, kindergarten through sixth grade students. Emphasis is on inter-curricular creativity using both 2-dimensional and 3-dimensional projects, featuring multi-cultural and disciplined-based education. Appropriate art safety instruction will be included. Prerequisite: Sophomore standing in TL or Art. F,S.

ART 461. Methods and Materials of Teaching Middle and Secondary School Art. 3 Credits.

ART 480. Advanced Graphic Design. 3-6 Credits.
Study and application of abstract representation in graphic design. Design methods and genres are examined during the production of promotional material including identity and business systems and campaigns. Ability to work metaphorically with image and design will be stressed. Focus will be on layout and composition. Continuing students will focus on application of graphic design principles to environmental and three-dimensional material including packaging, showroom graphics, display and electronic media applications. Appropriate art safety instruction will be included. Repeatable. Prerequisite: ART 273. Repeatable. F,S.

ART 481. Art & Design Internship. 3 Credits.
Supervised work experience in studio art, art history design. Plan submitted by student and approved in advance by faculty and on-site supervisor. Final report, portfolio of work produced during internship, and employee evaluation required. Prerequisite: Instructor consent. F,S.

ART 490. Special Projects/Independent Research. 1-6 Credits.
Advanced independent study within a specific art discipline outside of subject areas normally covered within regularly scheduled courses in studio art, graphic design, art history and art education. Formal contract must be signed with professor of record. Repeatable, no more than 6 credits in each discipline area. Prerequisite: Instructor consent. Repeatable to 6 credits. F,S.

ART 491. Special Topics. 1-6 Credits.
Experience in specialized techniques and processes as they apply to various media both new and traditional. Offered on request. May be conducted either on laboratory or tutorial basis as subject matter permits. Appropriate art safety instruction will be included. Prerequisite: Instructor consent. Repeatable to 6 credits. F,S.

ART 498. Seminar in Art and Design Capstone. 3 Credits.
Discussions, reports, and presentations that analyze, synthesize and evaluate various topics derived from what students have learned in the Art Design program in relation to their entire university experience. Emphasis on critical thinking will be demonstrated through written and oral communication. Prerequisite: Junior or senior standing. S.

B.A. with Major in Visual Arts
Bachelor of Arts Majors in Visual Arts pursue one of the following tracks of study:

Art History and Museum Studies
Graphic Design
Studio Art

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum of 42 major credits:

All BA degree majors in Art have a minimum requirement of 42 credits in Art. Art History or Graphic Design courses. Distribution of those credits is as follows:

Core Requirements (15 credits)

<table>

Additional Supportive Courses (6 credits)

1800-level two-dimensional studio art course
200-level three-dimensional studio art course

Track of Study (18 credits)
B.F.A. with a Major in Graphic Design

Candidates seeking admission to the BFA program in Graphic Design must submit an application to the chairperson who will then schedule a portfolio presentation and personal interview for the candidate with a committee consisting of three departmental faculty members. Candidates accepted for the program will be expected to maintain a high standard of excellence, demonstrate significant artistic growth, and a 3.00 grade point average in all art courses. Before advancement to upper-division status, all B.F.A. candidates must participate in review and evaluation by the departmental faculty.

Each student’s portfolio will be reviewed annually by departmental faculty, which will make a recommendation concerning the student’s status in the program. If probation is recommended, students may apply for readmission at the completion of a full semester. Readmission in the B.F.A. program in Graphic Design will be contingent upon faculty evaluation.

Candidates seeking admission to the BFA program must submit an application to the chairperson who will then schedule a portfolio presentation and personal interview for the candidate with a committee consisting of three departmental faculty members. Each student’s portfolio will be reviewed annually by departmental faculty, who will make a recommendation concerning the student’s status in the BFA program. If probation is recommended, students may apply for readmission at the completion of a full semester. Readmission will be contingent upon faculty evaluation.

Before advancement to upper-division status, all BFA candidates must participate in review and evaluation by the departmental faculty.

Major Emphasis Area Courses
At least 24 credits must be completed in one of the following emphasis areas:

- Ceramics
- Jewelry & Metalsmithing
- Photography
- Printmaking
- Sculpture
- Painting & Drawing

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing).

II. The following curriculum of 69 major credits:

All BFA degree majors in Art have a minimum requirement of 69 credits in Art, Art History and Graphic Design courses. Distribution of those credits is as follows:

<table>

**Exhibition Requirement**

| Total Credits | 69 |

All B.F.A. candidates are also required to produce a B.F.A. Exhibition with the approval of their faculty advisor.

B.F.A. with a Major in Visual Arts

The Bachelor of Fine Arts program in Art is offered to students with marked abilities who desire an intensive undergraduate concentration in visual art, in preparation for either a career as a professional artist, for graduate study leading to the MFA, or both. Candidates accepted for the program will be expected to maintain a high standard of excellence, demonstrate significant artistic growth, and a 3.00 grade point average in all art courses.

Candidates seeking admission to the BFA program must submit an application to the chairperson who will then schedule a portfolio presentation and personal interview for the candidate with a committee consisting of three departmental faculty members. Each student’s portfolio will be reviewed annually by departmental faculty, who will make a recommendation concerning the student’s status in the BFA program. If probation is recommended, students may apply for readmission at the completion of a full semester. Readmission will be contingent upon faculty evaluation.

Before advancement to upper-division status, all BFA candidates must participate in review and evaluation by the departmental faculty.

Teacher Licensure

Through a partnership with the College of Education and Human Development and the Department of Teaching and Learning, students may seek a K-12 licensure in Art. The following program of study must be completed:

I. Requirements for the B.A. or B.F.A. with major in Visual Arts or Art History.
Bachelor of Fine Arts with Major in Graphic Design

Candidates seeking admission to the BFA program in Graphic Design must submit an application to the chairperson who will then schedule a portfolio presentation and personal interview for the candidate with a committee consisting of three departmental faculty members. Candidates accepted for the program will be expected to maintain a high standard of excellence, demonstrate significant artistic growth, and a 3.00 grade point average in all art courses. Before advancement to upper-division status, all B.F.A. candidates must participate in review and evaluation by the departmental faculty.

Each student’s portfolio will be reviewed annually by departmental faculty, which will make a recommendation concerning the student’s status in the program. If probation is recommended, students may apply for readmission at the completion of a full semester. Readmission in the B.F.A. program in Graphic Design will be contingent upon faculty evaluation.

**Majors in Graphic Design must complete at least 24 credits in Graphic Design.**

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing).

II. The following curriculum of 69 major credits:

All BFA degree majors in Art have a minimum requirement of 69 credits in Art, Art History and Graphic Design courses. Distribution of those credits is as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>

Bachelor of Fine Arts with Major in Visual Arts

The Bachelor of Fine Arts program in Art is offered to students with marked abilities who desire an intensive undergraduate concentration in visual art, in preparation for either a career as a professional artist, for graduate study leading to the MFA, or both. Candidates accepted for the program will be expected to maintain a high standard of excellence, demonstrate significant artistic growth, and a 3.00 grade point average in all art courses.

Candidates seeking admission to the BFA program must submit an application to the chairperson who will then schedule a portfolio presentation and personal interview for the candidate with a committee consisting of three departmental
faculty members. Each student’s portfolio will be reviewed annually by
departmental faculty, who will make a recommendation concerning the
student’s status in the BFA program. If probation is recommended, students
may apply for readmission at the completion of a full semester. Readmission
will be contingent upon faculty evaluation.

Before advancement to upper-division status, all BFA candidates must
participate in review and evaluation by the departmental faculty.

Major Emphasis Area Courses
At least 24 credits must be completed in one of the following emphasis areas:

- Ceramics
- Jewelry & Metalsmithing
- Photography
- Printmaking
- Painting & Drawing

Required 120 credits (36 of which must be numbered 300 or above, and 30 of
which must be from UND) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum of 69 major credits:

All BFA degree majors in Art have a minimum requirement of 69 credits in
Art, Art History or Graphic Design courses. Distribution of those credits is as

approval of their faculty advisor.

Teacher Licensure
Through a partnership with the College of Education and Human Development
and the Department of Teaching and Learning, students may seek a K-12
licensure in Art. The following program of study must be completed:

I. Requirements for the B.A. or B.F.A. with major in Visual Arts or Art History.

II. Admission to the Teacher Education Program, normally while taking T&L 250
Introduction to Education. (See College of Education and Human Development
(https://education.und.edu) for admission and licensing requirements.)

III. The program in K-12 Education, to include:

<table>
<thead>
<tr>
<th>T&amp;L 250 Introduction to Education</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>T&amp;L 319 Integrating Diverse Needs in Educational Settings</td>
<td>3</td>
</tr>
<tr>
<td>T&amp;L 339 Educational Technology</td>
<td>2</td>
</tr>
</tbody>
</table>

T&L 345 Curriculum, Instruction, and Assessment | 3 |
T&L 350 Development and Education of the Adolescent | 3 |
ART 461 Methods and Materials of Teaching Middle and
Secondary School Art | 3 |
T&L 432 Learning Environments | 3 |
T&L 433 Multicultural Education | 3 |
T&L 486 Field Experience | 1 |
T&L 487 Student Teaching | 16 |
T&L 488 Senior Seminar | 1 |

| Total Credits | 41 |

* T&L 390 Special Topics, may be taken as an elective.

Art majors seeking a K-12 licensure must have an adviser in both the Art &
Design Department and the Department of Teaching and Learning.

Minor in Art History and Museum Studies

Required 21 credits including:

| ART 112 Two & Three Dimensional Design | 3 |
| ART 210 History of Art I | 3 |
| ART 211 History of Art II | 3 |
| ART 230 Intro to Drawing | 3 |
| 400-level art history courses | 9 |

| Total Credits | 21 |

Minor in Graphic Design

Required 21 credits including:

| ART 112 Two & Three Dimensional Design | 3 |
| ART 230 Intro to Drawing | 3 |
| ART 272 Digital Foundations | 3 |
| ART 273 Intro to Graphic Design | 3 |
| 400-level graphic design courses | 9 |

| Total Credits | 21 |

Minor in Visual Arts (Studio)

Required 21 credits including:

| ART 110 Introduction to the Visual Arts | 3 |
| ART 112 Two & Three Dimensional Design | 3 |
| 200-level two-dimensional studio art course | 3 |
| 200-level three-dimensional studio art course | 3 |
| 200/400-level studio art or art history courses | 9 |

| Total Credits | 21 |

Arts and Sciences (A & S)

Minor in Canadian Area Studies (p. 40)
Certificate in Diversity and Inclusion (p. 39)

Courses

A&S 100. Introduction to Peer Mentoring. 1 Credit.
This seminar will serve as an introduction to the Peer Mentor program in the
College of Arts Sciences and will include needed training modules for that
program. Prerequisite: Successful application to the College of Arts Sciences
Peer Mentor program; must obtain permission number from instructor. SS.
A&S 250. Arts & Sciences. 1-4 Credits. Repeatable to 21 credits.

A&S 251. Study in Canada. 1-12 Credits. One to twelve credits in any one semester (repeatable with permission of the student's academic department); a course load required to maintain full-time status; at least Sophomore status required; GPA of at least 2.50; must become familiar with Canadian study procedures, application, credit transfer and other matters as outlined in the Study Abroad Handbook; courses to be taken during a study in Canada must have pre-approval from student's academic department. Prerequisites: Sophomore status or higher and a GPA of 2.5 or higher. Repeatable. F.S.S.

A&S 252. Introduction to Canadian Studies. 3 Credits. An interdisciplinary, team-taught course focusing on the historical, geographical, socio-cultural, literary, political, economic, and international qualities that make Canada and its communities both vibrant and unique. F.

A&S 260. Exploring Topical Challenges. 3 Credits. Students will conduct signature work in interdisciplinary teams based on semester-long themes. The first half of the course will focus on exploration and inquiry on a chosen theme (varies by semester). The second half of the course will focus on student-driven group projects designed to enhance students' ability to work in diverse teams and engage in unstructured problem solving. Prerequisites: ENGL 130; 23 completed credit hours. F.S.

A&S 294. Directed Studies. 1-4 Credits. Specially arranged seminars or courses on a variety of subjects not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved, provided appropriate faculty members are willing. Repeatable as topics vary to 8 credits. Repeatable to 8 credits.

A&S 299. Special Topics. 1-4 Credits. Specially arranged seminars or courses on a variety of subjects not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved, provided appropriate faculty members are willing. Repeatable. On demand.

A&S 351. Introduction to Law and Legal Studies. 3 Credits. Segments on Contracts, Criminal Law, Constitutional Law, and Torts, taught in customary law school manner to acquaint undergraduates and others interested in exploring a career in the legal profession with law school methodology and legal analysis.

A&S 497. Internship. 1-4 Credits. This internship is a short-term work experience emphasizing hands-on learning that is not covered by regular departmental offerings. Prerequisite: Permission of instructor. Repeatable to 12 credits. F.S.S.

A&S 499. Special Topics. 1-4 Credits. Specially arranged seminars or courses on a variety of subjects not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved, provided appropriate faculty members are willing. Repeatable as topics vary. Repeatable.

Certificate in Diversity and Inclusion

A total of 16 credit hours within the following:

Core Course: One of the following (3 credits):
- ANTH 372 Culture Theory
- COUN 250 Dialogue on U.S. Diversity
- ENGL 228 Diversity in Global Literatures
- ENGL 229 Diversity in U.S. Literatures
- PHIL 342 Advanced Ethics
- PSYC 421 Diversity Psychology
- SOC 250 Diversity in American Society
- SWK 493A Special Topics (Diversity and International Social Welfare Through a Social Work Lens)

Area Courses: One course from four of the following areas (12 credits):
- Sex, Gender
- Race, Ethnicity, Nationality
- Religion
- Social/Economic Class
- Ability
- Age

Applied Experience (1 credit): As approved for the Diversity & Inclusion Certificate
- Workshop: Seminar courses related to diversity & inclusion, e.g., IMPACT, COUN 399
- Internship/Co-op: Student must propose how experience relates to diversity

Contact hours: At least 50 contact hours in the forms of volunteer work, shorter workshops or presentations, conference attendance (diversity-specific), or others as approved by the College of Arts & Sciences

Area Courses:
- Sex/Gender
  - ANTH 375 Women in Prehistory
  - CJ 302 Women, Crime, and Criminal Justice
  - ENGL 357 Women Writers and Readers
  - HIST 332 Women in Early America
  - HIST 333 Women in Modern America
  - IS 346 Gender in American Indian Cultures
  - PSYC 210 Human Sexuality
  - PSYC 365 Psychology of Women
  - RELS 216
  - SOC 340 Sociology of Gender
  - WGS 200 Introduction to Gender Studies
  - WGS 225 The Study of Women
  - WGS 480 Feminist Theory
  - Race, Ethnicity, Nationality
  - ANTH 373 Indians of Latin America
  - ENGL 365 Black American Writers
  - ENGL 367 American Indian Literatures
  - ENGL 415 Seminar in Literature (Asian-American Literature and Theory)
  - ENGL 415 Seminar in Literature (Latina/o Literature and Theory)
  - HIST 371 African-American History since 1877
  - IS 123 American Indians and Culture
  - SOC 435 Racial and Ethnic Relations
  - Religion
  - RELS 101
  - RELS 102
  - RELS 315
  - RELS 320
  - RELS 355
  - RELS 380
  - Social/Economic Class
  - PHIL 355 Social and Political Philosophy
  - SOC 407 Political Sociology
  - SOC 436 Social Inequality
  - Ability
  - IS 311 Health and American Indian Cultures
  - RHS 250 Contemporary Issues in Rehabilitation
  - RHS 260 Inclusion in Recreation Settings
  - RHS 350 Overview of Disabilities
  - Age
  - PSYC 355 Adulthood and Aging
  - RELS 245
  - SOC 352 Aging and Society
  - SWK 313 Orientation to Gerontology
Minor in Canadian Area Studies

Housed in the College of Arts and Sciences, this is an interdisciplinary 20-credit minor in Canadian Area Studies. There are three required courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEG 362</td>
<td>Geography of Canada</td>
<td>3</td>
</tr>
<tr>
<td>HIST 204</td>
<td>Canada to 1867</td>
<td>3</td>
</tr>
<tr>
<td>or HIST 205</td>
<td>Canada since 1867</td>
<td>3</td>
</tr>
<tr>
<td>A&amp;S 252</td>
<td>Introduction to Canadian Studies</td>
<td>3</td>
</tr>
</tbody>
</table>

At least 6 additional credits must be taken at the upper-division level.

Students will be able to choose an area of concentration from among the following:

French Canada (for the student with sufficient background in the French language), total 20 hours.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>FREN 307</td>

Athletic Training

(See Sports Medicine (p. 205) listing)

Atmospheric Sciences (AtSc)

B.S. in Atmospheric Science (p. 41)

Minor in Atmospheric Sciences (p. 42)

Courses

ATSC 100. Atmospheric Sciences Orientation. 1 Credit.
This course is required for all atmospheric sciences majors. Its purpose is to prepare new students for their university and professional careers by discussing university policies, the advising process, and career options. S/U grading. F/S.

ATSC 110. Meteorology I. 3 Credits.
Elements of the atmosphere with emphasis on those processes that affect the global atmospheric circulation. Includes laboratory. Corequisite: ATSC 110L. F/S.

ATSC 110L. Meteorology I Laboratory. 1 Credit.
Laboratory to accompany ATSC 110. Corequisite: ATSC 110. F/S.

ATSC 210. Introduction to Synoptic Meteorology. 4 Credits.
The analysis and portrayal of synoptic weather information. Kinematic flow analyses of barotropic and baroclinic systems. Introduction to many of the products produced by NWS. Includes laboratory. Prerequisites: ATSC 110 and MATH 146 or MATH 165. F.

ATSC 220. Extreme Weather and Climate. 3 Credits.
Severe weather is a leading cause of death, injury and property damage. Students will gain an understanding and appreciation of extreme weather events, their impact on society, minimizing risk and the use of technology in detection and forecasting. Students will also learn how climate change impacts the occurrence and severity of extreme weather events. Prerequisite: ATSC 110. F/S.

ATSC 231. Aviation Meteorology. 4 Credits.
A study of weather hazards, meteorological flight planning, aviation weather equipment and human factors in weather flying safety. Prerequisite: ATSC 110. F/S.

ATSC 240. Meteorological Instrumentation. 4 Credits.
A study of the theory, design, and accuracy of instrumentation for the measurement of temperature, pressure, humidity, wind, and radiation. In addition, topics such as radar, and the use of aircraft and balloons as instrument platforms are also discussed. Includes laboratory. Prerequisites: ATSC 110 and MATH 103. S.

ATSC 252. Applied Weather Modification. 4 Credits.
Provides a comprehensive introduction to basic concepts of weather modification as currently practiced around the world. It includes a study of cloud physics and seeding theory, a review of past and current programs, and a discussion of related legal, societal, economic and environmental issues. Students will gain an understanding and appreciation of extreme weather events, their impact on society, minimizing risk and the use of technology in detection and forecasting. Students will also learn how climate change impacts the occurrence and severity of extreme weather events. Prerequisite: ATSC 110. F/S.

ATSC 270. Computer Concepts in Meteorology. 3 Credits.
The course introduces students to the programming knowledge needed for manipulating observational and model data in the earth sciences. Topics include data visualization, Linux and shell scripting, advanced file I/O, and memory management. The example problems utilize datasets commonly found in the atmospheric sciences. Prerequisites: ATSC 110 and CSCI 130. S.
ATSC 310. Introduction to Weather Forecasting. 3 Credits.
An operations approach to application of practical methodologies of weather analysis using computer textual and graphic analysis systems. Involves routine weather laboratory activities commonly found within the operational sector of meteorology. Prerequisite: ATSC 210. S.

ATSC 315. Broadcast Meteorology. 3 Credits.
An introduction to the field of broadcast meteorology which provides an overview of television production, the profession of broadcast meteorology, AMS Seal requirements, ethics and the production, organization, critique, and presentation of weather information. Prerequisites: ATSC 310 and Communication or Atmospheric Sciences major. F, even years.

ATSC 345. Remote Sensing of the Atmosphere. 3 Credits.
Fundamental remote sensing concepts and tools including fundamental radiative processes in the atmosphere. Principles and applications of satellite and radar and their uses as meteorological observation and research tools. Additional instruments may be discussed including lidar, wind profilers, radio acoustic profilers, and other profiling systems. Prerequisites: ATSC 210 and MATH 166. F.

ATSC 350. Atmospheric Thermodynamics. 3 Credits.
An introduction into the theory and application of atmospheric thermodynamics used in synoptic, meso- and microscale meteorology. The course covers the principles of classical thermodynamics and how they are applied to atmospheric processes. Prerequisites: ATSC 270, MATH 166, and PHYS 251. F.

ATSC 353. Physical Meteorology. 3 Credits.
A study of atmospheric processes and properties from a physical standpoint. Includes atmospheric radiation, aerosols, cloud microphysics, and climate dynamics. Prerequisite: ATSC 345. S.

ATSC 355. Surface Transportation Weather I. 3 Credits.
An introduction to the concepts, practices and methodologies used in the surface transportation weather industry. Includes configuration, siting, and data management/quality control of environmental sensor stations, fundamentals of surface transportation weather forecasting, overview of winter road maintenance methods, and applications of geographical information systems technologies in a weather and road maintenance environment. Prerequisites: ATSC 210 and ATSC 240. F, odd years.

ATSC 360. Dynamic Meteorology. 4 Credits.
Basic equations of motion, atmospheric thermodynamics, balanced motions, and atmospheric disturbances are examined on an introductory level. Prerequisite: ATSC 350. Prerequisite or Corequisite: MATH 266. S.

ATSC 397. Cooperative Education. 1-8 Credits.
The student will receive credit for on-the-job compensated work experience in various areas of meteorology available within the government, university or private sectors. May be repeated to a total of 12 credits. Prerequisites: Overall GPA of 2.5 or higher and approval of the Coordinator of Atmospheric Sciences. May be repeated to a maximum of four credit hours. Prerequisites: Upper division status and consent of the instructor. Repeatable to 4 credits. F,S,SS.

ATSC 405. Numerical Methods in Meteorology. 3 Credits.
Methods to solve mathematical problems that are difficult to solve analytically. The course is designed to introduce students to numerical methods used to solve mathematical problems that are difficult to solve analytically. The course is designed to focus on numerical problems encountered in the field of atmospheric science. Prerequisites: ATSC 360 and MATH 266. F.

ATSC 411. Synoptic Meteorology. 4 Credits.
Development and application of quasi-geostrophic theory, including its application to the development and propagation of surface and upper-level systems, isentropic analysis, IPV theory, fronts, jets, and the relation between the synoptic environment and convection. Includes a laboratory in which concepts are reinforced through map discussion, map analysis, forecasting exercises and forecasting techniques. Prerequisites: ATSC 210 and ATSC 360. F.

ATSC 441. Radar Meteorology. 4 Credits.
Advanced radar theory, including basic radar principles, digital processing of radar signals, Doppler radar principles, displays, polarization techniques, and characteristic returns. Includes laboratory. Prerequisite: ATSC 345 or consent of instructor. S, odd years.

ATSC 450. Introduction to Cloud Physics Meteorology. 4 Credits.
A study of the physics of clouds with emphasis on microphysical processes involved in cloud formation, precipitation production, and dissipation. Includes Laboratory. Prerequisites: ATSC 350 and ATSC 353. F, odd years.

ATSC 455. Surface Transportation Weather II. 3 Credits.
An in-depth exploration of surface transportation meteorology designed to prepare students for a career in operational surface transportation meteorology. Includes application of mesoscale weather prediction models in a surface transportation environment, introduction to pavement condition modeling, forecast verification methods, and an introduction to methods of maintenance decision-making. Prerequisites: ATSC 310 and ATSC 355. S, even years.

ATSC 456. Introduction to Professional Meteorology. 3 Credits.
A survey of the structure and methods found within the operational and private sector weather community. Provide orientation of professional meteorology methods. While the government sector of operational meteorology will be discussed, the emphasis of the course will focus on aspects of private sector meteorology. Prerequisite or Corequisite: ATSC 350. F, odd years.

ATSC 460. Mesoscale Dynamics. 4 Credits.
An introduction to mesoscale dynamics and forecasting. Topics include mesoscale circulations, warm and cold season weather systems, terrain induced weather systems, tropical systems and mesoscale models. Prerequisite: ATSC 360. S.

ATSC 492. Senior Project I. 1 Credit.
A capstone project demonstrating a breadth and depth of knowledge in atmospheric sciences. An original student investigation of a topic to be selected in consultation with a supervising faculty member of the department. Students will demonstrate the ability to communicate their research through both oral and written communication at an advanced level. Prerequisites: Senior Standing in Atmospheric Sciences and consent of advisor. F.S.

ATSC 493. Senior Project II. 2 Credits.
This is the second semester of a capstone course intended to be a culminating experience. Students are expected to demonstrate a breadth and depth of knowledge in atmospheric sciences. Students will continue to investigate an original topic to be selected in consultation with a supervising faculty member of the department. Students will demonstrate the ability to communicate their research through both oral and written communication at an advanced level. Prerequisite: ATSC 492. F,S.

ATSC 494. Special Studies in Meteorology. 1-4 Credits.
Designed for those students who wish to pursue advanced topics in meteorology on an individual basis. May be repeated with change of subject matter to a maximum of four credit hours. Prerequisites: Upper division status and consent of the instructor. Repeatable to 4 credits. F,S,SS.

ATSC 497. Internship. 1-8 Credits.
Field experiences in various areas of meteorology will be offered as available. May be repeated up to a total of 12 credits. Prerequisites: Permission of instructor and dean. Repeatable to 12 credits. S/U grading. F,S,SS.

ATSC 499. Topics in Meteorology. 2-4 Credits.
This course will cover one or more topics in meteorology of special interest to upper division students. Course may be repeated up to a maximum of 6 credits. Prerequisite: Consent of instructor. Repeatable to 6 credits. F,S.

Bachelor of Science in Atmospheric Sciences

Requires 120 credits (36 of which must be number 300 or above) including:

I. Essential Studies Requirements (see University ES listing).

II. Center for Aerospace Sciences requirements.

III. The Following Curriculum:

<table>
<thead>
<tr>
<th>Freshman Year</th>

### Aviation (Avit)

#### John D. Odegard School of Aerospace Sciences

- B.S. in Aeronautics with a Major in Air Traffic Management (p. 47)
- B.S. in Aeronautics with a Major in Aviation Studies (p. 48)
- B.S. in Aeronautics with a Major in Commercial Aviation (p. 48)
- B.S. in Aeronautics with a Major in Flight Education (p. 49)
- B.S. in Aeronautics with a Major in Unmanned Aircraft Systems Operations (p. 49)

#### College of Business and Public Administration

- B.B.A. with a Major in Airport Management (p. 148)
- B.B.A. with a Major in Aviation Management (p. 149)
- Minor in Professional Flight (p. 50)
- Minor in Aviation Management (p. 50)
- Minor in Unmanned Aircraft Systems (p. 50)

### Optional Specializations

Student coursework toward the Bachelor of Business Administration or Bachelor of Science described above may be augmented with one or more of the following specializations. Each specialization completed will be noted on the student's academic transcript.

- Specialization in Business Aviation (p. 50)
- Specialization in Safety (p. 50)

All 300 and 400 level courses are restricted to Aviation majors, minors, or to students with instructor/departmental permission. All 400 level courses are restricted to junior/senior status.
Courses

AVIT 100. Aviation Orientation. 1 Credit.
This course is required for all aviation majors. Its purpose is to prepare new students for their university and professional careers by discussing students’ responsibilities and options concerning the aviation industry. Aviation career options will be explored. Academic and airport requirements and procedures will be covered. F,S.

AVIT 102. Introduction to Aviation. 5 Credits.
The course will develop the student's knowledge and skills that are needed to safely exercise the privileges and responsibilities of a Private Pilot. Course content includes instruction in aerodynamics, aircraft systems, FAA regulations, U.S. Airspace System, weight and balance, aircraft performance, aviation weather, flight publications, radio navigation, cross-country planning and navigation, basic flight physiology, and flight safety. The student must complete the appropriate flight lessons to satisfactorily complete the course.
Prerequisites or Corequisites: ATSC 110 and a minimum GPA of 2.6. F,S,SS.

AVIT 103. Introduction to Air Traffic Management. 2 Credits.
This introductory course allows all aviation majors the opportunity to explore the Air Traffic Operations through the simulated role of an Air Traffic Controller in a Terminal RADAR Approach Control (TRACON) environment, or a Control Tower facility. This course follows the applicable required Federal Aviation Administration's learning objectives set forth in their Air Traffic Basics Course.
Students will have a hands-on experience of working departures and arrivals in a simulated RADAR, or Tower, facility. They will be introduced to the Air Traffic Management System and National Airspace System, Navigational Aids, Separation Minima between Aircraft, and a general orientation to the world of Air Traffic Operations. This realistic look at the profession of an Air Traffic Controller will enhance any aviation enthusiast's dream of working air traffic. An Air Traffic lab is required. F,S,SS.

AVIT 105. Essentials of Flight. 3 Credits.
This course will provide the student with a survey of knowledge in both Visual Flight Rules and Instrument Flight Rules in aviation. F.

AVIT 126. Introduction to UAS Operations. 2 Credits.
This course of instruction introduces the student to the history of Unmanned Aircraft Systems and their current and future development for use in a burgeoning civil industry. Specific blocks deal with aircraft, ground, communications, launch and recovery systems while emphasizing the human integration into the overall system. F.

AVIT 142. Introduction to Aviation-Helicopter. 5 Credits.
This course develops the knowledge needed to safely exercise the privileges and responsibilities of a Private Pilot. Course content includes instruction in helicopter aerodynamics, helicopter systems, FAA regulations, U.S. airspace system, weight and balance, helicopter performance, aviation weather, flight publications, radio navigation, cross-country planning and navigation, basic flight physiology, and flight safety.
Prerequisite: A minimum GPA of 2.6. Corequisite: AVIT 143. Prerequisite or Corequisite: ATSC 110 and ATSC 110L. F.

AVIT 143. Private Pilot-Helicopter Certification Lab. 1 Credit.
This lab course provides the training required to obtain a Private Pilot Certificate with Rotorcraft-Helicopter category and class ratings. The student will learn the fundamentals of helicopter flying, including aerodynamics, aeronautical decision making, emergency procedures and glass cockpit operations.
Prerequisite: A minimum GPA of 2.6. Prerequisite or Corequisite: AVIT 142. S/U grading. F,S,SS.

AVIT 208. Aviation Safety. 3 Credits.
This course provides the student with a detailed introduction into aspects of aviation safety, aviation safety programs, risk management, and the associated components of pilot psychology, physiology, human factors, and accident review and investigation.
Prerequisite: A minimum GPA of 2.6. Prerequisite or Corequisite: AVIT 102 or AVIT 142. F,S,SS.

AVIT 221. Basic Attitude Instrument Flying. 3 Credits.
This course begins with a discussion of Aeronautical Decision Making (ADM), Airworthiness Requirements for flight, Human Factors and night flight. The course proceeds to an in-depth study of pilot/static and gyro instruments and Basic Attitude Instrument Flying. In addition, there will be a discussion of the operation, interpretation, and practical use of VOR, ADF, DME, GPS, RMI, and HSI, as well as an introduction to Electronic Instrument Flight Displays (Glass Flight Decks). The student must complete the appropriate flight lessons to satisfactorily complete the course.
Prerequisite: AVIT 102 and a minimum GPA of 2.6. Prerequisite or Corequisite: AVIT 100. F,S,SS.

AVIT 222. IFR Regulations and Procedures. 3 Credits.
This course will provide the student with a detailed study of the regulations, procedures, and publications necessary for operating IFR in the national airspace system. Terminal and enroute procedures will be studied in detail. The student must complete the appropriate flight lessons to satisfactorily complete the course.
Prerequisites: AVIT 221 and a minimum GPA of 2.6. Prerequisite or Corequisite: AVIT 208. F,S,SS.

AVIT 238. UAS Operator Certification. 3 Credits.
This course will develop the student's knowledge and skill needed to manage and operate small unmanned aircraft systems. Course content includes Federal Aviation Regulations, airspace authorization criteria, and operational approval requirements. Mission employment skills will be acquired through both classroom and hands-on flight activities. Flight activities will include launch and recovery operations, emergency procedures, plus mission planning and execution. Students must complete the appropriate UAS flight lessons to satisfactorily complete the course.
Prerequisites: AVIT 126 and a minimum GPA of 2.6. F,S,SS.

AVIT 239. Autonomous Fundamentals. 2 Credits.
This course provides an overview of the current state of remotely piloted, unmanned, and autonomous systems and current commercially available systems. Moving beyond the constraints of aerial applications, the course will review common characteristics and features employed by autonomous systems across all domains (air, ground, and sea) while exploring the challenges of blending man and machine responses in dynamic operational environments.
Prerequisites: AVIT 126 and a minimum GPA of 2.6. F.

AVIT 240. UAS Enabling Concepts. 3 Credits.
This course provides an in-depth survey of the enabling concepts critical to successful remotely piloted, unmanned aircraft, and autonomous system operations and provide the learner with an appreciation of the complexities of fully-realized autonomous system operations. Prerequisites: AVIT 239 and a minimum GPA of 2.6. S.

AVIT 241. Commercial Helicopter. 4 Credits.
This course provides a study of commercial helicopter systems, including turbine engines, drive trains, fuel, hydraulic, electrical, and basic flight instruments. Navigation aids, commercial regulations, and adverse helicopter aerodynamics will also be studied. Basic Attitude Instrument flying will be introduced and will include the interpretation and practical use of instrument navigation systems.
Prerequisites: AVIT 142 and a minimum GPA of 2.6. Prerequisite or Corequisite: AVIT 100. S.

AVIT 242. Introduction to Commercial Flying-Helicopter Lab. 1 Credit.
This lab course is the beginning of a student's commercial helicopter flight training and is structured to improve and refine aeronautical decision making skills and aircraft control technique. The night flying experience requirements for a FAA Commercial Pilot certificate with Rotorcraft-Helicopter category and class ratings will also be obtained.
Prerequisites: AVIT 142 and AVIT 143; minimum GPA of 2.6. S/U grading. F,S,SS.

AVIT 247. R44 Helicopter Transition Lab. 1 Credit.
This lab course provides the training necessary to operate a Robinson R44 helicopter as pilot-in-command, including flight experience in the R44 helicopter. Prerequisite: Minimum GPA of 2.6. Prerequisite or Corequisite: AVIT 241. S/U grading. On demand.

AVIT 250. Human Factors. 2 Credits.
This course introduces the student to issues influencing human performance in the complex operational aviation environments. Theory and practical applications of cognitive processing, decision-making, interpersonal interaction and communication will be presented. This course also provides an introduction to design elements intended to optimize man-machine interaction.
Prerequisite: Minimum GPA of 2.6. F,S,SS.

AVIT 260. Control Tower Operations I. 4 Credits.
The Control Tower Operations I provides an orientation to basic fundamental Clearance Delivery (CD) and Ground Control (GC) operations and procedures. Tower interaction with other Air Traffic and non-Air Traffic agencies is also part of this course. This course follows the applicable required Federal Aviation Administration’s learning objectives set forth in their Air Traffic Basics Course.
To complete this course, students must demonstrate their basic knowledge of the CD/GC function of Control Tower operations through written and performance examinations. An Air Traffic lab is required.
Prerequisites: AVIT 103 and a minimum GPA of 2.6. Prerequisite or Corequisite: AVIT 100. F.S.
AVIT 261. RADAR Operations I. 4 Credits.
This course provides students with basic RADAR training and knowledge of separation requirements and procedures of Air Traffic Terminal RADAR Operations. Student evaluations are based on demonstrated application of acquired controller skills utilizing Air Traffic simulation. Scenarios progress in difficulty. This course follows the applicable required Federal Aviation Administration’s learning objectives set forth in their Air Traffic Basics Course. To complete this course, students must, in addition to normal academic requirements, successfully complete an intermediate RADAR simulation scenario without assistance. An Air Traffic lab is required. Prerequisites: AVIT 103 and a minimum GPA of 2.6. F,S,SS.

AVIT 276. OSHA Safety Standards for Industry. 3 Credits.
This course covers OSHA Standards, policies, and procedures in general industry. Topics include scope and application of the OSHA General Industry Standards, general industry principles and special emphasis on those areas in general industry, which are most hazardous. Prerequisite: Minimum GPA of 2.6. On demand.

AVIT 309. Flight Physiology. 3 Credits.
In this course, human physiological responses to the stresses of flight environment will be examined in-depth. Topics include decompression, hypoxia, spatial disorientation, altered pressure environments, acceleration and fatigue. The students will experience altered pressure environments during laboratory flights in the UND Aerospace altitude chamber. Prerequisites: AVIT 250; open to Aviation majors and minors only; minimum GPA of 2.6. F,S,SS.

AVIT 310. Public Safety Aviation. 3 Credits.
This course develops the student’s knowledge related to the organization, operations, tactics and techniques related to air support operations within law enforcement, fire protection and resource protection agencies. Specific topics include: Airborne law enforcement patrol, surveillance and special operations (SWAT); fire operations including fire chemistry and behavior, fire department organization and tactics, airborne firefighting equipment, fire extinguishment tactics and air ambulance operations; and resource protection air operations including wildlife surveys, hunting and fishing enforcement patrols, search and rescue and operations from unimproved landing sites and seaplane operations. Prerequisite: AVIT 102 or AVIT 142 or consent of instructor; minimum GPA of 2.6. S.

AVIT 311. Safety Management System (SMS). 3 Credits.
This course provides instruction and practical application of Safety Management Systems (SMS) and how SMS relates to Accident Prevention Program Management. Students receive the necessary instruction required to design, develop, implement, manage, and foster an effective organizational level SMS and accident prevention program. Course topics include theory and application of SMS program elements. Prerequisites: AVIT 208 and a minimum GPA of 2.6. S.

AVIT 312. Aircraft Accident Investigation. 3 Credits.
This course is a detailed evaluation of the methods and procedures involved in aircraft accident investigation including the organization, duties, and procedures of the Aircraft Accident Board. Prerequisites: AVIT 208, AVIT 250, and a minimum GPA of 2.6. S.

AVIT 313. Aviation Insurance. 3 Credits.
This course is an introduction to the basic principles of insurance and risk applicable to general aviation aircraft owners, fixed base operators, and airport management personnel. It includes an in-depth review of the aviation insurance industry in the United States, including market analysis and types of aviation insurers. Prerequisite: Minimum GPA of 2.6. F.

AVIT 320. Airline Career Planning. 2 Credits.
This course introduces the student to operations and quality of life issues related to working in a large flight department or air carrier environment. The material is not limited to one specific area of a professional pilot’s career, but will seek to cover far reaching issues and provide the student with a wide perspective of what to expect as an airline pilot. Specific topics include: airline style interviews, training formats, working agreements, collective bargaining, bidding, scheduling, seniority, travel benefits, personal finance and other similar quality of life issues that will be encountered as a professional pilot. This course introduces the student to specific regulations pertaining to airline pilots, such as duty, rest and flight time restrictions. Prerequisites: AVIT 222 and a minimum GPA of 2.6. On demand.

AVIT 323. Aerodynamics - Airplanes. 3 Credits.
This course will provide the student a study of the physical principles of airplane aerodynamics, thereby fostering an appreciation of the factors affecting aircraft performance, stability and control, and special flight conditions often experienced by commercial pilots of fixed-wing aircraft. The student must complete the appropriate flight lessons to satisfactorily complete the course. Prerequisite: AVIT 222; open to Aviation majors and minors only; minimum GPA of 2.6. F,S,SS.

AVIT 324. Aircraft Systems. 3 Credits.
This course provides an in-depth study of reciprocating engine, propeller, electrical, environmental, hydraulic, pneumatic, fuel, ignition, lubrication, and pressurization systems. Prerequisite: Open to Aviation majors and minors only; minimum GPA of 2.6. Prerequisite or Corequisite: AVIT 221. F,S,SS.

AVIT 325. Multi-Engine Systems and Procedures. 2 Credits.
This course is designed to develop the knowledge and skills necessary to safely and proficiently exercise the privileges and responsibilities of a Commercial Pilot with a Multi-engine rating. Included are discussions concerning Aeronautical Decision Making of multi-engine aircraft systems, aerodynamics, Crew Resource Management, weight and balance, aircraft performance, and abnormal/emergency procedures. The course also includes a scenario based introduction to U.S. Title 14 Code of Federal Regulations (CFR) governing common carriage commercial operations. The student must complete the appropriate flight lessons to satisfactorily complete the course. Prerequisites: AVIT 323 and AVIT 324; open to Aviation majors and minors only; minimum GPA of 2.6. F,S,SS.

AVIT 327. Gas Turbine Engines. 2 Credits.
This course will provide an in-depth introduction to the turbine engine through the study of its development, theory of operation and the function of turbine engine components. Prerequisites: AVIT 142 or AVIT 324; open to Aviation majors and minors only; minimum GPA of 2.6. F,S,SS.

AVIT 331. UAS Flight Systems. 3 Credits.
This course of instruction introduces the student to the systems common to most Unmanned Aircraft with focus on those that differ significantly from manned counterparts. Specific emphasis is placed upon autopilot systems and their integration with flight controls and airborne communications systems. Prerequisites: AVIT 126, AVIT 324, and a minimum GPA of 2.6. Corequisite: AVIT 332. F,S.

AVIT 332. UAS Ground Systems. 3 Credits.
This course introduces the student to those subsystems that comprise the unmanned aircraft system (UAS) ground control and mission planning system. The launch and recovery systems typical of current UAS are also covered. Prerequisites: AVIT 126, AVIT 324, and a minimum GPA of 2.6. Corequisite: AVIT 331. F,S.

AVIT 333. UAS Remote Sensing. 4 Credits.
This course presents the theory and operations of common sensors used by the operators of unmanned aircraft systems. Theory is combined with operational scenarios in order to provide the student with the ability to match specific sensors with anticipated missions. Prerequisites: AVIT 126, AVIT 324, and a minimum GPA of 2.6. F,S.

AVIT 337. Survey of Unmanned Aircraft Systems. 2 Credits.
Course content includes aircraft operating software, launch and recovery operations, payload operations, normal and emergency procedures, and mission planning and execution. It also includes a flight simulation component to provide exposure to the duties and responsibilities of UAS flight crew members but does not provide proficiency or certification on a specific UAS platform. Prerequisites: AVIT 102 and a minimum GPA of 2.6. F,S,SS.

AVIT 342. IFR Regulations and Procedures-Helicopter. 3 Credits.
This helicopter course provides a detailed study of the regulations, procedures, and publications necessary to operate a helicopter IFR in the national airspace system. Terminal and enroute procedures will be studied in detail. Prerequisite: AVIT 241 and a minimum GPA of 2.6. Prerequisite or Corequisite: AVIT 242. F,S.

AVIT 343. Instrument Rating-Helicopter Certification Lab. 1 Credit.
This lab course provides the training required to obtain an Instrument-Helicopter rating and to safely operate a helicopter as pilot-in-command under IFR in the national airspace system. It includes basic instrument flying, radio navigation, and glass cockpit procedures. Prerequisite: AVIT 242 and a minimum GPA of 2.6. Prerequisite or Corequisite: AVIT 342. SU grading, F,S,SS.
AVIT 362. Advanced Tower Operations II. 4 Credits.
Students will build on the knowledge gained in AVIT 260 Control Tower Operations I. Utilizing the 3D tower simulator, the students are taught the basic, advanced, and fundamental Control Tower operations, including structure, procedures, theories of airspace/traffic management. This course follows the applicable required Federal Aviation Administration’s learning objectives set forth in their Air Traffic Basics Course. To complete this course, students will be required to demonstrate their basic knowledge of Control Tower operations through written examinations and performance scenarios in the 3D tower simulator. An Air Traffic lab. Prerequisites: AVIT 260 and a minimum GPA of 2.6. F,S.

AVIT 363. RADAR Operations II. 4 Credits.
This course provides students with advanced RADAR training and knowledge of separation requirements and procedures of Air Traffic Terminal RADAR operations. Using advanced Air Traffic techniques, uncontrolled airport, military, and emergency operations are introduced. Student evaluations are based on demonstrated application of acquired controller skills utilizing RADAR simulation. Scenarios progress in difficulty. This course follows the applicable required Federal Aviation Administration’s learning objectives set forth in their Air Traffic Basics Course. To complete this course, students must, in addition to normal academic requirements, successfully complete required advanced RADAR simulation scenarios without assistance. An Air Traffic lab is required. Prerequisites: AVIT 102 and AVIT 261; minimum GPA of 2.6. F,S.

AVIT 372. Global Perspectives in Aviation History. 3 Credits.
This course investigates aviation’s effects on global culture, commerce, and politics throughout its history by examining original historical sources and evidence from significant events in aviation. After taking this class, students will be more aware of their own and other cultural frameworks and biases and will be able to use that perspective effectively as aviation professionals in a global industry. Prerequisite: Minimum GPA of 2.6. On demand.

AVIT 386. Conventional Aircraft Operations. 1 Credit.
Provides the necessary ground school and dual flight instruction for an endorsement for operation of tailwheel-type airplanes. Allows the student to acquire the knowledge and skills necessary for operation of the tailwheel aircraft on the ground and in flight. Prerequisites: AVIT 102; open to Aviation majors and minors only; minimum GPA of 2.6. S/U grading. F,S,SS.

AVIT 389. Introduction to Aerobatic Flight. 1 Credit.
To introduce, analyze and fly some of the more advanced flight maneuvers defined as aerobatics. Basic aerobatic maneuvers will be flown during the course including loops, spins, rolls, and inverted flight, with advanced variations and combinations of maneuvers demonstrated in flight. Prerequisite: AVIT 102; open to Aviation majors and minors only; minimum GPA of 2.6. S/U grading. F,S,SS.

AVIT 397. Cooperative Education. 1-2 Credits.
A practical work experience with an employer closely associated with the student’s academic area. Arranged by mutual agreement between student, aviation department, and employer. A maximum of four cooperative education credits may be applied toward the total credits needed to complete degree requirements. Co-op credits may not be substituted for any required course within the student’s major. Prerequisites: Acceptance into a co-op position with cooperating industry and approval of the aviation department; open to aviation majors and minors only. Repeatable to 8 credits. S/U grading. F,S,SS.

AVIT 399. Special Aerospace Topics. 1-12 Credits.
Special Aerospace Topics. Prerequisites: AVIT 102; open to Aviation majors and minors only; minimum GPA of 2.6. Repeatable to 12 credits. S/U grading. F,S,SS.

AVIT 402. Airport Planning and Administration. 3 Credits.
This is the first of a two course curriculum in airport administration. This initial course provides an introduction to the complex elements of airport planning and its importance in achieving a successful airport operation. Course content includes a study of the duties and responsibilities of the airport manager with a special emphasis on the Federal Air Regulations governing the operation and administration of commercial service airports within the United States. Prerequisites: Junior or Senior status, open to Aviation majors and minors only, and a minimum GPA of 2.6. F,S.

AVIT 403. Aerospace Law. 3 Credits.
This course is designed to introduce the student to the United States legal system and the development of air law. The course will cover a broad range of topics related to aviation operations including constitutional law, administrative law, Federal Aviation Administration enforcement actions, aircraft ownership issues, products liability law, criminal law, contract law, and international law. Course activities include case reading, argument, and legal research. Prerequisites: Junior or Senior status, open to Aviation majors and minors only, and a minimum GPA of 2.6. F,S,SS.

AVIT 405. Airline Operations and Management. 3 Credits.
This course examines the four major areas of air carrier operations, including ground, technical, flight and system operations, as well as airline economics, utilizing a management simulation tool. There is an intensive examination of regional, point-to-point and network carrier operations. Student management teams make weekly decisions in seven categories: Overall Strategy; Marketing; Operations Management; Human Resource Development; Finance; Asset Management; and Behavioral Elements. A portion of each class time is devoted to simulation activities, and the reading assignments focus on management decisions pertinent to the topic assigned, relying in part on current industry events, with an emphasis on ethical decision making. Prerequisites: Junior or Senior status, open to Aviation majors and minors only, and a minimum GPA of 2.6. F,S,SS.

AVIT 407. General Aviation Operations and Management. 3 Credits.
Aspects of the operation and management of corporate flight departments, fixed-base operations, air cargo operations, and fractional ownership programs will be discussed. Pertinent regulations including FAR parts 91 and 135 will be studied. Aircraft and equipment evaluations will be conducted. Prerequisites: Junior or Senior status, open to Aviation majors and minors only, and a minimum GPA of 2.6. F,S,SS.

AVIT 408. Fleet Planning and Aircraft Acquisition. 4 Credits.
This course will analyze the needs and missions of various business flight departments, provide insight into aircraft selection, and explore the details of aircraft acquisition. A broad range of issues will be discussed, including finance options, insurance coverage, and fleet management. Prerequisites: AVIT 102 or AVIT 142, AVIT 407, and a minimum GPA of 2.6. F.

AVIT 411. International and Long Range Navigation. 3 Credits.
This course provides an understanding of global charting systems, great circle routes and waypoint plotting. Problems and methods of international flight and modern systems of long range navigation are studied as well as methods and systems of computing, communicating and displaying navigation information. This course also gives the student a familiarization with the international airspace structure including Required Navigation Performance (RNP) standards, Minimum Navigation Performance Specification (MNPS) operations and Reduced Vertical Separation Standards (RVSM). Prerequisites: AVIT 241 or AVIT 325; open to aviation majors and minors only; minimum GPA of 2.6. F,S,SS.

AVIT 412. Aviation Safety Analysis. 3 Credits.
This course will examine the various techniques and processes used to assess and predict organizational risk as it pertains to aviation operations. The role of quality assurance within a Safety Management System (SMS) will be also explored. An introduction to specific aviation safety assurance programs will be conducted and will include safety surveys and formalized observations. Prerequisites: AVIT 311 and a minimum GPA of 2.6. F

AVIT 414. Certified Flight Instructor Certification. 5 Credits.
Provides the student with a detailed study of the responsibilities and teaching concerns of a flight instructor. The course is divided into two major sections: fundamentals of teaching and learning, including effective teaching methods, learning process, consideration of flight training syllabi, effective evaluations, and flight instructor responsibilities; the second section is concerned with the analysis of the flight maneuvers involved with Private Pilot, Commercial Pilot and Flight Instructor Certificates. The course will also provide practical teaching experiences. The student must complete the associated flight lessons in the CFI Flight Course to satisfactorily complete the course. Prerequisites: AVIT 325 and Junior or Senior status; open to Aviation majors and minors only; minimum GPA of 2.6. F,S,SS.
AVIT 415. Instrument Flight Instructor. 4 Credits.
Provides the student with an in-depth study of the responsibilities and techniques to be used as an Instrument Flight Instructor. This course will also include additional study of instrument flight, charts, publications and regulations pertaining to the IFR environment, further develop the student's knowledge of Technically Advanced Aircraft and provide practical teaching experience. The student must complete the associated flight lessons in the Instrument Flight Instructor course to satisfactorily complete the course. Prerequisites: AVIT 414 and Junior or Senior status; open to aviation majors and minors only; minimum GPA of 2.6. F.S,SS.

AVIT 416. Multi-Engine Flight Instructor. 2 Credits.
This course provides an understanding of the fundamentals of teaching in a multi-engine airplane. The course will include multi-engine aerodynamics and performance, analysis of multiengine operations, single-engine operations and procedures, flight instructor responsibilities, flight safety concerns and instrument flight maneuvers in multi-engine airplanes. The student must complete the associated flight lessons in the Multi-engine Airplane CFI course to satisfactorily complete the course. Prerequisites: AVIT 415 and Junior or Senior status; open to aviation majors and minors only; minimum GPA of 2.6. F.S,SS.

AVIT 419. SUAS Commercial Operations. 4 Credits.
This course will develop the student's knowledge and skill needed to manage and operate small unmanned aircraft systems in a commercial operation. Course content includes airspace authorization criteria, operational approval requirements, mission planning, data acquisition, and post processing of data. Mission employment skills will be acquired through both classroom and hands-on flight activities. Flight activities will include scenario based mission planning and execution. Students must complete the appropriate UAS flight lessons to satisfactorily complete the course. Prerequisites: AVIT 222, AVIT 331, AVIT 332, AVIT 333, AVIT 337 and a minimum GPA of 2.6. F.S.

AVIT 420. Transport Category Aircraft Systems. 3 Credits.
Beginning with a brief review of low speed aerodynamics, the course provides a study of the terminology and aerodynamics fundamentals associated with transonic and supersonic flight. Prerequisites: AVIT 325 and Junior or Senior status or consent of the instructor; open to aviation majors and minors only; minimum GPA of 2.6. F.S,SS.

AVIT 422. Multi-Engine Aircraft Systems. 4 Credits.
This course provides an in-depth study of the complex systems of today's air transport jet with an emphasis on the Canadair Regional Jet aircraft. It provides a review of all primary systems, to include both normal and abnormal operations. The course also provides the necessary background for Regional Jet simulator training to be presented in a later course. A course fee is charged for access to the Canadair Regional Jet virtual flight deck. Prerequisites: AVIT 325 and Junior or Senior status; open to aviation majors and minors only; minimum GPA of 2.6. F.S,SS.

AVIT 428. Transport Category Aircraft Systems. 4 Credits.
This course will provide an introduction to turboprop aircraft systems and procedures. Emphasis will be placed on the systems and operational procedures for a specific model of turboprop aircraft utilized by regional airlines. Course content and presentation will be similar to air carrier initial training. The course will be divided into four sections (overview, detect, identify and defeat), to cover all current and future lines of effort in a unified approach to counter UAS. Prerequisites: AVIT 241 and a minimum GPA of 2.6. F.S,SS.

AVIT 445. Commercial Pilot/Helicopter Certification Lab. 1 Credit.
This lab course is a continuation of commercial helicopter flight training and is completed after the student has obtained the Instrument-Helicopter rating. This course further refines the aeronautical decision making and flight proficiency skills necessary to obtain the Commercial Pilot Rotorcraft-Helicopter rating. Prerequisite: AVIT 343 and a minimum GPA of 2.6. S/U grading. F,S,SS.

AVIT 446. Control Tower/Radar Operations III. 4 Credits.
This course teaches advanced tower and RADAR operations and procedures combined. Students will learn about and practice military overhead maneuvers, arrivals and departures from uncontrolled airports, below Basic VFR minima operations, IFR operations, nighttime operations, in-flight and ground emergencies, bomb threat procedures, and special operations (incursions, hot cargo, and hijacking) procedures. This course follows the applicable required Federal Aviation Administration's learning objectives set forth in their Air Traffic Basics Course. To complete this course, students must demonstrate their knowledge of the preceding Control Tower and RADAR courses, in addition to this course's content. An Air Traffic lab is required. Prerequisites: AVIT 362, AVIT 363, and Junior or Senior status; open to aviation majors and minors only; minimum GPA of 2.6. F:S,SS.

AVIT 465. Control Tower/RADAR Operations IV. 4 Credits.
This is the capstone course for the Air Traffic Management program focusing on the interaction between the Tower, Terminal RADAR, and Enroute Facilities. The course provides students with highly advanced instruction on the ATM system, publications, Federal Aviation Regulations, separation standards, airspace utility, airport types and characteristics, fundamentals of navigation, pilot's environment, flight assistance and emergencies, special operations, wake turbulence, weather, communications, and teamwork. Instruction is delivered through classroom lecture, group discussions and scenarios with hands-on practice. This course follows the applicable required Federal Aviation Administration's learning objectives set forth in their Air Traffic Basics Course. To complete this course, students must successfully complete the FAA AT Basic Exam and the required advanced simulation scenarios without assistance. An Air Traffic lab is required. Prerequisites: AVIT 464 and Junior or Senior status; open to aviation majors and minors only; minimum GPA of 2.6. F,S,SS.
AVIT 468. Non-RADAR Environment. 4 Credits.
This course stresses the comprehensive knowledge of non-RADAR Air Traffic procedures, to include: airspace utilization, flight plans, general control procedures, board management, initial departure separation, IFR clearances to departing aircraft, communication requirements, and separation standards. Class scenarios will emphasize both enroute and terminal structures. This course follows the applicable required Federal Aviation Administration’s learning objectives set forth in their Air Traffic Basics Course. To complete this course, the student shall be required to demonstrate and apply the skills and knowledge required to successfully complete a non-RADAR performance exercise. An Air Traffic lab is required. Prerequisites: AVIT 415, AVIT 421, AVIT 428, and Junior or Senior status; open to aviation majors and minors only; minimum GPA of 2.6. F,S,SS.

AVIT 476. Risk Management. 3 Credits.
Risk Management. Prerequisite: Minimum GPA of 2.6. On demand.

AVIT 480. Advanced Aircraft Operations. 3 Credits.
The topics of study include high speed and high altitude aerodynamics, physiological aspects of high altitude flight, considerations associated with operations near high speed buffet boundaries, effects of turbulence on high speed aircraft, the effects of maneuvering load factors, FAR Part 25 takeoff and landing performance, along with the general study of applied systems management. The student must complete the associated flight lessons to satisfactorily complete the course. No concurrent enrollment allowed with other aviation flight courses. Prerequisites: AVIT 415, AVIT 421, AVIT 428, and Junior or Senior status; open to aviation majors and minors only; minimum GPA of 2.6. F,S,SS.

AVIT 485. Aviation Senior Capstone. 3 Credits.
This course will explore contemporary and ethical issues in the aviation industry. Students will work in multi-disciplinary teams to examine and solve issues related to global aviation, environmental concerns, technology advances, aviation safety and security practices, labor issues and aviation economics. Students will be required to demonstrate an understanding of information literacy and advanced communications through coursework. Prerequisites: AVIT 403, senior status, and a minimum GPA of 2.6. F, S.

AVIT 490. Methods and Materials in Teaching Aviation I. 2 Credits.
This course will acquaint the student with resources and software used in classroom teaching specific to aviation. Topics covered include teaching with technology, utilizing instructional aids, motivating students, marketing a program and a career exploration in aviation education. Students will also gain the experience of managing the Aerospace Learning Center. Prerequisite: AVIT 414 or consent of instructor; open to Aviation majors and minors only; minimum GPA of 2.6. Repeatable to 6 credits. On demand.

AVIT 491. Methods and Materials in Teaching Aviation II. 2 Credits.
This course will be a continuation of the work started in Aviation 490 by providing the student with additional opportunities in the use of resources and software used in classroom teaching specific to aviation. Additional emphasis will be placed on the development of course syllabi and lesson plans, delivering classroom lessons, and the critique, evaluation, and assessment of student and instructor performance. Students will also gain the experience of managing the Aerospace Learning Center. Prerequisites: AVIT 414 and Junior or Senior status or consent of instructor; open to Aviation majors and minors only; minimum GPA of 2.6. On demand.

AVIT 497. Aviation Internship. 1-4 Credits.
Aviation internship will provide a student with the actual, on-the-job exposure of a particular area of interest the student has within the aviation industry. Internships will be available in airport management, general aviation management, on both the manufacturer and fixed-base operator level and within the weather modification industry. The weather modification internship will be available only with the necessary federal funding or contractor support. A maximum of 4 credits will be allowed toward graduation. Prerequisites will vary depending on the area of the internship. Prerequisites: Junior or senior standing with a minimum GPA of 2.6 required; open to Aviation majors and minors only; prerequisites will vary depending on the area of the internship. Repeatable to 6 credits. F,S,SS.

AVIT 498. Advanced UAS Operations. 1-3 Credits.
This course is designed to develop advanced knowledge and skill in a specific area of expertise in UAS operations such as Original Equipment Manufacturer (OEM) certification, industry certifications, or special training on Autonomous platforms, payloads, and support equipment. Prerequisites: AVIT 438 or AVIT 419; a minimum GPA of 2.6. Repeatable to 6 credits. On demand.

AVIT 499. Readings in Aviation. 1-3 Credits.
Individual student projects designed to develop advanced knowledge in a specific area of expertise. A written report is required. Prerequisites: Senior standing; open to aviation majors and minors only; minimum GPA of 2.6. Repeatable to 8 credits. F,S,SS.

Bachelor of Science in Aeronautics with a Major in Air Traffic Management

NOTE: This program has a selective admission process. See your adviser for information.
Required: 120 credits (36 of which must be numbered 300 or above) including:
I. Essential Studies Requirements (see University ES listing).
II. School of Aerospace Sciences Requirements (see College section).
III. The following curriculum:

Essential Studies Courses
ENGL 110 College Composition I 3
ENGL 130 Composition II: Writing for Public Audiences 3
COMM 110 Fundamentals of Public Speaking 3
Social Science Electives 9
Fine Arts and Humanities Electives 9
ATSC 110 Meteorology I 3
ATSC 110L Meteorology I Laboratory 1
MATH 103 College Algebra 3
Math, Science, and Technology Elective 2

Aviation Courses
AVIT 100 Aviation Orientation 1
AVIT 102 Introduction to Aviation 5-6
or AVIT 142 Introduction to Aviation-Helicopter
& AVIT 143 and Private Pilot-Helicopter Certification Lab
AVIT 103 Introduction to Air Traffic Management 2
AVIT 126 Introduction to UAS Operations 2
AVIT 208 Aviation Safety 3
AVIT 250 Human Factors 2
AVIT 260 Control Tower Operations I 4
AVIT 261 RADAR Operations I 4
AVIT 362 Advanced Tower Operations II 4
AVIT 363 RADAR Operations II 4
AVIT 402 Airport Planning and Administration 3
AVIT 403 Aerospace Law 3
AVIT 464 Control Tower/Radar Operations III 4
AVIT 465 Control Tower/RADAR Operations IV 4
AVIT 468 Non-RADAR Environment 4
AVIT 485 Aviation Senior Capstone 3

Other Requirements
COMM 212 Interpersonal Communication 3
MGMT 300 Principles of Management 3
or AVIT 311 Safety Management System (SMS)
or AVIT 312 Aircraft Accident Investigation
Select one of the following: 3
BADM 225 Professional Communication for Business 3
or ENGL 228 Diversity in Global Literatures
or ENGL 229 Diversity in U.S. Literatures
or ENGL 308 The Art of Writing Nonfiction
Plus electives to total 120 credits. 22-23
Total Credits 120
Bachelor of Science in Aeronautics with a Major in Aviation Studies

Admission to this program requires the successful completion of an approved aviation technical program, with certification. Examples of approved technical certifications include: FAA Mechanic Certificate with Airframe and Powerplant ratings; FCC General Class Radio and Telephone License; FAA Aircraft Dispatcher License; FAA Commercial Pilot License; FAA Certified Tower Operator License or Radar Rating, or equivalent levels of certification in other related technical programs.

Required: 120 credits (36 of which must be numbered 300 or above) including:

I. Essential Studies Requirements (see University ES listing).

II. School of Aerospace Sciences Requirements (see College section).

III. The following curriculum:

**Aviation Requirements**

- ATSC 110 Meteorology I 3
- ATSC 110L Meteorology I Laboratory 1
- COMM 110 Fundamentals of Public Speaking 3
- ENGL 110 College Composition I 3
- ENGL 130 Composition II: Writing for Public Audiences 3
- MATH 103 College Algebra 3
- Fine Arts & Humanities 9
- Math, Science, and Technology 2
- Social Science 9

**Aviation Core Courses**

- AVIT 102 Introduction to Aviation 5
- AVIT 105 Essentials of Flight 2
- AVIT 126 Introduction to UAS Operations 2
- AVIT 208 Aviation Safety 3
- AVIT 250 Human Factors 2
- AVIT 403 Aerospace Law 3
- AVIT 485 Aviation Senior Capstone 3

**Select two of the following:**

- AVIT 402 Airport Planning and Administration 6
- AVIT 405 Airline Operations and Management 6
- AVIT 407 General Aviation Operations and Management 6

**Other Requirements**

- ATSC 231 Aviation Meteorology 4

**Required Courses - Airplane Option**

- AVIT 102 Introduction to Aviation 5
- AVIT 221 Basic Attitude Instrument Flying 3
- AVIT 222 IFR Regulations and Procedures 3
- AVIT 323 Aerodynamics - Airplanes 3
- AVIT 324 Aircraft Systems 3
- AVIT 325 Multi-Engine Systems and Procedures 2
- AVIT 414 Certified Flight Instructor Certification 5
- AVIT 415 Instrument Flight Instructor 4
- AVIT 421 Advanced Aerodynamics 3
- AVIT 428 Transport Category Aircraft Systems 4

**Bachelor of Science in Aeronautics with a Major in Commercial Aviation**

Required: 120 credits (36 of which must be numbered 300 or above) including:

I. Essential Studies Requirements (see University ES listing).

II. School of Aerospace Sciences Requirements (see College section).

III. The following curriculum:

**Essential Studies Courses**

- ENGL 110 College Composition I 3
- ENGL 130 Composition II: Writing for Public Audiences 3
- COMM 110 Fundamentals of Public Speaking 3
- Social Science Electives 9
- Fine Arts and Humanities Electives 9
- MATH 103 College Algebra 3
- Math, Science, and Technology Elective 2

**Aviation Core Courses**

- AVIT 100 Aviation Orientation 1
- AVIT 103 Introduction to Air Traffic Management 2
- AVIT 126 Introduction to UAS Operations 2
- AVIT 208 Aviation Safety 3
- AVIT 250 Human Factors 2
- AVIT 309 Flight Physiology 3
- AVIT 327 Gas Turbine Engines 2
- AVIT 403 Aerospace Law 3
- AVIT 411 International and Long Range Navigation 3
- AVIT 430 Crew Resource Management 3
- AVIT 485 Aviation Senior Capstone 3

**Select two of the following:**

- AVIT 402 Airport Planning and Administration 6
- AVIT 405 Airline Operations and Management 6
- AVIT 407 General Aviation Operations and Management 6

**Other Requirements**

- ATSC 231 Aviation Meteorology 4

**Required Courses - Aircraft Systems**

- AVIT 402 Aircraft Operation and Maintenance 3
- AVIT 405 Aircraft Systems 3
- AVIT 406 Aircraft Systems I 3
- AVIT 407 Aircraft Systems II 3
- AVIT 408 Aircraft Systems III 3
- MGMT 301 Operations Management 3
- MGMT 302 Human Resource Management 3
- MGMT 310 Organizational Behavior 3

Select 30 credits from the following:

- AVIT 310 Public Safety Aviation 3
- AVIT 311 Safety Management System (SMS) 3
- AVIT 312 Aircraft Accident Investigation 3
- AVIT 313 Aviation Insurance 3
- AVIT 408 Fleet Planning and Aircraft Acquisition 3
- ISBC 117 Personal Productivity with Information Technology 3
- ISBC 217 Fundamentals of Computer Information Systems 3
- BADM 225 Professional Communication for Business 3
- MGMT 300 Principles of Management 3

Students will be required to use their electives to establish expertise in a second field, which means completion of a second major, a minor, a specialization, or other degree sub-plans. The Aviation Department may be consulted to discuss other sub-plan options.
AVIT 480  Advanced Aircraft Operations  3

### Banking and Financial Economics

(See Economics (p. 82) listing)
Biochemistry and Molecular Biology (BMB)

Courses

BMB 301. Biochemistry. 3 Credits.
Topics including enzymology; bioenergetics; metabolism and its regulation; nucleic acid metabolism; recombinant DNA technology; structure and function of macromolecules. Prerequisite: CHEM 340 or CHEM 342 or an equivalent approved by the department. S.

BMB 401. Biochemistry of Proteins and Information Flow. 3 Credits.
This course will build upon the overview of biochemistry and molecular biology as presented in BMB 301. Topics to be presented include protein structure and function, enzymology, and the expression and transmission of genetic information. Prerequisite: BMB 301. F.

BMB 403. Advanced Biochemistry Laboratory. 2 Credits.
Students will demonstrate competency in understanding and performing physical and molecular techniques commonly used in biomedical research. Prerequisite: Permission of instructor. Prerequisites or Corequisite: BMB 401. F.

Biology (Biol)

B.S. with Major in Biology (p. 53)

B.S. with Major in Biology (Professional Health Sciences Emphasis) (p. 55)

B.S. with Major in Molecular and Integrative Biology (p. 57)

B.S. with Major in Fisheries and Wildlife Biology (p. 57)

Minor in Biology (p. 59)

Courses

BIOL 111. Concepts of Biology. 3 Credits.
Intended for non-science majors seeking general knowledge and cultural appreciation of contemporary biology. F.S.

BIOL 111L. Concepts of Biology Laboratory. 1 Credit.
A basic biology laboratory to complement BIOL 111. Prerequisite or Corequisite: BIOL 111. F.S.

BIOL 120. Orientation to the Biology Major. 1 Credit.
An introduction to careers available to students majoring in Biology and the coursework and other experiences valuable in pursuing those careers. S/U grading. F.

BIOL 121. Introduction to Fisheries and Wildlife Biology. 1 Credit.
This seminar will introduce Fisheries Wildlife Biology Majors to their program curriculum and profession. Topics will include the history and future directions of the Fish Wildlife Profession, specialties within the profession, coursework and training necessary for professional preparation, and potential opportunities for field experience during undergraduate education. Students will also meet fisheries and Wildlife Biologists working for state or federal agencies or non-governmental organizations to learn what they do and about opportunities for employment. Prerequisite: Permission of the instructor. F.

BIOL 150. General Biology I. 3 Credits.
Basic concepts of biology with emphasis on the process of science, metabolism, cell biology, plant and animal form and function, and physiology. Broadly designed to satisfy the needs of those pursuing biological and preprofessional curricula. F.

BIOL 150L. General Biology I Laboratory. 1 Credit.
A contemporary biology laboratory to complement BIOL 150, 151. Prerequisite or Corequisite: BIOL 150. F.

BIOL 151. General Biology II. 3 Credits.
Basic concepts of biology with emphasis on the process of science, genetics, molecular biology, evolution, biodiversity, and ecology. Broadly designed to satisfy the needs of those pursuing biological and preprofessional curricula. S.

BIOL 151L. General Biology II Laboratory. 1 Credit.
A contemporary biology laboratory to complement BIOL 150, 151. Prerequisite or Corequisite: BIOL 151. S.

BIOL 312. Evolution. 3 Credits.
A study of the processes that have led from the origin of life to the diverse patterns and forms of life observable today. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. S.

BIOL 312L. Evolution Laboratory. 1 Credit.
This course will focus on the application of evolutionary concepts by examining the evolution of organisms and genes. Students will use genetic data and relevant software to construct phylogenies and create tree of life pages. Prerequisites: BIOL 150 and BIOL 151. Corequisite: BIOL 312. S.

BIOL 315. Genetics. 3 Credits.
An introduction to genetics, with emphasis on classical genetic analysis and the biochemistry of gene transmission, expression and regulation. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. F.

BIOL 315R. Genetics Recitation. 1 Credit.
A recitation to aid students enrolled in BIOL 315: Genetics. The class is designed to review both “big idea” concepts from lecture as well as to work through genetics problems. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. Corequisites: BIOL 315. F.

BIOL 320. Forensic Biology. 3 Credits.
Forensic biology is the application of biological sciences to matters of law. This course covers the concept of biological evidence and focuses on human identification using the serological and genetic methods. This is one of the courses that the American Academy of Forensic Sciences recommends for forensic scientists. Prerequisites: BIOL 150 and BIOL 151. S.

BIOL 332. General Ecology. 3 Credits.
An introduction to ecology. Covers the relationship of individuals, populations, communities and ecosystems to their biotic and abiotic environments. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. F.

BIOL 332L. Gen Ecology Lab. 1 Credit.
Field projects and laboratory exercises to complement BIOL 332. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. Prerequisite or Corequisite: BIOL 332. F.

BIOL 333. Population Biology. 3 Credits.
Principles of population genetics, population ecology, and evolution in plants and animals. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, and MATH 93 or higher. S.

BIOL 336. Systematic Botany. 4 Credits.
Morphology, evolution, and classification of vascular plants with emphasis on the flora of the Great Plains. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or permission of instructor. F, even years.

BIOL 338. Animal Behavior. 2 Credits.
Studies in animal social behavior. The influences of environmental factors on behavior is emphasized. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L or an equivalent approved by the department. S, even years.

BIOL 341. Cell Biology. 3 Credits.
Description of processes common to life at the cellular level including: biochemical and structural organization, membrane function, motility, signal transduction, growth, division and genetic regulation of the cell. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L; Prerequisite or Corequisite: CHEM 122. S.

BIOL 341L. Cell Biol Lab. 1 Credit.
Laboratory investigation utilizing techniques to study life at the cellular level including chemical composition and characterization, enzyme kinetics, metabolism and microscopy. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L. Prerequisites or Corequisites: BIOL 341, CHEM 122. S.

BIOL 350. Plant Ecology. 3 Credits.
Structure and function of plants as they relate to the maintenance of plant populations and communities. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or permission of instructor. S, even years.

BIOL 360. Soil Ecology. 3 Credits.
This course will survey the abundance, distribution, and identity of biota that are present in soils, their ecological functions, methods of analysis, contemporary theories about soil ecology, and practical methods of promoting soil health in natural and managed systems. Prerequisites: BIOL 150, BIOL 151, and BIOL 332, or consent of instructor. S, odd years.
BIOL 363. Entomology. 4 Credits.
Structure, functions, life history, classification, habits and distribution of insects. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. F, even years.

BIOL 364. Parasitology. 2 Credits.
Classification, structure, functions, and life-cycles of parasites having importance to human, wildlife and veterinary health. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. F, odd years.

BIOL 364L. Parasitology Laboratory. 2 Credits.
A basic parasitology laboratory to complement BIOL 364. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. Prerequisite or Corequisite: BIOL 364. F, odd years.

BIOL 369. Histology. 2 Credits.
Microscopical anatomy of vertebrate tissues and organs, with emphasis on man and other mammals. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. S.

BIOL 369L. Histology Lab. 2 Credits.
A basic histology laboratory to complement BIOL 369. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. Prerequisite or Corequisite: BIOL 369. S.

BIOL 376. Animal Biology. 3 Credits.
Evolution, morpho-anatomy, development, reproduction and other aspects of the natural history of invertebrate and vertebrate animals. Prerequisites: BIOL 150 and BIOL 151. S.

BIOL 376L. Animal Biology Laboratory. 1 Credit.
Observation of live or fixed animals belonging to various invertebrate and vertebrate groups with emphasis on their adaptations to environment/life styles. Laboratory projects will include some of the classical and modern techniques used in systematic studies. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. Corequisite: BIOL 376. S.

BIOL 378. Developmental Biology. 3 Credits.
An overview of general stages and mechanisms of development, experimental approaches used to study developmental processes, and genetic and environmental influences that govern development. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 315 and BIOL 341. F.

BIOL 378L. Developmental Biology Lab. 1 Credit.
Developmental Biology Lab is a one-credit class designed to complement the Developmental Biology Course (BIOL378). In the laboratory students will be learning and applying a series of analytical and technical skills using a hands-on approach to fundamental development concepts. Students should come away from the course with a set of observational and technical skills as well as practical training in clear and accurate scientific documentation. Emphasis will be placed on the scientific method, data analysis, and effective written communication of results. Counts as an upper-division laboratory course. Prerequisite or Corequisite: BIOL 378. F.

BIOL 380. Disease Biology. 3 Credits.
A survey of the nature and etiology of infectious and parasitic disease in animals, pathogenicity and ways of transmission of most important disease agents and effect of disease on individual organisms and populations. Particular attention is given to emerging zoonotic diseases transmissible between animals and humans, and between wild and domestic animals. Prerequisites: BIOL 150 and BIOL 151. S, odd years.

BIOL 390. Endocrinology. 3 Credits.
This course focuses on the endocrine system of vertebrates. Students will learn how endocrine glands synthesize and secrete hormones and how hormones regulate gene expression, cell proliferation, cell differentiation, and cell physiology. Students build on these basic ideas to understand endocrine control of important developmental and physiological processes. Examples of positive and negative feedback loops will be presented throughout the semester. This reinforces the idea that endocrine glands and hormones work together as an integrated system to maintain homeostasis and produce complex biological cycles. Common endocrine disorders like diabetes mellitus, obesity, dyslipidemia (abnormal cholesterol levels), osteoporosis, erectile dysfunction, and polycystic ovary syndrome will be discussed. In summary, hormones produced by endocrine glands are required for normal development, survival, and reproduction. Prerequisites: BIOL 150, BIOL 151, and CHEM 122. F.

BIOL 396. Fisheries and Wildlife Biology Pre-Internship Seminar. 1 Credit.
The goal of this course is for students to identify internship opportunities to fulfill the required Cooperative Education internship requirement in the fisheries and wildlife biology major and to learn the necessary skills for successfully obtaining an internship and positions in the profession. Prerequisite or Corequisite: BIOL 121. F.

BIOL 397. Cooperative Education. 1-8 Credits.
A practical work experience with an employer under the direction of a supervisory faculty member. A written final report will be required and will be used as a basis for evaluation. Prerequisites: Sophomore standing and approval by the department chair and acceptance by a supervisory faculty member. Repeatable to 24 credits. S/U grading. F,S,SS.

BIOL 410. Molecular Biology Techniques. 4 Credits.
Applications of DNA and RNA analysis and recombinant DNA technologies, emphasizing practical experience in the laboratory. This class will meet twice a week for 50 minutes in the classroom, and students will be expected to work approximately 4-6 hours a week in the lab during open lab times. Counts as an upper-division laboratory course. Prerequisite: BIOL 315 is recommended. F,S.

BIOL 415. Genomics. 4 Credits.
Genomics describes the determination of the complete nucleotide sequence of an organism and subsequent analyses to decode the structural and functional information of all genes and regulatory sequences in the genome. This four-credit course will consist of lectures, computer lab sessions, in-class exercises, take-home assignments, student presentations, and discussion of research articles. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L and BIOL 315. S.

BIOL 416. Ecological Genomics. 3 Credits.
The objective of this course is to introduce students to the theories, vocabulary, and techniques used in the field of Ecological Genomics, which are drawn from ecology, genomics, evolution, and population genetics. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, BIOL 315, and BIOL 332. Prerequisite or Corequisite: BIOL 312. S, even years.

BIOL 418. Systems Biology. 3 Credits.
Living organisms are complex systems composed of numerous interacting parts. Systems biology seeks to understand biological phenomena by integrating the coordinated action of many components of a system using a multidisciplinary approach. This class introduces basic concepts and methods in systems biology with an emphasis on biological networks, gene regulation, intracellular signaling, development and pattern formation, metabolism, and the analysis of high-throughput "omics" data. Computer simulations are used heavily to gain deeper insight into system function. Counts as an upper-division laboratory course. Prerequisites: BIOL 315, BIOL 341, and MATH 103. F.

BIOL 420. Neuroscience. 3 Credits.
A course covering fundamental areas of neuroscience including neuroanatomy, cell and molecular neurobiology, sensory systems, motor systems, regulatory systems, nervous system development, and cognitive and behavioral neuroscience. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, and junior standing. F.

BIOL 425. Ichthyology. 3 Credits.
Structure and function, anatomy, physiology, behavior, classification, distribution and ecologic aspects of fishes. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. F, even years.

BIOL 426. Birds & Mammals. 4 Credits.
Birds and Mammals is designed to familiarize students with avian and mammalian biology, including anatomy and physiology, behavior, ecology, evolution and conservation. Lab exercises will be integrated with lecture to emphasize taxonomy and identification. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. S.

BIOL 430. Human Dimensions of Wildlife and Fisheries. 3 Credits.
This course explores interactions among humans and fisheries and wildlife resources, with a focus on principles important for understanding and addressing wildlife management. Topics will include public attitudes, expectations and diverse values of fisheries and wildlife resources; stakeholder engagement; public relations; governance; philosophy and ethics of resource use and management; and human dimensions research methodology. Prerequisites: BIOL 120, BIOL 150L, BIOL 151, and BIOL 151L. S, odd years.
BIOL 431. Wildlife Management. 4 Credits.
Theory and methods of management of wildlife populations. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. F; odd years.

BIOL 432. Techniques in Wildlife Population Assessment. 4 Credits.
Techniques in Wildlife Population Assessment is a course designed to teach wildlife biology students the techniques used to assess wildlife populations for conservation and management. Students learn the appropriate situations to use the techniques, how to properly conduct the procedures, how to collect data from the use of these techniques, and how to report the findings to a variety of audiences. The structure of the course is designed to teach students proper research methodology so that they not only know how and when to use the techniques, but also how they can apply their findings to make appropriate management recommendations for wildlife conservation and management under a variety of settings or conditions. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. F; even years.

BIOL 433. Aquatic Ecology. 3 Credits.
Analysis of the relationships between organisms and their physical, chemical and biological environments in freshwater ecosystems. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or an equivalent approved by the department. S; odd years.

BIOL 435. Large Mammal Ecology and Management. 3 Credits.
A course covering details of the population ecology, specialized management approaches and techniques, and conservation of large-bodied mammals in North America and worldwide. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L. Corequisites: BIOL 332 and BIOL 332L. F; odd years.

BIOL 438. Fisheries Management. 3 Credits.
Concepts and approaches to the management of freshwater fisheries. Course will include discussion of life histories and requirements of important regional sport fishes. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or instructor permission. S; even years.

BIOL 439. Conservation Biology. 3 Credits.
A course that integrates information from the disciplines of ecology, genetics, biogeography, economics, environmental policy, and ethics towards understanding how to maintain and restore biological diversity. F; odd years.

BIOL 442. Physiology of Organs and Systems. 3 Credits.
Study of the physiology of organs and organ systems in vertebrates. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, and Junior or Senior standing or an equivalent approved by the department. F.

BIOL 442L. Physiology of Organs and Systems Laboratory. 1 Credit.
A physiology laboratory to complement BIOL 442. Counts as an upper-division laboratory course. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, and BIOL 151L or an equivalent approved by the department. Prerequisite or Corequisite: BIOL 442. F.

BIOL 450. Molecular Genetics. 2 Credits.
Topics will include basic molecular genetic mechanisms, recombinant DNA technology, the organization and function of the cell nucleus, and the molecular control of gene expression. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, and BIOL 315 or an equivalent approved by the department. On demand.

BIOL 460. Molecular Biology of the Cell. 3 Credits.
A study of the structure and organization of the cell with a special emphasis on genetic regulation of the cell division cycle, the genetic basis of cancer, and the role of genes in the immune system. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, and BIOL 315 or and equivalent approved by the department. On demand.

BIOL 470. Biometry. 4 Credits.
Analysis of biological data. Covers descriptive statistics, inferential statistics (e.g., t-tests, goodness-of-fit tests, regression, ANOVA and non-parametric tests), and interpreting and presenting statistical results. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or equivalent approved by the department. F.

BIOL 480. Senior Capstone Seminar. 3 Credits.
Key aspects of scientific inquiry and communication are investigated and assessed. Students will participate in discussions of relevant current issues in biology and will develop an independent research project. This course provides an opportunity for students to integrate and apply knowledge and skills obtained in biology. Students must take course within 3 semesters of graduation. Prerequisite: Senior status in biological science or permission of instructor. F.S.

BIOL 481. Fisheries & Wildlife Senior Capstone. 3 Credits.
Key aspects of scientific inquiry and communication are investigated and assessed. Students will participate in discussions of relevant current issues in fisheries and wildlife biology and will complete an independent research project. The course provides an opportunity for students to integrate and apply knowledge and skills acquired in fisheries and wildlife biology. Prerequisites: BIOL 312, BIOL 315, BIOL 332 and senior status in Fisheries and Wildlife Biology or permission of the instructor. S.

BIOL 489. Senior Honors Thesis. 1-15 Credits.
Supervised independent study culminating in a thesis. Prerequisites: Consent of the department and approval of the honors committee. Repeatable to 15 credits. F.S.

BIOL 491. Seminar. 1 Credit.
Discussion of selected topics in advanced biology, a different topic each semester. Prerequisite: Major or minor in biology. Repeatable to 4 credits. On demand.

BIOL 492. Research. 1-4 Credits.
Research conducted under the supervision of a faculty member. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, BIOL 151L, and consent of instructor. Repeatable to 16 credits. F.S.

BIOL 494. Directed Studies. 1-4 Credits.
Designed to meet the needs of individual students in the areas of faculty specialization. Prerequisite: Consent of instructor. Repeatable to 9 credits. F.S.

BIOL 499. Special Topics. 1-4 Credits.
Important and current topics in biology not covered by other courses. Repeatable when topics vary. Prerequisites: BIOL 150, BIOL 150L, BIOL 151, and BIOL 151L or consent of instructor. Repeatable. On demand.

Bachelor of Science with Major in Biology

This program is designed for students interested in obtaining a broad background in biology, with maximum flexibility in program design. Students should consult with their adviser to develop an appropriate course of study. For example, students anticipating a career in biotechnology or biomedical science research may emphasize coursework in molecular, cellular and developmental biology. Students anticipating careers with ecological and evolutionary applications may emphasize coursework that explores animal behavior, biodiversity, evolutionary history and interactions of organisms and their environments.

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies requirements (See University ES listing, minimum 39 total credits.) The following courses must be taken as part of the Essential Studies requirement:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 110</td>
<td>College Composition I</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 130</td>

BIOL 315 Genetics 3
BIOL 332 General Ecology 3
BIOL 341 Cell Biology 3
BIOL 480 Senior Capstone Seminar ** 3

Total Credits 24

* Students who take BIOL 111 Concepts of Biology and BIOL 111L Concepts of Biology Laboratory and earn a grade of "B" or higher in both of those courses prior to becoming a Biology major may complete the General Biology sequence by taking BIOL 150 General Biology and BIOL 150L General Biology I Laboratory.

** Three credits for an accepted BIOL 489 Senior Honors Thesis can be substituted for the BIOL 480 Senior Capstone Seminar with prior approval of the thesis topic by the Chair of Biology.

We strongly advise mastery of materials in all core courses except BIOL 480 Senior Capstone Seminar prior to enrolling in other 300 or 400 level Biology courses.

At least 15 of the total 44 credits required for the BS degree must be taken in the UND Biology department, exclusive of the credits earned in other departments and institutions.

B. Advanced requirements (minimum 20 credit hours):

1. Electives. All 300 or 400 level Biology courses will count toward the 20 elective credit hours needed. Certain science courses in other departments may also qualify as electives (see examples below).

   Students may include no more than ten combined credit hours from BIOL 494 Directed Studies; BIOL 492 Research; BIOL 491 Seminar, and BIOL 489 Senior Honors Thesis towards the total 44 credit hours required for this Biology major.

2. Laboratory Requirement. At least four upper-division Biology courses with laboratories must be included in the 44 hour major. The following labs or courses satisfy this requirement:

* BIOL 494 Directed Studies or BIOL 492 Research may be counted as one upper-division laboratory requirement with appropriate documentation of the laboratory experience and approval by the supervising faculty member and the Biology Department Chairperson prior to taking the research credits.

Up to two upper-division, life sciences-related laboratory courses from UND departments outside Biology may be counted toward the four-course, upper-division laboratory requirement. See details about non-Biology courses below.

Up to three of the following courses from UND departments outside Biology can be applied toward the 20 elective credits required for a BS in Biology degree.

ANAT 204 Anatomy for Paramedical Personnel
& 204L and Anatomy for Paramedical Personnel Laboratory
ANTH 325 Human Origins
ANTH 335 Primates
BMB 401 Biochemistry of Proteins and Information Flow
BMB 403 Advanced Biochemistry Laboratory
MBIO 302 General Microbiology Lecture & 302L and General Microbiology Laboratory
MBIO 328 Introduction to Immunology
PPT 301 Human Physiology

- BMB 301 Biochemistry will not be allowed to fulfill elective requirements
- MBIO 202 Introductory Medical Microbiology Lecture/MBIO 202L Introductory Medical Microbiology Laboratory will only be allowed with special permission of the Biology department.
- Only ANAT 204L Anatomy for Paramedical Personnel Laboratory, BMB 403 Advanced Biochemistry Laboratory, and MBIO 302L General Microbiology Laboratory from the above list can be applied toward the requirement for four advanced labs. PPT 301 Human Physiology will not be allowed for the advanced lab requirement.
- PPT 301 Human Physiology and BIOL 442 Physiology of Organs and Systems/BIOL 442L Physiology of Organs and Systems Laboratory will not both be counted towards the 44 credit requirement for a UND Biology degree.
- Other courses will be considered on a case by case basis. To have a course considered, the student should provide a syllabus to the Department Chair.

III. Cognate requirements in other departments (29-32 credit hours):

Statistical Methods and Data Interpretation

Select one of the following: 3-4
**Bachelor of Science with Major in Biology (Professional Health Sciences Emphasis)**

This major is designed for students interested in medical professions (medicine, osteopathic medicine, dentistry, optometry, pharmacy, podiatry and veterinary), or allied medical professions (physician assistant, occupational therapy, physical therapy, or medical research). Health sciences students should consult with their Biology advisor and the Health Sciences advisor in the College of Arts and Sciences to develop an appropriate course of study.

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND), including:

I. Essential Studies requirements (see University ES listing, minimum 39 total credits). The following courses must be taken as part of the Essential Studies requirement:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 110</td>
<td>College Composition I</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 130</td>
<td>Composition II: Writing for Public Audiences</td>
<td>3</td>

</tbody>
</table>

- Students who take BIOL 111 Concepts of Biology and BIOL 111L Concepts of Biology Laboratory earn a grade of "B" or higher in both of those courses prior to becoming a Biology major may complete the General Biology sequence by taking BIOL 150 General Biology I and BIOL 150L General Biology I Laboratory.

** Three credits for an accepted BIOL 489 Senior Honors Thesis can be substituted for the BIOL 480 Senior Capstone Seminar with prior approval of the thesis topic by the Chair of Biology.

We strongly advise mastery of materials in all core courses except BIOL 480 Senior Capstone Seminar prior to enrolling in other 300 or 400 level Biology courses.

At least 15 of the total 39 credits required for the BS degree must be taken in the UND Biology department, exclusive of the credits earned in other departments and institutions.

B. Advanced requirements (minimum 21 credit hours):

<table>

Formal admission to Teacher Education is required and is normally sought while enrolled in T&L 250 Introduction to Education (see Department of Teaching and Learning (p. 206) listing). Biology majors seeking secondary certification must have an adviser both in the Biology Department and in the Department of Teaching and Learning.
BIOL 418 Systems Biology
BIOL 420 Neuroscience
BIOL 442 Physiology of Organs and Systems
BIOL 442L Physiology of Organs and Systems Laboratory
MBIO 302 General Microbiology Lecture
MBIO 302L General Microbiology Laboratory
MBIO 328 Introduction to Immunology

2. Other Electives:
- BIOL 312 Evolution
- BIOL 320 Forensic Biology
- BIOL 332 General Ecology
- BIOL 333 Population Biology
- BIOL 341L Cell Biol Lab
- BIOL 376 Animal Biology
- BIOL 376L Animal Biology Laboratory
- BIOL 410 Molecular Biology Techniques

3. Laboratory Requirement. At least four upper-division Biology courses with laboratories must be included. The following labs or courses satisfy this requirement:
- BIOL 312L Evolution Laboratory
- BIOL 332L Gen Ecology Lab
- BIOL 336 Systematic Botany
- BIOL 341L Cell Biol Lab
- BIOL 363 Entomology
- BIOL 364L Parasitology Laboratory
- BIOL 369L Histology Lab
- BIOL 376L Animal Biology Laboratory
- BIOL 410 Molecular Biology Techniques
- BIOL 415 Genomics
- BIOL 416 Ecological Genomics
- BIOL 418 Systems Biology
- BIOL 425 Ichthyology
- BIOL 426 Birds & Mammals
- BIOL 431 Wildlife Management
- BIOL 438 Fisheries Management
- BIOL 442L Physiology of Organs and Systems Laboratory

* All 300 or 400 level Biology courses, including any of those listed above, will count toward the elective credit hours needed. Certain sciences courses in other departments may also qualify as electives (see examples below).

** No more than 10 combined credit hours from BIOL 494 Directed Studies; BIOL 492 Research; BIOL 491 Seminar; and BIOL 489 Senior Honors Thesis, will count towards this 39 credit major.

** BIOL 494 Directed Studies, or BIOL 492 Research may be counted as one upper-division laboratory requirement with appropriate documentation of the laboratory experience and approval by the supervising faculty member and the Biology Department Chairperson prior to taking the research credits.

Up to two upper-division, life sciences-related laboratory courses from UND departments outside Biology may be counted toward the four-course, upper-division laboratory requirement. See details about non-Biology courses below.

* Up to three of the following courses from UND departments outside Biology can be applied toward the 39 credits required for a BS in Biology degree.

* ANAT 204 Anatomy for Paramedical Personnel & 204L Anatomy for Paramedical Personnel Laboratory
* BMB 401 Biochemistry of Proteins and Information Flow
* BMB 403 Advanced Biochemistry Laboratory
* MBIO 302 General Microbiology Lecture & 302L General Microbiology Laboratory
* MBIO 328 Introduction to Immunology
* PPT 301 Human Physiology
* MBIO 202 Introductory Medical Microbiology Lecture/MBIO 202L Introductory Medical Microbiology Laboratory will only be allowed with special permission of the Biology department.
* PPT 301 Human Physiology will not be allowed for the advanced lab requirement.
* ANAT 204L Anatomy for Paramedical Personnel Laboratory, BMB 403 Advanced Biochemistry Laboratory, and MBIO 302L General Microbiology Laboratory can be applied toward the requirement for four advanced labs. PPT 301 Human Physiology will not be allowed for the advanced lab requirement.
* PPT 301 Human Physiology and BIOL 442 Physiology of Organs and Systems/BIO 442L Physiology of Organs and Systems Laboratory will not both be counted towards the 39 credit requirement for this UND Biology degree.
* Other courses will be considered on a case by case basis. To have a course considered, the student should provide a syllabus to the Department Chair.

III. Cognate requirements in other departments (29-32 credit hours):

**Mathematics**
- MATH 146 Applied Calculus I **3-4**
  or MATH 165 Calculus I

**Chemistry**

<table>
<thead>
<tr>
<th>General chemistry</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 121 General Chemistry I &amp; 121L and General Chemistry I Laboratory &amp; CHEM 122 and General Chemistry II Laboratory &amp; CHEM 122L and General Chemistry II Laboratory</td>
</tr>
</tbody>
</table>

**Organic Chemistry**
- CHEM 341 & 341L Organic Chemistry I and Survey of Organic Chemistry Laboratory & BMB 301 and Biochemistry

**Physical Sciences**
- PHYS 161 & PHYS 162 Introductory College Physics I and Introductory College Physics II (OR)

**Statistical Methods and Data Interpretation**
Select one of the following: 3
- BIOL 470 Biometry
- PSYC 241 Introduction to Statistics
- SOC 326 Sociological Statistics
- MATH 321 Applied Statistical Methods

* Students with a particular aptitude for mathematics should consider taking both MATH 165 Calculus I and MATH 166 Calculus II and should consult with their adviser regarding this potential option.

** Prerequisites for either course are the responsibility of the student.
The chemistry sequence CHEM 221, CHEM 221L, CHEM 254, and CHEM 254L is intended for students with a strong background and interest in chemistry and presumes some exposure to calculus.

The sequence of CHEM 341 Organic Chemistry I and CHEM 342 Organic Chemistry II AND BMB 301 Biochemistry is highly recommended for pre-medicine students because some medical schools require or prefer this combination.

Students may take BIOL 470 and have those credits count toward biology electives AND satisfy the statistics requirement.

Bachelor of Science with Major in Fisheries and Wildlife Biology

The Department offers a four-year program leading to the degree of Bachelor of Science in Fisheries and Wildlife Biology. Students completing this program are qualified to obtain positions with state, federal and private fisheries and wildlife organizations.

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies requirements (see University ES listing, minimum 39 total credits). The following courses must be taken as part of the Essential Studies requirement:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 110 College Composition I</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 130 Composition II: Writing for Public Audiences</td>
<td>3</td>
</tr>
<tr>
<td>COMM 110 Fundamentals of Public Speaking</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 9

II. The following curriculum:

55-58 major hours, including:

Basic Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 121 Introduction to Fisheries and Wildlife Biology</td>
<td>1</td>

Total Credits 55-58

Students who take BIOL 111 Concepts of Biology and BIOL 111L Concepts of Biology Laboratory and earn a grade of "B" or higher in both of those courses prior to becoming a Fisheries and Wildlife Biology major may complete the General Biology sequence by taking BIOL 150 General Biology I and BIOL 150L General Biology I Laboratory.

We strongly advise mastery of materials in all basic courses prior to enrolling in other 300 or 400 level Biology courses.

Three credits of an accepted Senior Honors Thesis (BIOL 489) can be substituted for the Fisheries and Wildlife Senior Capstone (BIOL 481) with prior approval of the thesis topic by the Chair of Biology.

Management courses (BIOL 430, BIOL 431, BIOL 432, BIOL 438, or BIOL 439) taken beyond the two courses required to satisfy the management course requirement can be applied to the electives, up to a 4 credit maximum. If two plant courses are taken, the second plant course can be applied to the electives.

III Cognate courses required in other departments:

</tbody>
</table>

Total Credits 18-19

Bachelor of Science with Major in Molecular and Integrative Biology

Study of life science in the past has been largely confined to the intellectual platforms associated with individual levels of biological organization, e.g., molecular biology, cellular biology, physiology of organisms, and ecology. This degree program emphasizes integration of knowledge across levels of biological organization from the gene/molecular/cellular to the development and physiology of individual organisms, along with their adaptation to local environments. The new training model has greater potential to contribute to educational success, medical advances, technological innovation, and commercialization of knowledge. Coursework in the degree provides a strong foundation for students planning to either continue their studies in medical science, graduate, and professional programs or pursue technical positions/further training or professional positions in applied health science and biotechnology. Students in the degree program will be encouraged, depending on their interests, to pursue research experiences with faculty in the medical or life sciences, and internships with regional biotechnology corporations.
Bachelor of Science with Major in Molecular and Integrative Biology

Required 120 credits, 36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution, including:

I. Essential Studies (ES) requirements (See University ES listing), minimum 39 total credits. The following course must be taken as part of the Essential Studies requirement:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 110 Fundamentals of Public Speaking</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 3

II. Core and Advanced Requirements (48 credit hours):

A. Core requirements (24 hours), all courses below:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 120 Orientation to the Biology Major</td>
<td>1</td>
</tr>
<tr>
<td>BIOL 150 General Biology I &amp; BIOL 151 and General Biology II</td>
<td>6</td>

<td>3</td>
</tr>
<tr>
<td>BIOL 341 Cell Biology</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 480 Senior Capstone Seminar</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 24

* Students who take BIOL 111 Concepts of Biology and BIOL 111L Concepts of Biology Laboratory and earn a grade of "B" or higher in both of those courses prior to becoming a Molecular & Integrative Biology major may complete the General Biology sequence by taking BIOL 150 General Biology I and BIOL 150L General Biology I Laboratory.

** Three credits for an accepted BIOL 489 Senior Honors Thesis can be substituted for the BIOL 480 Senior Capstone Seminar with prior approval of the thesis topic by the Chair of Biology.

We strongly advise mastery of materials in all core courses except BIOL 480 Senior Capstone Seminar prior to enrolling in other 300 or 400 level Biology courses.

No more than one Biology course at the 200 level will count toward the 48 hour major.

At least four upper-division Biology courses with laboratories must be included in the 48 hour major. Specifically:

- The following courses qualify: 332L General Ecology Laboratory; 336 Systematic Botany; 341L Cell Biology Laboratory; 363 Entomology; 364L Parasitology Laboratory; 369L Histology Laboratory; 376L Animal Biology Laboratory; 378L Developmental Biology Lab; 410 Molecular Biology Techniques; 415 Genomics; 416 Ecological Genomics; 418 Systems Biology; 425 Ichthyology; 426 Birds and Mammals; 431 Wildlife Management; 442L Physiology of Organs and Systems Laboratory; 412L Evolution Lab.

- BIOL 494 Directed Studies, or BIOL 492 Research, may be counted as one upper-division laboratory requirement with appropriate documentation of the laboratory experience and approval by the supervising faculty member and the Biology Department Chairperson prior to taking the research credits.

- Up to two upper-division, life sciences-related laboratory courses from the UND departments outside Biology may be counted toward the four-course, upper-division laboratory requirement, provided they do not overlap extensively with subject matter in Biology Department courses also being used for credit. Only ANAT 204L Anatomy for Paramedical Personnel Laboratory, BMB 403 Advanced Biochemistry Laboratory and MBIO 302L General Microbiology Laboratory can be applied toward the requirement for four advanced labs. PPT 301 Human Physiology will not be allowed for the advanced lab requirement.

No more than two upper-division, life sciences-related courses (lecture + lab = 1 course) from UND departments outside Biology will count toward the 48 hour major. Specifically:

- PPT 301 Human Physiology and BIOL 442 Physiology of Organs and Systems/BIOL 442L Physiology of Organs and Systems Laboratory will not both be counted towards the 48 credit requirement for the degree.
- Other courses will be considered on a case by case basis. To have a course considered provide a syllabus to the Department Chair.
- At least 15 of the total 48 credits required for the BS degree must be taken in the UND Biology department, exclusive of the credits earned in other departments.

B. Advanced requirements (minimum 24 credit hours):

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>at least 2 of the following</td>
<td></td>
</tr>
<tr>
<td>BIOL 415 Genomics</td>

<tr>
<td>BIOL 397 Cooperative Education (2 cr.)</td>
<td>2-3</td>
</tr>
<tr>
<td>BIOL 492 Research (3 cr.)</td>
<td></td>
</tr>
</tbody>
</table>

Additional Electives up to at least 24 total

* To identify potential research opportunities in faculty labs, government agencies, or the biotechnology industry, students are encouraged to consult with their advisor and engage with faculty and/or regional biotech corporations early in their program of study regarding availability of research and internship opportunities. Research in other departments or colleges may also satisfy this requirement, with prior approval from the Department Chair.

III. Cognate requirements in other departments (27-31 credit hours):

**Mathematics**

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>

All other 300 or 400 level biology courses, including those listed above that have not already been taken to meet the minor requirements, will count toward the 20 hour minor.

No more than one UND life science course from outside the Biology Department may be counted toward completion of the minor.

## Biomedical Science (BIMD)

### Courses

**BIMD 492. Peer Teaching and Tutoring in Biomedical Sciences. 1-4 Credits.**
A course designed to provide individual students with the opportunity to peer teach and/or tutor for classes in the department of Biomedical Sciences. This experience will occur under the direction of a departmental faculty member. Experiences will have variation dependent on the class the student is assisting with. Open to all students with consent of the faculty member. Repeatable to 12 credits. S/U grading. F,S,SS.

**BIMD 494. Directed Studies. 1-4 Credits.**
A course designed to provide individual students with the opportunity for creative, scholarly and research activities in Biomedical Sciences under the direction of a departmental faculty member. Repeatable to 12 credits.

## Business Administration (BAdm)

**Minor in International Business (p. 60)**

**Minor in Chinese Studies: Culture and Business (p. 60)**

**Minor in Sport Business (p. 60)**

The College of Business and Public Administration offers two courses under the BAdm prefix that are available to any student on campus. Our Introduction to Business course fulfills essential studies requirements and provides students with an overview of all business topics. BAdm 395 courses are generally restricted to business majors. The purpose of these courses is to provide special interest courses for particular groups of students. The course title and number may also be used for experimental courses which may later be established as regular offerings within departments or programs.

**BADM Courses**

**BADM 101. Introduction to Business. 3 Credits.**
An essential studies business course and the first step in a well-planned learning agenda that prepares students to become contributing citizens capable of making astute personal economic decisions. Topics covered include economic environment, global competition, entrepreneurship, general and human resources management, marketing, accounting, finance, information systems, and challenges of business careers. In order to foster students’ ability to think critically, the course emphasizes an integrated approach that provides opportunities for synergy among various business functions. F,S,SS.

**BADM 105. Career Development I. 1 Credit.**
This course is the first in a series of four courses designed to address career exploration processes. Through this series of courses, important topics such as exploring career interests, developing a resume, improving interview skills, learning effective networking skills, and working with a mentor are covered. Prerequisite: CoBPA pre-majors and majors only. F.S.

**BADM 106. Career Development II. 1 Credit.**
This course is the second in a series of four courses designed to address career exploration processes. Through this series of courses, important topics such as exploring career interests, developing a resume, improving interview skills, learning effective networking skills, and working with a mentor are covered. Prerequisites: BADM 105 and CoBPA pre-majors and majors only with sophomore or above standing. F.

**BADM 205. Career Development III. 1 Credit.**
This course is the third in a series of four courses designed to address career exploration processes. Through this series of courses, important topics such as exploring career interests, developing a resume, improving interview skills, learning effective networking skills, and working with a mentor are covered. Prerequisites: BADM 105, BADM 106, and CoBPA pre-majors and majors only with Junior or above standing. S.

**BADM 206. Career Development IV. 1 Credit.**
This course is the fourth in a series of four courses designed to address career exploration processes. Through this series of courses, important topics such as exploring career interests, developing a resume, improving interview skills, learning effective networking skills, and working with a mentor are covered. Prerequisites: BADM 105, BADM 106, and CoBPA pre-majors and majors only with Senior standing. F.S.

**BADM 225. Professional Communication for Business. 3 Credits.**
An overview of the communication process, including composition of business letters and reports, use of computer technologies, strategies for oral communication and listening, as well as a brief review of writing mechanics. Clear, concise, effective presentation and logical organization of business messages are emphasized. F.S.

**BADM 316. Introduction to Business in China. 3 Credits.**
An overview of China’s past, present and future with particular emphasis on cross-cultural business skills and doing business in China today. S.

**BADM 318. China Then and Now. 3 Credits.**
Offered only in China, this course examines China’s culture, customs, politics, and artistic heritage through existing monuments, temples, historic residences, city structures and artifacts. SS.

**BADM 319. Business Fieldwork in Shanghai. 3 Credits.**
Offered only in China, this course exposes students to the practical problems associated with conducting business in China through lectures and fieldwork. SS.

**BADM 325. Business Research Writing and Culture. 3 Credits.**
An exposure to research writing, including what research is and its importance in the business world. Students will be shown how to gather data, analyze data, and manage the writing process. Students will learn how to develop and structure an academic research paper that demonstrates cultural agility. Prerequisites: ENGL 110 or ENGL 130. S.

**BADM 395A. Special Topics. 1-4 Credits.**
Specially arranged seminars, courses, or independent study on a variety of subjects not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved. BADM 395A-B repeatable to 9 credits. Repeatable to 9 credits. F,S,SS.
Minor in Chinese Studies: Culture and Business

The minor in Chinese Studies: Culture and Business is offered through the College of Business and Public Administration and is open to all students across campus. The Chinese Studies minor provides a formal, structured, multidisciplinary approach to the study of modern China, its history, language, customs, culture and economy. The program targets students from all majors for in-depth examination of a region of growing global importance with special emphasis on the practical development of cross-cultural business skills. The minor requires a minimum of 23 credits in three different categories: Chinese language, area studies and business. It also requires fieldwork or an internship experience in China.

Program Requirements: a minimum of 23 credits distributed between Parts A, B and C as follows:

**Language (Part A)**
- CHIN 101 First Year Chinese I 4
- CHIN 102 First Year Chinese II 4

**Area Studies (Part B)**
Select two of the following:
- CHIN 305 Chinese Culture Through Films
- CHIN 306 Introduction to Chinese Calligraphy
- HIST 362 Modern China
- PHIL 316 Daoism and Confucianism
- GEOG 463 Regional Geography
- ENGL 299 Special Topics

**Business Studies (Part C)**
- BADM 316 Introduction to Business in China 3
- BADM 318 China Then and Now 6
- & BADM 319 Introduction to Business in China & Business Fieldwork in Shanghai (summer in China) or BADM 497 Internship in China

**Total Credits** 23

Minor in International Business (for Business majors only)

The College of Business and Public Administration provides undergraduate business students with the opportunity to earn a minor in international business. The minor requires a minimum of 24 semester hours: nine hours from various international business courses, nine hours from various arts and sciences courses focused on global issues, and achievement of a Level II proficiency in a language (8 hours) or approved study abroad (6 hours).

Required 24-26 hours, including:

Select three of the following:
- ACCT 380 International Accounting 3
- ECON 338 International Economics 3
- ECON 380 Global Economic Development 3
- ECON 438 International Money and Finance 3
- FIN 430 International Financial Management 3
- MGMT 420 Multinational Management 3
- MRKT 325 International Marketing 3

Select three of the following:
- ANTH 171 Introduction to Cultural Anthropology 3
- GEOG 161 World Regional Geography 3
- HIST 102 Western Civilization II 3
- POLS 220 International Politics 3
- POLS 225 Comparative Politics 3

Completion of Level II Proficiency in a language (8 hours) or approved university study abroad (6 hours). Completion of B.B.A. or B.Acc. degree

**Total Credits** 24-26

* Only one of the above economic courses may be used.

Minor in Sport Business

The College of Business and Public Administration provides undergraduate students with the opportunity to earn a minor in sport business. Students receive a conceptual grounding in sport-specific business thought through coursework as well as experience in the sports field through internship opportunities. Students are encouraged to select a major which corresponds to a sport career choice of interest. Options are covered in the Introduction

**Sport Business Internships**
- SPRT 397 or SPRT 497 are required in the Sport Business minor. Credits beyond the first three are elective credits. Repeatable to a maximum of 6 credits. Prerequisite: Approval of Sport Business Internship Coordinator. Repeatable to 6 credits. On demand.

**Sport Business Courses**
- SPRT 205. F.
- SPRT 205. Introduction to Sport Business. 3 Credits. An overview of the business of sport, including career opportunities. A study of the value of professional business practices to sport organizations. F.S.

**Special Topics in Sport Business**
- SPRT 395. Special Topics in Sport Business. 1-3 Credits. Specific topics will vary. Provides opportunities for in-depth study beyond that of regularly scheduled courses. May be seminars, workshops, or lectures. Repeatable to a maximum of 6 credits. Prerequisite: SPRT 205. Repeatable to 6 credits. On demand.

**Sport Financial Management**
- SPRT 320. Sport Financial Management. 3 Credits. Addresses how sport entities such as professional sport franchises, professional sport leagues, university athletic departments and government-funded programs operate from a financial standpoint. Prerequisite: SPRT 205. F.

**Sport Law**
- SPRT 330. Sport Law. 3 Credits. Identification and analysis of legal issues, and the ramifications of these issues as they relate to the sports industry. Includes coverage of contracts, antitrust law, labor relations, collective bargaining, agent-athlete relations, intellectual property, governing bodies, and presentation of the athlete. Prerequisite: SPRT 205. F.

**Sport Financial Management**
- SPRT 320. Sport Financial Management. 3 Credits. Addresses how sport entities such as professional sport franchises, professional sport leagues, university athletic departments and government-funded programs operate from a financial standpoint. Prerequisite: SPRT 205. F.

**Sport Law**
- SPRT 330. Sport Law. 3 Credits. Identification and analysis of legal issues, and the ramifications of these issues as they relate to the sports industry. Includes coverage of contracts, antitrust law, labor relations, collective bargaining, agent-athlete relations, intellectual property, governing bodies, and presentation of the athlete. Prerequisite: SPRT 205. F.
CHE 305. Separations. 3 Credits.
Theory and application of rate-based and equilibrium-staged separations. Prerequisites: CHE 303 and CHE 201 with a grade of C or better; Chemical Engineering majors only or permission of instructor. Prerequisite or Corequisite: CHE 206. S.

CHE 315. Engineering Statistics and Design of Experiments. 3 Credits.
Statistical background needed to plan, conduct, and analyze engineering experiments. Topics include propagation of error, confidence intervals, hypothesis testing, linear regression, analysis of variance, and an introduction to statistical design of experiments. Prerequisite: CEM majors only or permission of instructor. Prerequisite or Corequisite: MATH 265. S.

CHE 321. Chemical Engineering Reactor Design. 3 Credits.
Theory of chemical reaction rates. Design of batch, tubular, CSTR and catalytic chemical reactors. Prerequisites: CHE 206, MATH 266 and C or better in CHE 201; Chemical Engineering majors only or permission of instructor. S.

CHE 331. Chemical Engineering Laboratory II. 2 Credits.
Experiments illustrating physico-chemical principles and the application of fluid flow and heat transfer theory. Prerequisites: CHE 315, CHE 206, and C or better in CHE 201; Chemical Engineering majors only or permission of instructor. F.

CHE 332. Chemical Engineering Laboratory III. 2 Credits.
Experiments reinforcing physico-chemical principles, unit operations, and separations. Pre-design labs are also introduced. Prerequisites: CHE 331; Chemical Engineering majors only or permission of instructor. S.

CHE 335. Chemical Engineering Summer Laboratory II. 3 Credits.
Experiments reinforcing physico-chemical principles, unit operations, separations, and mass and energy balances. Pre-design labs are also introduced. Prerequisites: CHE 201, CHE 206, CHE 315 and either CHE 232 or CHE 235; Chemical Engineering majors only or permission of instructor. SS.

CHE 380. Service Learning. 1-3 Credits.
Design and implementation of engineering-related projects to serve the community, including K-12 STEM outreach. Hands-on design experience by the student working as an individual or part of a team. Repeatable to 9 credits. S/U grading. F,S.

CHE 381. Experiential Learning. 1-3 Credits.
Hands-on design experience by student teams. May include interdisciplinary work on engineering student design competitions. Repeatable to 9 credits. S/U grading. F,S.

CHE 397. Cooperative Education. 1-2 Credits.
A practical work experience with an employer closely associated with the student's academic area. Arranged by mutual agreement among student, department and employer. Prerequisite: Sophomore standing in the chemical engineering degree program; Cumulative GPA of 2.0 or higher. Repeatable to 12 credits. S/U grading. F,S,SS.

CHE 403. Molecular Thermodynamics and Kinetics. 3 Credits.
a theoretical and mathematical understanding of statistical thermodynamics, quantum mechanics and kinetic theory of gases. Focus on estimating macroscopic thermodynamic and transport properties, equilibrium constants, and kinetic rate constants from a microscopic description of matter. Prerequisites: CHE 303 and CHE 321; CEM majors only or permission of instructor. F.

CHE 404. Air Emissions: Regulation and Control. 3 Credits.
This course is designed to enable engineers to understand natural and anthropogenic sources of air pollution, their impact on health and the environment, and learn ways to minimize air emissions by application of control practices. F.

CHE 408. Process Dynamics and Control. 3 Credits.
Dynamics and control of chemical processes and of systems. Prerequisites: MATH 266, CHE 206, and CHE 305; Chemical Engineering majors only or permission of instructor. F.

CHE 411. Plant Design I: Process Design and Economics. 4 Credits.
Introduction to how projects are executed in the process industries, including an understanding of what constitutes preliminary process design, preliminary cost estimation, the fundamentals of economics as applied to process economic assessment, sustainability considerations in design, oral written communications, teamwork, and the typical drawings and other deliverables produced during the scoping phase of process plant design. There is a particular emphasis on safety considerations in design. Prerequisites: CHE 303 and C or better in CHE 201, CHE 206, CHE 305 and CHE 321; Chemical Engineering majors only or permission of instructor. F.
CHE 412. Plant Design II: Process Project Engineering. 5 Credits.
Proficiency is gained in the development of the preliminary design for a major chemical process. In addition, this course provides an introduction to the second stage of process design—the conceptual design process including an introduction to Piping and Instrument Diagrams and Plant Layout Diagrams. A variety of oral communication skills are included. Prerequisites: CHE 408 and C or better in CHE 411; Chemical Engineering majors only or permission of instructor. S.

CHE 413. Plant Design II: Preliminary Process Project Engineering. 3 Credits.
Proficiency is gained in the development of the preliminary design for a major chemical process. A variety of oral communication skills are included. Prerequisites: CHE 411 with a C or better and CHE 408; Chemical Engineering majors only or permission of instructor. S.

CHE 414. Plant Design II: Conceptual Process Project Engineering. 2 Credits.
This course provides an introduction to the second stage of process design-conceptual design. Student will complete process-related components of a conceptual design for a major chemical process including Piping and Instrumentation diagrams and Plant Layout diagrams. A variety of oral communication skills are included. Prerequisites: CHE 413; Chemical Engineering majors only or permission of instructor. SS.

CHE 416. Chemical Product Design. 3 Credits.
Introduction to the design of chemical products. Topics include product development processes and methodologies, including StageGate and Design for Six Sigma (DFSS). Course contains both classroom and lab activities. Prerequisites: CHE 411, CHEM 340 and CHEM 340L or CHEM 341, CHEM 341L; Chemical Engineering majors only or permission of instructor. S.

CHE 420. Capstone in Sustainable Energy. 1 Credit.
The student will work one-on-one with a faculty member to develop a concept paper on the primary issues facing the development and implementation of sustainable energy technologies. Prerequisite: Completion of 12 credit hours towards a Concentration in Sustainable Energy. S.

CHE 422. Capstone in Energetics. 1 Credit.
The student will work with a faculty mentor to develop a white paper on a major issue facing the development and implementation of energetics technologies. This will include a discussion of the technical, economic, political, and social barriers facing implementation of the selected technology(s) plus plausible methodologies of overcoming these barriers. Prerequisite: Completion of, or concurrent enrollment in, 12 credit hours towards a concentration in Energetics. S.

CHE 424. Capstone in Petroleum Engineering. 1 Credit.
The student will work with a faculty mentor to develop a white paper on a major issue facing the development and implementation of petroleum engineering technologies. This will include a discussion of the technical, economic, political, and social barriers facing implementation of the selected technology(s) plus plausible methodologies of overcoming these barriers. Prerequisites: Completion of or concurrent enrollment in 12 credit hours towards a Concentration in Petroleum Engineering; restricted to Chemical Engineering majors. S/U grading. S.

CHE 431. Chemical Engineering Laboratory IV. 3 Credits.
Laboratory study of the unit operations of Chemical Engineering. Prerequisites: CHE 305 and either CHE 332 or CHE 335; Chemical Engineering majors only or permission of instructor. F,SS.

CHE 435. Materials and Corrosion. 3 Credits.
Provides an introduction to the fundamental properties of metals and polymers, reviews the forms of metal corrosion and of polymer degradations. Prerequisite: CEM majors only or permission of instructor. S.

CHE 480. Undergraduate Research. 1-6 Credits.
Undergraduate research experience in chemical engineering under the guidance of a faculty member. Prerequisite: Consent of instructor. Repeatable to 12 credits. S/U grading. F,SS.

CHE 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits. Repeatable to 9 credits. F,SS.

CHE 493A. Special Topics. 1-3 Credits.
Special topics dictated by student request and current faculty interest. The particular course may be initiated by the students by contacting members of the faculty. Regular grading. Repeatable to 9 credits. Repeatable to 9 credits. On demand.

CHE 493B. Special Topics. 1-3 Credits.
Special topics dictated by student request and current faculty interest. The particular course may be initiated by the students by contacting members of the faculty. S/U grading. Repeatable to 9 credits. Prerequisite: Consent of instructor. Repeatable to 9 credits. S/U grading. On demand.

Bachelor of Science in Chemical Engineering

Required 130 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum:

Freshman Year
First Semester Credits
CHE 102 Introduction to Chemical Engineering 2
CHEM 221 Fundamentals of Chemistry - Concepts & Fundamentals of Chemistry Laboratory "a" 4
ENGL 110 College Composition I 3
MATH 165 Calculus I 4
Arts/Humanities ES 3

Second Semester Credits
CHE 103 Computing Tools for Chemical Engineers 3
CHEM 254 Inorganic Chemistry I & 254L and Inorganic Chemistry I Laboratory "a" 4
MATH 166 Calculus II "a" 4
PHYS 251 University Physics I 4
Arts/Humanities ES 3

Sophomore Year
First Semester Credits
CHE 201 Chemical Engineering Fundamentals "a" 3
ENGL 130 Composition II: Writing for Public Audiences 3
LEAD 101 Learning Leadership 3
MATH 265 Calculus III 4
PHYS 252 University Physics II 4

Second Semester Credits
CHE 206 Unit Operations in Chemical Engineering "a" 3
CHE 232 Chemical Engineering Laboratory I "a" 2
CHE 315 Engineering Statistics and Design of Experiments 3
MATH 266 Elementary Differential Equations 3

Junior Year
First Semester Credits
CHE 301 Introduction to Transport Phenomena 4
CHE 303 Chemical Engineering Thermodynamics 4
CHE 331 Chemical Engineering Laboratory II 2
ENGR 206 Fundamentals of Electrical Engineering 3
Fine Arts Course 3

Second Semester Credits
CHE 305 Separations "a" 3
CHE 321 Chemical Engineering Reactor Design "a" 3
CHE 332 Chemical Engineering Laboratory III "a" 2
CHE 340 3
Material Science Elective 3
Technical Elective
Credits 3  
Senior Year
First Semester
CHE 408 Process Dynamics and Control 3  
CHE 411 Plant Design I: Process Design and Economics ** 3  
CHE 431 Chemical Engineering Laboratory IV 3  
CHEM 466 or CHE 403 Fundamentals of Physical and Biophysical Chemistry or Molecular Thermodynamics and Kinetics 3  
Advanced Chem. Science Elective 3  
Credits 16  
Second Semester
CHE 412 Plant Design II: Process Project Engineering ** †† 5  
CHE 416 Chemical Product Design 3  
Arts/Humanities ES 3  
Social Science Course 3  
Advanced Chem. Science Elective 3  
Credits 14  
Total Credits 127

Concentration in Energetics
Energetics concepts are widely used in defense applications, as well as many other areas including space exploration, counter-terrorism, fire suppression and public safety technologies, automotive airbags, and fireworks. With defense and security representing important issues facing our nation today, there is a critical need to grow and optimize the research and development of energetic materials. Furthermore, it has become equally important to train replacements for the aging workforce in this important technological area. This program is designed to equip students for careers associated with this industry with a strong need for the training and development of human capital. The concentration in Energetics is designed to help students prepare themselves for careers associated with sustainability and sustainable energy technologies.

To qualify for a Concentration in Energetics, a student must complete the requirements for the B.S. in Chemical Engineering. Requirements for the concentration are fulfilled by taking the following courses to meet the required electives of the B.S. ChE degree. In addition, one additional credit is required for the concentration: CHE 420 Capstone in Sustainable Energy.

Concentration in Sustainability
Climate change, rising energy costs, and water-energy-food security represent some of the most significant issues facing today’s society. It will take major advances in technology to help resolve these issues. Additionally, energy-related issues have created a new industry with a strong need for the training and development of human capital. The concentration in Sustainability is designed to help students prepare themselves for careers associated with sustainability and sustainable energy technologies.

To qualify for a concentration in Sustainability, a student must complete the requirements for the B.S. in Chemical Engineering. CHEM 115L. Introductory Chemistry Laboratory. 1 Credit.

Measurement, ionic and covalent compounds, chemical calculations, states of matter; energy, solutions, reactions, chemical bonding, thermochemistry, bonding, molecular geometry, periodicity, gases. Prerequisite or Corequisite: MATH 103 or higher. F,S,SS.

CHEM 116L. Introduction to Organic and Biochemistry Laboratory. 1 Credit.

Laboratory to accompany CHEM 116. Prerequisites: CHEM 115 and CHEM 115L, or CHEM 121 and CHEM 121L. Corequisite: CHEM 116. F,S.

CHEM 116. Introduction to Organic and Biochemistry. 3 Credits.

Does not satisfy the prerequisite for any advanced chemistry course. A second semester of general chemistry with emphasis on organic and biochemistry. Includes alkanes, alkenes, aromatics, alcohols, phenols, ethers, aldehydes, ketones, carboxylic acids, esters, amines, amides, carbohydrates, lipids, amino acids, proteins, and nucleic acids. Required of students in the B.S. in Chemistry program. Prerequisites: CHEM 115 and CHEM 115L, or CHEM 121 and CHEM 121L; a minimum of a C in either course is required. F.S.

CHEM 121. General Chemistry I. 3 Credits.

Open to all students; no high school credit in chemistry required. Elementary principles and theories of chemistry; matter, measurement, atoms, ions, molecules, reactions, chemical calculations, thermochemistry, bonding, molecular geometry, periodicity, gases. Prerequisite or Corequisite: MATH 103 or higher. F,S,SS.

CHEM 121L. General Chemistry I Laboratory. 1 Credit.

Laboratory to accompany CHEM 121. Prerequisite or Corequisite: CHEM 121. F,S,SS.

CHEM 122. General Chemistry II. 3 Credits.

Elementary principles and theories of chemistry; Intermolecular forces, liquids, solids, kinetics, equilibria, acids and bases. Solution of chemistry, precipitation, thermodynamics, electrochemistry. Prerequisite: CHEM 121 with a grade of C or better and CHEM 121L. F,S,SS.

CHEM 122L. General Chemistry II Laboratory. 1 Credit.

Laboratory to accompany CHEM 122. Prerequisite: CHEM 121 and CHEM 121L. Corequisite: CHEM 122. F,S,SS.

CHEM 221. Fundamentals of Chemistry - Concepts. 3 Credits.

Atomic and molecular structure, stoichiometry, states of matter, thermodynamics, periodicity and descriptive inorganic chemistry. Prerequisite: High school chemistry. Corequisite: CHEM 221L. Prerequisite or Corequisite: MATH 165. F.

CHEM 221L. Fundamentals of Chemistry Laboratory. 1 Credit.

Laboratory to accompany CHEM 221. Prerequisites: High school chemistry and MATH 103 or appropriate Math Placement score. Corequisite: CHEM 221. F.

CHEM 254, Inorganic Chemistry I. 3 Credits.

Required for chemistry majors. Chemistry of the elements with emphasis on occurrence, preparation, physical properties, chemical reactivity, uses, nomenclature, structure, and periodic behavior. Includes chemical kinetics and thermodynamics. Prerequisite: CHEM 122 or CHEM 221. Corequisite: CHEM 254L. S.

CHEM 254L. Inorganic Chemistry I Laboratory. 1 Credit.

Qualitative and quantitative inorganic chemistry, including precipitation, acid-base reactions, and redox reactions in aqueous solutions. The preparation and isolation of main-group element and transition metal compounds. The characterization of these compounds with standard chemical and instrumental methods. Determinations of the rates of chemical reactions and of bond parameters. Prerequisite: CHEM 122 or CHEM 221. Corequisite: CHEM 254L. S.

CHEM 333. Analytical Chemistry. 3 Credits.

For all science majors interested in using analytical chemistry techniques in a modern science laboratory. Principles of quantitative and qualitative chemical analysis as applied to environmental, clinical and forensic science are covered. Prerequisite: CHEM 122 or CHEM 221. Corequisite: CHEM 333L. F.

CHEM 333L. Analytical Chemistry Laboratory. 1 Credit.

Laboratory to accompany CHEM 333. Principles of quantitative and qualitative chemical analysis as applied to environmental, clinical and forensic science are covered. Prerequisite: CHEM 122 or CHEM 254. Corequisite: CHEM 333. F.

CHEM 340. Survey of Organic Chemistry. 4 Credits.

For all students interested in a one-semester survey of organic chemistry. Structure and bonding, nomenclature; hydrocarbons: alkanes, alkenes, alkynes, aromatics; substituted hydrocarbons: alkyl halides, stereochemistry, alcohols, phenols, ethers, amines; carboxylic acids, aldehydes, ketones, carboxylic acids, esters, amides. Prerequisites: CHEM 122 with a grade of C or better and CHEM 122L; or CHEM 254 and CHEM 254L. Prerequisite or Corequisite: CHEM 340L or CHEM 341L. S.
CHEM 340L. Survey of Organic Chemistry Laboratory. 1 Credit. Laboratory to accompany CHEM 340. Prerequisite: CHEM 122L or CHEM 254L. Corequisite: CHEM 340. S.

CHEM 341. Organic Chemistry I. 3 Credits. Designed for science and pre-professional students. Structure and bonding, acid-base reactions, nomenclature, stereochemistry, functional groups, alkanes, alkenes, alkynes, alkyl halides and alcohols. Application of spectrometric methods (NMR, IR and MS) for identification of organic compounds. Prerequisites: CHEM 122 with a grade of C or better and CHEM 122L; or CHEM 254 and CHEM 254L. Corequisite: CHEM 341L. F,S.

CHEM 341L. Organic Chemistry I Laboratory. 1 Credit. Laboratory to accompany CHEM 341. Required for chemistry majors. Prerequisite: CHEM 122L or CHEM 254L. Prerequisite or Corequisite: CHEM 341. F,S.

CHEM 342. Organic Chemistry II. 3 Credits. Designed for science and pre-professional students. Structure and reactivity, organometallic compounds, aldehydes, ketones, carboxylic acids and their derivatives, aromatic compounds, amines, multi-step synthesis. Prerequisite: CHEM 341 or CHEM 341C with a grade of C or better and CHEM 341L. Prerequisite or Corequisite: CHEM 342L. F,S.

CHEM 342L. Organic Chemistry II Laboratory. 1 Credit. Required for all chemistry majors. Laboratory to accompany CHEM 342. Prerequisite: CHEM 341. Prerequisite or Corequisite: CHEM 342. F,S.

CHEM 361. Problem Solving in Organic Chemistry I. 1 Credit. Reaction mechanisms and multi-step syntheses based on the reactions of alkenes, alkenes, alkyl halides and alcohols. Prerequisites: CHEM 122, with a grade of C or better and CHEM 122L; or CHEM 254 and CHEM 254L. Prerequisites or Corequisites: CHEM 341 and CHEM 341L. F.

CHEM 362. Problem Solving in Organic Chemistry II. 1 Credit. Reaction mechanisms and multi-step syntheses involving organometallic compounds, aldehydes, ketones, carboxylic acids and their derivatives, aromatic compounds and amines. Prerequisites: CHEM 341 with a grade of C or better, CHEM 341L, and CHEM 361. Corequisites: CHEM 342 and CHEM 342L. S.

CHEM 392. Special Problems in Chemistry. 1-3 Credits. An opportunity for students to be involved in research, teaching, and outreach activities under close faculty guidance. Prerequisite: Consent of Instructor. Repeatable to 6 credits. S/U grading. F,S.

CHEM 397. Cooperative Education. 1-2 Credits. May be repeated for a maximum of 6 credits. Prerequisites: One year of freshman chemistry with laboratory and either one of the following course sequences: (CHEM 341, CHEM 342) or (CHEM 341, BMB 301). Repeatable to 6 credits. S/U grading. F,S,SS.

CHEM 431. Selected Topics in Chemistry. 1-5 Credits. Repeatable with different topics. Repeatable. On demand.

CHEM 441. Instrumental Analysis I - Spectroscopy. 2 Credits. Topics ranging from the fundamentals of spectroscopic analysis to contemporary techniques (including atomic absorption spectroscopy, atomic emission spectroscopy, atomic fluorescence spectroscopy, UV-vis molecular spectroscopy, fluorescence molecular spectroscopy, and infrared spectroscopy) are explored in the classroom and in laboratory exercises. Prerequisites: CHEM 333 and CHEM 333L. S, even years.

CHEM 442. Instrumental Analysis II - Electrochemistry. 2 Credits. Topics ranging from the fundamentals of electrochemistry (including thermodynamics, kinetics, and mass transfer) to contemporary techniques of electroanalysis (such as potentiometry, coulometry, amperometry, and voltammetry) are explored in classroom and laboratory exercises. Prerequisites: CHEM 333 and CHEM 333L. S, odd years.

CHEM 443. Instrumental Analysis III - Chromatography/Mass Spectrometry. 2 Credits. Topics involving the fundamentals of gas and liquid chromatography (GC and LC) and mass spectrometry (MS) as well as their practical considerations in the method development (including sample preparation and MS interpretation) are covered. The modern chromatographic techniques (GC, GC/MS, and high resolution MS) are explored in classroom and laboratory exercises. Prerequisites: CHEM 333 and CHEM 333L. F, odd years.

CHEM 454. Inorganic Chemistry II. 3 Credits. Chemistry of inorganic compounds in terms of modern theories and concepts. Prerequisites: CHEM 254 and CHEM 342. Corequisites: CHEM 454L. F.

CHEM 454L. Inorganic Chemistry II Laboratory. 1 Credit. A course in laboratory techniques as applied to inorganic systems, including modern methods for synthesizing inorganic compounds and their analyses by spectroscopic and diffraction techniques. Prerequisites: CHEM 254 and CHEM 254L. Corequisite: CHEM 454. F.

CHEM 455. Spectroscopy and Structure. 3 Credits. Applications of spectroscopic techniques to the determination of molecular structure. Prerequisite: CHEM 342 or CHEM 466. F.

CHEM 462. Physical Chemistry Laboratory. 3 Credits. Required for B.S. in Chemistry and B.S. with Major in Chemistry Physical Science Emphasis majors. The solution of chemical problems in the laboratory using modern physical and analytical methods. Prerequisites: CHEM 466. Prerequisite or Corequisite: CHEM 471. S.

CHEM 463. Advanced Synthesis Laboratory. 3 Credits. Designed for science and pre-professional students. Structure and reactivity, organometallic compounds, aldehydes, ketones, carboxylic acids and their derivatives, aromatic compounds and amines. Prerequisites: CHEM 341 with a grade of C or better, CHEM 341L, and CHEM 361. Corequisites: CHEM 342 and CHEM 342L. F,S.

CHEM 466. Fundamentals of Physical and Biophysical Chemistry. 3 Credits. Designed for all senior students majoring in Chemistry. Discussion of current research topics in chemistry. Practice critical thinking skills and the knowledge gained in various chemistry courses to interpret and evaluate chemistry research data. Process information from different sources to provide an original interpretation of a given chemical phenomenon. Prepare a professional research paper and poster or oral presentation. Prerequisite or Corequisite: CHEM 462 or CHEM 467. S.
Bachelor of Science in Chemistry
(ACS Certified Program)

Required 120 credits (36 of which must be numbered 300 or above and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES guidelines and course listings).

II. The Following Curriculum:

Major Requirements—51 hours of Chemistry including:

Freshman Year

Credits 15

Total Credits 120

1 If a student is not ready for MATH 165 Calculus I, the math sequence may be moved back one semester and MATH 107 Prealgebra (also MATH 103 College Algebra, if needed) should be taken in the first semester.

2 Suggested electives are courses in Physics, Mathematics, Biology, Languages, Computer Science, Chemical Engineering, Business Management, and Speech.

3 Chem 44X (CHEM 441 Instrumental Analysis I - Spectroscopy, CHEM 442 Instrumental Analysis II - Electrochemistry and CHEM 443 Instrumental Analysis III - Chromatography/Mass Spectrometry) courses are offered within a regular, two-year cycle. Students can take Chem 44X courses in any order.

4 Other undergraduate and graduate level courses in Chemistry may be taken as electives.

5 Two semesters of a foreign language are required. If a student wishes to pursue Study Abroad, taking language courses earlier is recommended.

Bachelor of Science with Major in Chemistry

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES guidelines and course listings)

II. The Following Curriculum:

Major Requirements — 43 hours (Option A) or 40 hours (Option B) of Chemistry and Biochemistry including:

Option A. Physical Science Emphasis

2. Suggested electives are courses in Physics, Mathematics, Biochemistry, Biology, Computer Science, Chemical Engineering, Business Management, and Speech.
3. Chem 44X (CHEM 441 Instrumental Analysis I - Spectroscopy, CHEM 442 Instrumental Analysis II - Electrochemistry and CHEM 443 Instrumental Analysis III - Chromatography/Mass Spectrometry) courses are offered within a regular, two-year cycle. Students can take CHEM 44X courses in any order.
4. Other undergraduate and graduate level courses in Chemistry may be taken as electives. One credit hour must be from either Special Problems in Chemistry (Chem 392) or Senior Research (Chem 492).
5. Two semesters of a foreign language are required. If a student wishes to pursue Study Abroad, taking language courses earlier is recommended.
Minor in Chemistry

If a student is not ready for MATH 146 Applied Calculus I, MATH 103 College Algebra should be taken in the first semester. If a student would like the option to change into the B.S. in Chemistry or the B.S. with Major in Chemistry with emphasis for the Physical Science Option at a later date, be aware that MATH 165 Calculus I, MATH 166 Calculus II, and MATH 265 Calculus III are required. If a student who begins either the B.S. in Chemistry or the B.S. with Major in Chemistry with emphasis for the Physical Science Option wishes to change into the Biochemistry Option, MATH 165 Calculus I will substitute for MATH 146 Applied Calculus I.

Biol 150 General Biology I and Biol 151 General Biology II can be taken in the sophomore year. They are prerequisites to other required biology courses.

Electives must include 3 credit hours from BIOL 341 Cell Biology, BIOL 315 Genetics, or MBIO 302 General Microbiology Lecture/Mbio 302L General Microbiology Laboratory and one credit hour from either CHEM 392, Special Problems in Chemistry, or CHEM 492, Senior Research. Other suggested electives are courses in Physics, Mathematics, Biochemistry, Biology, Languages, Computer Science, Chemical Engineering, Business Management, and Speech. Other undergraduate and graduate level courses in Chemistry may also be taken as electives.

Two semesters of a foreign language are required. If a student wishes to pursue Study Abroad, taking language courses earlier is recommended.

Minor in Chemistry

Required: A minimum of 20 semester hours unless all twenty are required for the student’s current major. The 20 semester hours shall include one year of general/inorganic chemistry with laboratory, a semester of analytical chemistry with laboratory, and one year of organic chemistry with laboratory. CHEM 340 Survey of Organic Chemistry and BMB 301 Biochemistry can be substituted for one year of organic chemistry. If all twenty hours are required by the student’s major, a minor may be achieved by taking 2 semester hours at or above the 300 level beyond the chemistry courses required for the major.

Civil Engineering (CE)

B.S. in Civil Engineering (p. 69)

Courses

CE 101. Introduction to Civil Engineering. 1 Credit. Course will be a series of lectures, discussions and group projects, concerning the practice of civil engineering and sustainable design. Topics include scope of civil engineering practice, professional ethics, professional practice issues, sustainable engineering design concepts, communication skills, project management and team-working, literature searches and information gathering, and career planning. Exposure to Grand Challenges. Prerequisite: CE major or department permission. S/U grading. F.

CE 102. Professional Assessment and Evaluation. 1 Credit. This course is designed for students with industrial experience. Students complete a portfolio documenting educational and work experiences for evaluation, and individualized curriculum plans are developed. Based on the assessment and evaluation, some civil engineering requirements may be waived. Prerequisites: Work experience and/or technical school training plus completion of CHEM 121, CHEM 121L, PHYS 251, and MATH 265. S/U grading. F, S, SS.

CE 103. Graphical Communication. 3 Credits. Development of visualization, technical communication, and documentation skills. The course covers 3D AutoCAD geometric modeling using current methods and techniques commonly found in the industry and Civil 3D land systems design program. Fundamentals of land surface modeling and current surveying techniques will be taught in a combined lecture-laboratory format. On-campus students have access to necessary software programs through the CEM computer system. DEEP students are required to download a free computer aided design software version from AUTODESK to their personal computer. Prerequisites: CE major and CE 101 or permission of department.

CE 301. Civil Engineering Laboratory I. 2 Credits. Course involves lab experiences dealing with design of experiments; determining the properties of coarse and fine aggregates, concrete, asphalt, steel, and wood; and determining the properties of soil in terms of moisture content, specific gravity, grain size distribution, index properties, moisture-density relationships, and permeability. Students perform lab work in teams and write reports as a group and/or individually. Prerequisites: CE major, ENGR 203, and ENGL 110. Corequisites: MATH 321 and CE 412. F, SS.

CE 302. Civil Engineering Laboratory II. 2 Credits. Course involves lab experiences dealing with design of experiments; fluid properties, flow measurements, open channel flow, pipe flow, and hydraulic machinery; and water and wastewater treatment topics such as BOD, total and suspended solids, water hardness, chlorination, alkalinity, coagulation, and jar testing. Students perform lab work in teams and communicate results in written reports and one oral presentation. Prerequisites: CE major, ENGR 203, and ENGL 110. Corequisites: MATH 321, CE 431, and CE 423. S, SS.

CE 306. Fluid Mechanics. 3 Credits. Fluid properties; fluid statics and dynamics; transport theory and transport analogies, conservation of mass, energy, and momentum; dimensional analysis; boundary layer concepts; pipe flows; compressible flow; open channel flow. Prerequisites: PHYS 251 and MATH 265. F, S.

CE 313. General Surveying. 2 Credits. Measurements of distances and angles, EDM, satellite and inertial systems, triangulation, differential leveling, horizontal curves, vertical curves, traverse surveys, U.S. public land surveys, earthwork, boundary surveys and construction surveys. Basic knowledge of geometry and trigonometry required. Prerequisites: MATH 165 and CE 101 or permission of the department. Corequisite: On campus students must take CE 313L along with this class. F.

CE 313L. General Surveying Laboratory. 1 Credit. Course will involve laboratory assignments dealing with measurements of distances and angles; use of EDM, GPS, and automatic levels; traversing; leveling; horizontal curves; vertical curves; and topographic survey. Offered in Summer for DEED students. Prerequisite: DEED students must have completed CE 313. Corequisite: On-campus students must be enrolled in CE 313. F.

CE 351. Structural Mechanics. 4 Credits. Reactions, shear and bending moment, plane and space trusses, influence lines, deflections, virtual work, energy methods, approximate analysis, consistent deformations method, slope deflection and moment distribution methods, introduction to matrix methods. Use of computer for analysis. Prerequisite: ENGR 203. F.

CE 397. Cooperative Education. 1-8 Credits. A practical work experience with an employer closely associated with the student’s academic area. Arranged by mutual agreement among student, department and employer. Repeatable to 24 credits. Prerequisite: Admission to the civil engineering program or consent of advisor. Repeatable to 24 credits. F, S, SS.

CE 412. Soil Mechanics. 3 Credits. Course topics include principles of soil mechanics including weight-volume relationships, classification, compaction, effective stress, permeability and seepage, consolidation, shear strength, site exploration, introduction to lateral earth pressure, and slope stability. Prerequisite: ENGR 203. F.

CE 414. Foundation Engineering. 3 Credits. Soil improvements and ground modifications, soil exploration and sampling, bearing capacity, spread footings, mat foundations, settlement analysis, drilled shaft and pile foundations, foundations on difficult soil. Prerequisite: CE 412. S.

CE 416. Transportation Engineering. 3 Credits. Introduction to highway engineering, traffic analysis, and transportation systems; road vehicle performance; highway, vehicle, and driver characteristics; highway capacity and level of service analysis; level of service analysis for signalized intersections; principles of traffic flow; geometric design of highways; pavement design and drainage; highway safety and transportation planning; and group design project. Prerequisite: CE 412. S.

CE 421. Hydrology. 3 Credits. Course topics include measurement, interpretation, analysis and application of hydrologic data; precipitation, evaporation and transpiration; runoff hydrographs; routing methods; groundwater; and snow hydrology. Computer applications. Prerequisite: CE 306. F.
Repeatable. Prerequisite: Department approval. Repeatable. F,S.

CE 490. Special Topics. 1-3 Credits. Presentations are required. Prerequisites: CE 482 or departmental consent. S.

Developing design specifications, and estimating construction costs. Other design, preparing plans and drawings using graphical communication tool(s), engineering. Course activities include developing and analyzing a detailed design, formulating project objectives, gathering background information, scheduling the project, applying engineering standards and realistic constraints; developing design alternatives; objective, background information, scheduling the project, applying engineering standards and realistic constraints; developing design alternatives; selection of sections, bolted and welded connections, trusses, bearings, lightweight structural members, fatigue of structural members and introduction to plastic design. Prerequisite: CE 351. S.

CE 451. Steel Design. 3 Credits. Material properties of reinforced concrete ingredients; mix design of ordinary and high performance concrete; loads and load factors; introduction to the working stress method in reinforced concrete; analysis and strength design of reinforced concrete beams in bending, shear, and development length; design of one way slabs; serviceability requirements for deflection and cracking; axially and eccentrically loaded reinforced concrete columns. The design process is based on ACI 318 building code. Prerequisite: CE major and CE 351. F.

CE 431. Environmental Engineering I. 3 Credits. Environmental quality, water quality modeling, water wastewater treatment systems, sludge processing, solid wastes, hazardous wastes, environmental law. Prerequisite: CE 306. S.

CE 432. Environmental Engineering II. 3 Credits. Water distribution networks, mass curve analysis, wastewater collection systems, pumping systems for water and wastewater, system design project, computer-assisted design, confined spaces. Prerequisite: CE 306. F.

CE 306 and CHEM 121. S.

Primary Studies Requirements (see University ES listing). Required 128 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum:

Credits 17
**Communication Program (Comm)**

B.A. with Major in Communication (p. 71)

Minor in Communication (p. 72)

Specialization in International/Intercultural Communication (p. 72)

**Courses**

**COMM 102. Introduction to Communication. 3 Credits.** Introduces students to the discipline of Communication. Surveys a broad range of sub-disciplines, including social media, strategic communication, human interactions, newswriting, communication technology, media and communication policies, and digital media production. F,S,SS.

**COMM 110. Fundamentals of Public Speaking. 3 Credits.**
The theory and practice of public speaking with emphasis on content, organization, language, delivery, and critical evaluation of messages. Additional emphasis on student performance stressing original thinking, effective organization, and direct communication of ideas. F,S,SS.

**COMM 200. Writing for New and Traditional Media. 3 Credits.**
Introduction to the various styles and forms required to effectively write content for existing and emerging media platforms, including the fundamentals of public relations, advertising, and reporting. F,S,SS.

**COMM 206. Digital Communication: Fundamentals. 3 Credits.**
An introduction to the theory and practice of digital communication for print, online and mobile media. Course emphasis is on a holistic approach to digital design including both theoretical knowledge and software expertise. Course involves creating a series of portfolio-ready digital artifacts. F.

**COMM 212. Interpersonal Communication. 3 Credits.**
Introduces fundamental concepts of communication between individuals. Explores aspects of self expression and relationship communication. To give insights into the dynamics of interpersonal communication. To aid in the understanding of how people present themselves to other people, and how others perceive them in return. F,S,SS.

**COMM 246. News Writing Fundamentals in the Online World. 3 Credits.**
Professional techniques of news gathering, editing, source analysis, and information dissemination. Explores the potential for diverse and evolving technologies and platforms to deliver news content in a connected world. Prerequisites: COMM 200 or instructor consent. F,S.

**COMM 294. Individual Research. 1-4 Credits.**
Introductory experience as a research assistant on a research team. A total of 45 hours is required over the course of the semester/term per credit. Prerequisite: Consent of Instructor. Repeatable to 4 credits. S/U grading. F,S,SS.

**COMM 305. Audio Production & Broadcasting. 3 Credits.**
Investigates audio-related aspects of communication in digital sound production and broadcast dissemination. Beginning with the basic principles of audio, the course examines modern means of capturing, editing, and producing high-quality audio for the web and mobile devices, podcasting, and includes the use of a variety of software packages, plugins, and platforms. F,S.

**COMM 310. Media and Diversity. 3 Credits.**
Study of minority status within mass media organizations and in media content from historical, contemporary and speculative points of view. F.

**COMM 313. Persuasion. 3 Credits.**
An examination of principles and practices of persuasion and its influence across communication contexts. Emphasis will be placed on ethical standards and implications of persuasion and influence. F,S.

**COMM 319. Digital Imaging Across Platforms. 3 Credits.**
Introduces the history and practice of digital imaging for social media and communication industries, including introductory photographic principles, digital image capture devices, and software, apps, and workflows. Students learn to enhance/optimize digital images for transmission/broadcast to the web, social networks, and other platforms. F,S.

**COMM 324. Feature and Opinion Writing. 3 Credits.**
Investigative reporting and writing for traditional and new media using innovative research and source analysis techniques. Includes methods for informed opinion and commentary writing. Prerequisites: COMM 200 or consent of instructor. S.

**COMM 325. Content Creation for Social Media. 3 Credits.**
Focuses on writing, creating, and curating professional content for diverse social media platforms with the goal of engaging users, delivering messages and building relationships. Prerequisites: COMM 200 or consent of instructor, F,S.

**COMM 328. Community Journalism. 3 Credits.**
Considers the role that news media can play in enhancing community life. May focus on the role of print and broadcast journalism in Native American communities, on the role of weekly newspapers in small, rural towns or on broadcast and print media in cities. Provides an In-depth introduction to an assessment of efforts to determine how new forms of news media could provide innovative service for communities. Prerequisite: COMM 200 or consent of instructor. S.

**COMM 339. Digital Video Production. 3 Credits.**
This course offers an introduction to the theory and practice of modern digital video production utilizing a variety of production software techniques, industry best practices, and online/mobile technologies. F,S.

**COMM 345. Social Media Strategy. 3 Credits.**
This course focuses on scholarly and commercial aspects of social media strategy as a Communicative practice. In particular, course topics include a variety of social media driven outcomes including social activism, constituent engagement, outreach and advocacy, reputation management, analytics and optimization, and enhancing the quality and impact of message transmission in the social online environment. S.

**COMM 346. Sports Communication. 3 Credits.**
Introduces students to sports communication through an examination of athletics-related aspects of public relations, journalism, digital communication, organizational, and professional/executive communication. A significant component of the course focuses on aligning digital Communication technologies towards sports including digital imaging at games, sports writing, researching and reporting, web layout and presentation, public speaking/press releases etc. S.
COMM 352. Writing for Advertising & Public Relations. 3 Credits.
Intensive practice in preparing, planning and writing the materials used in public relations, with a special emphasis on engaging the media as well as internal and external target audiences. Prerequisites: COMM 200 or consent of instructor. F.S.

COMM 360. Communicating Science. 3 Credits.
This class is designed for upper-division students in the physical, biological, social, health and engineering sciences interested in science communication. It combines findings from research into information processing with best practices in media production to build student competency in communicating about science, scientific discoveries and the scientific process to general audiences through various media, as well as more specific audiences, such as funding organizations and policymakers. Students end the semester by producing a piece of science communication for a course-created website. Prerequisite: Junior or senior status (60+ hours). F.

COMM 374. Principles of Strategic Communication. 3 Credits.
This course introduces the fundamental theories, concepts, and applications of strategic communication to critically analyze its social influence and meet organizational goals. F.

COMM 380. Health Communication. 3 Credits.
Introduces theories and practices of health communication. Explores health communication with interpersonal sources (e.g., physicians other providers), groups (e.g., support groups healthcare organizations), and effective communication through mass media and digital/social media channels. F.

COMM 394. Readings/Projects in Communication. 1-6 Credits.
Individual projects or directed study related to topics, issues, or activities in communication. Prerequisite: Consent of Instructor. Repeatable to 6 credits. F,S,SS.

COMM 401. Organizational Communication. 3 Credits.
Analysis of communication behavior in formally structured relationships as it relates to the organization and to individuals. Special attention given to organizational style, status, trust and conflict-management. Informal communication networks and rumor are studied. S.

COMM 402. Intercultural/International Communication. 3 Credits.
This course will provide an overview of the study of intercultural and international communication. Topics addressed will include: history, literature, and culture of specific groups including racial, religious, and ethnic issues that affect communication patterns and outcomes. S.

COMM 404. Advertising and Society. 3 Credits.
Examines and evaluates the social, ethical and economic aspects of advertising. Attention is given to appraising the effects of advertising on the consumer and competition. F.

COMM 405. Social Implications of the Information Society. 3 Credits.
Considers and evaluates different perspectives on the information society, ranging from humanistic and Neomarxist critiques to the optimistic scenarios of some futurists. Examines the implications of new means of creating, storing, manipulating and disseminating information. Discussion of whether or not the potential benefits will be realized. S.

COMM 406. Future of Communication Technology. 3 Credits.
Evaluates different perspectives on the future of communication technology, ranging from utopian through dystopian views of the impact of communication technology on modern society. Examines the implications of new means of creating, storing, manipulating and disseminating communication information, and analysis of whether potential benefits may be realized. This course is also offered for graduate credit. F.S.

COMM 410. Senior Capstone in Communication. 3 Credits.
Provides students with the opportunity to enrich their knowledge of communication and hone their analytic, research, and writing skills. Students will create content that are relevant to their desired professions or career paths and test its effectiveness by conducting appropriate research. Prerequisites: COMM 102, COMM 110, COMM 200, and at least 75 credits completed. F,S,SS.

COMM 430. AD/PR Campaigns. 3 Credits.
Provides students an opportunity to apply their knowledge and skills in strategic communication to a real-client situation. The essentials of developing and executing a campaign are covered, including market and audience research, positioning, traditional and social media strategies, budgeting, public relations programs, creative strategies, actual execution, and evaluation of the campaign. S.

COMM 451. Risk and Crisis Communication. 3 Credits.
This course explores identifying risks to organizational goals and key stakeholders, and communicating effectively during crisis events to maintain organizational legitimacy. Risk and crisis key theories and concepts, applications and analysis are addressed. Prerequisite: COMM 200 or consent of instructor. S.

COMM 493. Instructional Experiences in Communication. 2 Credits.
Students will receive training and practical experiences in providing instruction in communication at the collegiate level. Such experiences include serving as an undergraduate teaching assistant or tutor for Communication courses with a faculty mentor. Prerequisites: Junior or senior status, “A” in course they are serving, minimum overall GPA of 3.0 or higher, and permission of instructor. Repeatable to 8 credits. S/U grading. F,S,SS.

COMM 494. Advanced Individual Research. 1-4 Credits.
Advanced experience as a research assistant on a research team. A total of 45 hours is required over the course of the semester per credit. Prerequisite: Consent of Instructor. Repeatable to 8 credits. S/U grading. F,S,SS.

COMM 497. Internship. 1-3 Credits.
Supervised experience consistent with student's career objectives. Formal application in advance of internship needs department approval. Prerequisites: Consent of Instructor. Repeatable to 6 credits. S/U grading. F,S,SS.

COMM 499. Special Topics. 1-3 Credits.
Selected topics in communication that allow students to study specific communication issues and/or topics that are not covered by regular department offerings. Repeatable to 6 credits. Repeatable to 6 credits. On demand.

Bachelor of Arts with Major in Communication

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University Essential Studies listing.)

II. Major Requirements

Required minimum of 33 credits. A grade point average of 2.2 is required on all Communication courses, and a C or better in each course used for the 33-credit major.

Major Course Requirements

12 credits required

<table>

Electives: Students must complete an additional 18 credits of COMM coursework. Note: Some courses may have prerequisites; check individual course descriptions. A total of 3 credits of upper-division (i.e., 300- or 400-level) coursework in PSYC can be applied to this 18-credit requirement.

Specialization:

Undergraduate students in the Communication Program at UND may choose to acquire an International/Intercultural Communication specialization.

In order to achieve this written designation on their undergraduate transcript, students in Communication must earn the following additional credits:

**Level IV Foreign Language Proficiency**

<table>

</tbody>
</table>

Scholarship funding will be made available by the Communication Program on a competitive basis for students in this specialization, to assist with study abroad expenses.

**Minor in Communication**

Required: 21 credits (3 required courses and 12 elective credits).

Students must complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 102</td>
<td>Introduction to Communication</td>
<td>3</td>
</tr>

</tr>
<tr>
<td>COMM 200</td>
<td>Writing for New and Traditional Media</td>
<td>3</td>
</tr>
</tbody>
</table>

Students must complete 12 additional credits from COMM coursework

**Specialization in International/Intercultural Communication**

Undergraduate students in the Communication Program at UND may choose to acquire an International/Intercultural Communication specialization.

In order to achieve this written designation on their undergraduate transcript, students in Communication must earn the following additional credits:

**Level IV Foreign Language Proficiency**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LANG 101</td>
<td>First Year Foreign Language I</td>

Scholarship funding will be made available by the Communication Program on a competitive basis for students in this track, to assist with study abroad expenses.

**Communication Sciences and Disorders (CSD)**

B.A. with Major in Communication Sciences and Disorders (p. 73)

**Courses**

**CSD 223. Phonetics. 3 Credits.**

Introduction to Phonetics. Includes articulatory descriptions of the speech sounds of English and other language, the International Phonetic Alphabet, coarticulatory phenomena, suprasegmentals, phonological features and phonological processes. Supervised practice in broad and narrow transcription of normal and disordered speech is provided. F.

**CSD 231. Anatomy and Physiology of the Speech and Hearing Mechanism. 4 Credits.**

Structure and function of the mechanisms involved in breathing, phonation, resonance, articulation and hearing. F.

**CSD 232. Survey of Communication Disorders. 3 Credits.**

Speech disorders: causes, symptoms, diagnosis and therapy of the common speech defects. F.

**CSD 235. Speech and Hearing Science. 4 Credits.**

An introduction to the normal processes of speech, hearing and language through the study of basic speech and hearing science exploring the scientific investigation of the physiological and acoustical parameters of speech. Prerequisites: CSD 231 and CSD 223, and MATH 103 or consent of instructor. S.

**CSD 333. Speech Sound Development and Disorders. 3 Credits.**

Development, etiology, diagnoses and management of phonological and articulation disorders. Prerequisite: CSD 223. S.

**CSD 340. Normal Language Structure. 3 Credits.**

The purpose of this course is to learn to analyze the grammar of English, focusing on morphology and syntax. The knowledge gained will serve as a foundation for the analysis of normal and impaired language. Prerequisite: ENGL 209 or equivalent. S.

**CSD 343. Language Development. 3-4 Credits.**

The nature and development of linguistic content, form, and use from birth to adulthood are studied relative to the development of communication and speech; relative to cognitive, social, and physical development; and relative to cultural diversity. Prerequisites or Corequisites: ENGL 209, PSYC 250, and CSD 340; or equivalents. F.

**CSD 343L. Language Development Laboratory. 2 Credits.**

Laboratory component of CSD 343. Prerequisite or Corequisite: CSD 343. F.

**CSD 400. School Programs in Speech-Language-Hearing. 3 Credits.**

This course covers the educational model of service delivery and how the speech-language pathologist works collaboratively in a school setting to meet the needs of students with speech, language, and hearing disabilities. Prerequisite: CSD 333 and CSD 343. F.

**CSD 422. Neuroanatomy of Communication Disorders. 3 Credits.**

A study of the essentials that form the basis for neuroanatomy, neuropathology, neuropsychology, and neurology, with a special section of study dealing with the neurological bases for speech, language and hearing. Prerequisite: CSD 231. S.

**CSD 425. Language, Multiculturalism and Communication Disorders. 3 Credits.**

Study of language structure and its interaction with culture from the perspective of the concept of world view, and the application of this relationship to the practice of speech-language pathology. Prerequisites: ENGL 209, CSD 223 and 343. Corequisite: CSD 440. F.
CSD 431. Introduction to Audiology. 3 Credits.
Elementary structure and function of the hearing mechanism; basic psychophysical dimensions of the auditory mechanism; types of deficient hearing; pure tone threshold and screening audiometry. Students are required to do hearing testing to qualify for certification in speech and hearing. Prerequisites: CSD 231 and CSD 235, and MATH 103. F.

CSD 434. Aural Rehabilitation. 3 Credits.
Principles, techniques and clinical practice in the diagnosis and rehabilitation of hearing disorders in children and adults; auditory training, speech reading and hearing conservation. Prerequisites: CSD 431 and CSD 434, or consent of instructor. S.

CSD 438. Craniofacial Anomalies. 3 Credits.
An introduction to medical genetics and craniofacial anomalies and syndromes, the etiology of these disorders, and the assessment and treatment of related feeding and communication disorders. Prerequisites: CSD 223, CSD 231 and CSD 333. S.

CSD 440. Language Disorders I. 3 Credits.
The course covers the causes, identification, assessment, and remediation of language disorders. The focus is on the phonological, semantic, syntactic, and pragmatic aspects of language disorders. Prerequisite: PSYC 241 or CSD 343. F.

CSD 441. Language Disorders II. 3 Credits.
The course integrates the concepts learned in Language Disorders I with the assessment and remediating of specific disorders. It includes a more in-depth analysis of special topics. General principles of diagnostic testing, including criterion and norm referenced assessment tools, are discussed. Prerequisite: CSD 440. S.

CSD 448. Clinical Practicum I: Speech-Language Pathology. 3 Credits.
An introduction to the clinical process and speech and language intervention. Includes supervised observation of clinical intervention. F,S,SS.

CSD 445. Clinical Practicum II: Speech-Language Pathology. 3 Credits.
Continuation of the content introduced in CSD 448 with increased emphasis on the clinical process and clinical skills. Includes supervised observation of direct clinical intervention. Prerequisite: CSD 448. F,S,SS.

CSD 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits. Repeatable to 9 credits. F,S,SS.

CSD 497. Special Problems in Communication Disorders. 1-3 Credits.
An examination of special topics in Communication Disorders. Prerequisite: Consent of instructor. Repeatable. On demand.

Bachelor of Arts with Major in Communication Sciences and Disorders

Required 120 credits (36 of which must be numbered 300 or above and 30 of which must be from UND) including:

I. Essential Studies Requirements
(see University ES listing).

Speech, Language and Hearing Clinic

The Clinic provides an opportunity for students to gain practical experience in speech and language evaluation and treatment procedures as student clinicians and provides a basis for research in the clinical process. This experience is under the direct supervision of departmental faculty who hold the Certificate of Clinical Competence of the American Speech-Language-Hearing Association. The Department of Communication Sciences and Disorders is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association.
Services provided include evaluation and treatment of individuals with all types of speech and language disabilities and hearing impairments (including evaluations for hearing aid candidacy). Referrals to the Clinic may be made by anyone, and treatment is provided for individuals of all ages.

School of Electrical Engineering and Computer Science (EECS)

College of Engineering & Mines
B.S. with Major in Computer Science (p. 78)
B.S. in Data Science (p. 77)

College of Arts and Sciences

Minor in Computer Science (p. 78)
Minor in Cyber Security (p. 78)
Optional Specializations (p. 78)

CSCI Courses

CSCI 101. Introduction to Computers. 3 Credits.
An overview of the fundamental concepts and applications of computer science. Topics include data storage, hardware, operating systems, and programming principles. Corequisite: CSCI 101T is recommended. F,S,SS.

CSCI 110. Introduction to Computer Science. 3 Credits.
This is an introductory course for prospective computer science majors as well as offering an introduction to computing for non-computer science majors. Students will receive a broad introduction to the discipline of computer science without the immersion into a programming language. Students will learn to write interactive Web-based programs. No previous computing or programming experience is assumed. F,S,SS.

CSCI 120. Computer Programming I. 4 Credits.
An introduction to computer programming in a high-level language, with emphasis on problem solving and logical thinking. Students learn to design, implement, test, and debug programs for small-scale problems using elementary data types and control structures. Includes laboratory. On demand.

CSCI 130. Introduction to Scientific Programming. 4 Credits.
An introduction to scientific computing, with problem solving, algorithm development, and structured programming in a high-level language with an engineering and mathematical focus. Emphasis on learning how to design, code, debug, and document programs, using techniques of good programming style. Includes laboratory. F,S,SS.

CSCI 160. Computer Science I. 4 Credits.
An introduction to computer science, with problem solving, algorithm development, and structured programming in a high-level language. Emphasis on learning how to design, code, debug, and document programs, using techniques of good programming style. Includes laboratory. F,S,SS.

CSCI 160L. Computer Prog I Lab.
Computer Programming I Lab.

CSCI 161. Computer Science II. 4 Credits.
A broadening of foundations for computer science with advanced concepts in computer programming. Includes an introduction to data structures, analysis of algorithms, and the theory of computation. Includes laboratory. Prerequisites: CSCI 130 with a grade of C or better or CSCI 160 with a grade of C or better, and MATH 103 or MATH 107; concurrent enrollment in MATH 208 is recommended. S.

CSCI 161L. Computer Prog II Lab.
Computer Programming II Lab.

CSCI 170. Computer Programming II. 4 Credits.
Advanced techniques in computer programming using a high-level language. Topics include the use of recursion, pointers, and fundamental data structures in developing small to medium-scale programs. Includes laboratory. Prerequisite: CSCI 120. On demand.

CSCI 189. Topics in Computing. 1-3 Credits.
Selected introductory-level topics in computing for students of all majors. Course may be repeated to 6 credits with different topics. Repeatable to 6 credits. On demand.

CSCI 230. Systems Programming. 3 Credits.
Focus on low level programming. Topics covered include pointers, memory management, dynamic memory, code optimization, compiling and linking, and library development. Weekly programming assignments. Prerequisite: CSCI 161 with a grade of C or better. F,S.

CSCI 242. Algorithms and Data Structures. 3 Credits.
Object-oriented implementations of complex data structures including lists, sets, trees, and graphs. Time and space analysis and classification of algorithms using upper bounds (big Oh), lower bounds (big Omega), and exact bounds (big Theta). Techniques for analysis of recursive algorithms including use of the "Master Theorem" for divide-and-conquer recurrences. Prerequisites: CSCI 161 with a C or better and MATH 208. F,S.

CSCI 260. Advanced Programming Languages. 3 Credits.
Programming in a specific high-level language for students who are already proficient at programming in another high-level language. Course may be repeated for different languages. A student may not receive credit for both CSCI 260 and a 100-level programming course in the same language. Prerequisite: CSCI 161 or consent of instructor. Repeatable. F.

CSCI 270. Programming for Data Science. 3 Credits.
The Programming for Data Science course provides students with an introduction to the main tools and ideas in the data scientist's toolbox. The course gives an overview of the data, questions, techniques and tools that data analysts and data scientists work with. This course provides a conceptual introduction to the ideas behind turning data into actionable knowledge and tools that will be used to analyze this data. The course will cover collecting, cleaning and sharing data. Additionally, this course will cover how to communicate results through visualizations. Prerequisite: CSCI 161 with a grade of C or better. S.

CSCI 280. Object Oriented Programming. 3 Credits.
An introduction to the concept and execution of Object-Oriented programming, using the Java language. Includes an introduction to object creations, classes, inheritance, interfaces, exceptions, overloading, and more. Prerequisite: CSCI 161 with a C or better.

CSCI 289. Social Implications of Computer Technology. 3 Credits.
An introduction to the effects of computer technology on society and individuals and to ethical problems faced by computer professionals. Topics covered include privacy, the nature of work, centralization versus decentralization and the need for human factors analysis in the development of a new computer system. F.

CSCI 290. Cyber-Security and Information Assurance. 3 Credits.
An introduction covering the breadth of essential Cyber-Security and Information Assurance topics. Students will hone skills in observation, deduction, analysis, logical reasoning and critical thinking as they gain experience with non-technical and lightly technical aspects of Cyber-Security and Information Assurance through practical and real-world examples. S.

CSCI 297. Experiential Learning. 1-3 Credits.
A practical experience in which students offer their proficiency in computing as a resource or service for others. The experience may involve software development, software consulting and assistance, system administration, or instruction. Prerequisite: CSCI 161. Repeatable to 6 credits. S/U grading. F.

CSCI 299. Topics in Computer Science. 1-3 Credits.
Selected intermediate-level topics in computer science for students with some experience or previous coursework in computing. Course may be repeated up to 6 credits with different topics. Repeatable to 6 credits. On demand.

CSCI 327. Data Communications. 3 Credits.
An introduction to the concepts of data transmission, communication hardware and protocols, communication software and the design, performance and management of computer networks. Prerequisites: CSCI 230 and MATH 208. F.

CSCI 363. User Interface Design. 3 Credits.
A study of the design and implementation of user interfaces for software applications. Students will apply principles of interface design to build applications using a toolkit of graphical interface components. Required coursework includes a team project. Prerequisite: CSCI 280 with a grade of C or better. F.
CSCI 364. Concurrent and Distributed Programming. 3 Credits.
This course focuses on concurrent object-oriented programming and modern distributed/parallel programming models (such as OpenMP, CUDA, OpenCL and Actors). Students will utilize various high performance distributed computing technology. Topics covered will include shared and distributed memory systems, sockets, threads, and message passing. Prerequisites: CSCI 242 with a grade of C or better and CSCI 230 with a grade of C or better. S.

CSCI 365. Organization of Programming Languages. 3 Credits.
Compile and run time requirements of programming languages, parameter passing and value binding techniques. Vector and stack processing. Prerequisite: CSCI 242 with a grade of C or better. S.

CSCI 370. Computer Architecture. 4 Credits.
Computer structure, machine presentation of numbers and characters, instruction codes and assembly systems. Introduction to hardware methodologies and software extensions to hardware in computers. Some topics on hardware and software selection will be discussed. Prerequisites: CSCI 230 with a grade of C or better, EE 201, and EE 201L. S.

CSCI 384. Artificial Intelligence. 3 Credits.
A study of algorithms and application of AI. The topics include agent theory, problem-solving with the search, constraint satisfaction problem, game, knowledge-based system, reasoning and machine learning which are widely applicable to design of an intelligent system, data science and mining, information retrieval, pathfinding and classification, etc. Prerequisite: CSCI 242. SS, even years.

CSCI 387. Secure Software Engineering. 3 Credits.
This course provides fundamental knowledge of secure software development methodologies and applied security topics related to compiled programs. In-depth coverage of source code auditing, fuzzing, introduction to reverse engineering, and exploitation will be emphasized. F.

CSCI 388. Exploit Analysis and Development. 3 Credits.
Provides fundamental knowledge of Malware analysis. Topics include an introduction to both static and dynamic techniques for analyzing suspect binaries. Students will be exposed to advanced malware concepts including malware detection as well as the utilization of industry standard tools to analyze, debug, and reverse engineer suspect binaries. F.

CSCI 389. Computer and Network Security. 3 Credits.
This course introduces techniques for achieving security in multi-user standalone computer systems and distributed computer systems. Coverage includes host-based security topics (cryptography, intrusion detection, secure operating systems), network-based security topics (authentication and identification schemes, denial-of-service attacks, worms, firewalls), risk assessment and security policies. Prerequisite: CSCI 161. S.

CSCI 397. Cooperative Education. 1-2 Credits.
A practical work experience with an employer closely associated with the student's academic area. Arranged by mutual agreement among student, department, employer, and the UND Cooperative Education office. Repeatable to 6 credits. Prerequisites: Declared Computer Science major with 15 completed credits in CSCI including CSCI 230 and CSCI 242. Repeatable to 6 credits. S/U grading. F.S,SS.

CSCI 399. Topics in Computer Science. 1-3 Credits.
Selected topics in Computer Science which allow students to study specialized subjects. Repeatable to 12 credits. Prerequisite: Consent of instructor. Repeatable to 12 credits. On demand.

CSCI 427. Cloud Computing. 3 Credits.
This is the undergraduate-level course on cloud computing models, techniques, and architectures. Cloud computing is an important computing model which enables information, software, and other shared resources to be provisioned over the network as services in an on-demand manner. This course introduces the current practices in cloud computing. Topics may include distributed computing models and technologies, Infrastructure-as-a-Service (IaaS), Platform-as-a-Service (PaaS), Software-as-a-Service (SaaS), virtualization, performance and systems issues, capacity planning, disaster recovery, Cloud OS, federated clouds, challenges in implementing clouds, data centers, hypervisor CPU and memory management, and cloud hosted applications. S, even years.

CSCI 435. Formal Languages and Automata. 3 Credits.
A study of automata, grammars, and Turing machines as specifications for formal languages. Computation is defined in terms of deciding properties of formal languages, and the fundamental results of computability and decidability are derived. Prerequisites: CSCI 242 with a grade of C or better and minimum second semester junior standing. F.

CSCI 445. Mathematical Modeling and Simulation. 3 Credits.
A study of various mathematical applications for digital computers, including the modeling, simulation and interpretation of the solution of complex systems. Prerequisites: CSCI 161 or CSCI 170, and MATH 166 and a statistics course. F, even years.

CSCI 446. Computer Graphics I. 3 Credits.
Introduction to computer graphics. Topics include raster scan graphics, 2D and 3D representations, affine transformations, light and color, texture mapping, image processing, ray-tracing, and computer animation. Team-based weekly homework develops a 4 minute computer animation. Prerequisites: CSCI 242, CSCI 363, and MATH 166. F, odd years.

CSCI 448. Computer Graphics II. 3 Credits.
A continuation of CSCI 446, topics covered include: history of games, game taxonomies, game design theory, computer game development, physics engines and AI engines. Prerequisite: CSCI 446. S, even years.

CSCI 451. Operating Systems I. 3 Credits.
Introduction to operating system theory and fundamentals. Topics include: CPU scheduling, memory management, file systems, interprocess communication facilities, security. Weekly homework assignments focus on process synchronization using fork/execute, threads, mutexes, pipes, semaphores, and shared memory. Prerequisites: CSCI 242 and CSCI 370; both with a grade of C or better. F.

CSCI 452. Operating Systems II. 3 Credits.
A study of the implementation of operating systems and parts of operating systems, and development of system software. Prerequisites: CSCI 451. On demand.

CSCI 455. Database Management Systems. 3 Credits.
Database concepts, database design (ER, UML), database programming languages (SQL), NoSQL Database, Database Concurrency and recovery techniques, and Database security. Prerequisite: CSCI 242 with a grade of C or better. S, even years.

CSCI 457. Electronic Commerce Systems. 3 Credits.
A study of the system architecture, content design and implementation, and data analysis, management, and processing of electronic commerce. Topics include Internet basics, business issues, data management and processing, static and dynamic web programming, e-commerce content design and construction, and databases and host languages with embedded SQL. Prerequisite: CSCI 260 with course topic of Dot Net. S, odd years.

CSCI 463. Software Engineering. 3 Credits.
This course teaches software engineering principles and techniques used in the specification, design, implementation, verification and maintenance of large-scale software systems. Major software development methodologies are reviewed. As development team members, students participate in a group project involving the production or revision of a complex software product. Prerequisites: CSCI 242 and CSCI 363. S.

CSCI 465. Principles of Translation. 3 Credits.
Techniques for automatic translation of high-level languages to executable code. Prerequisites: CSCI 365 and CSCI 370. F, odd years.

CSCI 487. Penetration Testing. 3 Credits.
Provides theoretical and practical aspects of Network Penetration Testing. The course includes in-depth details and hands on labs for each of the five distinct phases of an ethical hack including reconnaissance, scanning and vulnerability assessment, gaining access and exploitation, maintaining access, and covering tracks. An applied approach with a focus on current tools and methodologies will be stressed. S.

CSCI 491. Seminars in Computer Science. 1 Credit.
A course for advanced students. Repeatable to 3 credits. Prerequisite: Consent of instructor. Repeatable to 3 credits. S/U grading. F.S.
CSCI 492. Senior Project I. 3 Credits.
The first course in a two-semester sequence in which computer science majors undertake a culminating research or software development project. The course requires written documents, oral presentations, and peer review for the initial phases of the project, including a project proposal, a review of previous work, and a complete software design or research plan. Prerequisites: CSCI 242 and at least second-semester junior standing. F.

CSCI 493. Senior Project II. 1 Credit.
The second course in a two-semester sequence in which computer science majors undertake a culminating research or software development project. The course requires written documents and oral presentations/demonstrations for both a preliminary and a final review of the completed project. Prerequisite: CSCI 492. S.

CSCI 494. Special Projects in Computer Science. 1-3 Credits.
A course for advanced students. 1-3 credits varying with the choice of project. May be repeated (6 credits maximum). Prerequisite: Consent of instructor. Repeatable to 6 credits. F.S.

EE Courses

EE 101. Introduction to Electrical Engineering. 1 Credit.
An introduction to the electrical engineering discipline. Recent technologies and practices in electronics, computers, controls, power systems, robotics, communication, and microwaves. F.S.

EE 201. Introduction to Digital Electronics. 2 Credits.
Introduction to the fundamentals of digital circuits design. Logic gates; Boolean algebra; Karnaugh maps; Mathematical operations; Flip Flops; Counters. Corequisite: EE 201L. F.S.

EE 201L. Digital Electronics Laboratory. 1 Credit.
Introduction to design and implementation of digital electronic circuits. Corequisite: EE 201. F.S.

EE 206. Circuit Analysis. 3 Credits.
Introduces the foundations of electrical engineering, applying these concepts in developing the fundamentals of energy conversion, electronics and circuit theory. Prerequisite: MATH 165 with a grade of C or better; EE Major should be declared. F.

EE 206L. Circuits Laboratory I. 1 Credit.
Introduction to methods of experimental circuit analysis and to proper uses of laboratory equipment. Prerequisite: EE major should be declared. Corequisite: EE 206. F,SS.

EE 304. Computer Aided Measurement and Controls. 3 Credits.
The principles of the use of a computer in a measurement and control environment are presented. Software is designed to drive interfaces to perform measurement and control algorithms. The software and concepts presented are evaluated in a laboratory environment. Prerequisites: Electrical Engineering major and MATH 165. F.

EE 313. Linear Electric Circuits. 3 Credits.
Linear electric circuits in the steady state and transient conditions; two-port circuits; Fourier Series single and polyphase systems. Prerequisites: Electrical Engineering major and EE 206 with a grade of C or better. Corequisite: EE 313L. S.

EE 313L. Circuits Laboratory II. 1 Credit.
Experimental circuit analysis and proper uses of laboratory equipment. Prerequisites: Electrical Engineering major and EE 206L. Corequisite: EE 313. S,SS.

EE 314. Signals and Systems. 3 Credits.
Passive filters; Laplace transform applications; Fourier transform; Z-transform; Nyquist sampling theorem; other topics as time permits (state variables; introduction to control and communications theory; discrete Fourier transform). Prerequisite: EE 313. Corequisite: MATH 266 and EE 314L. F.

EE 314L. Signal and Systems Laboratory. 1 Credit.
In this laboratory course, students will conduct simulations and experiments related to theory covered in EE 314. The topics include implementation of passive filters, Laplace transform, and z-transform. Corequisite: EE 314. F.

EE 316. Electric and Magnetic Fields. 3 Credits.
Field produced by simple distributions of electric charges and magnetic poles, field mapping and application to engineering problems. Prerequisites: EE 206 with a grade of C or better. Corequisite: MATH 266. F.

EE 318. Engineering Data Analysis. 3 Credits.
This course will provide undergraduate electrical engineering students with an understanding of the principles of engineering data analysis using basic probability theory and basic statistics theory. Students will have the opportunity to apply these concepts to actual engineering applications and case studies. Prerequisites: EE 206 with a grade of C or better. Corequisite: EE 313. F.

EE 321. Electronics I. 3 Credits.
Fundamentals of semiconductors, nonlinear discrete components such as diodes and transistors, and integrated circuits; analysis and synthesis of simple electronic circuits, including amplifiers. Prerequisite: EE 313. Corequisite: EE 321L. F.

EE 321L. Electronics Laboratory I. 1 Credit.
Practical electronics application and design using theory studied in concurrent third year electrical engineering courses. Prerequisite: EE 313L. Corequisite: EE 321. F.

EE 397. Cooperative Education. 1-2 Credits.
A practical work experience with an employer closely associated with the student's academic area. Arranged by mutual agreement among student, department, and employer. Repeatable to 24 credits. Prerequisite: Admission to the electrical engineering degree program; a cumulative GPA of 2.0 or higher is required. Repeatable to 24 credits. S/U grading. F,S,SS.

EE 401. Electric Drives. 3 Credits.
A study of variable speed drives and their electronic controls; analysis and synthesis of power electronics through computer simulations and laboratory implementations. Prerequisite: EE 314. Corequisite: EE 401L. S.

EE 401L. Electric Drives Laboratory. 1 Credit.
The course provides the basic knowledge required for the usage and the design of the most common electrical drives. This lab focuses on the Electric Drives and their control in a real time environment using dSPACE and/or similar digital signal processing based methods and simulations. Corequisite: EE 401. S.

EE 405. Control Systems I. 3 Credits.
Mathematical modeling and dynamic response of linear control systems; stability analysis; design of linear controllers using the root locus and frequency response techniques. Prerequisite: EE 314 and MATH 266. Corequisite: EE 405L. S.

EE 405L. Control Systems Laboratory. 1 Credit.
Experiments and simulations related to theory discussed in EE 405 are implemented in this laboratory course. The topics included mathematical modeling and dynamic response of linear systems; stability analysis; and design of controllers. Corequisite: EE 405. S.

EE 409. Distributed Networks. 3 Credits.
Fundamentals of transmission lines. Prerequisite: EE 313 and EE 316. S.

EE 411. Communications Engineering. 3 Credits.
Mathematical definition of random and deterministic signals and a study of various modulation systems. Prerequisite: EE 314. On demand.

EE 421. Electronics II. 3 Credits.
Analysis of electronic circuits and systems using discrete components and integrated circuits, digital circuits, active filters, and power amplifiers. Prerequisite: EE 314 and EE 321. Corequisite: EE 421L. S.

EE 421L. Electronics Lab II. 1 Credit.
Practical electronics application and design using theory studied in concurrent third year electrical engineering courses. Prerequisite: EE 321L. Corequisite: EE 421. S.

EE 423. Power Systems I. 3 Credits.
Electric power systems operation, control and economic analysis. Prerequisite: EE 313. On demand.

EE 424. Electronic Circuits. 3 Credits.
Principles, applications, and design of electronic equipment studied from viewpoint of complete systems. Prerequisite: EE 321. On demand.

EE 428. Robotics Fundamentals. 3 Credits.
Fundamentals of robotic systems: modeling, analysis, design, planning, and control. The project provides hands-on experience with robotic systems. Prerequisite: MATH 266 or consent of instructor. On demand.

Optional Specializations

A student’s coursework in either the B.S. program, the B.A. program, or the Minor program above may be designed to complete one or more of the following specializations. Each specialization completed will be noted on the student’s academic record.

I. System and Programming Security

Coursework must include:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 110</td>
<td>Introduction to Computer Science</td>
<td>3</td>

COUN 101. Career Exploration. 1 Credit.
The process of making career choices and decisions is explored through assessment, instruments, class activities, and assignments. Student interests, skills, and work values are explored and related to information about careers and job market trends. Recommended for students in the process of choosing an academic major. S/U grading. F.S.
CJ 340. What Works in Policing, Sentencing, and Corrections. 3 Credits.
This course will focus on the development and identification of evidence-based practices and programs (a.k.a., EBP) in criminal justice. A review of practices and programs in each area of the justice system will be explored including the juvenile justice system, policing, sentencing, and corrections. The course will rely heavily on systematic reviews of the empirical literature from which criminal justice practices and programs are deemed as effective, promising, or ineffective. This will include a review of work conducted by the Office of Juvenile Justice and Delinquency Prevention (OJJDP), the National Institute of Justice (NIJ), and other governmental efforts to promote empirically-justified programs. Prerequisites: CJ majors and minors only. F.

CJ 341. Criminal Law. 3 Credits.
This course covers the fundamentals and foundations of American criminal jurisprudence with an emphasis on common law definitions of crimes and modern requirements for the criminalization of behavior, statutory laws. Prerequisite: Criminal Justice Majors and Minors or Forensic Science Majors. F.

CJ 342. Criminal Procedure. 3 Credits.
This course covers requirements of the American system of criminal procedure, especially regarding the legal requirements of search and seizure, interrogation, right to counsel, and eyewitness identifications. Special attention is given to the relationship between the 4th, 5th, 6th, 8th, and 14th amendments to the U.S. Constitution and the development of the law of criminal procedure. Prerequisite: Criminal Justice Majors and Minors or Forensic Science Majors. S.

CJ 350. Correctional Alternatives. 3 Credits.
This course is designed to explore and evaluate intervention strategies developed in the criminal justice system as alternatives to institutional corrections in the sentencing of adjudicated persons. Among these options this course looks for community corrections, parole, house arrest, restitution, community service, and the development of intervention strategies in support of the dispositions. Prerequisite: Criminal Justice majors and minors only. S.

CJ 351. Police Administration. 3 Credits.
Principles of police administration and organization for a modern police agency. Included are planning and development of organizations, direction, goal identification, etc. Prerequisites: CJ 210; CJ majors and minors only. F.

CJ 352. Criminal Investigation. 3 Credits.
An overview and examination of basic principles and techniques in the criminal investigations procedures and the rules of the law of evidence in criminal court proceedings. Prerequisites: CJ 210, CJ majors and minors, and forensic science majors. F.

CJ 351. Victimology. 3 Credits.
This class will provide an overview of the literature and research concerning victimization. Attention will be directed toward current trends concerning the victim in the American criminal justice system, with particular emphasis on measuring victimization, fear of crime, the impact of victimization on the individual, and victims rights and compensation initiatives. The basic goal of this course is to help the student develop an understanding of the impact of victimization on the victim, those associated with the victim, the criminal justice system, and each of us as individuals. Prerequisite: Criminal Justice majors and minors only. F.

CJ 356. Law and Society. 3 Credits.
This course explores legal ideals, deviations from those ideals, and the relationship between culture, social structure, and law. Prerequisite: CJ majors and minors only. F.

CJ 397. Cooperative Education. 1-6 Credits.
A practical work experience with an employer closely associated with the student’s academic area. Arranged by mutual agreement among student, department, and employer. Students may be required to have a criminal background check performed with results deemed favorable by the field agency as a condition of their initial enrollment and/or continued enrollment in cooperative education credits. Repeatable to 12 credits. Prerequisites: CJ 494; CJ majors and minors only. Repeatable to 12 credits. S/U grading. F,S,SS.

CJ 399. Problems in Criminal Justice. 1-3 Credits.
Students study special topics under the direction and supervision of a member of the faculty; prior consent of instructor is required before enrollment. Repeatable to 12 credits in different topic areas. Prerequisites: Criminal Justice majors and minors only and consent of instructor. Repeatable to 12 credits. On demand.

### Criminal Justice Studies (CJ)

**B.S. in Criminal Justice Studies (p. 81)**

**Minor in Criminal Justice Studies (p. 81)**

**Courses**

**CJ 201. Introduction to Criminal Justice. 3 Credits.**
An undergraduate study and overview of the criminal justice system emphasizing the "system," its legal actors and its political constraints. Designed for the beginning student in law enforcement, criminology, corrections, sociology, social welfare, government and pre-law. F.S.

**CJ 210. Introduction to Policing. 3 Credits.**
Introduces the student to the specific field of law-enforcement agencies. Provides an overview of federal, state, and local law enforcement agencies. Reviews the coordination requirements of the system. Prerequisite: CJ 201. S.

**CJ 220. Introduction to Courts. 3 Credits.**
This course will examine the historical background, the traditions, and the legal principles that underlie the courts as an integral component of the American system of criminal justice. Both differences and similarities inherent within the State and Federal Court processes will be examined, and the procedures through which the criminal courts uphold the basic rights and liberties of all U.S. citizens, both victims and the accused, will be explored. Focus will be placed on understanding the respective roles of judges, prosecutors, defense attorneys, police officers, probation officers, and other court-related personnel in the criminal court process. Prerequisite: CJ 201. F.S.

**CJ 270. Introduction to Corrections. 3 Credits.**
This course describes the corrections system as part of a larger criminal justice system. Students will be introduced to the history and practice of corrections from earlier forms of physical punishment to jail, probation, intermediate sanctions, prisons, parole, and the death penalty. Special topics in the field will also be addressed as appropriate. Prerequisite: CJ 201. F.S.

**CJ 302. Women, Crime, and Criminal Justice. 3 Credits.**
This class will explore the changing roles of women as offenders, as victims, and as professionals in the criminal justice system. Attention will be directed toward empirical findings, conflict theory insights, and the feminist perspective within the discipline. The basic goal of this course is to respectfully enhance understanding of the importance of gender equality within the field of criminal justice and to encourage self-examination of habitual modes of thinking and acting. Prerequisite: CJ majors and minors only. S.

**CJ 317. Theories of Counseling, Personality and Development. 3 Credits.**

**CJ 319. Psychology of Women, Gender and Development. 3 Credits.**

**CJ 322. Multicultural Counseling. 3 Credits.**

**CJ 323. Couples And Family Counseling. 3 Credits.**

**CJ 324. Child and Adolescent Counseling. 3 Credits.**

**CJ 325. Child and Adolescent Cognitive and Personality Assessment. 3 Credits.**

**CJ 326. Counseling Practicum. 4 Credits.**

3. Completion of 8 credits of COUN 588 Rehabilitation Counseling Internship.
4. Completion of COUN 995 Scholarly Project (1 cr.), COUN 997 Independent Study (2 cr.) or COUN 998 Thesis (4 cr.).
II. The Following Curriculum (42 credits):

I. Essential Studies Requirements (see University ES listing).
Which must be from UND) including:

- Justice Studies

Bachelor of Science in Criminal Justice Studies

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum (42 credits):

Preadmission Requirements

- CJ 201 Introduction to Criminal Justice 3
- CJ 210 Introduction to Policing 3
- CJ 220 Introduction to Courts 3
- CJ 270 Introduction to Corrections 3

Required upper division courses

- CJ 330 Criminological Theory 3
- CJ 341 Criminal Law 3
- CJ 342 Criminal Procedure 3
- CJ 385 Law and Society 3
- CJ 401 Administration of Criminal Justice Systems 3
- SOC 323 Sociological Research Methods 3
- SOC 326 Sociological Statistics 3

Select three of the following: 9

- ANTH 346
- CJ 302 Women, Crime, and Criminal Justice
- CJ 320 Cybersecurity Law and Investigations
- CJ 350 Correctional Alternatives
- CJ 351 Police Administration
- CJ 352 Criminal Investigation
- CJ 351 Victimology
- CJ 430 Developmental Perspectives on Adolescent Problem Behavior
- CJ 440 The Police Role in Society
- SOC 252 Criminology
- SOC 253 Delinquency and Juvenile Justice

Total Credits 42

A concentration in a single supplementary field other than criminal justice studies is also required of all criminal justice majors. This concentration may be met in one of three ways:

1. a language proficiency of level IV in a modern foreign language;
2. completion of the four-course sequence in American Sign Language; or
3. 20 credit hours (at least nine of which must be numbered 300 or above) in any single subject matter taught at this University.

Minor in Criminal Justice Studies

21 credits required:

- CJ 201 Introduction to Criminal Justice 3
- CJ 210 Introduction to Policing 3
- CJ 220 Introduction to Courts 3
- CJ 270 Introduction to Corrections 3

Select three of the following: 9

- FS 345 Forensic Science
- FS 346 Analysis of Forensic Evidence
- CJ 302 Women, Crime, and Criminal Justice
- CJ 320 Cybersecurity Law and Investigations
- CJ 330 Criminological Theory
- CJ 340 What Works in Policing, Sentencing, and Corrections
- CJ 341 Criminal Law
- CJ 342 Criminal Procedure
- CJ 350 Correctional Alternatives
- CJ 351 Police Administration
- CJ 352 Criminal Investigation
- CJ 361 Victimology
- CJ 365 Law and Society
- CJ 399 Problems in Criminal Justice
- CJ 430 Developmental Perspectives on Adolescent Problem Behavior
- CJ 452 The Police Role in Society
- PHIL 371 Philosophy of Law
- SOC 252 Criminology
- SOC 253 Delinquency and Juvenile Justice

Total Credits 21

Earth System Science and Policy (ESSP)

Minor in Sustainability Studies (p. 82)
Courses

ESSP 160. Sustainability & Society. 3 Credits.
Human interactions with the natural environment are often perceived as conflicts between environmental protection and socio-economics. Sustainability attempts to redefine that world view by seeking balance between the ‘three Es’ - environment, economy, equity. This course examines the concept of sustainability, the theory behind it, and what it means for society. F.

ESSP 200. Sustainability Science. 3 Credits.
This course will provide an integrated, system-oriented introduction on the concepts, theories and issues surrounding a sustainable future for humans and the Planet Earth. The course will address the concept of sustainability, the concept of a system, explore human world views, provide an introduction to energy, complexity and ecosystems, and examine resources use, food production, industrial development and the prospects for a sustainable future. S.

ESSP 310. Sustainable Food Systems. 3 Credits.
This course will examine the need for development of sustainable food production systems. The course will introduce the concept of an integrated agro-ecosystem. Students will learn how food production systems work, how they impact natural ecosystems, how fragile the human food resource has become, and gain an appreciation of the complexity of relationships between humans and food. F, even years.

ESSP 320. Land and Water Sustainability. 3 Credits.
This course covers topics of sustainability of physical landscapes and water on the Earth. Class lectures will introduce concepts related to landscape use, perception of landscape and water use as a resource, and most importantly, how to use the physical landscape and freshwater as a resource in a manner to which it will be viable for future generations (i.e. landscape and water resource sustainability). Topics include, but are not limited to snow and glacier melt water, ground water, mountain environment resources, river flood plain land use, and water use in desert environments. F, odd years.

ESSP 330. Environmental Change: Adaptation & Mitigation. 3 Credits.
The objective is to introduce the varieties of adaptation and mitigation strategies to address four main sustainability challenges: land use/land cover change, climate change, water security, and biodiversity loss. The major physical processes of the Earth systems will be examined, together with the natural and anthropogenic changes in these processes; then, the societal impacts from modifications to the Earth systems will be described; finally, the strategies of adaptation and mitigation will be compared, using a variety of regional case studies as examples. S, odd years.

ESSP 333. Oceanography. 3 Credits.
Oceanography introduces the ocean and the study of the ocean, which regulates our climate, maintains our atmosphere, and serves as an enormous resource. The course explores all aspects of the oceans- their physics, chemistry and biology, as well as the structure of the basins that contain them. Students will learn how the oceans interact with the atmosphere and the solid Earth, understand the role played by the oceans, not only as a producer of food and source of recreation, but as a transporter of heat energy, sink for greenhouse gases, and moderator of the climate. In the end, students will come away with a deeper understanding of how the ocean works and greater appreciation for the benefits we derive from it. F, odd years.

ESSP 420. Sustainable Energy. 3 Credits.
This course is an interdisciplinary exploration of Sustainable Energy. The interdisciplinary exploration includes the analysis of renewable energy systems as well as the socio-economical, political, and environmental aspects of renewable energy. The course will specifically analyze the origin and dimensions of global energy issues and identify how renewable energy issues and policies are critical to the sustainable future of global environmental quality, economic growth, social justice, and democracy. S, even years.

ESSP 450. Environmental and Natural Resource Economics. 3 Credits.
This course will cover the general topics in the field of environmental and natural resource economics: market failure, pollution regulation, the valuation of environmental amenities, renewable and non-renewable resources management, and the economics of biodiversity conservation, climate change and sustainability. The course has a strong focus on the interaction between human society and natural environmental systems and the connection between market equilibrium and social sustainability. F, odd years.

ESSP 460. Global Environmental Policy. 3 Credits.
Governance and policy are the most common strategies used to address environmental problems. This course introduces students to the foundation, development, actors, process, challenges, and future outlook of global environmental policy. By navigating various levels of US and global governance, students will explore a variety of concepts and principles in the development and implementation of environmental policies. S, odd years.

ESSP 499. Special Topics in Sustainability. 1-4 Credits.
Investigation and detailed study of special topics related to sustainability issues. The course may include a lab if applicable. Repeatable once with different topic. Maximum of 8 credits. Repeatable to 8 credits. On demand.

Three additional electives 1

Total Credits 21-22

1 These may be fulfilled with ESSP courses or options from an approved list of courses in other UND departments; only two courses can be applied from the same department outside ESSP. The electives will be approved based on their topical contributions to the fundamentals of the sustainability pillars: environment, society and/or economy. The approved list may be subject to change each academic year. Additional or alternative course electives may be approved by the Coordinator of the ESSP Minor in Sustainability Studies on a semester by semester basis or upon student request.

Economics (Econ)

B.B.A. with Major in Business Economics (p. 85)
B.B.A with Major in Banking and Financial Economics (p. 85)
B.A. in Economics (p. 84)
Minor in Economics (p. 86)
Certificate in Applied Economics (p. 86)

Courses

ECON 105. Elements of Economics. 3 Credits.
Survey of Economic principles for students planning no further formal study of Economics. Analysis of factors influencing aggregate levels of output, employment, and prices; introduction to U.S. monetary system; price determination and resource allocation under competitive and monopolistic conditions. Review of selected contemporary economic issues. (No credit if Economics 201-202, Principles of Microeconomics and Macroeconomics, have been completed or audited. Not available to students in the College of Business and Public Administration.). Prerequisite: Not available to students in the College of Business and Public Administration. F,S.
ECON 201. Principles of Microeconomics. 3 Credits. Nature, method, and scope of Economic analysis: economic scarcity, resources, specialization and division of labor, supply and demand, production and cost, technology, product and resource market structures, distribution of income, and international trade. Prerequisite or Corequisite: MATH 103 or MATH 146 or MATH 165 or MATH 166. F.S.

ECON 202. Principles of Macroeconomics. 3 Credits. Nature, method, and scope of economic analysis: aggregate levels of income and employment, inflation, monetary and fiscal policy, the role of the U.S. economy as part of a world economic system. Prerequisite: ECON 201. F.S.

ECON 206. Survey of Economic Principles: Micro-Macro. 4 Credits. Accelerated course in economic principles intended for students pursuing the MBA graduate degree. This course considers both micro and macro topics. Micro topics include: Economics and Economic Reasoning; The Economic Organization of Society; Supply-Demand Analysis; Elasticity; Individual Choice; Production and Cost Analysis; and Market Structures. Macro topics include: National Income Accounting; Economic Growth, Business Cycles and Inflation; Fiscal Policy; Monetary Economics; Monetary Policy; and the World Economy. Prerequisite: Consent of instructor. On demand.

ECON 210. Introduction to Business and Economic Statistics. 3 Credits. Descriptive statistics; probability distributions; sampling distributions; statistical inference for means and proportions; hypothesis testing; simple regression and correlation; non-parametric statistics. Prerequisite: MATH 103 or MATH 146 or MATH 165 or MATH 166. F.S.

ECON 216. Mathematics and Statistics for MBA Students. 3 Credits. To provide knowledge in mathematics and statistics needed for students in the MBA program. Topics include, among others, linear and quadratic functions, logarithmic and exponential functions, matrix algebra, limits, derivatives, linear and nonlinear programming, descriptive statistics, data collection, sampling, probability, estimation, hypothesis testing, statistical inference, and linear regression. Prerequisite: Approval of MBA director. SS.

ECON 303. Money and Banking. 3 Credits. Nature of our current Monetary system; functional analysis of commercial bank operations; limits to credit expansion; alternative theories of the value of money; monetary and fiscal policies for control of the business cycle; powers of the Federal Reserve System and the Treasury; mechanics of international payment; balance-of-payments and other problems. Prerequisites: ECON 201 and ECON 202. F.S.

ECON 305. Principles of Banking I. 3 Credits. This course introduces the students to basic principles of banking governing loans, investments, deposits, liabilities, and capital. Consideration is given to the areas of liquidity, profitability, and capital adequacy as they relate to regulatory standards. Additional topics include bank organization, performance, and scope of services. Prerequisite: ECON 303. F.

ECON 306. Principles of Banking II. 3 Credits. A continuation of ECON 305, Principles of Banking I. Students will explore the application of theory to the financial decision making and management of banks. The main focus of the course is the assessment of bank risks and management of those risks. A feature of the course is the use of a bank simulation model to connect theory and practice. Prerequisite: ECON 305. S.

ECON 308. Intermediate Microeconomic Theory. 3 Credits. Theory of demand, production, and cost; price determination under alternative market structures; general equilibrium and economic welfare; analysis of market failure; applications to public policy. (Core requirement for students planning advanced study in Economics.). Prerequisites: ECON 201 and ECON 202. F.

ECON 309. Intermediate Macroeconomic Theory and Policy. 3 Credits. A framework for studying national income, employment, and the general price level is developed. Theoretical perspectives on the National Income and Product accounts, expenditures in the public and private sectors of the economy, and supply and demand for money, labor, and other resources are surveyed. Macroeconomic Theory is then applied to a study of monetary, fiscal, incomes, and other policies intended to influence unemployment, inflation, balance of international financial payments, and economic growth. (Core requirement for students planning advanced study in Economics.). Prerequisites: ECON 201 and ECON 202. S.

ECON 324. Public Finance. 3 Credits. Growth and effects of the public sector of the economy emphasizing effects of taxation and spending or borrowing and debt management on efficiency and use of economic resources. Prerequisites: ECON 201 and ECON 202.

ECON 330. Business and Economic History. 3 Credits. An analysis of the growth and development of the American economy since its colonial origins. The framework of economic analysis applied to the patterns and trends. Specific topics include industrialization, capital accumulations, financial innovation, technological change, banking, the Great Depression and effects of entrepreneurial and government decisions. Prerequisites: ECON 105 or ECON 201 or ECON 202. F.

ECON 338. International Economics. 3 Credits. Economic basis for gain in international trade; capital and population movements; international disequilibrium and the process of balance-of-payments adjustments; tariffs, underdeveloped countries. Prerequisites: ECON 201 and ECON 202. F.S.

ECON 341. Labor Economics and Labor Relations. 3 Credits. A survey of the nature and causes of the economic problems of the American wage and salary earner and of the attempts of wage earners and society, through organizations and legislation, to alleviate these problems. The course comparatively surveys the history and systematic theories of labor movements and the market and institutional influences on wages and employment. Particular emphasis will be placed on the role of industrial relations, employment and income access, and the adjustment of labor disputes. Prerequisites: ECON 201 and ECON 202. F.

ECON 355. Government Regulation of Business. 3 Credits. An exploration of the many ways that federal and state governments regulate business activity. Government regulation falls into three broad areas: economic regulation; social regulation; antitrust laws. The historical development of regulation, from both a legal and economic perspective, will be discussed. Particular attention will be paid to the current trend toward deregulation of previously regulated industries such as airlines, telecommunications, and trucking. Prerequisites: ECON 201 and ECON 202. F.

ECON 380. Global Economic Development. 3 Credits. This course focuses on economic development issues at the global level. It covers both our developing countries in the conventional sense and economies in transition from socialism to a market economy. In this context development is broadly defined as the transition from one stage of development to another. Selected topics common among these countries (such as determinants of growth, modernization, technology, price liberalization, privatization, macro stabilization, trade policies, legal structure, organized crime, inequality, poverty, human capital, and global sustainability) are discussed to better understand the forces that shape the wealth and well being of nations and people in the world around us. Prerequisites: ECON 201 and ECON 202. On demand.

ECON 395. Special Topics in Economics. 1-3 Credits. Specific topic will vary from year to year; some years an important development in economic theory, other years, a significant issue in economic policy. Repeatable to 20 credits. Prerequisites: ECON 201 and ECON 202. Repeatable to 20 credits. On demand.

ECON 397. Cooperative Education. 1-2 Credits. A practical work experience with an employer closely associated with the student's academic area. Repeatable to 5 credits. Prerequisite: Permission of departmental Cooperative Education Coordinator. Repeatable to 3 credits. S/U grading. F,SS.

ECON 400. History of Economic Thought. 3 Credits. Broad overview of the major schools of thought including Mercantilist, Physiocrat, Classical, Marxist, Socialist, Historical, Austrian, Neoclassical, Institutional, Keynesian, and Monetarist. The coverage includes value theory, income/expenditure theory, growth/development theory, scientific method, scope and public policy. Prerequisites: ECON 105 or ECON 201, and ECON 202. S.

ECON 405. Bank Regulation. 3 Credits. The regulations imposed upon the banking industry are examined at several levels: state, federal, and global. Both the historical development of banking regulation as well as current issues/controversies are discussed. In addition, the banker's perspective of regulatory compliance is explored. Prerequisite: ECON 303. S.
Bachelor of Economics

The major in Economics provides a critical examination of how the economic system works in the United States and throughout the world. The introductory courses are surveys of economic problems, policies, and theory; the required courses in micro theory and macro theory give a deeper analytical foundation.

Electives permit further study in a wide range of fields, including international trade and finance, public sector economics, economic development, economic history, capital theory and finance, labor economics, income distribution, political economy, financial markets, and public policy analysis. The major in Economics provides a general background that is useful to those planning careers in law, government service, or business, as well as those planning careers as professional economists. Professional economists work as college professors, as researchers for government agencies, in businesses and consulting firms, and as administrators and managers in a wide range of fields.

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing: 39 credit hours)

II. Required Major Courses (24 credit hours):

- ECON 201 Principles of Microeconomics 3
- ECON 210 Principles of Macroeconomics 3
- ECON 303 Money and Banking 3
- ECON 308 Intermediate Microeconomic Theory 3
- ECON 309 Intermediate Macroeconomic Theory and Policy 3
- ECON 338 International Economics 3
- ECON 410 Empirical Methods in Economics I 3

Total Credits 24

- This course satisfies part of the ES Social Sciences requirement and carries a Q designation.
- ** This course satisfies part of the ES Math, Science, and Technology requirement and carries a Q designation.

III. Elective Major Courses: Choose from either Option A, Option B, or a 12 credit hour combination from Options A and B below.

Option A - Choose at least 12 credit hours from the following:

- ECON 305 Principles of Banking I 3
- ECON 324 Public Finance 3
- ECON 330 Business and Economic History 3
- ECON 341 Labor Economics and Labor Relations 3
- ECON 355 Government Regulation of Business 3
- ECON 380 Global Economic Development 3
- ECON 395 Special Topics in Economics 1-3
- ECON 397 Cooperative Education 1-4
- ECON 400 History of Economic Thought 3
- ECON 405 Bank Regulation 3
- ECON 409 Current Issues in Macroeconomic Policy 3
- ECON 411 Economic Forecasting 3
- ECON 414 Managerial Economics 3
- ECON 416 Mathematics for Economists 3
- ECON 438 International Money and Finance 3
- ECON 489 Senior Honors Thesis 1-8
- ECON 495 Readings in Economics 1-3
- ECON 496 Research in Economics 1-3
- ECON 497 Internship 1-4
- ECON 575 Advanced Special Topics 3

- No more than 6 credit hours of electives from ECON 397 Cooperative Education, ECON 495 Readings in Economics, ECON 496 Research in Economics, and ECON 497 Internship may count toward the elective major courses.

Option B (Quantitative Option)* - Choose 12 credit hours from the following:

- ECON 411 Economic Forecasting 3
- ECON 416 Mathematics for Economists 3
- MATH 165 Calculus I 4
- MATH 166 Calculus II 4

* This course satisfies part of the ES Mathematics requirement and carries a Q designation.

Option C - Choose 12 credit hours from the following:

- ECON 411 Economic Forecasting 3
- ECON 416 Mathematics for Economists 3
- MATH 165 Calculus I 4
- MATH 166 Calculus II 4

* This course satisfies part of the ES Mathematics requirement and carries a Q designation.

Courses are surveys of economic problems, policies, and theory; the required courses in micro theory and macro theory give a deeper analytical foundation.

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing: 39 credit hours)

II. Required Major Courses (24 credit hours):

- ECON 201 Principles of Microeconomics 3
- ECON 210 Principles of Macroeconomics 3
- ECON 303 Money and Banking 3
- ECON 308 Intermediate Microeconomic Theory 3
- ECON 309 Intermediate Macroeconomic Theory and Policy 3
- ECON 338 International Economics 3
- ECON 410 Empirical Methods in Economics I 3

Total Credits 24

- This course satisfies part of the ES Social Sciences requirement and carries a Q designation.
- ** This course satisfies part of the ES Math, Science, and Technology requirement and carries a Q designation.

III. Elective Major Courses: Choose from either Option A, Option B, or a 12 credit hour combination from Options A and B below.

Option A - Choose at least 12 credit hours from the following:

- ECON 305 Principles of Banking I 3
- ECON 324 Public Finance 3
- ECON 330 Business and Economic History 3
- ECON 341 Labor Economics and Labor Relations 3
- ECON 355 Government Regulation of Business 3
- ECON 380 Global Economic Development 3
- ECON 395 Special Topics in Economics 1-3
- ECON 397 Cooperative Education 1-4
- ECON 400 History of Economic Thought 3
- ECON 405 Bank Regulation 3
- ECON 409 Current Issues in Macroeconomic Policy 3
- ECON 411 Economic Forecasting 3
- ECON 414 Managerial Economics 3
- ECON 416 Mathematics for Economists 3
- ECON 438 International Money and Finance 3
- ECON 489 Senior Honors Thesis 1-8
- ECON 495 Readings in Economics 1-3
- ECON 496 Research in Economics 1-3
- ECON 497 Internship 1-4
- ECON 575 Advanced Special Topics 3

- No more than 6 credit hours of electives from ECON 397 Cooperative Education, ECON 495 Readings in Economics, ECON 496 Research in Economics, and ECON 497 Internship may count toward the elective major courses.

Option B (Quantitative Option)* - Choose 12 credit hours from the following:

- ECON 411 Economic Forecasting 3
- ECON 416 Mathematics for Economists 3
- MATH 165 Calculus I 4
- MATH 166 Calculus II 4

* This course satisfies part of the ES Mathematics requirement and carries a Q designation.

Option C - Choose 12 credit hours from the following:

- ECON 411 Economic Forecasting 3
- ECON 416 Mathematics for Economists 3
- MATH 165 Calculus I 4
- MATH 166 Calculus II 4

* This course satisfies part of the ES Mathematics requirement and carries a Q designation.
Bachelor of Business Administration with Major in Banking and Financial Economics

The Economics Faculty together with other faculty in the College of Business and Public Administration offer a major in Banking and Financial Economics that is intended to prepare students for employment with financial institutions and government. The major is comprised of a comprehensive curriculum that provides a background in basic business, economic theory, the principles and practices of banks and other financial institutions, bank regulation, macroeconomic policy and international finance. Experience has shown the graduates of this program are prepared to immediately function in highly responsible positions in financial institutions and regulatory agencies.

All B.B.A. candidates must fulfill the College of Business and Public Administration degree requirements.

Required 120 credit hours (36 of which must be numbered 300 or above) including:

I. Essential Studies Requirements (see University ES listing).

II. Choose one of the following: MATH 103, MATH 146, or MATH 165

III. College of Business and Public Administration Requirements:

** No more than 3 hours of electives from ECON 395 Special Topics in Economics, ECON 397 Cooperative Education, ECON 497 Internship and FIN 491 Senior Topics in Finance may count toward the elective major courses.

VI. College of Business & Public Administration Graduation Requirements:

1. Earn a minimum cumulative GPA of 2.50
2. Earn a minimum UND GPA of 2.50
3. Earn a minimum cumulative major GPA of 2.50 (business administration courses that apply toward the degree and major)
4. Earn a minimum UND major GPA of 2.50 (business administration courses that apply toward the degree and major)
5. At least half of the business courses that apply toward the degree and major must be from UND

Bachelor of Business Administration with Major in Business Economics

The major in Business Economics is offered through the College of Business and Public Administration. This program emphasizes the business firm — integrating economics with related areas in marketing, management, accounting, finance, and quantitative analysis. Students who complete a major in Business Economics possess a comprehensive background in the basic foundations of a business as well as the analytical skills in economics increasingly required to be successful in the business world at local, regional, national and international levels. All B.B.A. candidates must fulfill the College of Business and Public Administration degree requirements.

Required 120 credit hours (36 of which must be numbered 300 or above) including:

I. Essential Studies Requirements (see University ES listing).

II. Choose one of the following: MATH 103, MATH 146, or MATH 165

III. College of Business and Public Administration Requirements:

* ACCT 218 Advanced Spreadsheet Applications is waived as a prerequisite for Banking and Financial Economics majors.

** No more than 3 hours of electives from ECON 395 Special Topics in Economics, ECON 397 Cooperative Education, ECON 497 Internship and FIN 491 Senior Topics in Finance may count toward the elective major courses.

VI. College of Business & Public Administration Graduation Requirements:

1. Earn a minimum cumulative GPA of 2.50
2. Earn a minimum UND GPA of 2.50
3. Earn a minimum cumulative major GPA of 2.50 (business administration courses that apply toward the degree and major)
4. Earn a minimum UND major GPA of 2.50 (business administration courses that apply toward the degree and major)
5. At least half of the business courses that apply toward the degree and major must be from UND
Certificate in Applied Economics

Admission Requirements

1. A four-year bachelor's degree from a recognized college or university.
2. An overall undergraduate grade point average of 2.75 or greater for all undergraduate work or a GPA of at least 3.0 for the junior and senior years of undergraduate work (based on A=4.0).
3. Official scores from the Graduate Record Examination (GRE) General Test or Graduate Management Admission Test (GMAT). Students with strong quantitative backgrounds, including current and former UND undergraduate STEM majors, or, students holding a graduate degree in a business or STEM related field from an AACSB accredited institution, may request a waiver of the GRE/GMAT requirement.
4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.
5. Complete undergraduate intermediate microeconomics, one semester of calculus, and one semester of probability and statistics, or equivalent.
6. Applicants may be eligible for admission in "Qualified" status with six credits of requisite undergraduate work provided that they meet all other stated admission criteria. In such cases, the student must satisfy all conditions in her/his admission letter in order to advance to "Approved" status. Failure to address the conditions of admission as stated in the admission letter will be viewed as unsatisfactory progress and could result in dismissal from the School of Graduate Studies.

Certificate Requirements

Students seeking the Certificate in Applied Economics through the Department of Economics & Finance at the University of North Dakota must satisfy all general requirements set forth by the School of Graduate Studies as well as particular requirements set forth by the Department of Economics & Finance. The Certificate program requires the completion of the 4 graduate-level courses (for a total of 12 credits) in the Master of Science in Applied Economics (MSAE) program; listed below. Students may take additional courses in the MSAE program (or, other approved programs) for additional credits, if they wish. Certificate students may also choose to transfer to the MSAE program with the approval of the MSAE Program Director.

Minor in Economics

Students who are interested in obtaining a basic background in Economics to complement their chosen major course of study may elect a minor in Economics offered through the College of Business and Public Administration.

I. Required courses (15 credit hours):

ECON 201 Principles of Microeconomics 3
ECON 202 Principles of Macroeconomics 3
ECON 303 Money and Banking 3
ECON 308 Intermediate Microeconomics 3
ECON 309 Intermediate Macroeconomic Theory and Policy 3

Total Credits 15

II. Economics electives (5 credit hours):

ECON 210 Introduction to Business and Economic Statistics 3
ECON 305 Principles of Banking I 3
ECON 324 Public Finance 3
ECON 330 Business and Economic History 3
ECON 338 International Economics 3
ECON 341 Labor Economics and Labor Relations 3
ECON 355 Government Regulation of Business 3
ECON 380 Global Economic Development 3
ECON 395 Special Topics in Economics 1-3
ECON 400 History of Economic Thought 3
ECON 405 Bank Regulation 3
ECON 409 Current Issues in Macroeconomic Policy 3
ECON 410 Empirical Methods in Economics I 3
ECON 411 Economic Forecasting 3
ECON 414 Managerial Economics 3
ECON 416 Mathematics for Economists 3
ECON 420 Economic Education 3
ECON 438 International Money and Finance 3
ECON 495 Readings in Economics 1-3
ECON 496 Research in Economics 1-3

Education and Human Development (EHD)

Courses

EHD 200. Research in the University Library. 1 Credit.
Introduction to effective library-based research. Current technologies and traditional methods are emphasized. F,S.

EHD 250A. Special Topics. 1-3 Credits.
Specially arranged seminars or courses on contemporary topics not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved, provided appropriate faculty members are willing. 1 to 3 credits in any one semester; repeatable to 12 credits. Regular grading. Repeatable to 12 credits. F,S.

EHD 250B. Special Topics. 1-3 Credits.
Specially arranged seminars or courses on contemporary topics not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved, provided appropriate faculty members are willing. 1 to 3 credits in any one semester; repeatable to 12 credits. S/U grading. Repeatable to 12 credits. S/U grading. F,S.

EHD 390A. Special Topics. 1-2 Credits.
May be repeated to 12 credits. Regular grading. Repeatable to 12 credits.

EHD 390B. Special Topics. 1-2 Credits.
May be repeated to 12 credits. S/U grading. Repeatable to 12 credits. S/U grading.

EHD 495A. Special Problems. 1-3 Credits.
Specially arranged seminars or courses on contemporary topics, having professional orientation and possible prerequisites not covered by regular departmental offerings. May be initiated by the students with approval of dean and department involved, provided appropriate faculty are willing. 1 to 3 credits in any one semester; repeatable to 12 credits. Regular grading. F,S.

EHD 495B. Special Problems. 1-3 Credits.
Specially arranged seminars or courses on contemporary topics, having professional orientation and possible prerequisites not covered by regular departmental offerings. May be initiated by the students with approval of dean and department involved, provided appropriate faculty are willing. 1 to 3 credits in any one semester; repeatable to 12 credits. S/U grading. S/U grading. F,S.

EHD 497. Community Concepts of Residence Hall Living. 2 Credits.
Assists Resident Assistants in gaining a more complete understanding of components of a successful residence hall environment with implications for job satisfaction and individual development. F,S.
CSCI 160. Computer Programming I. 4 Credits.
An introduction to computer programming in a high-level language, with emphasis on problem solving and logical thinking. Students learn to design, implement, test, and debug programs for small-scale problems using elementary data types and control structures. Includes laboratory. On demand.

CSCI 161. Computer Science I. 4 Credits.
A broadening of foundations for computer science with advanced concepts in computer programming. Includes an introduction to data structures, analysis of algorithms, and the theory of computation. Includes laboratory. Prerequisite: CSCI 130 with a grade of C or better or CSCI 160 with a grade of C or better, and MATH 103 or MATH 107; concurrent enrollment in MATH 208 is recommended. S.

CSCI 161L. Computer Prog I Lab.
Computer Programming I Lab.

CSCI 160L. Computer Prog I Lab.
Computer Programming I Lab.

CSCI 170. Computer Programming II. 4 Credits.
Advanced techniques in computer programming using a high-level language. Topics include the use of recursion, pointers, and fundamental data structures in developing small to medium-scale programs. Includes laboratory. Prerequisite: CSCI 120. On demand.

CSCI 199. Topics in Computing. 1-3 Credits.
Selected introductory-level topics in computing for students of all majors. Course may be repeated to 6 credits with different topics. Repeatable to 6 credits. On demand.

CSCI 230. Systems Programming. 3 Credits.
Focus on low level programming. Topics covered include pointers, memory management, dynamic memory, code optimization, compiling and linking, and library development. Weekly programming assignments. Prerequisite: CSCI 161 with a grade of C or better. F.S.

CSCI 242. Algorithms and Data Structures. 3 Credits.
Object-oriented implementations of complex data structures including lists, sets, trees, and graphs. Time and space analysis and classification of algorithms using upper bounds (big Oh), lower bounds (big Omega), and exact bounds (big Theta). Techniques for analysis of recursive algorithms including use of the "Master Theorem" for divide-and-conquer recurrences. Prerequisites: CSCI 161 with a C or better and MATH 208. F.S.

CSCI 260. Advanced Programming Languages. 3 Credits.
Programming in a specific high-level language for students who are already proficient at programming in another high-level language. Course may be repeated for different languages. A student may not receive credit for both CSCI 260 and a 100-level programming course in the same language. Prerequisite: CSCI 161 or consent of instructor. Repeatable. F.

CSCI 270. Programming for Data Science. 3 Credits.
The Programming for Data Science course provides students with an introduction to the main tools and ideas in the data scientist's toolbox. The course gives an overview of the data, questions, techniques and tools that data analysts and data scientists work with. This course provides a conceptual introduction to the ideas behind turning data into actionable knowledge and tools that will be used to analyze this data. The course will cover collecting, cleaning and sharing data. Additionally, this course will cover how to communicate results through visualizations. Prerequisite: CSCI 161 with a grade of C or better. S.

CSCI 280. Object Oriented Programming. 3 Credits.
An introduction to the concept and execution of Object-Oriented programming, using the Java language. Includes an introduction to object creations, classes, inheritance, interfaces, exceptions, overloading, and more. Prerequisite: CSCI 161 with a C or better.

CSCI 289. Social Implications of Computer Technology. 3 Credits.
An introduction to the effects of computer technology on society and individuals and to ethical problems faced by computer professionals. Topics covered include privacy, the nature of work, centralization versus decentralization and the need for human factors analysis in the development of a new computer system. F.

CSCI 290. Cyber-Security and Information Assurance. 3 Credits.
An introduction covering the breadth of essential Cyber-Security and Information Assurance topics. Students will hone skills in observation, deduction, analysis, logical reasoning and critical thinking as they gain experience with non-technical and lightly technical aspects of Cyber-Security and Information Assurance through practical and real-world examples. S.

CSCI 297. Experiential Learning. 1-3 Credits.
A practical experience in which students offer their proficiency in computing as a resource or service for others. The experience may involve software development, software consulting and assistance, system administration, or instruction. Prerequisite: CSCI 161. Repeatable to 6 credits. S/U grading. F.

CSCI 299. Topics in Computer Science. 1-3 Credits.
Selected intermediate-level topics in computer science for students with some experience or previous coursework in computing. Course may be repeated up to 6 credits with different topics. Repeatable to 6 credits. On demand.

CSCI 327. Data Communications. 3 Credits.
An introduction to the concepts of data transmission, communication hardware and protocols, communication software and the design, performance and management of computer networks. Prerequisites: CSCI 230 and MATH 208. F.

CSCI 363. User Interface Design. 3 Credits.
A study of the design and implementation of user interfaces for software applications. Students will apply principles of interface design to build applications using a toolkit of graphical interface components. Required coursework includes a team project. Prerequisite: CSCI 280 with a grade of C or better. F.

CSCI 364. Concurrent and Distributed Programming. 3 Credits.
This course focuses on concurrent object oriented programming and modern distributed/parallel programming models (such as OpenMP, CUDA, OpenCL and Actors). Students will utilize various high performance distributed computing technology. Topics covered will include shared and distributed memory systems, sockets, threads, and message passing. Prerequisites: CSCI 242 with a grade of C or better and CSCI 230 with a grade of C or better. S.

CSCI 365. Organization of Programming Languages. 3 Credits.
Compile and run time requirements of programming languages, parameter passing and value binding techniques, Vector and stack processing. Prerequisite: CSCI 242 with a grade of C or better. S.

CSCI 370. Computer Architecture. 4 Credits.
Computer structure, machine presentation of numbers and characters, instruction codes and assembly systems. Introduction to hardware methodologies and software extensions to hardware in computers. Some topics on hardware and software selection will be discussed. Prerequisites: CSCI 230 with a grade of C or better, EE 201, and EE 201L. S.

CSCI 384. Artificial Intelligence. 3 Credits.
A study of algorithms and application of AI. The topics include agent theory, problem-solving with the search, constraint satisfaction problem, game, knowledge-based system, reasoning and machine learning which are widely applicable to design of an intelligent system, data science and mining, information retrieval, pathfinding and classification, etc. Prerequisite: CSCI 242. SS, even years.

CSCI 387. Secure Software Engineering. 3 Credits.
This course provides fundamental knowledge of secure software development methodologies and applied security topics related to compiled programs. In-depth coverage of source code auditing, fuzzing, introduction to reverse engineering, and exploitation will be emphasized. F.

CSCI 388. Exploit Analysis and Development. 3 Credits.
Provides fundamental knowledge of Malware analysis. Topics include an introduction to both static and dynamic techniques for analyzing suspect binaries. Students will be exposed to advanced malware concepts including malware detection as well as the utilization of industry standard tools to analyze, debug, and reverse engineer suspect binaries. F.
CSCI 389. Computer and Network Security. 3 Credits.
This course introduces techniques for achieving security in multi-user standalone computer systems and distributed computer systems. Coverage includes host-based security topics (cryptography, intrusion detection, secure operating systems), network-based security topics (authentication and identification schemes, denial-of-service attacks, worms, firewalls), risk assessment and security policies. Prerequisite: CSCI 161. S.

CSCI 397. Cooperative Education. 1-2 Credits.
A practical work experience with an employer closely associated with the student's academic area. Arranged by mutual agreement among student, department, employer, and the UND Cooperative Education office. Repeatable to 6 credits. Prerequisites: Declared Computer Science major with 15 completed credits in CSCI including CSCI 230 and CSCI 242. Repeatable to 6 credits. S/U grading. F,S,SS.

CSCI 399. Topics in Computer Science. 1-3 Credits.
Selected topics in Computer Science which allow students to study specialized subjects. Repeatable to 12 credits. Prerequisite: Consent of instructor. Repeatable to 12 credits. On demand.

CSCI 427. Cloud Computing. 3 Credits.
This is the undergraduate-level course on cloud computing models, techniques, and architectures. Cloud computing is an important computing model which enables information, software, and other shared resources to be provisioned over the network as services in an on-demand manner. This course introduces the current practices in cloud computing. Topics may include distributed computing models and technologies, Infrastructure-as-a-Service (IaaS), Platform-as-a-Service (PaaS), Software-as-a-Service (SaaS), virtualization, performance and systems issues, capacity planning, disaster recovery, Cloud OS, federated clouds, challenges in implementing clouds, data centers, hypervisor CPU and memory management, and cloud hosted applications. S, even years.

CSCI 435. Formal Languages and Automata. 3 Credits.
A study of automata, grammars, and Turing machines as specifications for formal languages. Computation is defined in terms of deciding properties of formal languages, and the fundamental results of computability and decidability are derived. Prerequisites: CSCI 242 with a grade of C or better and minimum second semester junior standing. F.

CSCI 445. Mathematical Modeling and Simulation. 3 Credits.
A study of various mathematical applications for digital computers, including the modeling, simulation and interpretation of the solution of complex systems. Prerequisites: CSCI 161 or CSCI 170, and MATH 166 and a statistics course. F, even years.

CSCI 446. Computer Graphics I. 3 Credits.
Introduction to computer graphics. Topics include raster scan graphics, 2D and 3D representations, affine transformations, light and color, texture mapping, image processing, ray-tracing, and computer animation. Team-based weekly homework develops a 4 minute computer animation. Prerequisites: CSCI 242, CSCI 363, and MATH 166. F, odd years.

CSCI 448. Computer Graphics II. 3 Credits.
A continuation of CSCI 446. topics covered include: history of games, game taxonomies, game design theory, computer game development, physics engines and AI engines. Prerequisite: CSCI 446. S, even years.

CSCI 451. Operating Systems I. 3 Credits.
Introduction to operating system theory and fundamentals. Topics include: CPU scheduling, memory management, file systems, interprocess communication facilities, security. Weekly homework assignments focus on process synchronization using fork/exec, threads, mutexes, pipes, semaphores, and shared memory. Prerequisites: CSCI 242 and CSCI 370; both with a grade of C or better. F.

CSCI 452. Operating Systems II. 3 Credits.
A study of the implementation of operating systems and parts of operating systems, and development of system software. Prerequisites: CSCI 451. On demand.

CSCI 455. Database Management Systems. 3 Credits.
Database concepts, database design (ER, UML), database programming languages (SQL), NoSQL Database, Database Concurrency and recovery techniques, and Database security. Prerequisite: CSCI 242 with a grade of C or better. S, even years.

CSCI 457. Electronic Commerce Systems. 3 Credits.
A study of the system architecture, content design and implementation, and data analysis, management, and processing of electronic commerce. Topics include Internet basics, business issues, data management and processing, static and dynamic web programming, e-commerce content design and construction, and databases and host languages with embedded SQL. Prerequisite: CSCI 260 with course topic of Dot Net. S, odd years.

CSCI 463. Software Engineering. 3 Credits.
This course teaches software engineering principles and techniques used in the specification, design, implementation, verification and maintenance of large-scale software systems. Major software development methodologies are reviewed. As development team members, students participate in a group project involving the production or revision of a complex software product. Prerequisites: CSCI 242 and CSCI 363. S.

CSCI 465. Principles of Translation. 3 Credits.
Techniques for automatic translation of high-level languages to executable code. Prerequisites: CSCI 365 and CSCI 370. F, odd years.

CSCI 487. Penetration Testing. 3 Credits.
Provides theoretical and practical aspects of Network Penetration Testing. The course includes in-depth details and hands on labs for each of the five distinct phases of an ethical hack including reconnaissance, scanning and vulnerability assessment, gaining access and exploitation, maintaining access, and covering tracks. An applied approach with a focus on current tools and methodologies will be stressed. S.

CSCI 491. Seminars in Computer Science. 1 Credit.
A course for advanced students. Repeatable to 3 credits. Prerequisite: Consent of instructor. Repeatable to 3 credits. S/U grading. F,S.

CSCI 492. Senior Project I. 3 Credits.
The first course in a two-semester sequence in which computer science majors undertake a culminating research or software development project. The course requires written documents, oral presentations, and peer review for the initial phases of the project, including a project proposal, a review of previous work, and a complete software design or research plan. Prerequisites: CSCI 242 and at least second-semester junior standing. F.

CSCI 493. Senior Project II. 1 Credit.
The second course in a two-semester sequence in which computer science majors undertake a culminating research or software development project. The course requires written documents and oral presentations/demonstrations for both a preliminary and a final review of the completed project. Prerequisite: CSCI 492. S.

CSCI 494. Special Projects in Computer Science. 1-3 Credits.
A course for advanced students. 1-3 credits varying with the choice of project. May be repeated (6 credits maximum). Prerequisite: Consent of instructor. Repeatable to 6 credits. F,S.

EE Courses

EE 101. Introduction to Electrical Engineering. 1 Credit.
An introduction to the electrical engineering discipline. Recent technologies and practices in electronics, computers, controls, power systems, robotics, communication, and microwaves. F,S.

EE 201. Introduction to Digital Electronics. 2 Credits.
Introduction to the fundamentals of digital circuits design. Logic gates; Boolean algebra; Karnaugh maps; Mathematical operations; Flip Flops; Counters. Corequisite: EE 201L. F,S.

EE 201L. Digital Electronics Laboratory. 1 Credit.
Introduction to design and implementation of digital electronic circuits. Corequisite: EE 201. F,S.

EE 206. Circuit Analysis. 3 Credits.
Introduces the foundations of electrical engineering, applying these concepts in developing the fundamentals of energy conversion, electronics and circuit theory. Prerequisite: MATH 165 with a grade of C or better; EE Major should be declared. F.

EE 206L. Circuits Laboratory I. 1 Credit.
Introduction to methods of experimental circuit analysis and to proper uses of laboratory equipment. Prerequisite: EE major should be declared. Corequisite: EE 206. F,S,SS.
EE 304. Computer Aided Measurement and Controls. 3 Credits.
The principles of the use of a computer in a measurement and control environment are presented. Software is designed to drive interfaces to perform measurement and control algorithms. The software and concepts presented are evaluated in a laboratory environment. Prerequisites: Electrical Engineering major and MATH 165. F.

EE 313. Linear Electric Circuits. 3 Credits.
Linear electric circuits in the steady state and transient conditions; two-port circuits; Fourier Series single and polyphase systems. Prerequisites: Electrical Engineering major and EE 206 with a grade of C or better. Corequisite: EE 313L. S.

EE 313L. Circuits Laboratory II. 1 Credit.
Experimental circuit analysis and proper uses of laboratory equipment. Prerequisites: Electrical Engineering major and 206L. Corequisite: EE 313. SS.

EE 314. Signals and Systems. 3 Credits.
Passive filters; Laplace transform applications; Fourier transform; Z-transform; Nyquist sampling theorem; other topics as time permits (state variables; introduction to control and communications theory; discrete Fourier transform). Prerequisite: EE 313. Corequisite: MATH 266 and EE 314L. F.

EE 314L. Signal and Systems Laboratory. 1 Credit.
In this laboratory course, students will conduct simulations and experiments related to theory covered in EE 314. The topics include implementation of passive filters, Laplace transform, and Z-transform. Corequisite: EE 314. F.

EE 316. Electric and Magnetic Fields. 3 Credits.
Field produced by simple distributions of electric charges and magnetic poles, field mapping and application to engineering problems. Prerequisites: EE 206 with a grade of C or better. Corequisite: MATH 266. F.

EE 318. Engineering Data Analysis. 3 Credits.
This course will provide undergraduate electrical engineering students with an understanding of the principles of engineering data analysis using basic probability theory and basic statistics theory. Students will have the opportunity to apply these concepts to actual engineering applications and case studies. Prerequisites: EE 206 with a grade of C or better. Corequisite: EE 313. F.

EE 321. Electronics I. 3 Credits.
Fundamentals of semiconductors, nonlinear discrete components such as diodes and transistors, and integrated circuits; analysis and synthesis of simple electronic circuits, including amplifiers. Prerequisite: EE 313. Corequisite: EE 321L. F.

EE 321L. Electronics Laboratory I. 1 Credit.
Practical electronics application and design using theory studied in concurrent third year electrical engineering courses. Prerequisite: EE 313L. Corequisite: EE 321. F.

EE 397. Cooperative Education. 1-2 Credits.
A practical work experience with an employer closely associated with the student's academic area. Arranged by mutual agreement among student, department, and employer. Repeatable to 24 credits. Prerequisite: Admission to the electrical engineering degree program; a cumulative GPA of 2.0 or higher is required. Repeatable to 24 credits. S/U grading. F.S.SS.

EE 401. Electric Drives. 3 Credits.
A study of variable speed drives and their electronic controls; analysis and synthesis of power electronics through computer simulations and laboratory implementations. Prerequisite: EE 314. Corequisite: EE 401L. S.

EE 401L. Electric Drives Laboratory. 1 Credit.
The course provides the basic knowledge required for the usage and the design of the most common electrical drives. This lab focuses on the Electric Drives and their control in a real time environment using dSPACE and/or similar digital signal processing based methods and simulations. Corequisite: EE 401L. F.

EE 405. Control Systems I. 3 Credits.
Mathematical modeling and dynamic response of linear control systems; stability analysis; design of linear controllers using the root locus and frequency response techniques. Prerequisite: EE 314 and MATH 266. Corequisite: EE 405L. S.

EE 405L. Control Systems Laboratory. 1 Credit.
Experiments and simulations related to theory discussed in EE 405 are implemented in this laboratory course. The topics included mathematical modeling and dynamic response of linear systems; stability analysis; and design of controllers. Corequisite: EE 405. S.

EE 409. Distributed Networks. 3 Credits.
Fundamentals of transmission lines. Prerequisite: EE 313 and EE 316. S.

EE 411. Communications Engineering. 3 Credits.
Mathematical definition of random and deterministic signals and a study of various modulation systems. Prerequisite: EE 314. On demand.

EE 421. Electronics II. 3 Credits.
Analysis of electronic circuits and systems using discrete components and integrated circuits, digital circuits, active filters, and power amplifiers. Prerequisite: EE 314 and EE 321. Corequisite: EE 421L. S.

EE 421L. Electronics Lab II. 1 Credit.
Practical electronics application and design using theory studied in concurrent third year electrical engineering courses. Prerequisite: EE 321L. Corequisite: EE 421. S.

EE 423. Power Systems I. 3 Credits.
Electric power systems operation, control and economic analysis. Prerequisite: EE 313. On demand.

EE 424. Electronic Circuits. 3 Credits.
Principles, applications, and design of electronic equipment studied from viewpoint of complete systems. Prerequisite: EE 321. On demand.

EE 428. Robotics Fundamentals. 3 Credits.
Fundamentals of robotic systems: modeling, analysis, design, planning, and control. The project provides hands-on experience with robotic systems. Prerequisite: MATH 266 or consent of instructor. On demand.

EE 430. Introduction to Antenna Engineering. 3 Credits.
Review of vector analysis and Maxwell's equations, wave propagation in unbounded regions, reflection and refraction of waves, fundamental antenna concepts, wire- and aperture-type antennas, wave and antenna polarization, antenna measurements, and computer-aided analysis. Prerequisite: EE 409 or consent of instructor. On demand.

EE 434. Microwave Engineering. 3 Credits.
Review of transmission lines and plane waves, analysis of microwave networks and components using scattering matrices, analysis of periodic structures, transmission and cavity type filters, high frequency effects, microwave oscillators, amplifiers, and microwave measurement techniques. Prerequisite: EE 409 or consent of instructor. On demand.

EE 451. Computer Hardware Organization. 3 Credits.
The study of complete computer systems including digital hardware interconnection and organization and various operation and control methods necessary for realizing digital computers and analog systems. Prerequisite: EE 201 and EE 304; or consent of instructor. On demand.

EE 452. Embedded Systems. 3 Credits.
A study of microcontroller hardware and software, with an emphasis on interfacing the microcontroller with external electronic devices such as transceivers, sensors, and actuators for communications and control within an embedded system. Prerequisite: EE 201, EE 304 and EE 321. Corequisite: EE 452L. S.

EE 452L. Embedded Systems Design Laboratory. 1 Credit.
This introductory laboratory course provides students with the hands-on activities in order to learn and gain more experiences in designing embedded systems (smart systems) using microcontrollers, actuators, and sensors. Prerequisites: EE 201 and EE 304 or consent of instructor. Prerequisite or corequisite: EE 452. S.

EE 456. Digital Image Processing. 3 Credits.
Digital image retrieval, modification, enhancement, restoration, and storage. Image transformation and computer vision. The associated laboratory provides hands-on experiences. Prerequisite: EE 304 and EE 314. On demand.

EE 480. Senior Design I. 3 Credits.
First course in the two-semester capstone design experience for the electrical engineering undergraduate degree, emphasizing design methodologies, advanced communication, and teamwork. Student teams will select an electronic system to design, capture end-user requirements, and perform component trade studies, resulting in an oral and written critical design review at the end of the semester. EE 480 Senior Design I meets the Essential Studies Special Emphasis requirements for Advanced Communication (A) and Senior Capstone (C). Prerequisites: EE 309 and EE 421 and two out of the four following classes: EE 401, EE 405, EE 409, EE 452. F.
EE 481. Senior Design II. 3 Credits.
Second course in the two-semester capstone design experience for
the electrical engineering undergraduate degree, emphasizing design
methodologies, oral communication, and teamwork. Student teams will be
required to build and test a prototype of the electronic systems designed in
EE 480 Senior Design I, and they will prepare written reports and deliver oral
presentations on their design choices with critique by the instructor. EE 481
Senior Design II meets the Essential Studies Special Emphasis requirement for
Oral Communication (O). Prerequisite: EE 480. S.

EE 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits. Repeatable to 9 credits. F.S.S.

EE 490. Electrical Engineering Problems. 1-9 Credits.
Repeatable to maximum of 9 credits. Prerequisite: Approval by departmental
faculty member under whom the electrical engineering problem is studied. Repeatable to 9 credits. F.S.

Bachelor of Science in Cyber Security

This program prepares students who have a strong interest related to the field
of cyber-physical security systems.

Admission Requirements

All of the general UND requirements for undergraduate enrollment, participation, and completion of a degree shall be required.

Degree Requirements

Required curriculum (120 credits):

1. Electrical Engineering (43 credits):

   EE 201 Introduction to Digital Electronics 2
   EE 206 Circuit Analysis 3
   EE 206L Circuits Laboratory I 1
   EE 304 Computer Aided Measurement and Controls 3
   EE 313 Linear Electric Circuits 3
   EE 313L Circuits Laboratory II 1
   EE 314 Signals and Systems 3
   EE 314L Signal and Systems Laboratory 1
   EE 318 Engineering Data Analysis 3
   EE 321 Electronics I 3
   EE 321L Electronics Laboratory I 1
   EE 405 Control Systems I 3
   EE 405L Control Systems Laboratory 1
   EE 421 Electronics II 3
   EE 421L Electronics Lab II 1
   EE 480 Senior Design I 3
   EE 481 Senior Design II 3

2. Electrical Engineering electives with a focus on Cyber Security (15 credits from the following):

   EE 508 Intelligent Decision Systems 3
   EE 526 Systems Reliability 3
   EE 534 Advanced Wireless Communications Engineering 3
   EE 540 Computer Networks Communications 3
   EE 542 Network Architectures 3
   EE 551 Cryptography Techniques and their VLSI Implementations 3
   EE 552 Advanced Embedded Systems Design 3
   EE 611 Emerging Threats and Defenses 3
   EE 612 Spread Spectrum Communications for Cyber Security 3
   EE 613 Advanced Cyber Security Principles 3
   EE 615 Cyber Forecasting 3
   EE 616 Cyber-Physical Energy Systems Security 3
   EE 617 Data Operations and Security 3

   EE 623 Introduction to Smart Grid I 3
   EE 624 Introduction to Smart Grid II 3
   EE 640 Communication Protocols: OSI model and TCP/IP Protocol Stack 3
   EE 740 Intrusion Detection Algorithms 3
   EE 750 Internet of Things and Security 3
   EE 751 Wireless Sensor Networks 3
   EE 752 Introduction to Autonomous Systems 3

3. Electives from other departments (15 credits from the following):

   CSCI 130 Introduction to Scientific Programming 4
   or CSCI 160 Computer Science I 4
   CSCI 161 Computer Science II 4
   CSCI 230 Systems Programming 3
   CSCI 387 Secure Software Engineering 3
   CSCI 389 Computer and Network Security 3
   CSCI 388 Exploit Analysis and Development 3
   CSCI 487 Penetration Testing 3
   CJ 320 Cybersecurity Law and Investigations 3
   MATH 208 Discrete Mathematics 3
   MATH 425 Cryptological Mathematics 3
   PSYC 301 Industrial and Organizational Psychology 3
   PSYC 370 Cyber Security, Big Data, & Human Behavior 3
   PSYC 372 Behavioral Design & Digital Products 3
   PSYC 433 Psychology of Learning 4
   PSYC 436 Perception 4
   PSYC 439 Cognitive Psychology 4

4. Required courses from other departments (55 credits):

   MATH 165 Calculus I 4
   MATH 166 Calculus II 4
   MATH 207 Introduction to Linear Algebra 2
   MATH 265 Calculus III 4
   MATH 266 Elementary Differential Equations 3
   PHYS 251 University Physics I 4
   PHYS 252 University Physics II 4
   ENGL 110 College Composition I 3
   ENGL 130 Composition II: Writing for Public Audiences 3
   ENGR 460 Engineering Economy 3
   Essential Studies (Social Science) 9
   Essential Studies (Arts & Humanities) 9

Total Credit Hours 120

Bachelor of Science in Electrical Engineering

Required 125 credits (36 of which must be numbered 300 or above and 60 of
which must be from a 4-year institution) including:

I. The University’s Essential Studies Breadth of Knowledge, Social-Cultural
Diversity, and Special Emphasis Requirements (refer to the online Academic
Catalog for a listing of acceptable Essential Studies courses).

Bachelor of Science in Electrical Engineering with Aerospace Focus  

To meet the University's Essential Studies Breadth of Knowledge requirements, all students must complete 9 credits of Arts & Humanities Electives (minimum of 2 departments, including 3 Fine Arts credits and 3 Humanities credits) and 9 credits of Social Sciences Electives (minimum of 2 departments). Refer to the online Academic Catalog for a listing of acceptable Essential Studies courses.

To meet the University’s Essential Studies Social-Cultural Diversity requirements, all students must complete 3 credits of Global (G) Diversity Electives and 3 credits of United States (U) Diversity Electives. Refer to the online Academic Catalog for a listing of acceptable Essential Studies G and U Diversity Electives.

Non EE Elective choices: ENGR 201 Statics, ENGR 202 Dynamics; ENGR 203 Mechanics of Materials; ME 301 Materials Science; CE 306 Fluid Mechanics/ME 306 Fluid Mechanics; and ME 341 Thermodynamics, Computer Science, Engineering (including EE), Math and Physics courses approved by advisor, normally 300 level or higher (Math 308 History of Math and Math 321 Applied statistical Methods do not meet the requirements of non EE electives). CSci 242 Algorithms and Data Structures, CSci 260 Advanced Programming Languages, and Math 208 Discrete Mathematics are permitted.

EE 480 Senior Design I, EE 481 Senior Design II, meets the Essential Studies Special Emphasis requirements for Advanced Communication (A) and Senior Capstone (C). Senior standing with approval of adviser. Prerequisites: EE 421 and EE 421L and two out of the four following classes: EE 401, EE 405, EE 409, EE 452.

EE 480 Senior Design I, EE 481 Senior Design II, meets the Essential Studies Special Emphasis requirement for Oral Communication (O).

Maximum of three credits of EE 490 Advanced EE Problems allowed as an independent study, applicable to both EE and non EE electives. 2 credits of EE 397 Cooperative Education (40 hours/week) is equivalent to 3 credits of the EE Electives with S/U grading, maximum 4 credits of EE 397 is equivalent to maximum of 6 credits of EE Elective.

The Ethics Elective is a 3-credit course that meets Essential Studies requirements in either the Arts & Humanities or the Social Sciences. Ethics Elective choices: Phil 120 Introduction to Ethics (Humanities); and ME 370 Engineering Disasters and Ethics (SS).

Some of the following courses may be waived by completing: ENGR 102

EE 101 Introduction to Electrical Engineering | 1
EE 201 Introduction to Digital Electronics | 2
EE 201L Digital Electronics Laboratory | 1
EE 304 Computer Aided Measurement and Controls | 3
EE 397 Cooperative Education | 1-3

II. Grade of “C” or better in all EE courses required for graduation.

Bachelor of Science in Electrical Engineering with Aerospace Focus  

Required 129 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. The University’s Essential Studies Breadth of Knowledge, Social-Cultural Diversity, and Special Emphasis Requirements (refer to the online Academic Catalog for a listing of acceptable Essential Studies courses).

II. Grade "C" or better in all EE courses required for graduation.

May be waived for transfer students (substitute science credit required).

To meet the University's Essential Studies Breadth of Knowledge requirements, all students must complete 9 credits of Arts & Humanities Electives (minimum of 2 departments, including 3 Fine Arts credits and 3 Humanities credits) and 9 credits of Social Sciences Electives (minimum of 2 departments). Refer to the online Academic Catalog for a listing of acceptable Essential Studies courses.

To meet the University's Essential Studies Social-Cultural Diversity requirements, all students must complete 3 credits of Global (G) Diversity Electives and 3 credits of United States (U) Diversity Electives. Refer to the online Academic Catalog for a listing of acceptable Essential Studies G and U Diversity Electives.

Senior Standing with approval of advisor. EE 480 Senior Design I meets the Essential Studies Special Emphasis requirements for Advanced Communication (A) and Senior Capstone (C). EE 480 Prerequisites: EE 421 and EE 421L and two out of the four following classes: EE 401, EE 405, EE 409, EE 452.

EE 481 Senior Design II meets the Essential Studies Special Emphasis requirement for Oral Communication (O).

Maximum of three credits of EE 490 Advanced EE Problems allowed as an independent study, applicable to both EE and non-EE Electives. 1-2 credits of EE 397 Cooperative Education (40 hours/week) is equivalent to 3 credits of the EE Electives with S/U grading, maximum 4 credits of EE 397 is equivalent to maximum of 6 credits of EE Elective.

The Ethics Elective is a 3-credit course that meets Essential Studies requirements in either the Arts & Humanities or the Social Sciences. Ethics Elective choices: Phil 120 Introduction to Ethics (Humanities), CHE 340 The Role of Engineers and Applied Scientists in a Global Society (SS), and ME 370 Engineering Disasters & Ethics (SS).

ENGL 110 College Composition I 3
MATH 165 Calculus I 4

**Second Semester**

**First Semester**

EE 206 Circuit Analysis 3
EE 206L Circuits Laboratory I 1
EE 304 Computer Aided Measurement and Controls 3
ENGL 130 Composition II: Writing for Public Audiences 3
MATH 265 Calculus III 4
PHYS 252 University Physics II 4

Credits 15

**Second Semester**

ANAT 204 Anatomy for Paramedical Personnel 3
EE 313 Linear Electric Circuits 3
EE 313L Circuits Laboratory II 1
ENGR 460 Engineering Economy (SS) 2 3
MATH 266 Elementary Differential Equations 3
PSYC 111 or SOC 110 Introduction to Psychology (Social Science (SS)) 2, 3 3

Credits 16

**Junior Year**

**First Semester**

EE 314 Signals and Systems 3
EE 314L Signal and Systems Laboratory 1
EE 316 Electric and Magnetic Fields 3
EE 318 Engineering Data Analysis 3
EE 321 Electronics I 3
EE 321L Electronics Laboratory I 1
PPT 301 Human Physiology 4

Credits 18

**Second Semester**

EE 405 Control Systems I 3
EE 405L Control Systems Laboratory 1
EE 409 Distributed Networks 3
EE 421 Electronics II 3
EE 421L Electronics Lab II 1
EE 452 Embedded Systems 3
EE 452L Embedded Systems Design Laboratory 1

Credits 15

**Senior Year**

**First Semester**

EE 480 Senior Design I 5
Electrical Engineering Elective 7 3
Electrical Engineering Elective 7 3
Humanities (A&H) 2, 3 3
Fine Arts Elective (A&H) 2, 3 3

Credits 15

**Second Semester**

EE 481 Senior Design II 6 3
Electrical Engineering Elective 7 3
Non-EE Elective 4 3
Ethics Elective (A&H or SS) 2, 3, 8 3

Credits 15

**Additional Recommended Pre-Medical Courses**

Engineering (Engr)

Minor in Engineering Science (p. 97)

Courses

ENGR 100. Introduction to Engineering. 1 Credit.
This course has been developed to provide undecided freshman in engineering with an introduction to the different engineering disciplines offered at the College of Engineering and Mines. The goal of this course is to enable undecided freshmen to make a more informed choice when choosing an engineering degree program. The course covers challenges and opportunities for emerging engineers. The overview is followed by discipline specific presentations and activities. Information about advising, career planning and placement, and information on student organizations will also be presented. S/U grading. F.
ENGR 410. Technology Ventures. 1-3 Credits.
The primary focus will be on developing techniques to formulate the strategic framework required to develop high-tech ventures. Successful techniques to take technology-intensive opportunities from concept to commercialization will be explored. Prerequisite: Permission of instructor. Repeatable to 6 credits. S.

ENGR 460. Engineering Economy. 3 Credits.
Simple evaluation of the economic merits of alternative solutions to engineering problems. Evaluations emphasize the time value of money. Prerequisite: CEM major or permission of instructor. F,S,SS.

ENGR 490. Topics in Engineering. 1-3 Credits.
This course covers current engineering topics based on student and faculty interest. Student should check with their home department to determine whether it can be used to satisfy specific degree requirements. Prerequisite: Permission of instructor. Repeatable to 9 credits. On demand.

Minor in Engineering Science
The Engineering Science minor is available to non-engineering students, and requires the completion of 20 credit hours of approved coursework, as detailed below with a cumulative GPA of 2.0 or above.

Total Credits 20

* The appropriate Mathematics and other pre-requisites must be met.

** Any regularly offered course at the 200 or higher level with the prefix Engr, ChE, CE, EE, GE, ME, or PTRE, may be used as an elective.

English Language and Literature (Engl)

B.A. with a Major in English (p. 98)

Minor in English (p. 100)

Certificate in Writing and Editing (p. 99)

Courses

ENGL 100. Individualized Instruction in College Composition. 1 Credit.
(Not Degree Countable). Supplemental, individualized writing support for students enrolled in English 110. Prerequisite: An ACT English score of 14-17 or an SAT Writing score of 360-420 or a COMPASS Writing Skills score of 76 or below or ACCUPLACER WritePlacer score of 4 or below; ENGL 110 is the corequisite. F,S.

ENGL 110. College Composition I. 3 Credits.
Immersion in college-level critical reading and expository writing, emphasizing revision and careful preparation of manuscripts. The credit from this course will not count toward an English major or minor. F,S.

ENGL 130. Composition II: Writing for Public Audiences. 3 Credits.
Continues the work of College Composition I with an emphasis on rhetoric and critical thinking. Requires the writing and production of both primary and secondary research, while asking students to apply that research to larger community issues. Students will practice writing with an immediate and explicit public purpose. Prerequisite: ENGL 110. F,S.

ENGL 209. Introduction to Linguistics. 3 Credits.
An introduction to the nature of language, phonology, grammar, semantics, and historical, geographical, social, and developmental aspects of language. F,S.

ENGL 225. Introduction to Film. 3 Credits.
The study of film drama, concentrating on appreciation and evaluation of motion pictures. F,S.

ENGL 226. Introduction to Creative Writing. 3 Credits.
An introduction to the types and basic principles of creative writing, taught through a combination of class discussion and practice-writing. F,S.

ENGL 227. Introduction to Literature and Culture. 3 Credits.
A course with alternating topics that asks students to read literary texts of a variety of genres. The course may emphasize form and texts from various historical periods as it introduces students to the pleasures of analyzing text and culture. Repeatable when topics vary. Repeatable. F,S.

ENGL 228. Diversity in Global Literatures. 3 Credits.
This course will explore global literatures with a special emphasis on concepts like culture, difference, and diversity. The course will analyze global literature in cultural and historical contexts, and will emphasize the complex ways that literature is influenced by issues of social power (especially those that affect significant categories through which social inequalities are negotiated--such as gender, race, class, and sexual orientation). Repeatable when topics vary. Repeatable to 9 credits. F,S.

ENGL 234. Introduction to Writing, Editing, and Publishing. 3 Credits.
This course will explore global literatures with a special emphasis on concepts like culture, difference, and diversity. The course will analyze literature in cultural and historical contexts, and will emphasize the complex ways that literature is influenced by issues of social power (especially those that affect significant categories through which social inequalities are negotiated--such as gender, race, class, and sexual orientation). Repeatable to 9 credits. F,S.

ENGL 241. World Literature I. 3 Credits.
Great literature of western Europe, or in the European tradition, studied with emphasis upon intellectual and cultural values. F.

ENGL 242. World Literature II. 3 Credits.
Great literature of western Europe, or in the European tradition, studied with emphasis upon intellectual and cultural values. S.

ENGL 271. Reading and Writing about Texts. 3 Credits.
A writing-intensive introduction to English Studies offering practice in the conventions of analyzing texts and of writing literary analysis. Required of English majors. F,S.

ENGL 272. Introduction to Literary Criticism. 3 Credits.
A writing-intensive course that introduces students to various schools of literary criticism. Required of English majors. F,S.

ENGL 299. Special Topics. 1-4 Credits.
A course for undergraduate students, on topics varying from term to term. Repeatable when topics vary. Repeatable to 40 credits. F,S.

ENGL 301. Survey of English Literature I. 3 Credits.
English literature from its beginnings to the twenty-first century. F.

ENGL 302. Survey of English Literature II. 3 Credits.
English literature from its beginnings to the twenty-first century. S.

ENGL 303. Survey of American Literature. 3 Credits.
The literature of the United States from its beginnings to the twenty-first century. F.

ENGL 304. Survey of American Literature. 3 Credits.
The literature of the United States from its beginnings to the twenty-first century. S.

ENGL 306. Creative Writing: Fiction. 3 Credits.
Intermediate-level study and practice of fiction-writing. Prerequisite: ENGL 226 or instructor's permission. F,S.

ENGL 308. The Art of Writing Nonfiction. 3 Credits.
Advanced writing. Emphasis on rhetorical effectiveness and style. Prerequisite: ENGL 120 or ENGL 125 or ENGL 130. F,S.

ENGL 309. Modern Grammar. 3 Credits.
Various approaches to the structure of modern English, with emphasis on dialect variation and applications to the problems of teaching. F.
Bachelor of Arts with Major in English

ENGL 315. Shakespeare. 3 Credits.
The study of Shakespeare's works. F.

ENGL 323. Studies in Literary Genre. 3 Credits.
Genre-specific study of literature. Repeatable if topics vary. Repeatable to 12 credits. On demand.

ENGL 334. Practicum in Writing, Editing, and Publishing. 3 Credits.
Intensive practice in preparing materials for publication in a variety of media. Prerequisite: ENGL 234 or permission of instructor. Repeatable to 6 credits. F,S.

ENGL 357. Women Writers and Readers. 3 Credits.
Literature by and about women, examining the social, historical, and aesthetic significance of the works. Repeatable when topics vary. Repeatable to 21 credits. F,S.

ENGL 359. Young Adult Literature. 3 Credits.
The study of literature for and about young adults (from the middle school through the high school years), examining the social, historical, and aesthetic significance of the works. S.

ENGL 365. Black American Writers. 3 Credits.
Writing by Black Americans studied for understanding and critical appreciation. S.

ENGL 367. American Indian Literatures. 3 Credits.
A study of historical and contemporary literature by American Indians. S.

ENGL 369. Literature and Culture. 3 Credits.
The study of literature in its cultural context. Repeatable when topics vary. Repeatable. F,S.

ENGL 370. Language and Culture. 3 Credits.
Interactions of language with other cultural subsystems. (Same course as Anthropology 370.) Prerequisite: ENGL 209. S.

ENGL 372. Literary Theory. 3 Credits.
An exploration of particular writers of, approaches to, or debates within literary theory and criticism. Topic varies by semester. Repeatable. Repeatable. F,S.

ENGL 397. Cooperative Education. 1-8 Credits.
A course designed to offer English majors work experience related to their disciplinary training in close reading, careful writing, and interpretative analysis. Repeatable to 15 credits. Prerequisites: 15 credits completed in English, overall GPA of 2.5, English GPA of 2.75, and department approval. Repeatable to 15 credits. S/U grading. F,S,SS.

ENGL 398. Independent Study. 1-4 Credits.
Supervised independent study. Only 6 hours may apply to the 36-hour English major. Prerequisites: English majors only and written consent of the department. Repeatable to 40 credits. F,S.

ENGL 399. Honors Tutorial. 2-4 Credits.

ENGL 408. Writing for Digital Environments. 3 Credits.
Advanced writing in and for digital platforms. Prerequisite: ENGL 120 or ENGL 125 or ENGL 130. On demand.

ENGL 409. Art of the Cinematic Drama. 3 Credits.
An investigation of the aesthetics of the film drama with a concentration on the theory and evaluation of the medium. This course examines the relationship of the verbal and visual arts. Repeatable when topics vary. Prerequisite: ENGL 225. Repeatable. S.

ENGL 410. Studies in Literary Periods. 3 Credits.
Period-specific study of literature. Repeatable if topics vary. Repeatable to 12 credits. On demand.

ENGL 413. The Art of Writing: Poetry. 3 Credits.
Intermediate and advanced-level study and practice of poetry-writing. Repeatable once. Prerequisite: ENGL 226 or instructor's permission. Repeatable to 6 credits. F.

ENGL 414. The Art of Writing: Fiction. 3 Credits.
Continues the work of ENGL 306, Creative Writing: Fiction, at the advanced level. Prerequisite: ENGL 306 or instructor's permission. Repeatable to 6 credits. S.

ENGL 415. Seminar in Literature. 1-4 Credits.
A course for advanced students on topics varying from year to year. Repeatable. Repeatable. S.

ENGL 418. Second Language Acquisition. 3 Credits.
This course focuses on recent second language acquisition (SLA) research findings from the areas of linguistics, psychology, education, and communication and on how to relate these findings to language learning and teaching. Prerequisite: ENGL 209. S.

ENGL 419. Teaching English as a Second Language. 3 Credits.
An introduction to the principles of teaching English as a second language, with special attention to tutoring. Prerequisite: ENGL 209. F.

ENGL 423. Methods/Materials for Teaching Middle/Secondary English. 3 Credits.
Various teaching methods, strategies, and materials used in teaching middle and secondary school English. For English education majors only. Prerequisites: T&L 250 and T&L 345. Corequisite: T&L 486. F.

ENGL 428. Digital Humanities. 3 Credits.
Examines the growing necessity for digital products in the humanities and moves the concept of publishing from hard copy to electronic copy. Students will have hands-on opportunities to create new knowledge by working on projects across campus such as digitizing materials in the library's special collections department and working directly with professors' research initiatives. F, even years.

ENGL 442. History of the English Language. 3 Credits.
The development of the language from the earliest times to the present. This course is recommended for all prospective English teachers. S.

ENGL 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits. Prerequisites: Consent of the Department and approval of the Honors Committee. Repeatable to 9 credits. F,S.

ENGL 98

Bachelor of Arts with Major in English

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum:

Major Requirements—36 credits, 20 of which must be at the 300- or 400-level. The following courses are required:

ENGL 271 Reading and Writing about Texts 3
ENGL 272 Introduction to Literary Criticism 3
Select one of the following: 6
ENGL 301 Survey of English Literature I & ENGL 302 and Survey of English Literature II
ENGL 303 Survey of American Literature & ENGL 304 and Survey of American Literature
Select one of the following: 3
ENGL 241 World Literature I
ENGL 301 Survey of English Literature I (in addition to 303-304)
ENGL 303 Survey of American Literature (in addition to 301-302)
ENGL 315 Shakespeare
ENGL 410 Studies in Literary Periods (when topic is appropriate; consult your adviser)
ENGL 415 Seminar in Literature (when topic is appropriate; consult your adviser)

Select two 400-level courses, one of which must be ENGL 415

Level II (two semesters) proficiency in a language other than English.
400-level courses require students to develop and complete significant independent research, writing, and/or professional projects.

Majors may complete the remaining English credits in any way they wish, with two stipulations:

- ENGL 423 Methods/Materials for Teaching Middle/Secondary English, the methods course for English Education majors, may not count towards the English major.
- Twenty credits of English major coursework must be at the 300/400 level.

The English Department encourages majors to take an active role in choosing courses that develop their individual interests and capacities. To help majors tailor course choices to specific interests, here are three sample plans that may help in designing a program of study beyond the major requirements:

**Scenario One:** You are interested in writing and publishing. Include courses from this list:

- ENGL 226 Introduction to Creative Writing 3
- ENGL 308 Creative Writing: Fiction 3
- ENGL 308 The Art of Writing Nonfiction 3
- ENGL 408 Writing for Digital Environments 3
- ENGL 413 The Art of Writing: Poetry 3
- ENGL 414 The Art of Writing: Fiction 3

You may also consider pursuing a Certificate in Writing and Editing or taking any of the courses included in the Certificate:

- ENGL 234 Introduction to Writing, Editing, and Publishing 3
- ENGL 334 Practicum in Writing, Editing, and Publishing 3
- ENGL 408 Writing for Digital Environments 3
- ENGL 428 Digital Humanities 3

**Scenario Two:** You would like to focus on linguistics (the study of language, including teaching English as a second language, computer languages, translation, etc.) Include courses from this list:

- ENGL 209 Introduction to Linguistics 3
- ENGL 309 Modern Grammar 3
- ENGL 370 Language and Culture 3
- ENGL 418 Second Language Acquisition 3
- ENGL 419 Teaching English as a Second Language 3
- ENGL 442 History of the English Language 3

Note: Related language and linguistics courses are taught in the summer through the Summer Institute of Linguistics. A maximum of 10 credits of these courses may be applied to the English major. Students considering graduate work in language and linguistics are urged to study more than one foreign language.

**Scenario Three:** You are considering attending graduate school in English, in another discipline, or law school. Include courses from this list:

- ENGL 372 Literary Theory (topics rotate and may be repeated with different topics) 3
- ENGL 410 Studies in Literary Periods (Advanced study in particular genres or periods (topics rotate and may be repeated with different topics) 3
- ENGL 415 Seminar in Literature (topics rotate and may be repeated with different topics) 3

**Teacher Licensure**

Through a partnership with the College of Education and Human Development, and the Department of Teaching and Learning, students may seek secondary licensure in English. The following program of study must be completed:

I. The English major (described above), including level-II proficiency (two semesters) in a foreign language, 2 hours of speech, and 3 hours of developmental reading (T&L 416 Adolescent Literacy Development). (For Middle School licensure, 6 hours of developmental reading are required, including T&L 409 Reading in the Content Areas.) ENGL 423 Methods/Materials for Teaching Middle/Secondary English does not count toward the 36-hour English major.

Students are advised to create a major in which courses that satisfy the demands of a career in secondary teaching are balanced against the broader range of courses offered by the Department.

**Required in the major:**

<table>

<td>Senior Seminar</td>
<td>1</td>
</tr>
</tbody>
</table>

**Total Credits:** 29-44

* taken concurrently with ENGL 423 Methods/Materials for Teaching Middle/Secondary English; 60 hours per semester

English majors seeking secondary licensure must have an adviser in both the English Department and the Department of Teaching and Learning.

Students planning to teach in Minnesota are required to take coursework in Middle Level Education; consult Teaching & Learning advisers for more information.

IV. Optional

<table>

**Total Credits:** 2-4

**Certificate in Writing and Editing**

The ability to present ideas and concepts artfully and in a professional style is highly valued by employers, no matter what the medium or context - print or
digital; business or the academy. Courses are designed with three goals for student learning:

- to introduce the role of information processing in our culture, both in print and electronic media;
- to offer hands-on experience in the production of texts in academic and commercial contexts;
- to promote the clear and concise dissemination of ideas and information.

The certificate is comprised of 18 credit hours. English courses taken for the certificate, with the exception of the required writing course, do not count towards the English major or minor. The following courses are required for the certificate:

**Required courses:**

<table>
<thead>
<tr>
<th>Course Code</th>

</tbody>
</table>

Total Credits 9

**ENTR Courses**

**ENTR 101. Introduction to Entrepreneurship. 3 Credits.**
ENTR 101 is an introductory course structured to provide a firm basis as to the critical role entrepreneurs and entrepreneurship plays in the global economy. Entrepreneurship will be analyzed, debated, assessed, and explored experientially throughout the semester from an interdisciplinary perspective. Entrepreneurship will be viewed as a manageable process and way of thinking, acting, and behaving applicable not only to business endeavors, but to everyday problems existing in the workplace and society. F,S.

**ENTR 290. Entrepreneurial Opportunities and Concept Development. 3 Credits.**
Every successful venture, big or small, started with a problem and an idea for a solution. Venture success is a measured combination of feasibility, viability, testing, and luck. Too many entrepreneurs, unfortunately, rely strictly on luck. This course will show you how to test your business idea through customer discovery and validation; business and revenue modeling; effectuation; and the ability to communicate all of your findings to stakeholders. Whether for-profit, not-for-profit, or an internal corporate project/venture, success or failure doesn't happen by accident. Learn the tools that give you the best chance to win. F,S.

**ENTR 316. Entrepreneur Law & Operations. 3 Credits.**
Starting your own venture? Do you know the legal hurdles you must leap? This is not a dry, legal lecture series. Learn entrepreneurship law hands-on! Experience relevant legal requirements as you form a real or simulated corporation/LLC, participate in mock owner disputes, draft contracts, hire employees, assume debt, sell equity, file for bankruptcy, franchise, and a host of other exciting activities! Who knew? Law doesn't have to be boring!. F,S.

**ENTR 333. New Product Development. 3 Credits.**
The recognition, discovery and creation of new product/service opportunities is a critical component of the entrepreneurial process. From the inception of the automobile to Facebook, finding the right opportunity can help create products and organizations that can have profound impacts on industries, customers and society at large. Therefore, the goal of the course is to create a product/service development lab, to help participants explore different techniques and perspectives on finding new products/services and bring them to market. F.

**ENTR 375. Small and Family Business. 3 Credits.**
Small business is an economic driver and contributes to new jobs and economic growth development. Family-owned businesses often outperform non-family owned businesses. This course will cover venture planning and operations in this important context, small and family businesses. Prerequisite: ENTR 101. S.

**ENTR 385. Entrepreneurial Opportunities and Concept Development. 3 Credits.**
Every successful venture, big or small, started with a problem and an idea for a solution. Venture success is a measured combination of feasibility, viability, testing, and luck. Too many entrepreneurs, unfortunately, rely strictly on luck. This course will show you how to test your business idea through customer discovery and validation; business and revenue modeling; effectuation; and the ability to communicate all of your findings to stakeholders. Whether for-profit, not-for-profit, or an internal corporate project/venture, success or failure doesn't happen by accident. Learn the tools that give you the best chance to win. F,S.

**ENTR 386. Financials for Entrepreneurs. 3 Credits.**
This course will review key financing concepts to give entrepreneurs and aspiring entrepreneurs a guide to securing funding. Students will develop the skills necessary to complete the financial section of a business plan. Concepts that are taught include sources of capital, the economic ecosystem, core and adjacency strategies, lean startups and strategy pivots, customer value creation and switching costs, pricing models, operating costs, cash flow planning, revenue forecasts and financial projections, private and public company analysis, and franchise evaluation. At the end of the course students should be able to think critically about business and make critical strategic evaluations during the course of a business lifecycle. F,S.
ENTR 388. Entrepreneurship: The Money. 3 Credits.
You've figured out what you want to bring to the market, done all the analysis, written a bang-up proposal--now all you need is some funding. This is where you learn how to raise money for your venture. We explore internal/external capital generation (debt, equity, bootstrapping), the time value of money, cash flow management, venture valuation, and exit strategies. In a nutshell, you will learn about "money matters"--because money matters. Prerequisite: ENTR 386. F.S.

ENTR 395. Special Topics. 1-4 Credits.
Specially arranged seminars, courses, or independent study on a variety of topics not covered by regular program offerings. May be initiated by students with approval of the dean and department(s) involved. Prerequisite: Instructor consent. Repeatable to 9 credits. On demand.

ENTR 410. Marketing and Management Concepts for Entrepreneurship. 3 Credits.
Marketing and managing your startup--it's different from corporate management and marketing. This course is an introduction to the nature, significance and role of marketing and management in startup organizations. The primary objective is to explore the management and marketing functions from product/service conceptualization through the initial stages of startup growth sustainability. F.

ENTR 450. Venture Implementation. 3 Credits.
Expanding on the idea which began in ENTR 290, a significant pivot, or an entirely new venture idea, ENTR 450 prepares the venture for launch. This course orchestrates the idea, people, business model, legal ramifications, and finances into a complete, executable venture plan. Emphasis will be placed not only on the startup phase of the venture, but the equally important post-startup. You will also learn how to communicate your plan to stakeholders and incorporate constructive feedback from experts. Prerequisites: ENTR 290 and ENTR 386. S.

ENTR 497. Entrepreneurship Practice. 3 Credits.
Practical experience with an entrepreneurial firm or comparable experiential learning. All ENTR 497 experiences must be pre-approved by the Entrepreneurship Practice Director prior to beginning the experience. Prerequisites: ENTR 290 and Department consent. Repeatable to 3 credits. S/U grading. F,S,SS.

ISBC Courses

ISBC 117. Personal Productivity with Information Technology. 1 Credit.
Introductory lab-based course covering basic computer hardware, operating systems, software, and Microsoft Office tools. F,S,SS.

ISBC 217. Fundamentals of Computer Information Systems. 3 Credits.
This course exposes students to the role information systems play in the business world with an introduction to information technology topics and data analytics. This experiential and application-oriented course develops spreadsheet, visualization, and database competencies relevant to business professionals. F,S,SS.

ISBC 240. Operating Systems Principles. 3 Credits.
An introduction to a variety of computer operating systems. Emphasis placed on terminology, concepts, system commands, architecture, maintenance, and troubleshooting. Hands-on experience with operating systems and operating environments such as Windows and UNIX at the workstation and server level. Prerequisite: ISBC 117. On demand.

ISBC 260. Digital Technology for Entrepreneurs. 3 Credits.
All new ventures utilize digital technology. Even the most basic enterprise is dependent upon digital technology to function efficiently and effectively. You will explore and learn some of the common digital technologies that assist with entrepreneurial thinking. We will also play with technologies that form the basis of new digital ideas, products and services. F.S.

ISBC 300. Programming for Data Analytics. 3 Credits.
This course introduces one powerful and widely used programming language for data analytics. Course content may vary based on the current programming trend. The programming language chosen has easily understood syntax and library or open source modules for everything from web development to data analysis. This course covers the syntax and semantic of the programming language and its uses as a data analytics tool. The material will emphasize the core concepts in the programming language, specifically data types, data structures, functions, and text and image processing and how they can be implemented and used to address data analytics problems. Popular modules used in data analysis such as data mining and data visualization will also be covered. F.

ISBC 305. End-User Applications. 3 Credits.
Development of proficiency in the use of end-user software applications with emphasis on spreadsheet and database. Spreadsheet applications include solutions for typical business situations using functions, macros and linking. Database applications include development of and querying of databases, linking, generating forms and reports, and developing menus. Prerequisite: ISBC 117 or ISBC 217. S.

ISBC 330. Database Management. 3 Credits.
This course covers the fundamentals of database design and management. Topics include, but not limited to, database models, database normalization, entity-relationship diagramming, SQL and database implementation and management. The course will provide a balance of theory and practical applications and will culminate in database implementation exercises conducted by students. F.S.

ISBC 340. Fundamentals of Networking. 3 Credits.
Explores principles of networking computer systems; telecommunications hardware, software, and media components; and approaches to efficient business data communications. The student will be exposed to telecommunications terminology, concepts, protocols, and logical and physical design of local area networks. S.

ISBC 350. Networking II. 3 Credits.
An in-depth study of networking protocols, planning, design, security, VLANs, switch and router configuration, workstation and server management, troubleshooting, and when possible, enterprise level network topics. Prerequisite: ISBC 340. On demand.

ISBC 370. Web Development. 3 Credits.
An introduction to web application development in a business environment. Students learn programming theory, fundamentals and practices in writing programs to meets business requirements, solve business problems, and address business opportunities in the desktop, mobile and/or Internet/intranet environments. S.

ISBC 397. Cooperative Education. 1-2 Credits.
Compensated work experience in areas related to information systems. Enrollment in 1 credit grants half-time student status, 2 credits grants full-time status (See Academic Catalog description of Cooperative Education.). Prerequisites: ISBC 217 and approval of the Information Systems Cooperative Education/Internship Coordinator. Repeatable to 6 credits. S/U grading. F,S,SS.

ISBC 410. Information Security. 3 Credits.
An introduction to information security and information assurance. The students will achieve a firm intuition about what information security means; be able to recognize potential threats to information confidentiality, integrity and availability; be aware of some of the underlying technologies that address these challenges; and be conversant with current security-related issues in the field. This course addresses both the technical and behavioral aspects of information security. Prerequisites: ISBC 330, ISBC 340, and ISBC 370. F.

ISBC 430. Database Analytics. 3 Credits.
This course equips students with an understanding of techniques in data analytics with particular emphasis on unstructured data. Coverage includes, but not limited to, database analytics, PL/SQL, advanced SQL, business intelligence, unstructured big data analytics, Hadoop framework in business, data visualization, data warehousing, NoSQL, and in-memory database system. Prerequisite or Corequisite: ISBC 330. F.S.

ISBC 431. Database Administration and Optimization. 3 Credits.
Focuses on the administration of business databases and the optimization of database performance at the server level. Topics may include but are not limited to user and security administration, physical organization and optimization, performance maintenance and monitoring, fault tolerance, database distribution and replication. Prerequisite: ISBC 430. On demand.

ISBC 444. Philosophy of Vocational Education. 3 Credits.

ISBC 451. Networking Ill. 3 Credits.
Focuses on exploring a variety of advanced networking topics. Students will develop knowledge and practical skills including, but not limited to, advanced configuration, implementation, security, and troubleshooting of network servers, services, devices, resources, and infrastructure. Prerequisite: ISBC 350. On demand.
ISBC 471. Advanced Information Systems Programming. 3 Credits.
Advanced-level programming in a business environment. Students apply programming and database theory, fundamentals and practices learned in ISBC 370 and ISBC 430 to address complex business problems and opportunities in the desktop, mobile and/or Internet/intranet environments. Prerequisite: ISBC 430. On demand.

ISBC 490. Information Systems Analysis and Design Seminar. 3 Credits.
The capstone course for the Information Systems major. System analysis and design is taught and applied through team development of an information system. Prerequisites: ISBC 340, ISBC 370, and ISBC 410. S.

ISBC 497. Information System Internship. 1-3 Credits.
Compensated work experience in areas related to information systems. Repeatable to 6 credits cumulative from ISBC 397, ISBC 497. Prerequisites: ISBC 217 and approval of the Information Systems Cooperative/Internship Coordinator. Repeatable to 6 credits. S/U grading. F,S,SS.

ISBC 499. Special Topics. 1-3 Credits.
Topics will be selected on the basis of currency and relevancy to student needs. Repeatable to 12 credits. Repeatable to 12 credits. On demand.

TECH Courses

TECH 102. Digital Design Software. 3 Credits.
Learn to use industry-standard software to explore the principles of graphic design. You learn the principles of design production and develop the ability to communicate effectively in a visual format. F.

TECH 110. Fundamentals of Technology. 2 Credits.
The study of the philosophy and objectives of technology with emphasis on the theories, principles, and concepts of manufacturing, design, and electronics. F.

TECH 122. Computer-Aided Design. 3 Credits.
You are introduced to computer-aided design/drafting using AutoCAD software and technical drawing techniques to include blueprint interpretation, various projections, pictorials, dimensioning, developments and tolerancing. Hands-on exercises and drawing problems are reflective of industry and business. S.

TECH 200. Energy Fundamentals. 3 Credits.
The objective of the Energy Fundamentals course is to provide students with the fundamental knowledge to understand, and qualitatively and quantitatively calculate how energy is converted from basic energy sources such as fossil fuels, biomass, solar energy and wind to electrical energy. F.

TECH 201. Electromechanical Fundamentals. 4 Credits.
The study of the fundamental properties of mechanical, hydraulic, and electronic/electrical systems (primarily those that revolve around Direct Current (DC) including an introduction to Programmable Logic Controllers (PLCs). Experiential learning is facilitated through the use of project design and development. Prerequisite: MATH 103. Corequisite: PHYS 161 or equivalent. F.

TECH 202. Advanced Application of CADD Techniques. 3 Credits.
The advanced study of computer aided design/drafting to include 3D coordinates and layout, subsurface meshes, regions, solid modeling, and connection to computer numerical control (CNC). The creation of presentation graphics using bitmap files, shading, and rendering is also presented. Prerequisite: TECH 122 or consent of instructor. S.

TECH 203. Production Processes & Material Testing. 4 Credits.
This course provides students with an understanding of manufacturing processes and the strong interrelationships between manufacturing processes, product design, and material properties. Emphasis is placed on standard manufacturing processes such as casting, heat treatment, forming, turning, and milling. Additional topics covered will include material testing and inspection, and the interpreting technical drawings. S.

TECH 204. Industrial Materials. 4 Credits.
The theoretical and laboratory study of the physical and chemical attributes of organic and inorganic materials for conversion into industrial materials are explored. Source, structure, characteristics, properties, and practical applications of metallic, polymer, wood, ceramic, and composite materials are introduced. Laboratory activities are designed to explore the attributes of these materials as well as to practice the material testing processes. F.

TECH 211. Electric Circuits and Devices. 4 Credits.
The subject matter covered in this course will include concepts, principles, and operational characteristics of electronic/electrical components with a focus on Alternating Current (AC), discrete and integrated devices including computer driven electronic control systems. Design and developmental activities are facilitated through the use of simulation-Multisim software-and Ultiboard, a Printed Circuit Board (PCB) design and development software. Prerequisite: TECH 201, MATH 103 and MATH 105. S.

TECH 212. Visual Literacy. 3 Credits.
This course introduces the basic concepts of graphic design and visual communication. You sharpen brainstorming and problem-solving skills via design principles, color theory, and typography as they sharpen brainstorming and problem-solving skills. Prerequisite: TECH 102. S.

TECH 213. Wood Products Manufacturing. 3 Credits.
An introductory study of wood manufacturing methods and techniques utilizing tools and machines leading to the production of constructed assemblies. Prerequisite: TECH 110 or TECH 204 or consent of instructor. F, even years.

TECH 223. Applied Synthetics. 3 Credits.
A study of synthetic/polymer materials emphasizing identification of characteristics and properties; and their application as related to industrial products. Prerequisites: CHEM 115/115L or 121/121L. F, odd years.

TECH 230. User Experience and Interface Design. 3 Credits.
Have you ever felt frustrated using a website or digital interface that didn't function properly? This course introduces you to the common ways in which humans interact with digital interfaces. Through study of user experience principles, you will design digital interfaces that are easy to use. F.

TECH 232. Web Design. 3 Credits.
Learn how to design for the web using HTML and CSS. This class provides you with the principles and tools to create modern, aesthetically pleasing websites that are easy to navigate. S.

TECH 270. Design Thinking. 3 Credits.
Ever had a problem you didn't have any idea how to solve? Design thinking is actually a problem solving process you can learn! You will learn to approach highly unstructured problems and to create opportunities of them. Design thinking is an important entrepreneurial skill, but it is an equally important life skill. Design thinking is empowering—at a lot of fun. F,S.

TECH 300. Technology and Society. 3 Credits.
A lecture-recitation course emphasizing the various impacts of technology on the individual, society, environment and basic institutions. Technological matrix of various cultures. F,S.

TECH 311. Computers and Emerging Technologies. 3 Credits.
An introductory course to the personal computer with an emphasis on system hardware, boot-up sequence, configuration and customization, operating systems, upgrading, and troubleshooting. The course will also examine emerging computer technologies, various peripheral devices and interfaces, including network and computer wireless communications systems. F.

TECH 322. Digital Photography Fundamentals. 3 Credits.
Taking good pictures is more than point and click! This course is introduces the basic aesthetic and technical theories and techniques of digital photography. A digital camera with aperture priority, shutter priority, manual, and exposure compensation is required. F.

TECH 330. Quality Assurance. 3 Credits.
The study of principles and techniques of quality assurance and quality management, with an emphasis on the fundamentals of quality assurance for products, process control, and process capability. Related topics include quality design review, fundamentals of statistics, sampling and control chart systems, quality reporting, process capability analysis, tool and gauge control, document control, and troubleshooting quality control. Prerequisite: ECON 210 or consent of instructor. S, odd years.

TECH 332. Industrial Design. 3 Credits.
In this industrial design course students will learn how to design products in support of human activities and interactions. Principles and techniques of needs assessment, patent research, concept realization, design alternatives, and prototype development will be introduced through a creative and inventive process to address various instrumental factors such as product aesthetics, functionality, materials, sustainability, and usability. Prerequisite: TECH 122 or consent of instructor. F.
TECH 340. Cost Estimating. 3 Credits.
Principles and techniques necessary for the economic analysis and evaluation of industrial design projects. Prerequisites: ECON 210, MATH 146, or equivalent, or consent of instructor. S, even years.

TECH 341. Digital Integrated Circuits. 3 Credits.
The study of basic concepts of digital circuits and devices; operational characteristics of digital integrated circuits. Prerequisite: TECH 211 or consent of instructor. S, odd years.

TECH 373. Advanced Manufacturing Processes. 3 Credits.
This advanced course in manufacturing covers both the theory and practice of advanced manufacturing. The course will focus on advanced machines and processes that are used to a significant degree in modern manufacturing facilities including conventional CNC machines and also non-traditional processes such as additive manufacturing. Students will demonstrate their knowledge of these processes through a series of lectures, discussions, and laboratory activities with the resultant knowledge necessary to apply these principles and processes to appropriate applications. Prerequisites: TECH 122 and TECH 203, or equivalent. S.

TECH 396. Field Experiences in Technology. 1-6 Credits.
Provides students with supervised opportunities to engage in various technical industrial or business experiences by working with and learning from practicing professionals. Repeatable to 6 credits. Prerequisite: Junior standing or consent of instructor. Repeatable to 6 credits. F, S, SS.

TECH 397. Cooperative Education. 1-6 Credits.
A practical work experience with an approved company in business or industry, arranged by the student, faculty and employer. Repeatable to 6 credits. Prerequisites: junior standing, GPA of 2.5 overall, and faculty approval. Repeatable to 6 credits. S/U grading. F, S, SS.

TECH 399. Honors Tutorial. 1-3 Credits.

TECH 400. Teaching Technology Education. 3 Credits.
An analysis of various methods employed in instructional techniques for industry and education. Development of methods and strategies of instruction use and ordering of instructional materials, based on behavioral objectives and classroom application of instructional techniques; lab activities. Prerequisites: Junior standing and consent of instructor. F, odd years.

TECH 403. Product Research and Development. 3 Credits.
The study of product development and production planning for manufacture through the application of research methodologies, design processes, and prototype development. Prerequisite: TECH 203 or consent of instructor. F.

TECH 420. Facilities Design. 3 Credits.
Principles and applications of designing industrial/business facilities with emphasis on site location, environmental consideration, qualitative and quantitative modeling. Computer application in facility planning and quantitative analysis; lab activities. Prerequisites: TECH 122, S.

TECH 422. Advanced Digital Photography and Imaging. 3 Credits.
Through specialized shooting techniques, this course builds upon the fundamentals learned in TECH 322 to expand your knowledge and abilities. You will explore several theme-based photographic topics that will challenge you visually and intellectually. Then you create a portfolio of unique photographs to tie these topics together into one theme. A digital camera with aperture priority, shutter priority, manual, and exposure compensation is required. Prerequisite: TECH 322 or consent of instructor. S.

TECH 433. Manufacturing Strategies. 3 Credits.
Theoretical and laboratory study of strategies utilized by business and industry to develop and maintain a competitive edge. Topics include lean manufacturing, Kanban, five S’s, Kaizen, push and pull modeling, fishbone-4Ms, line balancing, and PoKayoke. Prerequisites: TECH 122 and TECH 203. F.

TECH 440. Occupational Safety. 3 Credits.
The major safety concerns and problems commonly associated with the industrial and occupational environment are addressed. Emphasis is placed on the study of safety rules and regulations, implementation of management tools to benefit people for optimum safety conditions and productivity, and the documentation required for record keeping. Prerequisite: Upper division students only. S.

TECH 442. Industrial/Applied Graphic Design. 3 Credits.
We explore the concepts of branding, info-graphics and various avenues of processing and translating information in a visual format. Emphasis is placed on the relationship between text and image through a series of design-based problems. The visual and conceptual aspects of branding focuses on the development of practical, multi-component design solutions including logo design and other business communication applications. Understanding and ordering complex data into useful and persuasive informational tools takes form via info-graphics, visual processes and procedures. Emphasis is placed on the use of formal design principles, creative brainstorming, conceptualizing, critical thinking, collaboration, and presentation. Prerequisites: TECH 212, S.

TECH 450. Packaging Design. 3 Credits.
This course introduces you to the unique challenges of packaging design. Through prototypes and finished products, you develop solutions to 3D design problems that will delight the user. Special emphasis is placed on social, sustainable, and environmental issues in the packaging industry. Prerequisite: TECH 122, F.

TECH 451. Computer Integrated Manufacturing. 3 Credits.
A study of computer integrated systems and their designs to facilitate the manufacture and production processes. Topics covered the application and integration of Programmable Logic Controllers (PLCs), microcontrollers, touch-screen, TCP/IP, and voice control systems to facilitate manufacturing processes. Students will also utilize commercial computer-aided design tools, i.e., Multisim and Ultiboard to design, simulate, and test designed manufactured systems. Prerequisites: TECH 201 and TECH 211. F.

TECH 452. Multimedia Production. 3 Credits.
This advanced graphics course is designed to explore multimedia production technologies, concepts, processes, methods, and techniques. The course provides hands-on experience applying multimedia technology to create graphics, text, sound and video into meaningful productions. On demand.

TECH 493. Workshop. 1-6 Credits.
A workshop course on a specific topic, primarily for, but not confined to, Continuing Education. Repeatable to 24 credits. Repeatable to 24 credits. F, S, SS.

TECH 497. Directed Studies in Technology. 1-8 Credits.
Studies in topics relevant to the students' needs in selected topics including, but not limited to, Graphics, Electronics, Production, and Technology Education. Prerequisites: Junior Standing and instructor consent. Repeatable to 8 credits. F, S, SS.

TECH 498. Senior Capstone I. 1 Credit.
Prerequisites: Senior standing and consent of instructor. F.

TECH 499. Senior Capstone II. 3 Credits.
The capstone course is designed to integrate and reflect on coursework covered throughout the student’s program in order to demonstrate knowledge, understanding and competency related to the program goals. The course also facilitates students’ transition from the academic to the professional world. Prerequisites: TECH 498, senior standing and consent of instructor. S.

Bachelor of Business Administration with Major in Entrepreneurship

Required 120 credit hours (36 of which must be numbered 300 or above) including:

I. Essential Studies Requirements (see University ES Listing).

II. One of the following: MATH 103, MATH 146, or MATH 165

III. College of Business and Public Administration Requirements:

Bachelor of Science in Industrial Technology

Industrial Technology is a field of study designed to prepare technical/management-oriented professionals for employment in business, industry, and government. The curriculum is organized to equip students with critical knowledge and skills for product innovation and process improvement.

Required 125 credit hours, and including:

I. Essential Studies Requirements, see University ES listing.

II. The College of Business and Public Administration GPA Graduation Requirement (2.50), see College section.

III. Industrial Technology Major Program Requirements: At least a 2.50 GPA in courses that apply toward the degree and major, and the following:

- TECH 102  Digital Design Software  2
- TECH 212  Visual Literacy  3
- TECH 230  User Experience and Interface Design  3
- TECH 232  Web Design  3
- TECH 322  Digital Photography Fundamentals  3
- TECH 422  Advanced Digital Photography and Imaging  3
- TECH 442  Industrial/Applied Graphic Design  3

Total Credits 24

IV. The following 20 credits of Support Courses are required:

- ECON 210  College Algebra  3
- MATH 103  Trigonometry  2
- MATH 105  College Algebra & 121L  4
- CHEM 121  General Chemistry I  4
- PHYS 161  Introductory College Physics I  4
- PHYS 162  Introductory College Physics II  4
- ECON 210  Introduction to Business and Economic Statistics  3

Total Credits 20

Minor in Graphic Design Technology

The Minor in Graphic Design Technology has been suspended and no new applications are being accepted at this time.

21 credits including the following courses:

- TECH 102  Digital Design Software  3
- TECH 212  Visual Literacy  3
- TECH 230  User Experience and Interface Design  3
- TECH 232  Web Design  3
- TECH 322  Digital Photography Fundamentals  3
- TECH 422  Advanced Digital Photography and Imaging  3
- TECH 442  Industrial/Applied Graphic Design  3

Total Credits 21

Finance (Fin)

B.B.A. with Major in Investments (p. 105)

B.B.A. with Major in Managerial Finance and Accounting (p. 106)

Courses

FIN 220. Personal Investing. 3 Credits.
Investment concepts for individual investors who are, or will be, actively developing and monitoring their own investment portfolios. Covers basic analysis techniques, investment vehicles, strategies for implementing investment goals in a portfolio context, risk-return tradeoffs, and sources of investment information. Not available to students who have successfully completed FIN 420 or its equivalent. F.S.

FIN 251. Personal Finance. 3 Credits.
The personal financial planning and management process: goal identification and budgeting; minimizing tax liability; uses and costs of various forms of credit; buying, selling and/or leasing real estate, automobiles and other major items; life, health, property and income insurance; various investment options; the retirement planning process; and estate planning options. The role of financial planning professionals and financial planning as a career option are also discussed. F.S.

FIN 310. Principles of Financial Management. 3 Credits.
This course introduces students to asset management, cost of capital, dividend policy, valuation, capital structure planning, and working capital management. Forms of business organizations and tax environment are surveyed. Managerial implications of current developments in national and international capital markets are reviewed. Prerequisites: ACCT 201, ECON 210; Sophomore, Junior or Senior Standing; declared CoBPA majors only. F.S.
FIN 310L. Problems in Financial Management. 1 Credit.
FIN 321. Real Estate Finance and Investment. 3 Credits.
Nature of real estate finance, financial sources, role of government, real estate financial instruments, loan processing, defaults and foreclosures in real estate finance, fundamentals of real estate investment analysis. Prerequisites: FIN 310 and Sophomore, Junior or Senior standing. F.
FIN 324. Real Estate Appraisal. 3 Credits.
Nature of value; appraisal process; analysis of neighborhoods, land and improvements; cost, market data and income approach to value; appraisal report; code of ethics. Prerequisite: Sophomore standing or higher. S.
FIN 340. Intermediate Financial Management. 3 Credits.
Integrated coverage of topics in finance theory. This course continues to develop student understanding of corporate finance topics which were introduced in FIN 310. These topics include valuation, project analysis, capital structure planning, working capital management, and cash flow analysis. The course also introduces students to risk analysis, the capital asset pricing model, and investment analysis. Prerequisites: FIN 310 and Sophomore, Junior or Senior Standing; declared CoBPA majors only. F.S.
FIN 350. Financial Statement Analysis. 3 Credits.
Students interpret and evaluate financial statements used to report financial performance. Analysis incorporates accounting, financial, and economic models and data; and describes various reporting regulations, principles, rules, standards, and interpretations. The course includes an investigation of current issues and debates in financial statement reporting. Prerequisites: ACCT 301 and FIN 310; Sophomore, Junior or Senior Standing; declared CoBPA majors only. F.
FIN 360. Capital Market Financing and Investment Strategies. 3 Credits.
Covers analysis and procedures for implementing particular financing and investment plans in financial markets. Includes financing and investment through commercial banks, investment banks, pension funds, venture capital sources, insurance companies and limited partnerships. Prerequisites: ACCT 218 and FIN 310; Sophomore, Junior or Senior Standing; declared CoBPA majors only. F.S.
FIN 370. Student Investment Fund I. 1 Credit.
This is an introductory course to the Student Managed Investment Fund. It examines the issues involved in the management and investment strategies of a portfolio of financial assets. Students are required to attend Student Investment Fund meetings. Student members research prospective stocks, generate reports, make decisions to invest or liquidate, and execute the trades. Any recommendation to buy, sell, or retain a position in a security is presented to all student team members and to the Faculty Advisor. Repeatable up to a maximum of 3 credits. Prerequisite: Investments major or approval of instructor. Repeatable to 3 credits. F.S.
FIN 375. Lending and Liquidity Management. 3 Credits.
This course analyzes the short-term sources and uses of funds with primary emphasis on the management of liquidity in the context of a financial institution. The course also examines the risks and returns in a loan portfolio, particularly loans by financial institutions. Prerequisites: FIN 310; Junior or Senior Standing; declared CoBPA majors only. F.
FIN 397. Cooperative Education. 1-2 Credits.
On-the-job compensated work experience in various areas of Finance. Prerequisites: ACCT 200, ACCT 201, ISBC 117, ECON 201, ECON 202, ECON 210, and approval by department. Repeatable to 3 credits. S/U grading. F.S,SS.
FIN 415. Fixed Income Analysis and Portfolio Management. 3 Credits.
This course covers characteristics and analysis of fixed-income (or debt) instruments. Types of debt securities examined primarily include corporate (commercial paper, notes, and fixed- and floating-rate bonds without and with various embedded options) and U.S. Government (Treasury bills, Treasury bonds without and with inflation protection, and Agency debt). Those enrolled in the class will be responsible for actively managing a live bond portfolio. Prerequisites: FIN 310, FIN 360 and FIN 370; Junior or Senior Standing; declared CoBPA majors only. S.
FIN 420. Investment Analysis and Portfolio Management. 3 Credits.
Comprehensive study of methods used to evaluate securities. Includes formulation of investment strategy and analysis, design of portfolios for classes of individual investors and institutions, fundamental analysis and portfolio performance evaluation. Extensive use of financial databases and software. Prerequisites: FIN 340 and FIN 360; Junior or Senior Standing; declared CoBPA majors only. F.
FIN 430. International Financial Management. 3 Credits.
Financial management implications of exchange risk exposure, accounting conventions and international constraints on capital flows. Other topics include multi-national investment management and related financing problems, taxation and working capital management. Prerequisites: FIN 310 and Junior or Senior Standing; declared CoBPA majors only. S.
FIN 450. Financial Derivatives. 3 Credits.
Detailed analysis of major elements affecting market prices of options and futures contracts and analysis of optimal investment strategies involving these other derivative instruments. Prerequisites: FIN 340 and FIN 360; declared CoBPA majors only. S.
FIN 470. Student Investment Fund II. 3 Credits.
The Student Managed Investment Fund is a sequence of courses whereby a select group of students manage a live portfolio. The course examines the issues involved in the management and investment strategies of a portfolio of financial assets. It focuses on asset allocation, portfolio monitoring and evaluation, portfolio rebalancing, and investment analysis. The students selected to manage the fund are responsible for the investment decisions involving the composition of the portfolio under the supervision of Finance department faculty. Student members establish the stock selection criteria, research the prospective stocks, generate reports, and make decisions to invest or liquidate, and execute the trades. Oral presentations are required. Repeatable to a maximum of 6 credits. Prerequisites: FIN 310, 340 and 370 and declared CoBPA majors only. Repeatable to 6 credits. F.
FIN 475. Cases in Managerial Finance. 3 Credits.
Introduces students to construction and utilization of financial management decision models using case study examples. Topics evaluated include working capital management, capital budgeting, cost of capital, capital structure, dividend policy, valuation, risk-return, and special topics of financial management. Students are required to develop original simulation models, prepare formal case reports, and orally and visually present their results. Prerequisites: FIN 340 and FIN 360; Junior or Senior Standing; declared CoBPA majors only. S.
FIN 491. Senior Topics in Finance. 3 Credits.
Multiple sections covering different topics may be offered in any one semester. Provides opportunities for in-depth study beyond that of regularly scheduled courses. May be seminars, workshops, or lectures. Repeatable to 6 credits. Prerequisites: FIN 310; consent of instructor; Junior or Senior Standing; declared CoBPA majors only. Repeatable to 6 credits. F.S.
FIN 492. Readings and Research in Finance. 1-3 Credits.
Designed for students with an interest in finance topics not covered in regularly scheduled courses. Repeatable to 6 credits. Prerequisites: FIN 310 and approval by department. Repeatable to 6 credits. F.S.
FIN 497. Internship in Finance. 1-3 Credits.
Guided practical experience in managerial finance, investment management, real estate, and insurance with public and private sector enterprises. Prerequisites: ACCT 200, ACCT 201, ISBC 117, ECON 201, ECON 202, ECON 210, and approval by department. Repeatable to 6 credits. S/U grading. F.S,SS.

Bachelor of Business Administration with Major in Investments

B.B.A. with Major in Investments

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The College of Business and Public Administration Requirements, see College listing and including:

ACCT 200 & ACCT 201 Elements of Accounting I and Elements of Accounting II 6
ACCT 315 Business Law I 3
ISBC 117 Personal Productivity with Information Technology 1
ISBC 217 Fundamentals of Computer Information Systems 3
Bachelor of Business Administration with Major in Managerial Finance and Accounting

Required 127 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The College of Business and Public Administration Requirements, see College listing and including:

ACCT 200 Elements of Accounting I 6
& ACCT 201 and Elements of Accounting II
ACCT 315 Business Law I 3
ISBC 117 Personal Productivity with Information Technology 1
ISBC 217 Fundamentals of Computer Information Systems 3
ECON 201 Principles of Microeconomics 3
ECON 202 Principles of Macroeconomics 3
ACCT 200 Principles of Accounting I 3
ACCT 201 Principles of Accounting II 3
MATH 103 College Algebra 3
MATH 146 Applied Calculus I 3
MGMT 300 Principles of Management 3
MGMT 301 Operations Management 3
FIN 310 Principles of Financial Management 3
MGMT 475 Strategic Management 3
MRKT 305 Marketing Foundations 3
POLS 115 American Government I 3
COMM 110 Fundamentals of Public Speaking 3

Select one of the following:

- ANTH 171 Introduction to Cultural Anthropology 3
- PSYC 111 Introduction to Psychology 3
- SOC 110 Introduction to Sociology 3

Total Credits 55

III. The Following Major Courses:

ACCT 218 Advanced Spreadsheet Applications 3
ACCT 301 Intermediate Accounting I 3
FIN 340 Intermediate Financial Management 3
FIN 360 Capital Market Financing and Investment Strategies 3
FIN 370 Applied Security Analysis 1
FIN 415 Fixed Income Analysis and Portfolio Management 3
FIN 420 Investment Analysis and Portfolio Management 3
FIN 430 International Financial Management 3
FIN 450 Financial Derivatives 3
FIN 470 Student Investment Fund II 3
ACCT 302 Intermediate Accounting II 3
FIN 321 Real Estate Finance and Investment 3
FIN 324 Real Estate Appraisal 3
FIN 350 Financial Statement Analysis 3
FIN 375 Lending and Liquidity Management 3
FIN 475 Internship in Finance (no more than 3 credits) 3
SPRT 320 Sport Financial Management 3

Select three of the following:

- ACCT 320 Cost Accounting 3
- ACCT 309 Accounting Information Systems 3
- ACCT 320 Cost Accounting 3
- FIN 340 Intermediate Financial Management 3
- FIN 350 Financial Statement Analysis 3
- FIN 360 Capital Market Financing and Investment Strategies 3
- FIN 475 Cases in Managerial Finance 3

Total Credits 36

Fine Arts (FA)

Courses

FA 150. Introduction to the Fine Arts. 3 Credits.
Introduction to the fundamental principles of the Fine Arts -- Visual Arts, Music, Theatre, and Dance -- followed by examples of the interaction of the arts in selected cultures from history and around the world and at a variety of campus arts events, in order to increase appreciation of the importance of the fine arts to the individual and community. F.S.

Forensic Science

B.S. with Major in Forensic Science (p. 108)

Courses

ANTH 100. Introduction to Anthropology. 3 Credits.
An introduction to the breadth of inquiry pursued by anthropologists, including the origins and biological evolution of humans, the prehistoric development of world cultures, and the interplay of biological, social, and cultural factors in present day societies. On demand.

ANTH 170. Introduction to Biological Anthropology. 3 Credits.
An introduction to the field of biological or physical anthropology. This course will provide a general background in human evolutionary biology. F.S.

ANTH 171. Introduction to Cultural Anthropology. 3 Credits.
Examination of diversity and similarities across contemporary world societies. Topics: fieldwork and ethnographic description; theoretical approaches; communication/human language; interrelationships between environment, technology, social and political organization and worldview; sociocultural change; applied anthropology. Films and case studies illustrate intricacies of culture and how an anthropological perspective provides insights about our own society/culture. F.S.
ANTH 172. Introduction to Archaeology. 3 Credits.
This course looks at how we investigate past cultures using the artifacts that people have left behind. What questions do archaeologists ask about the past? How do archaeologists find and record archaeological sites? What field and laboratory techniques are used to collect evidence and gather data, and how do these methods work? How do we interpret and understand the past using archaeological hypotheses, explanations, models and theories? Case studies will be drawn from different regions, cultures, and time periods to illustrate course concepts. F.S.

ANTH 200. World Prehistory. 3 Credits.
In this course we explore the extraordinary five million year-long record of human cultural achievements, as reconstructed by scientific archaeology. We will focus on prehistoric societies (those that existed before the advent of writing and written history), on what happened in the past, and how the major milestones in the development of world cultures came about. These milestones include the cultural evolution of our earliest hominid ancestors from almost 5 million years ago, the two million year-long persistence of the hunting and gathering lifestyle, the origins of agriculture and farming societies, and the rise and collapse of prehistoric civilizations. F.S.

ANTH 209. Special Topics. 1-4 Credits.
Repeatable when topics vary. Repeatable. F.S.

ANTH 270. Introduction to Forensic Anthropology. 3 Credits.
Forensic anthropology is the study of skeletal remains in a medico-legal context for the purpose of identification and trauma analysis. This course covers the history of this field, its relevance to death investigation in the United States, and the theories and techniques applied to skeletal identification. On demand.

ANTH 300. Archaeological Laboratory Methods. 3 Credits.
A hands-on introduction to the basic processing, organizing, and analytical techniques used in the archaeological laboratory. Excavated materials from prehistoric sites will be used for lab exercises and demonstrations. Includes lecture and lab. Prerequisites: ANTH 172 and permission of instructor. S.

ANTH 309. Special Topics. 1-4 Credits.
Repeatable when topics vary. Repeatable. F.S.

ANTH 325. Human Origins. 3 Credits.
A description of the fossil evidence for primate and human evolution with an emphasis on the origins and evolution of the hominid and human lines. Prerequisite: ANTH 170 or consent of instructor. On demand.

ANTH 330. Human Variation. 3 Credits.
An examination of the range of human physical variation, with a special emphasis on its adaptive nature. Prerequisite: ANTH 170 or consent of instructor. On demand.

ANTH 335. Primates. 3 Credits.
A survey of the biology and behavior of the living primates, with a special emphasis on similarities and differences to humans. On demand.

ANTH 340. Medical Anthropology. 3 Credits.
An examination of the human biological and cultural responses to health and disease as seen from an anthropological perspective. F.

ANTH 350. Ethnographic Methods. 3 Credits.
Introduction to fieldwork methods and analytic approaches used by cultural anthropologists in their ethnographic research; class discussion topics will include ethical issues, framing of research problems, the writing of ethnographic accounts, and modes of presentation of research results. Prerequisite: ANTH 171 or by special permission. On demand.

ANTH 360. Environmental Change & Culture. 3 Credits.
This course uses an anthropological lens to understand how humans have responded to and/or caused environmental changes and how differing cultural values and behaviors have shaped this relationship. By the end of the course students should be able to (1) explore how power and privilege impact us and others and how this relates to race, ethnicity, cultural identity, economic class, and environmental discrimination and (2) use worldview as a tool to understand different cultural responses to environmental challenges. Present and past cultural examples from around the world are examined to provide background for class discussions and exploration of hot topics and challenges that currently face us and how this relates to our diverse beliefs and levels of local and global power. F, odd years.

ANTH 370. Language and Culture. 3 Credits.
Fundamentals of modern linguistics; utility of linguistic concepts of culture analysis; interaction of language with other cultural subsystems. Prerequisite: ANTH 171 or consent of instructor. S.

ANTH 371. Cultural Dynamics. 3 Credits.
Focus on sociocultural change along a selected theme, such as "the local and the global," "ethnic minorities and nation-states," or "ethnographer as researcher and writer." Also considered are theoretical orientations in the study of society/culture, fieldwork, ethics, and anthropologists' roles with respect to public policy. Repeatable to 9 credits if topics vary. Prerequisite: ANTH 171. Repeatable to 9 credits. F.

ANTH 372. Culture Theory. 3 Credits.
An overview of the ideas and approaches that have played a role in the development of anthropological studies of societies and cultures. Focus on the contributions of major figures in anthropology, in the past and at present, as well as current issues within the discipline. Prerequisite: ANTH 171.

ANTH 373. Indians of Latin America. 3 Credits.
Examination of traditional and modern Indian cultures of Latin America. Focus on the adaptation to cultural change, the impact of world economy, and the impact of resource exploitation on indigenous peoples. Prerequisite: ANTH 171.

ANTH 375. Women in Prehistory. 3 Credits.
This course will explore recent research that explicitly illuminates women's roles, behaviors and ideologies in the ancient past, and will examine methodological and theoretical attempts to understand how gender can be retrieved from the archaeological record. On demand.

ANTH 376. The Aztec, Maya and Inca. 3 Credits.
An examination of the high civilizations of Latin America with focus on the Aztec, Maya and Inca. On demand.

ANTH 377. North American Archaeology. 3 Credits.
Explores the fascinating cultural developments that have taken place throughout prehistory in North America (north of Mexico), ranging from the first peopling of the Americas to the emergence of complex chiefdoms, and from hunting and gathering to the development of intensive agriculture. On demand.

ANTH 378. Physical Anthropology Method and Theory. 1-4 Credits.
A discussion of current theoretical arguments within the field of physical anthropology and the techniques used to examine them. Prerequisite: ANTH 170. S.

ANTH 379. Culture Area Studies. 3 Credits.
A survey of peoples and cultures of selected areas. Selections based upon staff and student interest. May be repeated to maximum of 6 credits. Repeatable to 6 credits. F.S.

ANTH 380. Field Techniques in Archaeology. 1-6 Credits.
Prerequisites: ANTH 172 and permission of instructor. SS.

ANTH 385. Antiquities, Culture and Law. 3 Credits.
This course is an exploration of the complex cultural, ideological and legal issues involved in contemporary views of the ancient past and its material record. Students will examine how antiquities, archaeological sites, landscapes and monuments are defined and shaped by current cultural identities, notions of human progress, political power, and global conflicts. National and international laws that regulate the antiquities trade and address the illegal trafficking of artifacts will also be explored in the context of ethics and social problems. On demand.

ANTH 388. Method and Theory in Archaeology. 3 Credits.
This course explores how archaeologists reconstruct the past: how they formulate research problems and conduct field work; what field and laboratory analytical tools they employ; and how they use data, models, and theory to explain culture change. Techniques, methods, and theoretical frameworks used in modern prehistoric archaeology are examined. Readings in the professional literature, case studies, and guest lectures provide vivid examples of archaeologists in thought and action. Prerequisite: ANTH 172 or consent of instructor. S.

ANTH 420. Archaeological Origins of Plant and Animal Use. 3 Credits.
This course uses archaeological information to examine the relationships between humans and the plant and animal resources we exploit and will focus on specific examples of economic uses of both wild and domestic species, covering both prehistoric and modern consequences of how we interact with biological resources. Basic issues in floral and faunal analysis such as the recovery, quantification, analysis, and interpretation of plant and animal remains from archaeological sites will be presented in depth. Prerequisite: ANTH 172. On demand.

ANTH 426. Lithic Technology. 3 Credits.
Study of prehistoric stone tool technology and examination of the analytical methods used by archaeologists in lithics research. Prerequisite: ANTH 172 or consent of instructor. F, odd years.
Bachelor of Science with Major in Forensic Science

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing)

General Studies

B.G.S. with a Major in General Studies (p. 109)

Bachelor of General Studies with a Major in General Studies

Required: 120 credits (30 of which must be from UND and 36 of which must be numbered 300 and above) including:

I. Essential Studies Requirements (see University ES listing).

II. A curriculum approved by the College of Arts & Sciences.

Optional Sub-Plan:

Students have the option of completing the Women and Gender Studies Sub-Plan. In order to complete this sub-plan, students must complete a minimum of 36 credits in the area/s of WGS, including:

WGS 200 Introduction to Gender Studies 3
WGS 225 The Study of Women 3
WGS 480 Feminist Theory 3

The remaining 27 credits can be made up of the following courses. This list is not exhaustive. Students should consult with their WGS advisor to confirm their plan of study.

WGS 492 Senior Study: Women and Gender Studies 1-4
ANTH 372 Culture Theory 3
ANTH 375 Women in Prehistory 3
ENGL 357 Women Writers and Readers 3
CJ 302 Women, Crime, and Criminal Justice 3
CJ 361 Victimization 3
COMM 310 Media and Diversity 3
HIST 332 Women in Early America 3
HIST 333 Women in Modern America 3
IS 346 Gender in American Indian Cultures 3
PHIL 360 Feminist Philosophy 3
POL 321 International Human Rights 3
POL 351 Women and Politics 3
PSYC 210 Human Sexuality 3
PSYC 365 Psychology of Women 3
PSYC 421 Diversity Psychology 3
RELS 216 Sex, Gender and Religion 3
RELS 466 Sex, Gender and Religion 3

Total Credits 19

FORENSIC WILDLIFE BIOLOGY

Required Courses

BIOL 150/L must also be completed if choosing this sub-plan

BIOL 320 Forensic Biology 3
BIOL 336 Systematic Botany 4
BIOL 363 Entomology 4
BIOL 426 Birds & Mammals 4

Complete at least 1 of the following courses:

BIOL 376 Animal Biology 4
& 376L Animal Biology Laboratory 4
or BIOL 333 Population Biology 4
or BIOL 410 Molecular Biology Techniques 4
or BIOL 432 Techniques in Wildlife Population Assessment 4

Total Credits 21

Geography and Geographic Information Science (Geog)

B.S. with a Major in Geography (p. 112)

Minor in Geography (p. 113)

Minor in Geospatial Technologies (p. 113)

The geography courses that may be used to satisfy the 4-credit Essential Studies laboratory science requirement are Geography 121 and 134.

The geography courses that may be used to satisfy the 9-credit Essential Studies social science requirement include: Geography 151, 161 and 262.

Courses

GEOG 121. Global Physical Environment. 3 Credits.
A study of the pattern of distribution of the physical elements of the global environment. The origin and characteristics of the terrestrial grid, earth-space relations, climate, landforms, vegetation, and soils. F.S.S.

GEOG 121L. Global Physical Environment Laboratory, 1 Credit.
A basic environmental science laboratory to complement Geography 121. F.S.S.

GEOG 122. Foundations of Environmental Science. 3 Credits.
Introduction to the study of environmental dimensions of human activities, emphasizing the interdisciplinary nature of environmental studies. The course integrates principles of natural science, social science, policy, and humanistic perspectives needed to understand and solve environmental problems, and to communicate those problems, policy options, and solutions to various constituencies. S.

GEOG 134. Introduction to Global Climate. 3 Credits.
An introduction to the global climate, emphasizing atmospheric processes, weather and climate elements, and climate change. Emphasis is placed upon the factors that control climate and climatic distributions. S.

GEOG 134L. Introduction to Global Climate Laboratory, 1 Credit.
A basic physical science laboratory focused upon specific atmospheric-climatic phenomenon; wet and dry lab experiments, plus written lab exercises. S.

GEOG 151. Human Geography. 3 Credits.
A systematic study of human activities and events. The course attempts to help students apply a broad range of theoretical perspectives to the analysis of global and regional issues and events, and develop insights into what is happening in the world today. From war and terrorism to economic globalization, human rights and sustainable development, this course will explore a myriad of important issues and challenges that face the world today. S.

GEOG 250. Introduction to Geopolitics. 3 Credits.
As a branch of political geography, the study of Geopolitics is concerned with the spatial dynamics of power relations especially at the international level. From a geographic perspective, this course surveys changing relations among states and the influences of national and transnational actors and events. The course attempts to help students apply a broad range of theoretical perspectives to the analysis of global and regional issues and events, and develop insights into what is happening in the world today. From war and terrorism to economic globalization, human rights and sustainable development, this course will explore a myriad of important issues and challenges that face the world today. S.

GEOG 262. Geography of North America I. 3 Credits.
A spatial approach to the development of Canada and the United States which emphasizes the transformation of the cultural landscape by exploring the contributions of the diverse peoples who inhabit the two nation-states and deal with a global economy. F.

GEOG 263. Geography of North Dakota. 3 Credits.
Study of the interrelationships that exist between North Dakota’s physical and cultural environments. Specific topics include physiography, climate, flora, prehistoric occupation, historic development, demography, and economic structures. S.
GEOG 274. Introduction to Geospatial Technologies. 3 Credits.
Students engage with a range of geospatial technologies to explore, analyze, and represent geographical phenomena and data through a series of field-based exercises. Students will learn about the types of societal problems that geospatial scientists are uniquely positioned to solve. Through guest speakers, readings, and discussions, they will learn about the knowledge and skills required to enter this rapidly-expanding career field and the courses in the geography curriculum that will help them to acquire these skills. F.

GEOG 300. Special Topics in Geography. 1-3 Credits.
Topic of course will change from semester to semester but will typically emphasize recent developments in geography. Repeatable to six credits. Repeatable to 6 credits. F.S.SS.

GEOG 322. Environmental Hazards. 3 Credits.
An overview of the field of environmental hazards emphasizing risk assessment, hazard impacts, human vulnerability, and hazard mitigation. Prerequisites: GEOG 121 and GEOG 161 or consent of instructor. F, even years.

GEOG 334. Climatology. 3 Credits.
An overview of the field of climatology, emphasizing surface transfers of energy and water, the general circulation of the atmosphere, and climate change. Prerequisites: GEOG 134 or ATSC 110. S, odd years.

GEOG 352. Economic Geography. 3 Credits.
A study of the local, national, and global economic life describing and explaining the geographic factor involved in the production, distribution, and consumption of the major commodities and resources of the world. Special emphasis is placed upon the global issue of the underdeveloped or Third World countries and theories, which have been, developed to explain spatial structure. Prerequisite: Sophomore standing or consent of instructor. F.

GEOG 362. Geography of Canada. 3 Credits.
A regional and topical analysis of the physical, cultural, and economic features of Canada. S.

GEOG 374. Environmental Remote Sensing. 2 Credits.
A thorough examination of optical, infrared, and microwave methods for remote observation of Earth systems, with a focus on the use of aircraft and satellite data for addressing environmental problems. The course includes an overview of modern remote sensing systems for data collection at a variety of scales, as well as an introduction to digital image processing. Corequisite: GEOG 374L. F.

GEOG 374L. Environmental Remote Sensing Laboratory. 1 Credit.
A systematic coverage of visual and digital laboratory techniques used to interpret aerial photography and satellite imagery. Students gain hands-on experience assessing environmental problems using remotely sensed data. Corequisite: GEOG 374. F.

GEOG 378. Global Positioning Systems: Applications and Theory. 2 Credits.
This course examines the equipment, procedures, and techniques related to GPS technology, as well as its integration with Geographic Information Systems. Foci include the fundamentals of satellite navigation, the history of GPS, and applications related to mapping and analysis in the environmental sciences. Strong emphasis is placed on providing hands-on experience. S, even years.

GEOG 386. Geography Education Field Placement. 1-3 Credits.
A variable credit course with a variable credit depending upon the extent of the geographic education work of the student in a K-12 school setting. Recommended for secondary education social studies majors interested in how geography is taught at the high school level and for elementary/middle school social studies majors concerned about how federal legislation is affecting teaching grades K-8. Prerequisite: Department approval. Repeatable. F.S.SS.

GEOG 397. Cooperative Education. 1-6 Credits.
A practical work experience with an employer closely associated with geography. May be repeated to a maximum of 6 credits. Prerequisites: 60 credits completed and a minimum GPA of 2.75 or consent of Department Co-op Coordinator and Chair. Repeatable to 6 credits. S/U grading. F.S.SS.

GEOG 421. Selected Topics in Physical Geography. 3 Credits.
An examination of an advanced physical geography topic chosen from field methods, biogeography, human impact on the environment, physiography, or others. Repeatable to nine credits if different topics are examined. Prerequisite: GEOG 121 or consent of instructor. Repeatable to 9 credits. F.S.

GEOG 435. Historical Geography. 3 Credits.
Using the spatial approach, landscape change is analyzed over time in various regions of the world using a variety of scales of study. Emphasis is placed upon the relationship of historical geography to historic preservation and tourism. On demand.

GEOG 454. Conservation and Sustainable Use of Natural Resources. 3 Credits.
Geographic principles applied to the analysis of natural resources and their efficient utilization. Emphasis is on sustainable development. S.

GEOG 457. Urban Geography and Planning. 3 Credits.
This course examines the internal workings of cities from political, economic, and social perspectives. Geographic approaches to urban analysis are discussed, as are various methods for contemporary urban planning. Students learn to view the city as a geographic phenomenon created by human effort. S.

GEOG 458. Community Development. 3 Credits.
This course examines the historical evolution, conceptual framework, and implementation of community development. Students will be introduced to a broad range of community development issues from a geographical perspective with emphasis on local and statewide scales of study. Prerequisite: GEOG 151 or consent of instructor. F.

GEOG 459. Population Geography. 3 Credits.
The core components of population change (fertility, mortality, migration) are explored in the context of contemporary and historical population debates. The course focuses on understanding and critically assessing global, regional, national, and local population trends and issues. Topics include the impact of population growth, spatial diffusion processes, migration trends and theories, aging of societies, and population policies. S, even years.

GEOG 462. Geography of North America II. 3 Credits.
A regional analysis of the physical, cultural, and economic features of a selected region or group of regions within North America. May be repeatable to six credits if a different region is examined. Prerequisite: GEOG 262 or consent of instructor. On demand.

GEOG 463. Regional Geography. 2-3 Credits.
A regional and topical analysis of the physical and cultural features with emphasis on one continent or region. May be repeated up to nine credits provided different regions and approaches are involved. Repeatable to 9 credits. S.

GEOG 471. Cartography and Visualization. 2 Credits.
This course examines the art, science, and technology of cartography and visualization. It familiarizes students with basic cartographic principles and with GIS, both of which are applicable to a wide range of professional fields and academic disciplines. Students learn how maps are designed and used to accurately represent and effectively communicate spatial phenomena and relationships. The course also includes a discussion of selection of proper thematic mapping techniques. Corequisite: GEOG 471L. F.

GEOG 471L. Cartography and Visualization Laboratory. 1 Credit.
Students apply concepts learned in GEOG 471 to produce accurate, appropriate and well-designed maps using GIS software. Lab activities hone the ability of students to be informed producers and consumers of maps and provide hands-on experience that demonstrates how maps function as a communicative visual medium. Corequisite: GEOG 471. F.

GEOG 474. Introduction to Geographic Information Systems (GIS). 2 Credits.
An introductory course that examines the digital representation, manipulation, and analysis of geographic data, with emphasis on the analytical capabilities that GIS brings to bear on the solution of geographic problems. Prerequisites: GEOG 471 and 471L or equivalent or consent of instructor. Corequisite: GEOG 474L. F.S.

GEOG 474L. GIS Laboratory. 1 Credit.
Hands-on application of theory and methods associated with digital spatial data representation, manipulation, and analysis. Corequisite: GEOG 474. F.S.

GEOG 475. Digital Image Processing. 3 Credits.
A course focused on the concepts and principles involved in the use of digital remotely sensed data as they are applied to environmental monitoring and natural resource management. Emphasis is placed on algorithm development and ‘hands-on’ application of digital techniques to select imagery. Prerequisite: GEOG 374 and 374L.
II. The Following Curriculum (39 Major Credits)
which must be from UND) including:

- **Required 120 credits (36 of which must be numbered 300 or above, and 30 of**
  - Environmental Studies

**Bachelor of Arts with Major in Environmental Studies**

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES guidelines and course listings).

II. The Following Curriculum (39 Major Credits)

</tr>
</tbody>
</table>

* If not used as one of the required courses for the sub-plan
** May take up to 6 credits if not used as required course in sub-plan

**C: Teacher Licensure**

Through a partnership with the College of Education and Human Development and the Department of Teaching and Learning, students may seek secondary licensure in Geography. The following program of study must be completed:

I. The Geography major (sub-plan A or B described above). Geography majors seeking secondary licensure must have an adviser in the Geography Department and an adviser in the Department of Teaching and Learning. Elective courses in Geography specific to teaching must be selected in consultation with the academic adviser in Geography and Teaching and Learning.

II. Admission to the Secondary Program, normally while taking T&L 250 Introduction to Education. (See College of Education and Human Development (https://education.und.edu) for admission and licensing requirements.)

III. Students seeking the secondary teaching licensure in Geography must complete the Department of Teaching and Learning requirements in Secondary Education (See College of Education and Human Development (https://education.und.edu)).

**Minor in Geography**

Required 20 credits including:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 121 &amp; 121L</td>
<td>Global Physical Environment and Global Physical Environment Laboratory</td>

*must be different topic from required GEOG 476 class
Harold Hamm School of Geology and Geological Engineering (Geol and GeoE)

B.S. Geology (p. 120)
B.S. in Geological Engineering (p. 119)
B.S. in Environmental Geoscience (p. 118)
B.S. in Earth Science (p. 118)
Minor in Geology (p. 121)

Geology Courses

GEOL 101. Introduction to Geology. 3 Credits.
Introduction to the dynamics of the Earth -- volcanoes, earthquakes, plate tectonics, streams, groundwater, glaciers, waves, wind, and landslides, with emphasis on the environmental applications of these processes. Prerequisite: GEOL 101L may be taken concurrently. F, S, SS.

GEOL 101L. Introduction to Geology Laboratory. 1 Credit.
An introductory laboratory to complement GEOL 101. Field trip(s) included. Prerequisite or Corequisite: GEOL 101. F, S, SS.

GEOL 102. The Earth Through Time. 3 Credits.
The tracing of changes in the Earth and life through time, with emphasis on the record from North America. GEOL 102L may be taken concurrently. F, S.

GEOL 102L. The Earth Through Time Laboratory. 1 Credit.
An introductory laboratory to complement GEOL 102. Field trip included. Prerequisite or Corequisite: GEOL 102. F, S.

GEOL 103. Introduction to Environmental Issues. 3 Credits.
Introduction to Environmental Issues. A survey of environmental issues concerning society's interaction with Earth's natural systems and exploitation of Earth's resources. F, S.

GEOL 104. Geology of National Parks. 3 Credits.
An overview of the geology of U.S. National Parks. Unifying geological principles are emphasized. Major topics: sandstone parks, volcanic parks, hot springs and geothermal areas, caves and limestone parks, reefs and fossilized reefs, rivers and erosion, ice and glaciers, mountain building and mountain ranges. S.

GEOL 105. Selected Topics. 1-4 Credits.
A special topic course intended for non-geology majors. Subjects will include many issues of interest to non-geologists and non-scientists, such as earthquakes, evolution, gems, and the geology of National Parks. Repeatable when topics vary. Repeatable. On demand.

GEOL 106. Global Warming: The Facts and Myths. 3 Credits.
Global warming is the most debated current challenge to humans. A large, multifaceted and technically challenging topic, it has been diluted to popular slogans that at best capture some aspects of the issue and at the worst are over simplifications. Most of us who are directly affected by global warming do not understand the background, do not know what the assertions are based on, and can not evaluate the correctness of the arguments propagated in mass media such as newspapers and talk-radio. This class will provide students with a clear grasp of the science behind global warming discussion, the typical strategies (pros/cons) that are used in the popular media, and a good understanding of the science-based predictions of upcoming changes in the climate and environment. In addition to providing general scientific background to understand global warming and the science behind it, the class will visit the arguments that are used both for and against global warming. The graded written tests require students to address typical misinformation about global warming, show general knowledge of the scientific background, and recognize typical means to distort science in the mass media. GEOL 111. Views of Earth and Planets. 3 Credits.

GEOL 111R. Views of the Earth and Planets Recitation. 1 Credit.
A recitation-discussion to complement GEOL 111. Corequisite: GEOL 111. S.

GEOL 203. Earth Dynamics. 3 Credits.
Introductory physical geology course that also includes elements of historical geology, geomorphology, geohazards, and ethics. Intended for engineering and geosciences majors. F.

GEOL 203L. Earth Dynamics Laboratory. 1 Credit.
Laboratory course to accompany Earth Dynamics lecture. The laboratory is delivered as on-campus and virtually using specific required products and digital material. F.

GEOL 205. Surviving on Planet Earth. 3 Credits.
This Essential Studies course stresses critical thinking in covering the basic strategies about humans succeeding on our planet including Earth's hazards (our restless Earth); the balance of life on Earth (evolution and extinction); water in our lives (too much and too little); energy (use and population demands); and global change (Earth as a unique, ongoing experiment). S.

GEOL 220. Computer Applications in Geology and Environmental Science. 2 Credits.
Introduction to the application of computers, software, and digital processing in the geological and environmental sciences. F.

GEOL 256. Critical Thinking in the Geosciences. 2 Credits.
An introduction to the study of geoscience and skills needed to successfully complete a geoscience degree. F.

GEOE 301. Petrophysics. 3 Credits.
Mineral and rock formation, identification and petrophysical properties, particularly with respect to porous rocks and their interactions with fluids. Prerequisite: GEOL 203. Corequisite: GEOL 301L. F.

GEOE 301L. Petrophysics Laboratory. 1 Credit.
Laboratory course to accompany GEOL 301. Prerequisite: GEOL 203. Corequisite: GEOL 301. F.

GEOE 302. Reclamation Engineering. 3 Credits.
Principles of reclamation emphasizing: the need for reclamation; geology and hydrogeology of disturbed landscapes, geological, hydrological, and ecological reclamation objectives; current reclamation practices; reclamation of abandoned mine lands; reclamation design; laws, regulations, permits, bonds, and public perception. Includes laboratory and field trip. Prerequisite: GEOL 101 or GEOL 203 or consent of instructor. S.

GEOE 303. Selected Topics in Geology. 1-4 Credits.
Each topic is concerned with a special aspect of geology. May be repeated up to a maximum of 8 hours. Prerequisite: Consent of the instructor. Repeatable to 8 credits. On demand.

GEOL 311. Geomorphology. 4 Credits.
Dynamics of weathering, mass movement, running water, groundwater, waves, wind and ice in the production of landforms. Includes field trips and laboratory. Prerequisites: GEOL 101 or GEOL 203; MATH 165, PHYS 211, CHEM 121 or consent of instructor. F.

GEOL 318. Mineralogy. 3 Credits.
Survey of the origin, distribution and uses of rock-forming minerals. Introduction to mineral structures, crystal chemistry, and crystallography. Laboratory identification of common minerals in hand sample and petrographic thin section. Introduction to the use of the polarizing microscope. Includes field trip. Prerequisites: GEOL 101 or GEOL 203, and CHEM 121 or consent of instructor. S.

GEOL 320. Petrology. 3 Credits.
Description, classification and origin of igneous, metamorphic, and sedimentary rocks. Field and laboratory study of rocks. Engineering properties of earth materials. Advanced aspects of optical mineralogy. Includes laboratory. Prerequisite: GEOL 318. F.

GEOL 321. Geochemistry. 3 Credits.
Application of the principles of chemistry to geologic and hydrogeologic problems. Origin and distribution of the chemical elements. Introduction to radiochemistry, isotopic geochronology, and stable-isotope geochemistry. Prerequisites: GEOL 318, CHEM 122, and MATH 165 or consent of instructor. S.
GEOL 322. Geology, Society, and the Environment. 3 Credits.
Relationship of geology to society; natural hazards; protection, reclamation, and restoration of our natural environment; application of geology to engineering, land planning, and resource management. Prerequisite: One introductory geology course or upper division standing; MATH 103 is recommended. S, even years.

GEOL 323. Engineering Geology. 2 Credits.
This course is to introduce the application of geological, hydrological and environmental principles to geotechnical/geological engineering design, construction and operation as well as various geohazards. Prerequisites: One introductory geology course and MATH 165. S.

GEOL 330. Structural Geology. 3 Credits.
Mechanics of rock deformation, analysis of rock structures, preparation and interpretation of geologic maps and cross sections showing structural and tectonic features. Includes laboratory. Prerequisites: GEOL 318, GEOL 320 and MATH 105. S.

GEOL 340. Digital Mapping Methods. 3 Credits.
This course integrates "hands-on" data acquisitions and map generation with an overview of the technology (GPS, lasers, and data management). Field projects focus on mapping methodology and laboratory projects focus on analysis and presentation. It is assumed that students have an undergraduate geology background and a basic knowledge of computer applications. Prerequisite: Junior Standing in geology.

GEOL 342. Conservation and Environmental Hydrology. 3 Credits.
Topics relating hydrology to the environment and water conservation, including the global and local hydrological cycle, flood occurrence and prediction, water pollution, erosion and sedimentation, wetlands, and water management. Prerequisites: Introductory geology course or upper division standing; MATH 103. S, odd years.

GEOL 356. Geoscience Lectures. 1 Credit.
Students attend and evaluate departmental lectures given by visiting scientists and engineers, faculty, and students. May be repeated once. May not be taken concurrently with GEOL 422. S/U grading. F.S.

GEOE 397. Cooperative Education. 1-8 Credits.
For qualified students majoring in geological engineering, geology, or environmental geology and technology. A practical work experience with an employer closely associated with the student's academic area. Positions may require student relocation for one or more semesters. Arranged by mutual agreement among student, department, and employer. Special permission required. Repeatable to 24 credits. Repeatable to 24 credits. S/U grading. F.S.SS.

GEOL 407. Petroleum Geology. 3 Credits.
Origin, accumulation and geologic occurrence of petroleum and gas. Prerequisites: GEOL 101 or GEOL 203, and GEOL 102. F, odd years.

GEOL 410. Site Characterization. 3 Credits.
Purposes, techniques, and tools of site investigation. Covers geologic, hyrologic, and ecologic concerns. Hands-on application of principles, tools and techniques at real sites. Prerequisites: GEOL 220, GEOL 311, GEOL 414; BIOL 332, BIOL 332L. F.

GEOL 411. Sedimentology and Stratigraphy. 5 Credits.
Origin, transportation, deposition, and diagenesis of sediments; principles and applications of stratigraphy. Includes field trip and laboratory. Prerequisite: GEOL 320. S.

GEOL 414. Applied Geophysics. 3 Credits.
Principles of various geophysical methods and their application to geologic problems. Prerequisites: GEOL 101 or GEOL 203; MATH 165; and PHYS 211 or 251. F.

GEOL 415. Introduction to Paleontology. 4 Credits.
The principles of paleontology/paleobiology are presented using fossils to document the evolutionary, stratigraphic, and paleoecologic history of animal and plant life on Earth. Includes field trip and laboratory. Prerequisites: GEOL 102; BIOL 150 and BIOL 151 are recommended prerequisites. F, even years.

GEOL 417. Hydrogeology. 3 Credits.
Physical and chemical aspects of groundwater movement, supply, and contamination. Prerequisites: CHEM 121 or CHEM 221; MATH 166 or consent of instructor. F.

GEOL 418. Hydrogeological Methods. 2 Credits.
Field and laboratory methods used in hydrogeology; techniques of drilling, well and piezometer installation, determination of aquifer parameters, geophysical exploration, soil classification and analysis, ground water sampling and analysis. Includes field trip. Prerequisite: GEOL 417. F.

GEOL 419. Groundwater Monitoring and Remediation. 3 Credits.
Statistical methods for groundwater sampling and monitoring network design. Groundwater remediation and design; including strategies that remove contaminants for external treatment and strategies for in-situ contaminant treatment. Prerequisites: MATH 166, GEOL 417 and a statistics course (ECON 210, PSY 241, MATH 321 or MATH 353) or consent of instructor. S.

GEOL 420. Geology Capstone. 3 Credits.
Geology capstone entails information literacy and communication about Earth materials, processes and history. The course checks retention of earlier learning and insures review and significant addition to that learning. Prerequisite: GEOL 487. Corequisite: GEOL 494. F.S.

GEOL 421. Seminar I. 1 Credit.
Instruction and practice of oral and visual presentation in science and engineering. Includes preparation and delivery of artifact talks, chalk talks, and slide talks. Involves critical review of student presentations and departmental guest lectures. Prerequisite: GEOL 356. F.S.

GEOL 422. Seminar II. 1 Credit.
Continuation of GEOL 421 experience. Preparation and delivery of oral presentations in science and engineering, culminating in oral presentation of senior thesis (Geol 490) or Engineering Design (485). Includes critical review of student presentations and departmental guest lectures. Prerequisites: GEOL 421, senior or graduate status in departmental major. F.S.

GEOL 425. Design Hydrology for Wetlands. 3 Credits.
Principles of chemistry, geology, hydraulics, and hydrology applied to natural and constructed wetlands and other small catchments. Prerequisites: CHEM 121 and either CE 306/ME 306 or GEOL 417. S.

GEOL 427. Groundwater Modeling. 3 Credits.
Fundamentals of numerical modeling applied to groundwater flow. Spreadsheet calculations will be used to demonstrate the finite difference method applied to groundwater movement and storage. Simulation of practical groundwater problems will be performed with the U.S. Geological Survey's MODFLOW code. Prerequisites: GEOL 417 and MATH 265; some programming experience is recommended. On demand.

GEOL 455. Geomechanics. 3 Credits.
The objective of this course is to train the students to use fundamental principles and field and lab techniques of Rock Mechanics to analyze real-world problems, identify the optimal methods, and solve the practical geological engineering problems with the combination of field and laboratory, analytical and experimental means. Emphases will be on the fundamental principles and their application to practical engineering problems, both surface and underground. Prerequisites: GEOL 323 or consent of instructor. F.

GEOL 484. Geological Engineering Design. 3 Credits.
The first of a two-course sequence in geological engineering design. Define the design problem, establish design objectives, evaluate alternatives, specify constraints, determine a methodology, complete a formal design problem statement. Prerequisites: Advanced level standing in Geological Engineering and consent of advisor. F.

GEOL 485. Geological Engineering Design. 3 Credits.
Continuation of GEOL 484 taken the preceding semester. Systematic study and design, with determination of feasibility, careful assessment of economic factors, safety, reliability, aesthetics, ethics, and social and environmental impact. Results presented in GEOL 422 Seminar. Prerequisite: GEOL 484. Corequisite: GEOL 422. S.

GEOL 487. Research I. 1 Credit.
Identification and proposal of research project. Includes literature review, feasibility review, and formal project identification and written proposal. Selection of faculty research adviser within first month of semester. Prerequisite: Senior standing in departmental major. F.S.

GEOL 488. Research II. 2 Credits.
Execution of research plan developed in GEOL 487. Prerequisite: GEOL 487.

GEOL 491. Geologic Problems. 1-4 Credits.
Individualized or group study on selected geoscience topics. May be taken more than one semester to maximum of 8 hours. Prerequisite: Consent of instructor. Repeatable to 8 credits. F.S.SS.
GEOE 403. Selected Topics in Geological Engineering. 1-3 Credits.
Detailed study of selected topics in Geological Engineering. Includes laboratory if applicable. Repeatable. Repeatable. On demand.

GEOL 494. Senior Thesis. 1 Credit.
Written results of research conducted in Geol 489. The thesis document should conform to the format guidelines of a major English-language journal in which the thesis could be published. A copy is to be provided to the F.D. Holland, Jr. Geology Library. Prerequisite or Corequisite: GEOL 488. F,S.

GEOE Courses

GEOE 203. Earth Dynamics. 3 Credits.
Introductory physical geology course that also includes elements of historical geology, geomorphology, geohazards, and ethics. Intended for engineering and geosciences majors. F.

GEOE 203L. Earth Dynamics Laboratory. 1 Credit.
Laboratory course to accompany Earth Dynamics lecture. The laboratory is delivered as on-campus and virtually using specific required products and digital material. F.

GEOE 210. Earth Dynamics & Geophysics. 4 Credits.
Introduction to geology with an emphasis on those aspects of the science that are essential for petroleum engineers. Topics covered include an introduction to geologic features and processes that are responsible for accumulations of petroleum products in the subsurface. F.

GEOE 301. Petrophysics. 3 Credits.
Mineral and rock formation, identification and petrophysical properties, particularly with respect to porous rocks and their interactions with fluids. Prerequisite: GEOE 203. Corequisite: GEOE 301L. F.

GEOE 301L. Petrophysics Laboratory. 1 Credit.
Laboratory to accompany GEOE 301. Prerequisite: GEOE 203. Corequisite: GEOE 301L. F.

GEOE 302. Reclamation Engineering. 3 Credits.
Principles of reclamation emphasizing: the need for reclamation; geology and hydrogeology of disturbed landscapes, geological, hydrological, and ecological reclamation objectives; current reclamation practices; reclamation of abandoned mine lands; reclamation design; laws, regulations, permits, bonds, and public perception. Includes laboratory and field trip. Prerequisite: GEOL 101 or GEOE 203 or consent of instructor. S.

GEOE 323. Engineering Geology. 2 Credits.
This course is to introduce the application of geological, hydrological and environmental principles to geotechnical/geological engineering design, construction and operation as well as various geohazards. Prerequisites: One introductory geology course and MATH 165. S.

GEOE 351. Petroleum Development Engr. 3 Credits.

GEOE 397. Cooperative Education. 1-8 Credits.
For qualified students majoring in geological engineering, geology, or environmental geology and technology. A practical work experience with an employer closely associated with the student's academic area. Positions may require student relocation for one or more semesters. Arranged by mutual agreement among student, department, and employer. Special permission required. Repeatable to 24 credits. Repeatable to 24 credits. S/U grading. F,S,SS.

GEOE 412. Soil Mechanics. 3 Credits.
To introduce the student to the fundamental knowledge of geomaterials and mechanical behavior of Soils; to familiarize the student with the use of soil mechanics; to provide the student with a firm foundation for the continuation to more theoretical and applied aspects in pavement engineering, foundation engineering, dam engineering, geological engineering, slope stability and earthquake engineering. Prerequisite: GEOE 323. Prerequisite or Corequisite: ENGR 203. F.

GEOE 417. Hydrogeology. 3 Credits.
Physical and chemical aspects of groundwater movement, supply, and contamination. Prerequisites: CHEM 121 or CHEM 221; MATH 166 or consent of instructor. F.

GEOE 418. Hydrogeological Methods. 2 Credits.
Field and laboratory methods used in hydrogeology; techniques of drilling, well and piezometer installation, determination of aquifer parameters, geophysical exploration, soil classification and analysis, groundwater sampling and analysis. Includes field trip. Prerequisite: GEOE 417. F.

GEOE 419. Groundwater Monitoring and Remediation. 3 Credits.
Statistical methods for groundwater sampling and monitoring network design. Groundwater remediation and design; including strategies that remove contaminants for external treatment and strategies for in-situ contaminant treatment. Prerequisites: MATH 166, GEOE 417 and a statistics course (ECON 210, PSYC 241, MATH 321 or MATH 353) or consent of instructor. S.

GEOE 425. Design Hydrology for Wetlands. 3 Credits.
Principles of chemistry, geology, hydraulics, and hydrology applied to natural and constructed wetlands and other small catchments. Prerequisites: CHEM 121 and either CE 306/ME 306 or GEOE 417. S.

GEOE 427. Groundwater Modeling. 3 Credits.
Fundamentals of numerical modeling applied to groundwater flow. Spreadsheet calculations will be used to demonstrate the finite difference method applied to groundwater movement and storage. Simulation of practical groundwater problems will be performed with the U.S. Geological Survey's MODFLOW code. Prerequisites: GEOE 417 and MATH 265; some programming experience is recommended. On demand.

GEOE 455. Geomechanics. 3 Credits.
The objective of this course is to train the students to use fundamental principles and field and lab techniques of Rock Mechanics to analyze real-world problems, identify the optimal methods, and solve the practical geological engineering problems with the combination of field and laboratory, analytical and experimental means. Emphases will be on the fundamental principles and their application to practical engineering problems, both surface and underground. Prerequisites: GEOE 323 or consent of instructor. F.

GEOE 456. Geomaterials Stabilization. 3 Credits.
The course is to highlight the need for geomaterial improvement and stabilization in engineering. To provide an understanding for the different principles, analysis, design procedures and applications for geomaterial stabilization and ground improvement. Prerequisite: GEOE 355 or equivalent course with instructor's consent. F.

GEOE 484. Geological Engineering Design. 3 Credits.
The first of a two-course sequence in geological engineering design. Define the design problem, establish design objectives, evaluate alternatives, specify constraints, determine a methodology, complete a formal design problem statement. Prerequisites: Advanced level standing in Geological Engineering and consent of advisor. F.

GEOE 485. Geological Engineering Design. 3 Credits.
Continuation of GEOE 484 taken the preceding semester. Systematic study and design, with determination of feasibility, careful assessment of economic factors, safety, reliability, aesthetics, ethics, and social and environmental impact. Results presented in GEOE 422 Seminar. Prerequisite: GEOE 484. Corequisite: GEOE 422. S.

GEOE 493. Selected Topics in Geological Engineering. 1-3 Credits.
Detailed study of selected topics in Geological Engineering. Includes laboratory if applicable. Repeatable. Repeatable. On demand.

GEOL Courses

GEOL 101. Introduction to Geology. 3 Credits.
Introduction to the dynamics of the Earth -- volcanoes, earthquakes, plate tectonics, streams, groundwater, glaciers, waves, wind, and landslides, with emphasis on the environmental applications of these processes. Introduction to the tools of the geologist -- minerals, rocks, maps, and aerial photographs. GEOL 101L may be taken concurrently. F,S,SS.

GEOL 101L. Introduction to Geology Laboratory. 1 Credit.
An introductory laboratory to complement GEOL 101. Field trip(s) included. Prerequisite or Corequisite: GEOL 101. F,S,SS.

GEOL 102. The Earth Through Time. 3 Credits.
The tracing of changes in the Earth and life through time, with emphasis on the record from North America. GEOL 102L may be taken concurrently. F,S.

GEOL 102L. The Earth Through Time Laboratory. 1 Credit.
An introductory laboratory to complement GEOL 102. Field trip included. Prerequisite or Corequisite: GEOL 102. F,S.

GEOL 103. Introduction to Environmental Issues. 3 Credits.
Introduction to Environmental Issues. A survey of environmental issues concerning society's interaction with Earth's natural systems and exploitation of Earth's resources. F,S.
GEOL 104. Geology of National Parks. 3 Credits.
An overview of the geology of U.S. National Parks. Unifying geological principles are emphasized. Major topics: sandstone parks, volcanic parks, hot springs and geothermal areas, caves and limestone parks, reefs and fossilized reefs, rivers and erosion, ice and glaciers, mountain building and mountain ranges. S.

GEOL 105. Selected Topics. 1-4 Credits.
A special topic course intended for non-geology majors. Subjects will include many issues of interest to non-geologists and non-scientists, such as earthquakes, evolution, gems, and the geology of National Parks. Repeatable when topics vary. Repeatable. On demand.

GEOL 106. Global Warming: The Facts and Myths. 3 Credits.
Global warming is the most debated current challenge to humans. A large, multifaceted and technically challenging topic, it has been diluted to popular slogans that at best capture some aspects of the issue and at the worst are over simplifications. Most of us who are directly affected by global warming do not understand the background, do not know what the assertions are based on, and can not evaluate the correctness of the arguments propagated in mass media such as newspapers and talk-radio. This class will provide students with a clear grasp of the science behind global warming discussion, the typical strategies (pros/cons) that are used in the popular media, and a good understanding of the science-based predictions of upcoming changes in the climate and environment. In addition to providing general scientific background to understand global warming and the science behind it, the class will visit the arguments that are used both for and against global warming. The graded written tests require students to address typical misinformation about global warming, show general knowledge of the scientific background, and recognize typical means to distort science in the mass media.

GEOL 111. Views of Earth and Planets. 3 Credits.
An introduction to Earth and the Solar System. Coverage includes: the planets and their moons, comets, asteroids, impact craters, meteorites, the sun, the solar system's origin, planetary atmospheres, the living Earth, the question of life elsewhere. F.S.

GEOL 111R. Views of the Earth and Planets Recitation. 1 Credit.
A recitation-discussion to complement GEOL 111. Corequisite: GEOL 111. S.

GEOL 205. Surviving on Planet Earth. 3 Credits.
This Essential Studies course stresses critical thinking in covering the basic strategies about humans succeeding on our planet including Earth's hazards (our restless Earth); the balance of life on Earth (evolution and extinction); water in our lives (too much and too little); energy (use and population demands); and global change (Earth as a unique, ongoing experiment). S.

GEOL 220. Computer Applications in Geology and Environmental Science. 2 Credits.
Introduction to the application of computers, software, and digital processing in the geological and environmental sciences. F.

GEOL 256. Critical Thinking in the Geosciences. 2 Credits.
An introduction to the study of geoscience and skills needed to successfully complete a geoscience degree. F.

GEOL 303. Selected Topics in Geology. 1-4 Credits.
Each topic is concerned with a special aspect of geology. May be repeated up to a maximum of 8 hours. Prerequisite: Consent of the instructor. Repeatable to 8 credits. On demand.

GEOL 311. Geomorphology. 4 Credits.
Dynamics of weathering, mass movement, running water, groundwater, waves, wind and ice in the production of landforms. Includes field trips and laboratory. Prerequisites: GEOL 101 or GEOE 203; MATH 165, PHYS 211, CHEM 121 or consent of instructor. F.

GEOL 316. Earth Materials. 4 Credits.
We will organize the course into three Parts: Part I will provide the context in which Earth materials are studied, fundamental concepts that will be used subsequently including: how we study Earth materials, how Earth materials interact with other components of the Earth system, and a rationale for why Earth materials are important for the study of Earth (including processes and history) and the importance of Earth materials in our personal and societal lives. Part II will undertake a systematic look at Earth materials as they occur in different settings. We will identify and describe the key Earth materials, their properties, their distribution and occurrences, the processes that form them, and how scientists use these materials to interpret Earth. Part III will be an investigation of the practical applications of Earth materials to issues of societal importance (e.g., resources, hazards, engineering) and special applications that affect contemporary issues related to living on Earth. This course has both a lecture and a laboratory component. Prerequisites: GEOL 101, GEOL 101L, and CHEM 121 or equivalent. S.

GEOL 318. Mineralogy. 3 Credits.
Survey of the origin, distribution and uses of rock-forming minerals. Introduction to mineral structures, crystal chemistry, and crystallography. Laboratory identification of common minerals in hand sample and petrographic thin section. Introduction to the use of the polarizing microscope. Includes field trip. Prerequisites: GEOL 101 or GEOE 203, and CHEM 121 or consent of instructor. S.

GEOL 320. Petrology. 3 Credits.
Description, classification and origin of igneous, metamorphic, and sedimentary rocks. Field and laboratory study of rocks. Engineering properties of earth materials. Advanced aspects of optical mineralogy. Includes laboratory. Prerequisite: GEOL 318. F.

GEOL 321. Geochemistry. 3 Credits.
Application of the principles of chemistry to geologic and hydrogeologic problems. Origin and distribution of the chemical elements. Introduction to radiochemistry, isotopic geochronology, and stable-isotope geochemistry. Prerequisites: GEOL 318, CHEM 122, and MATH 165 or consent of instructor. S.

GEOL 322. Geology, Society, and the Environment. 3 Credits.
Relationship of geology to society: natural hazards; protection, reclamation, and restoration of our natural environment; application of geology to engineering, land planning, and resource management. Prerequisite: One introductory geology course or upper division standing; MATH 103 is recommended. S, even years.

GEOL 330. Structural Geology. 3 Credits.
Mechanics of rock deformation, analysis of rock structures, preparation and interpretation of geologic maps and cross sections showing structural and tectonic features. Includes laboratory. Prerequisites: GEOL 318, GEOL 320 and MATH 105. S.

GEOL 340. Digital Mapping Methods. 3 Credits.
This course integrates "hands-on" data acquisitions and map generation with an overview of the technology (GPS, lasers, and data management). Field projects focus on mapping methodology and laboratory projects focus on analysis and presentation. It is assumed that students have an undergraduate geology background and a basic knowledge of computer applications. Prerequisite: Junior Standing in geology.

GEOL 342. Conservation and Environmental Hydrology. 3 Credits.
Topics relating hydrology to the environment and water conservation, including the global and local hydrological cycle, flood occurrence and prediction, water pollution, erosion and sedimentation, wetlands, and water management. Prerequisites: Introductory geology course or upper division standing; MATH 103. S, odd years.

GEOL 356. Geoscience Lectures. 1 Credit.
Students attend and evaluate departmental lectures given by visiting scientists and engineers, faculty, and students. May be repeated once. May not be taken concurrently with GEOL 422. S/U grading. F.S.

GEOL 407. Petroleum Geology. 3 Credits.
Origin, accumulation and geologic occurrence of petroleum and gas. Prerequisites: GEOL 101 or GEOE 203, and GEOL 102. F, odd years.

GEOL 410. Site Characterization. 3 Credits.
Purposes, techniques, and tools of site investigation. Covers geologic, hydric, and ecologic concerns. Hands-on application of principles, tools and techniques at real sites. Prerequisites: GEOL 220, GEOL 311, GEOL 414; BIOL 332, BIOL 332L. F.
II. The following curriculum:

1. Essential Studies requirements (see University ES listing)

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies requirements (see University ES listing)

II. The following curriculum:

- Level II proficiency in a foreign language and 14 hours of Social Sciences and Arts and Humanities beyond the University requirement
- Social Sciences and Arts and Humanities beyond the University requirement
- Nonspecified electives approved by adviser 7

Total Credits 100

Bachelor of Science in Environmental Geoscience

The B.S. in Environmental Geoscience, administered by the College of Engineering and Mines, combines a broad foundation in geology with a thorough background in related sciences and mathematics. This degree provides the graduate with more applied and interdisciplinary science skills than the Geology B.S. or B.A. Although not an engineering degree, graduates with a B.S. in Environmental Geoscience are qualified to work in various environmental fields, including field monitoring, remediation of contaminated sites, evaluation of natural hazards, site selection, waste disposal, and water resources. Continuing at the graduate level at UND or other institutions is another option, with opportunities to branch into fields such as geography, ecology, hydrology, and environmental policy. The program includes electives in biology, chemistry, geological engineering, law, and Earth system science.

Completion of a summer geology field course, although strongly recommended, is not required for graduation.

Required 125 credits, including:

I. Essential Studies Requirements (see University ES listing)

Students may petition the Geological Engineering Curriculum Committee (GECC) to use GEOE 397 Cooperative Education, for up to three credits of technical elective credits with the following requirements:

1. Students must get approval in advance from the GECC and the Department Cooperative Coordinator.
2. The first cooperative experience may receive up to one credit of technical elective credit.
3. The second cooperative experience may receive up to two credits of technical elective credit.

**Petroleum Option**

The program has a petroleum option, which is designed to prepare students for possible employment in the petroleum industry, while continuing to provide a broad geological engineering background for career flexibility. The graduate pursuing this emphasis will have a B.S. in Geological Engineering and can report that they have completed the petroleum engineering option requirements.

**Bachelor of Science in Geology**

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies requirements (see University ES listing).

II. The following curriculum:

**Concentration in Petroleum Geology**

Geology is a critically important discipline in the exploration for and extraction of petroleum. These activities require skills in visualizing and understanding the sedimentary rocks especially those in the subsurface. The range of typical applications is wide and the methods used are diverse. Expertise provided by this concentration include aspects of sedimentary geology, stratigraphy, structural geology and geophysics. This expertise is highly sought after by industries and government agencies that find and produce the oil that fuels today’s economies. Furthermore, it has become equally important to train replacements for an aging workforce in this important technological area. The concentration in Petroleum Geology is designed to prepare students for careers as petroleum geologists.

* Students may substitute Geology lecture series (GEOL 356 Geoscience Lectures, GEOL 421 Seminar I, GEOL 422 Seminar II) with COMM 110 Fundamentals of Public Speaking (ES=O).
Teacher Certification (p. 124)

Students seeking secondary teacher certification in Geology must complete the Department of Teaching and Learning Requirements in Secondary Education. Students seeking certification should follow the curriculum for the B.S. in Geology and select Statistics (PSYC 241 Introduction to Statistics, MATH 321 Applied Statistical Methods) rather than MATH 265 Calculus III or Computer Science. The 24 additional hours in science, computer science, statistics, engineering, mathematics, or a foreign language must include each of the following: at least one course in Biology with lab equaling 4 credits, Atmospheric Sciences, and Astronomy.

Geology majors seeking secondary certification must have an adviser both in the Department of Geology and Geological Engineering and in the Department of Teaching and Learning. Formal admission to Teacher Education is required and is normally sought while the student is enrolled in T&L 250 Introduction to Education (see Department of Teaching and Learning listing).

Remaining electives chosen from Geology courses numbered 300 or higher, not including 303

Total Credits: 20-21

History (Hist)

B.A. with Major in History (p. 124)
HIST 220. History of North Dakota. 3 Credits.
A survey emphasizing settlement and development, noting the consequences of the state's location, climate, and settler on the situation in which it now finds itself. Special attention is paid to the Nonpartisan League story and the evolution of isolationist sentiment among North Dakotans. Recommended for Social Science major certification. F.S.

HIST 230. A Cultural History of Science and Technology. 3 Credits.
This course examines the evolution of modern science and technology from the Renaissance through the present day, focusing on the relationship between how cultures describe the natural world and develop the tools needed to manipulate it. The course will investigate how and why science and technology have acquired their privileged places in modern society, their crucial roles in the development of economic and military power, and in our construction of human social, racial, and gender difference. S.

HIST 240. The Historian's Craft. 3 Credits.
An introduction to research and writing history. Students will learn critical reading of secondary sources, how to locate and evaluate resources, how to analyze evidence, how to apply the style and form of historical writing, and how to utilize methods of research. Students will also study historiography and types of historical writing and practice. F.S.

HIST 250. The Civil Rights Movement. 3 Credits.
This course examines the "long" Civil Rights Movement, surveying not only the well-known struggles of the 1954-1965 period, but also significant episodes that came before and after that famous era. Along the way, the class explores contemporaries' accounts of the movement, how the crusade has been portrayed over the years, how Americans remember the saga nowadays, and civil rights today. S, odd years.

HIST 253. History of Stuff. 3 Credits.
What do your belongings say about you? Learn to interpret historic objects from ancient tools to modern toys and trash. Research, write and publish your findings online. S, odd years.

HIST 260. Slaves, Citizens and Social Change. 3 Credits.
Through intense role playing and a highly interactive learning environment, students in this course explore key historic debates in American history about slavery, capitalism, citizenship, and women's roles. Class sessions are student-centered and directed, while professors advise, guide and evaluate oral and written work. On demand.

HIST 269. World War II. 3 Credits.
A brief survey of the background, strategy and major campaigns of World War II including some of the diplomatic and political problems encountered by the major belligerents. The course includes extensive use of documentary film. S, odd years.

HIST 300. Topics in History. 1 Credit.
Topics in history which allow the student to study a specialized subject. 4 credits may apply to the history minor; 6 credits to the history major. Repeatable to 6 credits. Repeatable to 6 credits. F.S.

HIST 301. The Medieval World. 3 Credits.
A survey of the people, cultures, and history of the European middle ages, from the late Roman Empire to the Renaissance. The course will focus on the lives and thoughts of medieval women and men from all social classes and on the foundations of European culture, society, politics, and worldview. Specific topics will include the Crusades, the Black Death, crime and punishment, daily life, war and violence, and religious life. On demand.

HIST 304. The Holocaust. 3 Credits.
This course is an in-depth exploration of why and how one of the worst genocides in human history happened. It is discussion-oriented and uses readings to explore the perspectives of victims, perpetrators, and bystanders, as well as how different groups in our 21st-century world today remember the event. F, even years.

HIST 305. Revolution, Protest, and Freedom. 3 Credits.
This course explores how ordinary people have used protest and revolution to promote ideas about freedom in the 20th century. It focuses on non-elites inside and outside of Europe's borders by examining the actions of women, colonial peoples, and the working classes. While it focuses on Europe the course incorporates a global view of how to understand protest and revolutionary social change. F, odd years.

HIST 310. Monuments, Museums and Memory. 3 Credits.
How should we remember our history? How do museums and public monuments influence our understanding of the past? Explore these questions through case studies and extended role-playing games. On demand.

HIST 320. American West. 3 Credits.
Explores the lives of diverse peoples living in western North America from the 16th century to the present. Topics include migrations, intercultural interactions, environmental change, and the West in popular culture. On demand.

HIST 327. France and Empire. 3 Credits.
This course will explore the development of modern French history from 1789-present. French history is highly contentious, characterized by revolution, imperialism, and a variety of marginalized groups fighting for rights as full citizens. The course is organized chronologically and themes will include politics, empire, society, and culture. F, odd years.

HIST 328. Human Rights. 3 Credits.
This course will explore how the concept of human rights developed throughout the world from the 18th century to today. Topics will include debates over what human rights are and when they originated, how people throughout the world have used the concept for their own ends, and why it is a controversial subject today. S, even years.

HIST 330. The United States: Social and Cultural, 19th Century. 3 Credits.
A survey of the contributions of social institutions (such as the family, school, and church) to the development of a national culture. The colonial background is considered briefly, but emphasis is given to the first half of the nineteenth century. Changing attitudes toward social reform, intellectualism, class status, and minorities (such as children, women, blacks, and Indians) are examined. Competing regional trends in economics, social, political, and intellectual attitudes and institutions provide the dynamics for understanding the failure of nationalism during the antebellum period. On demand.

HIST 331. Women in Early America. 3 Credits.
How did women experience and shape American history and the United States as we know it today? This course explores the social, political, and economic lives of women from diverse cultural backgrounds in colonial America and the early United States. Using gender, race, class, and culture as analytical lenses reveals the struggles and victories of women, as well as their individual and collective influence on the broader society. F, odd years.

HIST 333. Women in Modern America. 3 Credits.
How did women experience and shape American history and the United States as we know it today? This course explores the social, political, and economic lives of American women from diverse cultural backgrounds from the rise of the "New Woman" in the late 19th century to the present. Using gender, race, class, and culture as analytical lenses reveals the struggles and victories of women, as well as their individual and collective influence on the broader society. S, even years.

HIST 335. Nuclear Weapons and the Modern Age. 3 Credits.
An introduction to the history of: nuclear weapons and their delivery systems, their development and use during World War II, the nuclear arms race between the U.S. and the U.S.S.R., popular disarmament movements, and diplomatic efforts to control nuclear weapons and their proliferation. A final section will deal with the nuclear implications of the end of the Cold War and the development of new nuclear states in the last years of the 20th century. The course will include—from an historian's point of view—some technical material necessary to a reasonable and realistic understanding of the subject. S, even years.

HIST 339. The United States and Vietnam, 1945-1975. 3 Credits.
An exploration of Southeast Asian as well as American history. This course will survey briefly the development of Vietnamese culture and nationalism, the history of French imperialism in Indochina as background to an examination of the development of the Vietnamese independence movement, the origins of Vietnamese communism, the war for independence from France, and the violent and tragic relationship between the U.S. and Vietnam from the end of World War II to the final departure of American forces from Saigon. S, even years.

HIST 343. Ancient Greece. 3 Credits.
A study of Greek prehistory and history to the end of the Hellenistic era. Greek achievements in art, commerce, literature, politics, religion, science, and technology are surveyed. F, odd years.

HIST 344. Ancient Rome. 3 Credits.
A survey of the prehistory, historical development, and ultimate decline in Rome. In addition to inquiries into the military, political, cultural, economic, and religious experiences of the ancient Romans, this course will attempt to delineate those qualities of life that were peculiar to Roman. S, even years.
HIST 345. The Ancient Near East. 3 Credits.
A course intended to acquaint the student with cultures of the ancient western Asian world. Egypt, Iran, Iraq, Turkey, and the Levant are the areas emphasized. S. even years.

HIST 347. Seminar. 3 Credits.
This class reinforces the skills introduced in HIST 240 through intensive student-centered approach to the study of the past. The class centers upon refining individual skills in informational literacy, critical thinking and both written and oral communication through a series of focused readings, discussions and projects. Prerequisite: HIST 240. F.S.

HIST 349. The Origins of Modern War. 3 Credits.
The course examines the military, social and technological developments that lead to the emergence of the modern way of war in the nineteenth century, from the advent of firearms and professional armies at the end of the middle ages, through the "Gunpowder Revolution" and the rise of the nation state, to the foundations of European global military dominance and the "nation at war" of the French Revolution and Napoleon. F. odd years.

HIST 350. The Renaissance and Reformations: Europe 1450-1600. 3 Credits.
An introduction to the cultural and political history of Europe from the Renaissance of the late Middle Ages through the religious upheavals of the 16th century. The course will focus on the emergence of new worldviews during the Early Modern Era and the accompanying religious, social, and political transformation of Western culture. Topics will include European global exploration and expansion, the Protestant and Catholic Reformations, and the growth of a new understanding of our place in the cosmos. On demand.

HIST 351. Kings, Witches, Science and War: Europe and the Search for a New Order. 3 Credits.
Kings, Witches, Science and War: Europe and the Search for a New Order. Through a survey of Europe in the eighteenth century, the course explores the fascinating contradictions of the age. The era saw the emergence of modern science and the greatest witch trials; its people endured Europe's most savage religious wars but took the first steps towards religious toleration; it was an age still grounded in ancient tradition, but which also saw the birth of modern political, social, military and economic systems. On demand.

HIST 352. Enlightenment and Revolution: Europe 1700-1800. 3 Credits.
The "Age of Reason" can be seen as a time of aristocratic privilege and refinement in the courts of absolute kings, but was also a time or revolution, social upheaval and emergent democracy. The course focuses upon the social, political, and intellectual development of Europe during the eighteenth century; topics include the Enlightenment, Europe's first global wars, slavery and colonialism, the French Revolution and the advent of Napoleon Bonaparte. On demand.

HIST 353. Europe in the Nineteenth Century, 1815-1918. 3 Credits.
Europe was transformed by industrial and scientific achievements in the 19th century. People in many European countries saw their capacities in transportation, communication, production, manufacture, and weaponry multiplied many times over. The accumulated energy generated by these achievements was released in the Great War 1914-1918, which ended Europe's domination of the world. On demand.

HIST 355. Europe since 1918. 3 Credits.
When the 20th century began, Europe was the acknowledged center of the world. But 400 years of European global supremacy ended with the Great War of 1914-1918. Its aftermath was marked by the greatest tragedies in human history. Following the even more global and more terrible Second World War, European nations created the European Union. Can the EU withstand the stresses to which it is being subjected? On demand.

HIST 362. Modern China. 3 Credits.
A survey of the political, economic, social, and intellectual history of China from the Opium War (1842) until the present. Special attention will be paid to the problems of modernization in traditional societies and to the nature of fundamental social revolution.

HIST 370. African-American History to 1877. 3 Credits.
This course begins with an examination of when and why the idea of race first developed; it then surveys colonial slavery, the impact of the American Revolution on race relations, and the slave community during the antebellum period. We also consider the lives of free blacks in the North and South, as well as the similarities and differences between U.S. and Latin American slavery. The course concludes with a detailed look at Reconstruction, this nation's experiment in interracial democracy. Through lecture, discussion, projects, and writing assignments, History 370 highlights both the tribulations and triumphs of African Americans. F.

HIST 371. African-American History since 1877. 3 Credits.
This course begins with a brief overview of Reconstruction; it then examines Populism, the entrenchment of Jim Crow segregation, and the philosophies of Booker T. Washington and W.E.B. Dubois. We also explore the impact of World War I on African Americans, as well as the Great Migration, the Harlem Renaissance, and the Great Depression/World War II era. Several weeks are devoted to the Civil Rights and Black Power Movements, and the course concludes with an examination of contemporary race relations. A mixture of lectures, discussion, projects, and writing assignments, History 371 emphasizes both the travails and triumphs of African Americans since 1877, and endeavors to discover (and cultivate) the forces which promote racial equality and social justice. S.

HIST 381. Modern Africa. 3 Credits.
This course explores Africa's history from the start of the Atlantic Slave Trade to the present. The class explores how both internal and external forces shaped Africa's history and pays particular attention to the current opportunities and issues within Modern Africa. S. odd years.

HIST 391. The Invention of Latin American. 3 Credits.
This course explores the history of Latin America from 1492 through the mid-19th Century. It focuses on lasting legacies of conquest and colonization that give rise to the notion of a "Latin" America that is linguistically, culturally, and ethnically distinct from an "Anglo" America in the northern part of the hemisphere. Emphasis will be placed upon formulations of culture and race as they relate to the emergence of Latin American national identities. On demand.

HIST 397. Cooperative Education. 3 Credits.
A practical work experience with an employer closely associated with the student's academic area. 3 credits repeatable to 9. Arranged by mutual agreement among student, department, and employer. May be repeated to a maximum of 9 credits. Repeatable to 9 credits. S/U grading. F., S., SS.

HIST 399. Selected Topics in History. 1-3 Credits.
Selected topics in history which allow the student to study a specialized subject. Credits may apply to history major or minor. Repeatable to 30 credits. On demand.

HIST 402. 'A Motley Rabble'... 3 Credits.
This course explores the rise of a 'Motley Rabble' of colonial peoples who John Adams, in 1770, blamed for the Boston Massacre. It explores the people who freely and unfreely came to British North America, their interactions with the peoples they encountered, and the world that they created. It ends by exploring how this 'Motley Rabble' gained their independence. On demand.

HIST 405. The United States: Age of Jefferson and Jackson, 1789-1850. 3 Credits.
A study of the creation of a new, expansive nationalism in the development of new institutions and new national character, and the simultaneous growth of sectional forces which brought the new nation to the brink of Civil War. F., even years.

HIST 406. The United States: Civil War and Reconstruction, 1850-1877. 3 Credits.
A study of the acceleration of the forces of sectionalism and racism that caused the temporary breakdown of the American democratic process and the tragedy of Civil War and Reconstruction. S. odd years.

HIST 407. The United States: Rise of Industrial America, 1877-1917. 3 Credits.
A survey of the rise of America to industrial and world power. Emphasis is placed upon the great changes which the Industrial Revolution brought and the American response to these changes. Detailed attention is given to the Populist and Progressive movements. F., odd years.

HIST 408. The United States, 1920-1945. 3 Credits.
A study of American society from the end of World War I through World War II. Emphasis will be placed upon the Republican ascendency and social changes during the 1920s, the causes of the Great Depression, the New Deal, the road to World War II, and the war, especially the homefront. F., odd years.
HIST 412. U.S. Foreign Relations since 1900. 3 Credits.
An advanced survey of the major policies advocated and pursued by the U.S. during the 20th century. S. odd years.

HIST 413. The United States since 1945. 3 Credits.
An advanced examination of the United States as it has developed from the height of its power, influence, and prosperity through years of upheaval, cultural and political transformation, and economic decline. F, even years.

HIST 419. Great Britain since 1815. 3 Credits.
A survey of British history since 1815 with an emphasis on the state of mind known as "Victorian," as it was manifested, practiced, or criticized in the nineteenth century; its influence on economics, politics, foreign affairs, and social policy; and its vestiges in modern-day Britain. F, even years.

HIST 421. The British Empire, 1496-1884. 3 Credits.
A survey of British Imperial history from the Tudors to the "Scramble for Africa." Particular attention will be paid to the social, economic, and political factors which shaped Britain's Imperial history as well as the history of its colonies. F, odd years.

HIST 422. The British Empire and Commonwealth, 1884-the Present. 3 Credits.
A survey of British Imperial history from the "Scramble for Africa" to the present. Beginning with an overview of the early Empire, this course will focus upon the cultural, economic, and political factors which shaped and led to the deconstruction of the Empire/Commonwealth in the modern era. S, even years.

HIST 424. European Witch Trials. 3 Credits.
An examination of the development and content of European witch-beliefs and persecution, from their origins in antiquity and the middle ages through the dawn of the modern era. Emphasis upon witchcraft as a social, legal, and cultural phenomenon. S, odd years.

HIST 425. American Family in Historical Perspective. 3 Credits.
This course is devised as a survey of the family over the nation's first 400 years of existence. Course members will examine variations in the structure of the family, changes in the definition of the family and the forces which have wrought significant alterations in this most basic of social institutions, taking into consideration race, culture, and gender. S.

HIST 431. Seminar in the History of the Great Plains. 3 Credits.
This course promotes focused study of the Great Plains of North America through reading, discussion, research, and writing. Students will examine all aspects of Great Plains history including culture, environment, social organization, economics, and politics from the ancient past to the present. S, odd years.

HIST 440. Research Capstone. 3 Credits.
In this capstone experience, students work closely with a member of the faculty to design and conduct a major research project on a topic of their choice. Students refine their skills in critical thinking, archival research, and persuasive written and oral communication. Prerequisite: HIST 240. F.S.

HIST 450. European Social History. 3 Credits.
This course will cover the methods, historiography, and problems of European social history. The course is divided into three sections for topical content: the Ancien Regime, the Age of Reform, and the Twentieth Century. There are several fairly specific skills students will develop, all of which can loosely be organized under the general heading of "how historians think;" to be able to distinguish between a primary and a secondary source; to be able to analyze a primary source within its appropriate historical context; to be able to locate the thesis or argument in a secondary source and to be able to offer an informed evaluation of that argument; to be able to read a secondary source within its particular context as part of a larger discussion of facts, individuals, events, etc.; and to be able to construct a sound historical thesis/argument of their own, whether in writing or class discussions. F, even years.

HIST 470. United States-Canadian Relations, 1776 to the Present. 3 Credits.
This course explores the historical relationships linking and dividing Canada and the United States of America since 1774. Because of the unique constitutional and diplomatic status of British North America and then Canada itself, this course examines the often complex tri-partite relationship between the U.S., Canada, and Great Britain. F, even years.

HIST 480. Introduction to Public History. 3 Credits.
An introduction to public history at federal, state, and local levels. Emphasis is given to archival theory, oral history, museum studies and historic preservation, with attention to awareness of historical resources. On demand.

HIST 481. Public History Practice. 3 Credits.
A practicum in which the student learns through experience the techniques of public history work. S. odd years.

HIST 489. Senior Honors Thesis. 1-15 Credits.
Supervised independent study culminating in a thesis. Total not to exceed 15 credits. Prerequisites: Consent of the Department and approval of the Honors Committee. F.S.

HIST 494. Readings in History. 1-3 Credits.
Repeatable to 6 credits. Repeatable to 6 credits. F.S.

Bachelor of Arts with Major in History

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies (see University ES listing).

II. The following core curriculum:

33 major hours, including:

- HIST 240 The Historian’s Craft 3
- HIST 440 Research Capstone 3
- 6 Credits from European History Selection (HIST 301, 343, 344, 349, 350, 351, 352, 353, 355, 419, 421, 422, 423, 424, 425, 450)
- 3 Credits from World History Selection (HIST 230, 269, 327, 328, 335, 345, 362, 381, 426)
- 6 Credits from any 300+ level History course 6
- 6 Credits from any History course 6

Total Credits 33

Minor in History

21 credits required:

- HIST 240 The Historian’s Craft 3
- No more than 9 credits of 100 and/or 200 level classes 9
- At least 9 credits of 300 and/or 400 level classes 9

Total Credits 21

Related Field Concentration in Intellectual History, Minor Only

Required: 20 credits Upper Level work approved by the chairs of the History or Philosophy Departments.

Such courses as follows may be used:

- HIST 330 The United States: Social and Cultural, 19th Century 3
- PHIL 300 History of Philosophy I (Ancient/Modern) 3
- PHIL 301 History of Philosophy II (Medieval/19th Century) 3
- PHIL 302 Renaissance and Enlightenment 3
- PHIL 303 Kant and the Nineteenth Century 3
- PHIL 312 American Philosophy 3
- ART 210 History of Art I 6
  & ART 211 History of Art II 6
- ART 410 Advanced History of Art 3

Histotechnician Program

Histotechnician Certificate (p. 125)
Courses

HT 360. Histopathology Laboratory Theory. 3 Credits.
This course presents an overview of topics related to histology laboratory operations and an introduction to histology laboratory management. Prerequisite: HT program students only. F,S,SS.

HT 362. Histotechniques I. 3 Credits.
This course is the introduction to the fundamental techniques, including fixation, processing, instrumentation, and solution preparation. Cytoplasmic, nuclear, carbohydrate, and amyloid staining will be presented. Prerequisite: HT program students only. F,S,SS.

HT 363. Histotechniques II. 3 Credits.
This course is the continuation of the fundamental techniques of histology, including muscle and connective tissue, nerves, microorganisms, pigment, minerals, cytoplasmic granules, immunohistochemistry, and enzyme histochemistry. Prerequisite: HT program students only. F,S,SS.

HT 367. Histology Practicum I. 5 Credits.
Communication skills, attitude and work performance will be evaluated. The skills involved will emphasize the fundamental techniques including fixation, specimen processing, instrumentation, sectioning and staining with emphasis on the Hematoxylin and Eosin stain. Prerequisite: HT program students only. Corequisite: HT 362. F,S,SS.

HT 368. Histology Practicum II. 5 Credits.
Individual assignments in an accredited histology lab. Emphasis on refining skills learned in Histology Practicum I, staining procedures and tissue identification. Prerequisite: HT program students only. Corequisite: HT 363. F,S,SS.

HT 399. Special Topics. 1-5 Credits.
Lecture, discussion, and readings on topics of current interest in the pathology laboratory. Prerequisite: HT program students only. Repeatable to 5 credits. F,S,SS.

Histotechnician Certificate

Admission to the certificate program is open to all individuals who meet the following requirements:

1. Associate degree
2. Introduction to Chemistry (Chem 115/L, 4 credits)
3. Concepts of Biology (Biol 111/L, 4 credits)
4. Math at college level
5. Verification of a cumulative GPA of 2.8 on a scale of 4.0
6. Completion of the Biology and Chemistry courses with a C or better
7. Criminal background check
8. Immunization records
9. Verification of acceptance by a clinical site that meets the specification for acceptance in the Histotechnician Certificate Program

Honors Program (Hon)

Courses

HON 101. Research Scholars Cornerstone. 3 Credits.
Reading and discussion of selected works that reflect the methodology of the humanities, with emphasis on US Diversity, as a means to establish fundamental skills for responsible research in any field, including: critical and creative thinking, deep reading, scholarly inquiry, and diversity of perspective through an intercultural approach. Taken by first-year students in the Honors Program who identify in the new Research Scholars track. Prerequisite: Admittance to the Honors Program. F,S.

HON 102. Leaders in Action Cornerstone. 3 Credits.
This course will feature readings and discussion of selected works that reflect the methodology of the social sciences, with emphasis on intercultural understanding, as a means to learn about diverse models of leadership and its connection to the Honors experience, and to cultivate skills for becoming thoughtful leaders within a pluralistic, democratic society. First-year students in the Honors Program who identify in the new Leaders in Action track will take this course and critically examine themes like power, effective action, communication, human differences and behavior, public service, and the common good through methods, sources, and paradigms central to the social sciences. Prerequisite: Admittance to the Honors Program. F,S.

HON 260. Honors Experiences. 1-4 Credits.
This flexible course allows Honors students to pursue specially arranged high-impact individual reflective experiences, like service-learning projects, community engagements and volunteering, internships, shadowing opportunities, peer mentoring, or tutoring for Honors credit. May be initiated by students with approval of Honors Director, provided appropriate supervisors are willing and structure for oversight is in place. Generally, credits will be determined by the number of hours devoted to the experience and reflection on it; for example, 1 credit = 15 contact hours, 2 credits = 30 contact hours, etc. Prerequisites: Admittance to Honors Program, and HON 101 or HON 102. Repeatable to 9 credits. F,S,SS.

HON 301. Honors Mode. 1 Credit.
A method of using a 1 credit study load to increase the level of any standard course to an Honors quality course. It provides an intellectual enhancement to a standard course. Prerequisite: Standard course which Honors Mode complements; see department for approval. F,S,SS.

HON 372. Advanced Social Science Colloquium on US Diversity. 3 Credits.
This course is designed to provide an Essential Studies Social Sciences-based, US Diversity overlay course. F,S.

HON 381. Exploring Global Diversity through Humanities. 3-4 Credits.
This course is designed to give students a study abroad experience without having to spend an entire semester abroad. During the semester the students will study the history, art, literature, culture and language of a chosen country. While it is possible that other aspects of the country will be studied the emphasis will be on Humanities subject areas. At the end of spring semester the instructor, students and other chaperones (as needed) will travel to the studied country for 10 to 14 days. The travel will be a requirement. Repeatable. S, odd years.

HON 382. Exploring Global Diversity through Social Science. 3-4 Credits.
This course is designed to give students a study abroad experience without having to spend an entire semester abroad. During the semester the students will study the history, geography, government, politics and culture of a chosen country. While it is possible that other aspects of the country will be studied the emphasis will be on Social Science subject areas. At the end of spring semester the instructor, students and other chaperones (as needed) will travel to the studied country for 10 to 14 days. The travel will be a requirement. Repeatable. S, even years.

HON 391. Advanced Colloquium in the Humanities. 1-4 Credits.
Advanced interdisciplinary courses on varying topics in the humanities. Repeatable. Repeatable. F,S.

HON 392. Advanced Colloquium in the Social Sciences. 1-4 Credits.
Advanced interdisciplinary courses on varying topics in the social sciences. Repeatable. Prerequisite: Admittance to the Honors Program. Repeatable. F,S.

HON 393. Advanced Colloquium in the Sciences. 1-4 Credits.
Advanced interdisciplinary courses on varying topics in the sciences. Repeatable. Prerequisite: Admittance to the Honors Program. Repeatable. F,S.
Honors

Graduation as a Scholar in the Honors Program

Required 125 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution), including:

I. Twenty-four credits of Honors coursework, eight of which must be taken in colloquia. Honors sections of courses offered by other departments may also count for a portion of the 24 credits. Nine senior Honors thesis credits, to be taken over a minimum of two semesters, also count toward the 24 credits.

II. Sophomore Honors Portfolio, submitted upon completion of nine Honors credits.

III. Senior Honors Thesis.

Note: Honors Program requirements may substitute for the University Essential Studies Requirements.

Humanities (Hum)

Courses

HUM 101. The Human Experience. 4 Credits.
This course uses the individual human experience as a lens for viewing ways of thinking across disciplines, drawing primarily on concepts and methodologies from the humanities but also incorporating ideas from the social sciences and the sciences. Materials chosen each semester will vary, often focusing on a central theme. This course helps students begin to develop competencies in problem solving, personal development, and relating to others. Students may be expected to attend events outside of class. F,SS.

HUM 101L. Humanities Recitation.

HUM 102. The Human Community. 4 Credits.
While this course has the same structure and goals as Humanities 101, its subject matter will focus primarily on the methods and expressions of human interactions within communities, with a focus on texts and artifacts that articulate the growth of human consciousness, responsibility, and potential. The texts chosen for this course will require students to compare and contrast ancient and modern ideas in the major disciplines of the humanities. Students may be expected to attend events outside of class. F,SS.

HUM 212. Integrated Cultural Experience. 3 Credits.
This course seeks to examine human concerns and motivations through the examination of artistic and cultural expressions. Students will attend and analyze various types of cultural events, including dramatic productions, art shows, films, and music concerts to examine the sub-text of the human condition. They will also study texts in which authors present philosophies regarding the nature of art and the importance of particular mediums (poetry, visual arts, film, etc.) in voicing personal and social concerns. In addition, students will study the philosophy of philanthropy by researching and gaining personal experience in a community service activity. Prerequisite: Consent of instructor. F, S.

HUM 224. Integrated Social Science Inquiry. 2-4 Credits.
Readings and discussion of selected works that reflect the methodology and concerns of the social sciences; integration of social science topics and methods with other Integrated Studies courses/topics. F, S.

HUM 225. Advanced Integrated Social Science. 2-4 Credits.
A continued, in-depth exploration of social science topics raised in Integrated Social Science (224). This course will require that students pursue more advanced research in and consideration of topics included in the social sciences as they relate to the Integrated Studies Program theme. F, S.

HUM 270. Integrated Studies Life Sciences. 3 Credits.
Through a variety of media and experiences, ISP Life Sciences explores historical and modern developments in the Life Sciences that have altered the conception of what it means to be human. ISP Life Sciences is an interdisciplinary examination of the core concepts of Life Sciences that may include genetics, evolution, and ecology through the process of scientific inquiry. No laboratory. F, S.

HUM 271. Integrated Studies General Science. 3 Credits.
Through a variety of media and experiences, General Sciences explores historical and modern developments in the Physical Sciences that have altered the conception of how our world and universe work and the place of humans within it. This course an interdisciplinary examination of the core concepts of Physical Sciences that may include cosmology, environment, climate, and sustainability through the process of scientific inquiry. F, S.

HUM 283. Evidenced Based Reasoning Across Disciplines. 3 Credits.
In this course, students will examine chosen issues in the sciences, social sciences, and humanities and will gain a general familiarity with the academic and popular forms of writing, evidence based reasoning, and research in each discipline. They will become familiar with the research methodologies of each discipline and learn to integrate the different methods and perspectives with their own analysis. F, S.

HUM 300. Knowledge, Truth and Reality. 1-3 Credits.
An interdisciplinary exploration of the nature of knowledge, truth, and reality from the perspectives of science, philosophy, and religion. On demand.

HUM 312. Creative Inquiry. 1 Credit.
This hands-on course allows students to deeply pursue and attempt to solve problems that spring from their own curiosity, from a professor's challenge, or from the pressing needs of the world around them. Course options may vary from a focused analysis of a current problem to team-based investigations led by a faculty mentor or creative endeavor. The purpose of the course activities are to allow students to experience and engage in creative activities or hands on research/problem solving, providing them with deep learning opportunities where they can develop critical thinking skills, team-based problem solving skills, and collaboration, communication, and presentation skills. Offered as needed by permission of department. Repeatable (when topics vary) up to three times. Repeatable to 3 credits. F, S.

HUM 325. Interdisciplinary Global Human Rights. 3 Credits.
This course addresses a variety of current international issues from multiple perspectives and through a lens of interdisciplinary. Through the study of global issues and topics, students will read, write, and discuss topics of international concern affecting human rights today and the future of the global common. This discussion based course will utilize readings, current events, and other media focusing on critical and creative thinking, and collaborative problem-solving in addressing current world problems. F, S.

HUM 391. Advanced Humanities Seminar. 1-4 Credits.
An interdisciplinary reading, writing and discussion course whose focus varies from semester to semester, but which draws on texts from the Humanities, Social Sciences, and Sciences. Repeatable. F, S.

HUM 408. Writing Across the Disciplines. 3 Credits.
This senior level course will provide students with an intensive writing experience that focuses on methods and strategies in the humanities, social sciences, and sciences. Students will gain an understanding of the theoretical underpinnings of the disciplines while they engage in the process of integrating disciplinary materials and writing tactics as well as formulating written responses to topics of current concern. Prerequisites: ENGL 120 or ENGL 125 or ENGL 130 and Junior/Senior standing. F, S.

HON 399. Independent Study. 1-4 Credits.
Individual instruction on specified topics arranged by mutual agreement among teacher, student, and the Program. Repeatable to 12 credits. Repeatable to 12 credits. F, S.

HON 489. Senior Project: Honors Research. 1-8 Credits.
Supervised independent study culminating in a thesis, white paper, literary work, art exhibition, musical or theatrical performance, portfolio, translation, or other focused demonstration of four years’ worth of research or creative work and learning. Prerequisites: Consent of the Department and ENGL 130. Repeatable to 9 credits. F, S, S.

Honors Program

Prerequisites for graduation in Honors:

A. Honors Program: Required 36 credits. Nine Honors courses numbered 300 or above (33 credits), plus three Honors senior thesis credits (3 credits). Nine senior Honors thesis credits, to be taken over a minimum of two semesters, also count toward the 24 credits.

B. Honors Program: Required 125 credits. (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution), including:

I. Twenty-four credits of Honors coursework, eight of which must be taken in colloquia. Honors sections of courses offered by other departments may also count for a portion of the 24 credits. Nine senior Honors thesis credits, to be taken over a minimum of two semesters, also count toward the 24 credits.

II. Sophomore Honors Portfolio, submitted upon completion of nine Honors credits.

III. Senior Honors Thesis.

Note: Honors Program requirements may substitute for the University Essential Studies Requirements.

Program

Graduation as a Scholar in the Honors Program

In addition, students will study the philosophy of philanthropy by researching and gaining personal experience in a community service activity. Prerequisite: Consent of instructor. F, S.

HUM 224. Integrated Social Science Inquiry. 2-4 Credits.
Readings and discussion of selected works that reflect the methodology and concerns of the social sciences; integration of social science topics and methods with other Integrated Studies courses/topics. F, S.
Interdisciplinary Health Studies (IDS)

B.S. with a Major in Interdisciplinary Health Studies (http://und-public.courseleaf.com/undergraduate/academicinformationdepartmental/coursesprograms/interdisciplinarystudies/inter-ba-bs)

Courses

IDS 280. Interdisciplinary Thinking and Writing. 3 Credits.
The course will examine the nature of academic disciplines and fields and the way in which knowledge is generated, organized, and shared. Basic assumptions and orientations will be compared and contrasted in the humanities, social sciences, and science disciplines. Current literature in the field of interdisciplinary studies will be presented, with an emphasis on interdisciplinary approaches in the health fields. F,S.

IDS 399. Interdisciplinary Topics. 1-3 Credits.
Topics, problems, or texts that connect or draw upon two or more academic disciplines will be studied. Repeatable when topics vary. Regular or S/U grading. Repeatable to 9 credits. F,S,SS.

IDS 491. Capstone Interdisciplinary Seminar. 1-3 Credits.
This seminar will be organized by the director of the Interdisciplinary Studies Program to act as a point of reference for students working on their Senior Projects in the program. The projects will vary from semester to semester, so the focus will shift accordingly. Not repeatable. Prerequisite: IDS 280. Corequisite: IDS 498. S.

IDS 495. Service and Citizenship. 3 Credits.
Students will design community service projects, or will join existing projects, and engage in volunteer action during the semester. Class meetings on campus will center on a critical discussion of volunteerism and community service; current literature on service learning will be studied. Self-assessment of experiential learning outcomes, as well as a portfolio and essay will be required. Prerequisite: Junior or Senior standing. F,S,SS.

IDS 498. Senior Project. 3 Credits.
The project will be designed on an area of interest which the student has defined. It will include data or material from a variety of disciplines or fields which the student finds relevant to the issue under study. The student will synthesize the cross-cutting information into a creative/original whole which the student finds relevant to the issue under study. The student will focus on student-driven group projects designed to enhance students’ ability to work in diverse teams and engage in unstructured problem solving. Prerequisites: ENGL 130; 23 completed credit hours. F,S.

IDS 252. Introduction to Canadian Studies. 3 Credits.
An interdisciplinary, team-taught course focusing on the historical, geographical, socio-cultural, literary, political, economic, and international qualities that make Canada and its communities both vibrant and unique. F.

A&S 260. Exploring Topical Challenges. 3 Credits.
Students will conduct signature work in interdisciplinary teams based on semester-long themes. The first half of the course will focus on exploration and inquiry on a chosen theme (varies by semester). The second half of the course will focus on student-driven group projects designed to enhance students’ ability to work in diverse teams and engage in unstructured problem solving. Prerequisites: ENGL 130; 23 completed credit hours. F.S.

A&S 294. Directed Studies. 1-4 Credits.
Specially arranged individual tutorials, projects, or reading programs on a variety of subjects not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved, provided appropriate faculty members are willing. Repeatable as topics vary to 8 credits. Repeatable to 8 credits.

A&S 299. Special Topics. 1-4 Credits.
Specially arranged seminars or courses on a variety of subjects not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved, provided appropriate faculty members are willing. Repeatable. On demand.

A&S 351. Introduction to Law and Legal Studies. 3 Credits.
Segments on Contracts, Criminal Law, Constitutional Law, and Torts, taught in customary law school manner to acquaint undergraduates and others interested in exploring a career in the legal profession with law school methodology and legal analysis.

A&S 497. Internship. 1-4 Credits.
This internship is a short-term work experience emphasizing hands-on learning that is not covered by regular departmental offerings. Prerequisite: Permission of instructor. Repeatable to 12 credits. F,S,SS.

A&S 499. Special Topics. 1-4 Credits.
Specially arranged seminars or courses on a variety of subjects not covered by regular departmental offerings. May be initiated by students with approval of dean and departments involved, provided appropriate faculty members are willing. Repeatable as topics vary. Repeatable.

Bachelor of Arts with Major in International Studies

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies requirements (See University ES listing)

II. A major in International Studies consists of 30 credits plus language credits. Students are required to participate in a study abroad experience through a University sponsored program. The program is organized around several categories: Language; Introduction and Capstone; Discipline Diversity; Regional & Thematic Diversity; Regional Diversity Outside of Concentration; and Study Abroad.

Language The foreign language requirement has two options: Option 1 Level IV second language proficiency plus two courses at the 300/400 levels in the same language. 300/400 level courses in languages can be counted towards the Regional & Thematic concentration (6 courses, 22 credits); Option 2 Level IV proficiency in second language plus level II proficiency in third language (6 courses, 24 credits)

Global Perspectives & Capstone: required unless authorized substitution

KIN Courses

KIN 104. Aquatics I. 1 Credit.
These courses are designed for beginners. They include instruction in various aquatics-related activities (e.g., swimming, diving, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. F,S,SS.

KIN 105. Combative Sports I. 1 Credit.
These courses are designed for beginners. They include instruction in various combative sports (e.g., boxing, kickboxing, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 107. Dance I. 1 Credit.
These courses are designed for beginners. They include instruction in various dance types (e.g., ballroom, hip-hop, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 108. Fitness and Conditioning I. 1 Credit.
These courses are designed for beginners. They include instruction in various fitness and conditioning activities (e.g., aerobic exercise, pilates, yoga, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 110. First Aid and CPR. 1 Credit.
Recommended First Aid and CPR practices for the care of persons who have been injured or suddenly become ill. Qualifying students will have the option to become certified in CPR, AED and First Aid. F,S.

KIN 111. Individual Sports/Activities I. 1 Credit.
These courses are designed for beginners. They include instruction in various individual sports and activities (e.g., golf, ice skating, track and field events, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 112. Outdoor Pursuits I. 1 Credit.
These courses are designed for beginners. They include instruction in various outdoor pursuit activities (e.g., camping, cycling, cross-country skiing, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 113. Racquet Sports I. 1 Credit.
These courses are designed for beginners. They include instruction in various racquet sports (e.g., badminton, racquetball, tennis, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 114. Strength Training I. 1 Credit.
These courses are designed for beginners. They include instruction in various types of strength training (e.g., body building, power lifting, weight training, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 115. Target Sports I. 1 Credit.
These courses are designed for beginners. They include instruction in various target sports (e.g., trapshooting, skeet, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 116. Team Sports I. 1 Credit.
These courses are designed for beginners. They include instruction in various team sports (e.g., baseball, basketball, football, ice hockey, soccer, volleyball, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 117. Gymnastics I. 1 Credit.
These courses are designed for beginners. They include instruction in various types of gymnastics (e.g., artistic, trampolining, tumbling, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 118. Military Conditioning I. 1 Credit.
This course is designed for beginners. It includes instruction in military conditioning. Repeatable to 4 credits. On demand.

KIN 118A. Air Force Conditioning I. 1 Credit.
This course is designed for beginners, emphasizing on the Air Force components of physical fitness: cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition. A key objective is for each student achieve a minimum score of 180 points total, in four events of the Air Force Personal Fitness Assessment (AFPFA): push-ups, sit-ups, a 1.5 mile run and waist measurement. Repeatable to 4 credits. F.

KIN 124. Aquatics II. 1 Credit.
Prerequisite: KIN 104 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various aquatics-related activities (e.g., swimming, diving, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 125. Combative Sports II. 1 Credit.
Prerequisite: KIN 105 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various combative sports (e.g., boxing, kickboxing, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 127. Dance II. 1 Credit.
Prerequisite: KIN 107 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various dance types (e.g., ballroom, hip-hop, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.
KIN 128. Fitness and Conditioning II. 1 Credit. 
Prerequisite: KIN 108 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various fitness and conditioning activities (e.g., aerobic exercise, pilates, yoga, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 131. Individual Sports/Activities II. 1 Credit. 
Prerequisite: KIN 111 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various individual sports and activities (e.g., golf, ice skating, track and field events, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 132. Outdoor Pursuits II. 1 Credit. 
Prerequisite: KIN 112 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various outdoor pursuit activities (e.g., camping, cycling, cross-country skiing, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 133. Racquet Sports II. 1 Credit. 
Prerequisite: KIN 113 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various racquet sports (e.g., badminton, racquetball, tennis, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 134. Strength Training II. 1 Credit. 
Prerequisite: KIN 114 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various types of strength training (e.g., body building, power lifting, weight training, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 135. Target Sports II. 1 Credit. 
Prerequisite: KIN 115 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various target sports (e.g., trapshooting, skeet, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 136. Team Sports II. 1 Credit. 
Prerequisite: KIN 116 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various team sports (e.g., baseball, basketball, football, ice hockey, soccer, volleyball, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 137. Gymnastics II. 1 Credit. 
Prerequisite: KIN 117 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various types of gymnastics (e.g., artistic, trampolining, tumbling, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 138. Military Conditioning II. 1 Credit. 
This course provides intermediate level instruction in military conditioning. Prerequisite: The course is for AFROTC enrolled students only. F.S.

KIN 138A. Air Force Conditioning II. 1 Credit. 
This course is designed for intermediate level instruction, emphasizing on the Air Force components of physical fitness; cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition. A key objective is for each student achieve a minimum score of 180 points total, in four events of the Air Force Personal Fitness Assessment (AFPFA): push-ups, sit-ups, a 1.5 mile run and waist measurement. Repeatable to 4 credits. S.

KIN 144. Aquatics III. 1 Credit. 
Prerequisite: KIN 124 in the same activity or consent of the instructor. These courses provide advanced level instruction in various aquatics-related activities (e.g., swimming, diving, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 145. Combative Sports III. 1 Credit. 
Prerequisite: KIN 125 in the same activity or consent of the instructor. These courses provide advanced level instruction in various combative sports (e.g., boxing, kickboxing, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 147. Dance III. 1 Credit. 
Prerequisite: KIN 127 in the same activity or consent of the instructor. These courses provide advanced level instruction in various dance types (e.g., ballroom, hip-hop, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 148. Fitness and Conditioning III. 1 Credit. 
Prerequisite: KIN 128 in the same activity or consent of the instructor. These courses provide advanced level instruction in various fitness and conditioning activities (e.g., aerobic exercise, pilates, yoga, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 151. Individual Sports/Activities III. 1 Credit. 
Prerequisite: KIN 131 in the same activity or consent of the instructor. These courses provide advanced level instruction in various individual sports and activities (e.g., golf, ice skating, track and field events, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 152. Outdoor Pursuits III. 1 Credit. 
Prerequisite: KIN 132 in the same activity or consent of the instructor. These courses provide advanced level instruction in various outdoor pursuit activities (e.g., camping, cycling, cross-country skiing, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 153. Racquet Sports III. 1 Credit. 
Prerequisite: KIN 133 in the same activity or consent of the instructor. These courses provide advanced level instruction in various racquet sports (e.g., badminton, racquetball, tennis, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 154. Strength Training III. 1 Credit. 
Prerequisite: KIN 134 in the same activity or consent of the instructor. These courses provide advanced level instruction in various types of strength training (e.g., body building, power lifting, weight training, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 155. Target Sports III. 1 Credit. 
Prerequisite: KIN 135 in the same activity or consent of the instructor. These courses provide advanced level instruction in various target sports (e.g., trapshooting, skeet, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 156. Team Sports III. 1 Credit. 
Prerequisite: KIN 136 in the same activity or consent of the instructor. These courses provide intermediate level instruction in various team sports (e.g., baseball, basketball, football, ice hockey, soccer, volleyball, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 157. Gymnastics III. 1 Credit. 
Prerequisite: KIN 137 in the same activity or consent of the instructor. These courses provide advanced level instruction in various types of gymnastics (e.g., artistic, trampolining, tumbling, etc.). For specific course content, see the current schedule of classes. Repeatable to 4 credits. On demand.

KIN 158. Military Conditioning III. 1 Credit. 
This course provides advanced level instruction in military conditioning. Prerequisite: KIN 138 or consent of instructor. Repeatable to 4 credits. On demand.

KIN 158A. Air Force Conditioning III. 1 Credit. 
This course is designed for advanced level instruction, emphasizing on the Air Force components of physical fitness; cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition. A key objective is for each student achieve a minimum score of 180 points total, in four events of the Air Force Personal Fitness Assessment (AFPFA): push-ups, sit-ups, a 1.5 mile run and waist measurement. Repeatable to 4 credits. S.

KIN 207. Prevention, Care and Legal Issues for Injury. 3 Credits. 
A study of the prevention, care and legal aspects of injuries incurred by individuals in physical activity settings across the lifespan. Includes recommended first aid and CPR practices for the care of persons who have been injured. Prerequisite: KIN Majors, Health Education Minors Athletic Coaching Minors only. F.S.

KIN 207L. Prevention And Care Of Injuries Lab. 1 Credit. 
Corequisite: KIN 207.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. These courses focus on the development of performance, performance analysis and knowledge in various aquatic-related activities (e.g., swimming, diving, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. Prerequisite or Corequisite: KIN 104, KIN 124, or KIN 144; or performance equivalent in same area. Repeatable to 12 credits. On demand.

Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. These courses focus on the development of performance, performance analysis and knowledge in various combative sports (e.g., boxing, kickboxing, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. Prerequisite or Corequisite: KIN 105, KIN 125, or KIN 145; or performance equivalent in same area. Repeatable to 12 credits. On demand.

KIN 227. Dance: Movement Performance and Analysis (MP&A). 1 Credit.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. These courses focus on the development of performance, performance analysis and knowledge in various dance types (e.g., ballet, hip-hop, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. Prerequisite or Corequisite: KIN 107, KIN 127, or KIN 147; or performance equivalent in same area. Repeatable to 12 credits. On demand.

KIN 228. Fitness & Conditioning: Movement Performance and Analysis (MP&A). 1 Credit.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. These courses focus on the development of performance, performance analysis and knowledge in various fitness and conditioning activities (e.g., aerobic exercise, pilates, yoga, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. Prerequisite or Corequisite: KIN 108, KIN 128, or KIN 148; or performance equivalent in same area. Repeatable to 12 credits. On demand.

KIN 231. Individual Sports/Activities: Movement Performance and Analysis (MP&A). 1 Credit.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. These courses focus on the development of performance, performance analysis and knowledge in various individual sports and activities (e.g., golf, ice skating, track and field events, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. Prerequisite or Corequisite: KIN 111, KIN 131, or KIN 151; or performance equivalent in same area. Repeatable to 12 credits. On demand.

Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. These courses focus on the development of performance, performance analysis and knowledge in various outdoor pursuit activities (e.g., camping, cycling, cross-country skiing, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. Prerequisite or Corequisite: KIN 112, KIN 132, or KIN 152; or performance equivalent in same area. Repeatable to 12 credits. On demand.

Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. These courses focus on the development of performance, performance analysis and knowledge in various racquet sports (e.g., badminton, racquetball, tennis, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. Prerequisite or Corequisite: KIN 113, KIN 133, or KIN 153; or performance equivalent in same area. Repeatable to 12 credits. On demand.

KIN 234. Strength Training: Movement Performance and Analysis (MP&A). 1 Credit.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. These courses focus on the development of performance, performance analysis and knowledge in various types of strength training (e.g., body building, power lifting, weight training, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. Prerequisite or Corequisite: KIN 114, KIN 134, or KIN 154; or performance equivalent in same area. Repeatable to 12 credits. On demand.

KIN 235. Target Sports: Movement Performance and Analysis (MP&A). 1 Credit.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. These courses focus on the development of performance, performance analysis and knowledge in various target sports (e.g., trapshooting, skeet, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. Prerequisite or Corequisite: KIN 115, KIN 135, or KIN 155; or performance equivalent in same area. Repeatable to 12 credits. On demand.

KIN 236. Team Sports: Movement Performance and Analysis (MP&A). 1 Credit.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. These courses focus on the development of performance, performance analysis and knowledge in various types of team sports (e.g., baseball, basketball, football, ice hockey, soccer, volleyball, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. Prerequisite or Corequisite: KIN 116, KIN 136, or KIN 156; or performance equivalent in same area. Repeatable to 12 credits. F,S.

KIN 237. Gymnastics: Movement Performance and Analysis (MP&A). 1 Credit.
Course may be repeated as long as content varies, to a maximum of 12 credits for the KIN 220-239 series. These courses focus on the development of performance, performance analysis and knowledge in various types of gymnastics (e.g., artistic, trampolining, tumbling, etc.). These are professional preparation courses for KIN majors. For specific course content, see the current schedule of classes. Prerequisite or Corequisite: KIN 117, KIN 137, or KIN 157; or performance equivalent in same area. Repeatable to 12 credits. On demand.

KIN 240. Introduction to Wellness. 2 Credits.
Designed to encourage personal awareness and responsibility for the maintenance of health and well-being. This course will study the multidimensional nature of wellness and the pivotal role that each dimension plays in personal self-fulfillment. F,S.

KIN 241. Introduction to Coaching. 2 Credits.
An introduction and overview of relevant philosophy, sport psychology, sport pedagogy, sport physiology, sport medicine and sport management issues confronting coaches. Coaching is presented with emphasis on effective instructional techniques and coaching principles based upon scientific knowledge. F.

KIN 242. Introduction to Kinesiology. 2 Credits.
An introduction and overview of are as in Kinesiology. Includes information on the required preparation and training for careers in this area. On demand.

KIN 276. Motor Learning. 2 Credits.
Consideration of various factors which may affect learning and performance in human movement activities. Prerequisite: KIN majors only or consent of instructor. Corequisite: KIN 276L. S.

KIN 276L. Motor Learning Lab. 1 Credit.
Demonstration of various factors which may affect learning and performance in human movement activities. Prerequisite: KIN major only or consent of the instructor. Corequisite: KIN 276. S.

KIN 290. Physical Education Activities for the Elementary Grades. 3 Credits.
Study of physical activities in modern physical education programs for grades K-6. Emphasis on skill themes and developmentally appropriate activities. F.

KIN 299. Special Topics in Kinesiology. 1-4 Credits.
Specialized topics related to Kinesiology. Repeatable to 9 credits. Repeatable to 9 credits. On demand.
KIN 356. Health/Physical Education for Early Childhood and Elementary Education Teachers. 3 Credits.
This course provides background information and skills for the early childhood and elementary teacher to implement coordinated health education in the elementary grades and how to provide support and effective instruction in elementary physical education. Prerequisite: Admission to the Teacher Education program. F,S,SS.

KIN 389. Water Safety Instruction. 2 Credits.
Scientific movement principles and techniques as they apply to the teaching and conduct of swimming and water safety. Prerequisite: KIN 104C or demonstrated ability to swim 15 yards of front, back crawl and breaststroke. S,SS.

KIN 325. Youth and Children in Sport. 3 Credits.
Analysis of research findings in physical education, exercise science and wellness with applications to coaching children and youth in sport. F.

KIN 326. Fundamentals of Physical Conditioning. 3 Credits.
A study of the basic knowledge, principles, and methods of physical conditioning for improved health, wellness, physical fitness and athletic performance. Prerequisite: KIN Majors or coaching minors only or consent of instructor. F,S.

KIN 327. Fitness for Life. 3 Credits.
A classroom course focusing on advanced concepts of lifetime fitness and wellness from a consumer perspective. Emphasis is on the development of personal programs for fitness and wellness. F,S.

KIN 353. Biomechanics. 2 Credits.
The study of human movement with special emphasis on those movements related to sport and physical activity. Prerequisites: KIN or Athletic Training majors only, or consent of instructor; ANAT 204, ANAT 204L. Corequisite: KIN 332L. F,SS.

KIN 332L. Biomechanics Laboratory. 1 Credit.
The demonstration of biomechanical principles related to movement in sport and physical activity. Prerequisites: KIN or Athletic Training Majors only, or consent of instructor; ANAT 204 and 204L. Corequisite: KIN 332. F.

KIN 341. Organization and Administration of Athletics. 2 Credits.
Principles and practices for management of the interscholastic athletic program. Prerequisite: Athletic Coaching minors only. S.

KIN 355. Applied Motor Development. 3 Credits.
Changes in motor performance which occur with age; physical and mental development as they relate to these changes. Prerequisite: KIN Majors only or consent of instructor. S.

KIN 375. Exercise and Weight Training Skills and Teaching Techniques. 3 Credits.
Knowledge and practical skills needed to lead group exercise and weight training classes (including adaptations needed for special populations). Prerequisite: KIN 326. S.

KIN 376. Essentials of Personal Training. 3 Credits.
Knowledge and skills required to provide personal training for individuals and/or small groups including aerobic and anaerobic exercise prescription. Prerequisite: KIN 326. F.

KIN 390. Introduction to Teaching in Physical Education and Coaching. 2 Credits.
Strategy for classroom management, planning, instruction, and assessment of teacher and student behavior. Special emphasis on systematic development of a variety of teaching skills through practice and feedback in individual and small group situations. Prerequisites: KIN 220-239 series requirements. Corequisite: KIN 390L. On demand.

KIN 390L. Introduction to Teaching in Physical Education and Coaching Laboratory. 2 Credits.

KIN 397. Cooperative Education. 1-4 Credits.
Part of the educational system where KIN majors can earn academic credit for career work done in their field of study. Arranged by mutual agreement among student, department, and employer. Repeatable to 16 credits. Prerequisite: KIN majors only. Repeatable to 16 credits. S/U grading. F,S,SS.

KIN 400. Methods and Materials for Teaching Physical Education Elementary School. 2 Credits.
The development of skills and knowledge related to teaching physical education to young children in elementary school. Prerequisites: KIN 305 and admission to Teacher Education. Corequisite: KIN 400L. S.

KIN 400L. Methods and Materials for Teaching Physical Education in the Elementary School -Laboratory. 2 Credits.
Supervised teaching experiences in the elementary schools for developing teaching skills for pre-service teachers. Prerequisites: KIN 305 and admission to Teacher Education. Corequisite: KIN 400. S.

KIN 401. Sport Sociology. 3 Credits.
The critical exploration of the function of sports in American culture, in an interdisciplinary fashion, with a focus on the contemporary scene. F,S,SS.

KIN 402. Exercise Physiology. 3 Credits.
The acute and chronic effect of the type, intensity and duration of exercise on physiological functions. Prerequisites: KIN or Athletic Training majors only, or consent of instructor; PPT 301 or Human Physiology equivalent. Corequisite: KIN 402L. F.

KIN 402L. Exercise Physiology Laboratory. 1 Credit.
The demonstration and measurement of the acute effects of exercise on physiological functions. Prerequisites: KIN or Athletic Training majors only, or consent of instructor; PPT 301 or Human Physiology equivalent. Corequisite: KIN 402. F.

KIN 403. School Health Education. 2 Credits.
Provides prospective health educators with a cursory look at health curriculum construction and investigation of different methods, devices and classroom techniques. Prerequisite: KIN majors only. S.

KIN 404. Adapted Physical Activity. 3 Credits.
A study of the physical and motor characteristics and needs of persons with disabilities across the lifespan. Application focuses on planning and implementing physical education and activity programs in school and/or community settings. Prerequisites: Junior or Senior Standing and KIN majors only or consent of instructor. S.

KIN 410. Methods and Materials for Teaching Physical and Health Education in the Secondary School. 3 Credits.
Instructional skills and curriculum analysis for secondary school physical and health education. Prerequisites: KIN 400 and admission to Teacher Education. Corequisite: KIN 410L. F.

KIN 410L. Methods and Materials for Teaching Physical & Health Education in the Secondary School-Laboratory. 1 Credit.
Supervised experiences in the secondary school for the purpose of developing teaching skills for physical and health education. Prerequisite: KIN 400L and admission to Teacher Education. Corequisite: KIN 410. F.

KIN 420. Curriculum Development for Physical and Health Education. 3 Credits.
An examination of different curriculum models used in K-12 physical education programs as well as health education programs. Also, study of national and state standards, program development and assessment, and future trends in school physical education. Prerequisites: KIN 390/390L, admission to Teacher Education. S.

KIN 424. Aquatics: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 224 in the same area. These courses focus on methods employed in coaching specific aquatics-related activities (e.g., swimming, diving, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 425. Combative Sports: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 225 in the same area. These courses focus on methods employed in coaching specific combative sports (e.g., boxing, kickboxing, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 427. Dance: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 227 in the same area. These courses focus on methods employed in coaching specific dance types (e.g., ballet, hip-hop, etc.). For specific course content, see the current schedule of classes. F,S,SS.
KIN 428. Fitness and Conditioning: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 228 in the same area. These courses focus on methods employed in coaching specific fitness and conditioning activities (e.g., aerobic exercise, pilates, yoga, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 431. Individual Sports/Activities: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 231 in the same area. These courses focus on methods employed in coaching specific individual sports and activities (e.g., golf, ice skating, track and field events, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 432. Individual Sports/Activities: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 232 in the same area. These courses focus on methods employed in coaching specific outdoor pursuit activities (e.g., camping, cycling, cross-country skiing, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 433. Racquet Sports: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 233 in the same area. These courses focus on methods employed in coaching specific racquet sports (e.g., badminton, racquetball, tennis, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 434. Strength Training: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 234 in the same area. These courses focus on methods employed in coaching specific types of strength training (e.g., body building, power lifting, weight training, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 435. Target Sports: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 235 in the same area. These courses focus on methods employed in coaching specific target sports (e.g., trap shooting, skeet, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 436. Team Sports: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 236 in the same area. These courses focus on methods employed in coaching specific team sports (e.g., baseball, basketball, football, ice hockey, soccer, volleyball, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 437. Gymnastics: Coaching Methods. 2 Credits.
Repeatable with different sports to a maximum of 10 credits in the KIN 420-439 series. Prerequisite: matching KIN 237 in the same area. These courses focus on methods employed in coaching specific types of gymnastics (e.g., artistic, trampoline, tumbling, etc.). For specific course content, see the current schedule of classes. F,S,SS.

KIN 440. Sport Psychology. 3 Credits.
Examination of psychological constructs influencing sport and exercise. F,S,SS.

KIN 446. Exercise Testing and Prescription. 3 Credits.
Development of skills in testing, prescribing and delivering exercise for the broader community across the lifespan. Prerequisites: KIN 326, KIN 402 and KIN 402L. S.

KIN 491. Senior Capstone. 3 Credits.
Focus on reflection, professional growth including information literacy and communication, collaboration, learning communities, professional decision making, and technology applications in Kinesiology and Public Health. Prerequisite: Senior standing. F,S.

KIN 494. Directed Studies/Research in KIN. 1-4 Credits.
An in-depth study or participation in a research project in a subject area selected by the student under faculty supervision. Repeatable to 9 credits. Prerequisite: Consent of instructor. Repeatable to 9 credits. F,S,SS.

KIN 495. Service Learning in KIN. 2 Credits.
Independent and group study of professional placement and leadership in kinesiology settings. Practical experiences in these settings within the community. Includes lectures, site visits, and fieldwork hours. Prerequisite: Instructor consent. F,S,SS.

KIN 496. Field Study in KIN. 1-8 Credits.
Placement of student in a practical setting under university faculty supervision. Repeatable to 8 credits. Prerequisites: Consent of instructor and upper division status. Repeatable to 8 credits. F,S,SS.

KIN 497. Internship in KIN. 1-10 Credits.
Development of professional skills through practical experience in agencies such as hospitals, physical therapy clinics, retirement or convalescent centers, work site wellness programs, fitness facilitation, on-campus fitness programs and community sports organizations under the supervision of professionals and faculty. Credits are taken during one semester for paid or volunteer work. Prerequisites: KIN majors only, consent of instructor, upper division status, and current First Aid/CPR certification. Repeatable to 10 credits. S/U grading. F,S,SS.

KIN 498. Practicum. 3 Credits.
Supervised experiences for development of coaching skills and/or exercise instruction. Repeatable to 6 credits. F,S,SS.

KIN 499. Special Topics in KIN. 1-4 Credits.
Investigation of special topics in the study of physical education, exercise science and wellness not included in current departmental course offerings. Repeatable to 4 credits. Prerequisites: KIN majors only and consent of instructor. Repeatable to 4 credits. F,S,SS.

PHE Courses

PHE 101. Introduction to Public Health. 3 Credits.
Introduction to the population health approach to public health. Principles of evidence-based public health and tools for implementation including health communications and informatics, applications of social and behavioral sciences, and health policy, law and ethics. Methods for addressing non-communicable diseases, communicable disease and environmental diseases and injury. An overview of the U.S. health care system and comparisons with health care systems in other developed countries. Examination of public health institutions and systems at the local/state, federal and global levels as well as future issue in public health. F.

PHE 102. Epidemiology in Public Health. 3 Credits.
This course covers applications of epidemiologic methods and procedures to the study of the distribution and factors influencing health and diseases, morbidity, injuries, disability, and mortality in populations. Epidemiologic methods for the control of conditions such as infectious and chronic diseases, mental disorders, community and environmental health hazards, and unintentional injuries are discussed. Other topics include quantitative aspects of epidemiology, for example, data sources, measures of morbidity and mortality, evaluation of association and causality, and study design. F,S.

PHE 103. Introduction to Global Health. 3 Credits.
The purpose of this course is to provide the students with the basic knowledge of health indicators, major determinants, and trends of global health. F.

PHE 301. Principles and Foundation of Health Education. 3 Credits.
The purpose of this course is to provide the students the historical perspectives of health and health education; professional issues and ethics; credentialing; principles, practices, theoretical frameworks, and foundations of health education. Prerequisite: PHE 101. F.

PHE 302. Community Health. 3 Credits.
Concepts of community and public health, health advocacy, and cultural competence; role of government, nonprofit and private agencies; investigation of health issues. Prerequisite: PHE 101. F.

PHE 303. Organization and Administration of Community Health Programs. 3 Credits.
The purpose of this course is to provide the students with the basic principles of the organization and administration of health programs; leadership skills; grant writing. Prerequisite: PHE 101. S.

PHE 304. Health Program Planning, Implementation, and Evaluation. 3 Credits.
This course is designed to prepare public health educators to plan, implement, and evaluate health education programs that are context sensitive, culturally relevant, and technologically appropriate to the setting, the population of potential learners, and the resources available. Additionally, concepts and theories essential to program evaluation are highlighted. Prerequisites: Public Health Education major, PHE 101, and PHE 301. S, even years.
PHE 305. Research Methods in Kinesiology & Public Health Education. 3 Credits.
This course will engage students to understand and evaluate research in kinesiology and public health education. Quantitative and qualitative research methodology will be discussed. Prerequisites: Public Health Education or Kinesiology Major, PHE 101, and PHE 102. S.

PHE 306. Epidemiology and Biostatistics. 3 Credits.
An introduction to epidemiology and biostatistics in public health. Prerequisites: Public Health Education Major, PHE 101, PHE 102 and MATH 103. S.

PHE 307. Methods and Materials of Health Education. 3 Credits.
Principles and application of methodology for educating about health; learning styles; development of computer-generated learning materials; selection, utilization, and evaluation of resources. Prerequisite: PHE 101. F.

PHE 308. Health Policy, Law, and Ethics. 3 Credits.
The purpose of this course is to introduce students to the legal and ethical issues impacting the administration and delivery of health care services. Health policy will examine the governmental role in health and in the provision of health care. Health policies, law, and ethics have a profound effect on quality of life. Accessibility, cost, quality of health care; safety of food, water, and environment; the right to make decisions about our health; these issues are vitally tied to health policies, law, and ethics. Prerequisites: PHE 101 and PHE 102. S.

PHE 309. Introduction to Human Disease. 3 Credits.
Fundamental principles relating to etiology, nature, prevention, and control of communicable and non-communicable diseases in human populations. Special emphasis on human physiology, disease prevention and health promotion in the high-risk diseases of modern, industrialized society. Prerequisites: PHE 101 and PHE 102. F.

PHE 415. Public Health Internship. 1-12 Credits.
A supervised practical experience designed to provide the student the opportunity to apply the knowledge and skills learned through their public health coursework. Prerequisites: Public Health Education major, PHE 301, PHE 302, PHE 303, PHE 304, PHE 305, PHE 306, and PHE 307. Repeatable to 12 credits. S/U grading. F,S,SS.

PHE 499. Special Topics in Public Health Education. 1-6 Credits.
Investigation of special topics in the study of public health education not included in current departmental course offerings. Specific topic will vary from offering to offering at the discretion of the department. Prerequisites: Consent of Instructor. Repeatable to 6 credits. On demand.

Bachelor of Science in Kinesiology

Required 120 credits (36 of which must be numbered 300 or above), including:

I. Essential Studies Requirements (see University ES listing).

II. The College of Education and Human Development Requirements.

III. Prerequisite courses and requirements, 19 credits, including: (some of these courses may be used to satisfy the Essential Studies requirements).

1. Criminal Background Check
2. Coursework:
   3. MATH 103 College Algebra 3
   BIOL 150 General Biology I 3
   BIOL 150L General Biology I Laboratory 1
   ANAT 204 Anatomy for Paramedical Personnel and Anatomy for Paramedical Personnel Laboratory 5
   PPT 301 Human Physiology 4
   PHE 102 Epidemiology in Public Health 3
   KIN 207 Prevention, Care and Legal Issues for Injury 3
   KIN 240 Introduction to Wellness 2
   KIN 242 Introduction to Kinesiology 2
   KIN 276 Motor Learning 3
   & 276L and Motor Learning Lab 3
   KIN 326 Fundamentals of Physical Conditioning 3
   KIN 332 Biomechanics 3
   & 332L and Biomechanics Laboratory 3
   KIN 355 Applied Motor Development 3
   KIN 401 Sport Sociology 3
   KIN 402 Exercise Physiology 3
   & 402L and Exercise Physiology Laboratory 4
   KIN 404 Adapted Physical Activity 1 3
   KIN 440 Sport Psychology 3
   KIN 446 Exercise Testing and Prescription 3
   KIN 491 Senior Capstone 3
   PHE 101 Introduction to Public Health 3
   PHE 305 Research Methods in Kinesiology & Public Health Education 3
   PHE 306 Epidemiology and Biostatistics 3
   Total Credits 47

V. One of the following options:

A. Teacher Education/Certification (120 credits)

Students seeking certification to teach physical education must be admitted to the Teacher Education program which requires a minimum of 2.75 GPA, adequate test scores, and at least 30 credits before applying for admission to Teacher Education. Students must also complete the KIN core requirements (listed above) plus additional courses specific to the preparation for teaching in physical education, including the following courses:

   T&L 250 Introduction to Education 3
   T&L 252 Child Development 3
   T&L 339 Educational Technology 2
   T&L 433 Multicultural Education 3
   KIN 305 Health/Physical Education for Early Childhood and Elementary Education Teachers 3
   KIN 400 Methods and Materials for Teaching Physical Education Elementary School 3
   KIN 400L Methods and Materials for Teaching Physical Education in the Elementary School-Laboratory 2
   KIN 410 Methods and Materials for Teaching Physical Education in the Secondary School 3
   KIN 410L Methods and Materials for Teaching Physical & Health Education in the Secondary School-Laboratory 1
   KIN 420 Curriculum Development for Physical and Health Education 3

Additional requirements for the teacher education/certification option include:

1. Admission to the Teacher Education program (see details under the College of Education and Human Development (https://education.und.edu) or on the Teacher Education website.) Note that many upper division courses are not open to students until they gain TE admission.
2. Student teaching at two levels: elementary and secondary (8 credits each, totaling 16 credits).
3. KIN 220-238, Movement Performance and Analysis courses, 6 credits total (2 individual sports/activities, 2 team sports, 1 aquatics, 1 outdoor pursuits).

B. Related Areas

KIN core requirements, plus the following:

1. Students will complete another major and/or minor in a subject area related to kinesiology.
Accelerated Bachelor's/Master's Application:

Requirements for Completion of the Accelerated Bachelor's/Master's Degree Program:

- Students must complete the bachelor's degree prior to entering the master's program. Students in the ABM may not elect to bypass the bachelor's degree.
- Students must maintain a cumulative GPA of 3.0/4.0 at UND to remain eligible for the ABM degree program.
- Students must maintain a cumulative GPA of 3.0/4.0 or better in the double counted graduate level courses.
- No more than twelve (12) credits of graduate work may be counted toward the requirements of both degrees.
- Students must complete the master's degree within 12 months from the completion of the bachelor's degree for the master's degree.

Continuing Eligibility for Accelerated Bachelor's/Master's Degree Programs:

- If a student becomes ineligible to participate in the ABM degree program, the Director of the Graduate Program must inform the student, the Department Chair, and the School of Graduate Studies in writing of his/her ineligibility.
- A student who is ineligible to participate in (or withdraws from) the ABM program, cannot double count any courses for both bachelor's and master's degrees.

Exceptions to the Accelerated Bachelor's/Master's Degree Program Time Limits:

The School of Graduate Studies may grant exception to the above time limits. The Dean will consider and evaluate the specific nature of the extenuating circumstances and the compelling reasons that prompted the Director of the Graduate Program and/or the advisory committee to make the request. Requests may be submitted formally and should explain the extenuating circumstances and provide a reasonable timeline for completing the work within the limits of the extension.

Accelerated Bachelor's/Master's Application:

2. KIN 220-238: Movement Performance and Analysis courses, 3 credits total (1 individual sports/activity, 1 team sport, 1 aquatics).
3. The remaining credits to satisfy the University minimum Graduation Requirements of 120 credits will be chosen from elective courses with the consent of the adviser.

C. Kinesiology Applications Area

KIN core requirements, plus the following:

1. Required Internship (KIN 497 for 10 credits) or Internship (KIN 497 for 7 credits) and Practicum (KIN 498 for 3 credits).

2. Required courses include:

3. KIN 110 First Aid and CPR
   KIN 114 Strength Training I
   KIN 220-238 (1 aquatic, 1 individual sport/activity & 1 team sport) 3

4. Electives (a minimum of 5 credits from the following):

5. N&D 240 Fundamentals of Nutrition
   N&D 348 Sports Nutrition
   KIN 234 Strength Training: Movement Performance and Analysis (MP&A)
   KIN 375 Exercise and Weight Training Skills and Teaching Techniques
   KIN 376 Essentials of Personal Training

Kinesiology applications area prepares students for the National Strength and Conditioning Association certification exams in strength and conditioning, and personal training.

D. Allied Health

1. KIN core requirements, plus the following:

2. KIN 220-238: Movement Performance and Analysis, 3 credits total (1 individual sports/activities, 1 team sports, 1 aquatics)
3. A pre-professional program in pre-med, pre-physical therapy, pre-occupational therapy, pre-chiropractic, pre-physician assistant or other approved pre-allied health science fields.

E. Accelerated Bachelor's/Master's Program (ABM)

The Accelerated Bachelor’s/Master’s (ABM) degree program allows exceptional undergraduate students an opportunity to complete the requirements for both the bachelor’s and master's degrees at an accelerated pace. These students may double count up to 12 graduate-level credits and obtain a master's degree within 12 months of completing the bachelor's degree.

Paths to ABM Entry:

Path one (direct admit for high school student): Student eligibility requirements

- High achieving high school students with a minimum cumulative high school grade point average—weighted or unweighted—(GPA) of 3.5/4.0 and a minimum ACT score of 25 may be granted direct entry to the ABM degree program upon satisfactory review of application materials by the Department Chair and the Director of the Graduate Program.

Path two (admission for current undergraduate students): Student eligibility requirements

- Students must meet all graduate admissions eligibility requirements.
- Students must have completed a minimum of 60 credits, including credits earned from advanced placement and dual credit. Students must apply before completion of the undergraduate degree.
- Transfer students with a minimum of 60 credits—whether from the transfer institution alone or in combination with UND credits—and a minimum cumulative GPA of 3.0/4.0.
- Students must have a minimum cumulative grade point average (GPA) of 3.0/4.0 at UND at the time of admission into the ABM degree program.
- A prospective student that meets the eligibility requirements above should schedule a meeting with his/her Department Chair and/or Director of the Graduate Program to develop a plan of work for his/her bachelor’s and master’s degree programs.
- Before admission to an ABM program can be finalized, students must submit, while still an undergraduate, the standard application for admission to the School of Graduate Studies, including an application, application fee, personal statement, and transcripts. Individual departments may choose to require GRE scores or other information.
- A Program of Study, signed by the applicant, the Department Chair, and the Director of the Graduate Program must be submitted.
- The Program of Study must clearly indicate:
  - The courses (a maximum of 12 graduate credits) that will be double counted for both bachelor’s and master’s degrees.
  - That students, prior to completion of the bachelor’s degree, will not take more than 50% of their semester credits at the graduate level, to maintain undergraduate financial aid status.
  - The courses that will be taken after being accepted into the graduate program.
  - The graduation date for the master's degree that meets the time limit for the ABM program (i.e., completing the non-thesis master's degree within 12 months).
  - After review of the materials submitted by the Department Chair and Director of the Graduate Program to the School of Graduate Studies, a letter of acceptance (or denial) to the master's program, contingent upon meeting the ABM requirements, is issued.
- Applications accepted for admission to the Graduate Program will not be matriculated until completion of the bachelor's degree.

Requests for Completion of the Accelerated Bachelor's/Master's Degree Program:

- Students must complete the bachelor’s degree prior to entering the master’s program. Students in the ABM may not elect to bypass the bachelor's degree.
- Students must maintain a cumulative GPA of 3.0/4.0 at UND to remain eligible for the ABM degree program.
- Students must maintain a cumulative GPA of 3.0/4.0 or better in the double counted graduate level courses.
- No more than twelve (12) credits of graduate work may be counted toward the requirements of both degrees.
- Students must complete the master’s degree within 12 months from the completion of the bachelor’s degree for the master’s degree.

Continuing Eligibility for Accelerated Bachelor’s/Master’s Degree Programs:

- If a student completes the bachelor's degree requirements with a cumulative GPA of less than 3.0/4.0, then he/she needs program approval to continue to pursue the ABM degree program.
- If a student becomes ineligible to participate in the ABM degree program, the Director of the Graduate Program must inform the student, the Department Chair, and the School of Graduate Studies in writing of his/her ineligibility.
- A student who is ineligible to participate in (or withdraws from) the ABM program, cannot double count any courses for both bachelor's and master's degrees.
Bachelor of Science in Public Health Education (B.S.P.H.E.)

Required 120 credits (36 credits numbered 300 or above and 30 credits from UND) including:

I. Essential Studies Requirements, 39 credits. The program includes the 39 credits that all students are required to complete in order to meet Essential Studies requirements (see University ES listing).

   BIOL 111 Concepts of Biology 3
   or BIOL 150 General Biology I
   BIOL 111L Concepts of Biology Laboratory 1
   or BIOL 150L General Biology I Laboratory
   KIN 491 Senior Capstone 3

II. Health-Related Core Requirements, 15 credits, including:

   PHE 101 Introduction to Public Health 3
   PHE 102 Epidemiology in Public Health 3
   PHE 103 Introduction to Global Health 3
   KIN 110 First Aid and CPR 1
   KIN 240 Introduction to Wellness 2
   N&D 240 Fundamentals of Nutrition 3

Total Credits 15

III. One of the following options:

A. Public Health Education (42 credits)

   PHE 301 Principles and Foundation of Health Education 3
   PHE 302 Community Health 3
   PHE 303 Organization and Administration of Community Health Programs 3
   PHE 304 Health Program Planning, Implementation, and Evaluation 3
   PHE 305 Research Methods in Kinesiology & Public Health Education 3
   PHE 306 Epidemiology and Biostatistics 3
   PHE 307 Methods and Materials of Health Education 3
   PHE 308 Health Policy, Law, and Ethics 3
   PHE 309 Introduction to Human Disease 3
   PHE 415 Public Health Internship 12
   COMM 345 Social Media Strategy 3

Total Credits 42

Additional requirement for public health education option includes:

1. A minor OR 24 credits of courses, related to public health education.

B. School Health Education:

Students seeking certification to teach health education must be admitted to the Teacher Education program which requires a minimum of 2.75 GPA, adequate test scores, and at least 30 credits before applying for admission to Teacher Education. Students must also complete the PHE prerequisites and core requirements (listed above) plus additional courses specific to the preparation for teaching in health education, including the following courses:

   PSYC 210 Human Sexuality 3
   SOC 335 Families in a Changing Society 3
   KIN 207 Prevention, Care and Legal Issues for Injury 3
   KIN 305 Health/Physical Education for Early Childhood and Elementary Education Teachers 3
   KIN 326 Fundamentals of Physical Conditioning 3
   KIN 355 Applied Motor Development 3
   KIN 402 Exercise Physiology 3
   KIN 402L Exercise Physiology Laboratory 1
   KIN 404 Adapted Physical Activity 3
   PHE 302 Community Health 3
   PHE 304 Health Program Planning, Implementation, and Evaluation 3
   PHE 305 Research Methods in Kinesiology & Public Health Education 3
   PHE 307 Methods and Materials of Health Education 3
   KIN 410 Methods and Materials for Teaching Physical and Health Education in the Secondary School 3
   KIN 410L Methods and Materials for Teaching Physical & Health Education in the Secondary School-Laboratory 1
   KIN 420 Curriculum Development for Physical and Health Education 3
   T&L 250 Introduction to Education 3
   T&L 252 Child Development 3
   T&L 339 Educational Technology 2
   T&L 433 Multicultural Education 3
   T&L 487 Student Teaching 16
   T&L 488 Senior Seminar 1

Additional requirements for the teacher education/certification option include:

1. Admission to the Teacher Education program (see details under the College of Education and Human Development (https://education.und.edu) or on the Teacher Education website.) Note that many upper division courses are not open to students until they gain TE admission.

Minor in Athletic Coaching

Required 20 credits, including:

   KIN 207 Prevention, Care and Legal Issues for Injury 3
   KIN 241 Introduction to Coaching 2
   KIN 325 Youth and Children in Sport 3
   KIN 326 Fundamentals of Physical Conditioning 3
   KIN 404 Adapted Physical Activity 3
   KIN 440 Sport Psychology 3
   KIN 498 Practicum 3

Total Credits 20

Minor in Public Health

Required 15 credits, including:

   PHE 101 Introduction to Public Health 3
   PHE 102 Epidemiology in Public Health 3
   PHE 103 Introduction to Global Health 3
   PHE 301 Principles and Foundation of Health Education 3
   PHE 304 Health Program Planning, Implementation, and Evaluation 3

6 credits from the following group:

   PHE 302 Community Health 3
   PHE 303 Organization and Administration of Community Health Programs 3
   PHE 305 Research Methods in Kinesiology & Public Health Education 3
   PHE 307 Methods and Materials of Health Education 3
   PHE 308 Health Policy, Law, and Ethics 3
   PHE 309 Introduction to Human Disease 3
   KIN 207 Prevention, Care and Legal Issues for Injury 3
   N&D 341 Community Nutrition I 3
   N&D 240 Fundamentals of Nutrition 3
   SOC 352 Aging and Society 3
   SOC 355 Drugs and Society 3
Languages: Department of Modern and Classical Languages & Literatures (Lang)

B.A. with a Major in Languages (p. 142)
B.A. with a Major in Languages/Teacher Certification (p. 142)
B.A. with a Major in Chinese Studies (p. 140)
B.A. with a Major in Classical Studies (p. 140)
B.A. with a Major in French (p. 141)
B.A. with a Major in German Studies (p. 142)
B.A. with a Major in Norwegian (p. 143)
B.A. with a Major in Spanish (p. 143)
Minor in Chinese Studies: Language and Culture (p. 144)
Minor in Classical Studies (p. 144)
Minor in French (p. 144)
Minor in German (p. 145)
Minor in Norwegian (p. 145)
Minor in Spanish (p. 145)
Certificate in Chinese (p. 143)
Certificate in Classical Studies (p. 143)
Certificate in French (p. 143)
Certificate in German (p. 143)
Certificate in Norwegian (p. 144)
Certificate in Spanish (p. 144)

CHIN Courses

CHIN 101. First Year Chinese I. 4 Credits.
Fundamentals of Chinese grammar, oral use of the language and reading of easy Chinese. F.

CHIN 102. First Year Chinese II. 4 Credits.
Continued study of fundamentals of Chinese grammar, oral use of the language and reading of easy Chinese. Prerequisite: CHIN 101 with a grade of C or better. S.

CHIN 201. Second Year Chinese I. 4 Credits.
Bring students' Chinese proficiency to the intermediate level through intensive training in reading, writing, listening and speaking. Prerequisite: CHIN 102 or an equivalent approved by the department. F.

CHIN 202. Second Year Chinese II. 4 Credits.
Bring students' Chinese proficiency to the intermediate level through intensive training in reading, writing, listening and speaking. Prerequisite: CHIN 201 or an equivalent approved by the department. S.

CHIN 303. Chinese Overseas Immersion. 3-12 Credits.
This course, offered in China/Taiwan allows further improvement in Chinese language proficiency and significant understanding of Chinese culture through coursework and first-hand experience. Repeatable to 24 credits. Repeatable to 24 credits. F.S.

CHIN 305. Chinese Culture Through Films. 3 Credits.
Help students understand traditional and modern Chinese cultural values through examining films and readings. F.

CHIN 306. Introduction to Chinese Calligraphy. 3 Credits.
Provide students significant exposure to Chinese culture through appreciation of a variety of script styles and practice in Kaishu "block." S.

CHIN 312. Topics in Chinese Culture. 3 Credits.
Introduction to various aspects of Chinese culture. Repeatable to 9 credits when topics vary. Repeatable to 9 credits. On demand.

CHIN 405. Traditional Chinese Literature in Translation. 3 Credits.
Introduction to genres and topics in Chinese literature, and significant pre-1911 Chinese works. Repeatable to 9 credits when topics vary. Repeatable to 9 credits. F, every year.

CHIN 406. Modern Chinese Literature in Translation. 3 Credits.
Introduction to genres and topics in Chinese literature, significant post-1911 Chinese writers and their works. Repeatable to 9 credits when topics vary. Repeatable to 9 credits. S, odd years.

CHIN 488. Senior Project. 1 Credit.
A capstone project designed by students, in consultation with their advisor, which reflects an integrated knowledge of various aspects of Chinese culture. Prerequisites: Senior standing and completion of coursework for Chinese Studies major or consent of Chinese Studies advisor. S/U grading. F.S.SS.

CLAS Courses

CLAS 101. First Year Latin I. 4 Credits.
Introduction to Latin grammar and syntax, with selected readings from ancient authors. F.

CLAS 102. First Year Latin II. 4 Credits.
Continued study of Latin grammar and syntax, with selected readings from ancient authors. Prerequisite: CLAS 101 with a grade of C or better. S.

CLAS 151. First Year Greek I. 4 Credits.
Introduction to ancient Greek grammar and syntax, with selected readings from ancient authors. On demand.

CLAS 152. First Year Greek II. 4 Credits.
Continued study of ancient Greek grammar and syntax, with selected readings from ancient authors. Grade of 'C' or better in CLAS 151 recommended. Prerequisite: CLAS 151 with a grade of a C or better. On demand.

CLAS 185. Introduction to Classical Mythology. 3 Credits.
Study of literary and artistic representations of Greek and Roman mythology. Different methods of interpreting myths will also be explored. These include anthropological, philosophical and psychological approaches. On demand.

CLAS 201. Second Year Latin I. 4 Credits.
Conclusion of basic grammar and introduction to Latin authors, such as Cicero, Nepos, Petronius, or Phaedrus. Prerequisite: CLAS 202 or an equivalent approved by the department. F.

CLAS 202. Second Year Latin II. 4 Credits.
Readings in Latin literature such as the works of Catullus, Ovid, or Vergil. Prerequisite: CLAS 201 or an equivalent approved by the department. S.
The Francophone world. F.S.

Focus on understanding the diversity of our world's natural heritage as found in FREN 101. First Year French I. 4 Credits.

FREN Courses

FREN 101. First Year French I. 4 Credits.

Introduction to speaking, reading, writing and listening comprehension with a focus on understanding the diversity of our world's natural heritage as found in the Francophone world. F.S.

FREN 102. First Year French II. 4 Credits.

A continuation of the fundamentals of speaking, reading, writing and listening comprehension with a focus on world issues arising in Francophone countries from the encounter between cultural heritage and natural heritage. Prerequisite: FREN 101 with a grade of a C or better, French placement exam or consent of instructor. F.S.

FREN 201. Second Year French I. 4 Credits.

Fundamentals of French grammar with an emphasis on speaking, reading, writing and listening comprehension and a focus on Francophone world organizations and the solutions they offer to world issues. This course is taught primarily in French. Prerequisite: FREN 102 with a grade of a C or better, French placement exam or consent of instructor. F.

FREN 202. Second Year French II. 4 Credits.

Review of the structure of the French language, continued practice of oral and written expression, introduction to phonetics, and Francophone literatures as a reflection of culture. This course is taught primarily in French. Prerequisite: FREN 201 with a grade of a C or better, French placement exam or consent of instructor. S.

FREN 301. Third Year French I. 3 Credits.

Review of French grammar with an emphasis on written expression and a focus on readings, films and cultures. This course is taught in French. Prerequisite: FREN 202 with a grade of a C or better, French placement exam or consent of instructor. F.

FREN 302. Third Year French II. 3 Credits.

Review of French grammar with an emphasis on oral expression, phonetics and pronunciation and a focus on readings, films and cultures. This course is taught in French. Prerequisite: FREN 202 with a grade of a C or better, French placement exam or consent of instructor. S.

FREN 305. French Conversation and Culture. 3 Credits.

The study of concepts helpful in describing contemporary cultures and their applications to addressing contemporary issues from both domestic and global perspectives in the francophone world. Prerequisite: FREN 202 with a grade of a C or better, French placement exam or consent of instructor. F.

FREN 306. French Conversation and Culture II. 3 Credits.

Contemporary world issues of the French speaking world with an emphasis on oral and written expression. Prerequisite: FREN 202 with a grade of a C or better, French placement exam or consent of instructor. S.

FREN 307. A Social and Cultural History of Québec. 3 Credits.

This course focuses on the case of Québec as an example of North American cultural diversity. It addresses how geography, history, language, ideology, religion and ethnicity help explain cultural differences and their construction of a cultural state. Prerequisite: FREN 202 with a grade of a C or better, French placement exam or consent of instructor. On demand.

FREN 340. Business French. 3 Credits.

Oral and written practice with terminology and idioms used in commerce and business correspondence. Readings on such topics as banking, employment, markets, production, services, trade and practices in the French business world. Prerequisite: FREN 301 with a grade of a C or better, French placement exam or consent of instructor. On demand.

FREN 371. Studies in European Francophone Literatures, Films and Cultures. 3 Credits.

Topics for this course may include genre studies, study of literary and social/political movements, or a specific time period. Depending on the topic and the range of interest outside the major, the course may be taught in French or English. For major or minor credit, written work must be done in French. Repeatable up to 6 credits when course content differs. Prerequisite: FREN 202 with a grade of a C or better, French placement exam or consent of instructor. Repeatable to 6 credits. On demand.

FREN 372. Studies in African, Asian, Caribbean, and/or Polynesian Francophone Literatures, Films and Cultures. 3 Credits.

Topics for this course may include genre studies, study of literary and social/political movements, or a specific time period. Depending on the topic and the range of interest outside the major, the course may be taught in French or English. For major or minor credit, written work must be done in French. Repeatable up to 6 credits when course content differs. Prerequisite: FREN 202 with a grade of a C or better, French placement exam or consent of instructor. Repeatable to 6 credits. On demand.
GERM Courses

GERM 101. First Year German I. 4 Credits.
Fundamentals of German grammar, oral use of the language and reading of easy German. F.S.

GERM 102. First Year German II. 4 Credits.
Continued study of fundamentals of German grammar, oral use of the language and reading of easy German. Prerequisite: GERM 101 with a grade of C or better. F.S.

GERM 201. Second Year German I. 4 Credits.
Review of the structure of the language, practice in oral and written expression and reading in German. Prerequisite: GERM 102, or equivalent. F.

GERM 202. Second Year German II. 4 Credits.
Review of the structure of the language, practice in oral and written expression and reading in German. Prerequisite: GERM 201 or equivalent. S.

GERM 206. Germany in a Global World. 3 Credits.
Cultural history course exploring the significant past and present global impact of Germany in areas such as aviation history, engineering, scientific innovation and discovery, psychology, politics, music, and the fine arts. No knowledge of German required. On demand.

GERM 304. German Phonetics: History, Dialect, and the Living Language. 3 Credits.
Intensive pronunciation practice leading to proper German sound articulation and to a thorough knowledge of the principles of German pronunciation and intonation. Prerequisite: GERM 201 or equivalent. On demand.

GERM 306. Contextualizing Culture: Introduction to German Studies. 3 Credits.
Interdisciplinary introduction to German Cultural Studies examines the historical development of the modern German nation as reflected in its cultural artifacts: literature, film, architecture, advertising, and visual art. No knowledge of German required. On demand.

GERM 307. Communicating Cultures I. 3 Credits.
Cultures of German-speaking countries are explored through conversation and composition. Prerequisite: GERM 202 or equivalent. F.

GERM 308. Communicating Cultures II. 3 Credits.
Cultures of German-speaking countries are further explored through conversation and composition. Prerequisite: GERM 307 or equivalent. S.

GERM 310. Screening German Cultures. 3 Credits.
Film course treating topics such as (but not limited to): film movements, cinematic adaptations of literary texts, specific directors, Oscar contenders, and the East German film company DEFA. Prerequisite: GERM 202 with a grade of C or better. On demand.

GERM 404. German Stories, German Histories. 3 Credits.
Topics vary: Literary periods and genres, individual authors, or interdisciplinary projects. Repeatable when topics vary. Repeatable to 9 credits. Prerequisite: GERM 308 or equivalent. Repeatable to 9 credits. On demand.

GERM 405. Mediating Cultures: Social Discourse in German-Speaking Countries. 3 Credits.
An exploration of German language media, focusing on social issues, such as multiculturalism, German politics, Germany and the European Union. Prerequisite: GERM 308. On demand.

GERM 406. Literary Voices in Translation. 3 Credits.
Introduction to masterpieces of German, Austrian, and Swiss literature in English. Possible course topics include Holocaust literature, the Grimms' fairy tales, the monstrous, the uncanny, and the fantastic. Repeatable to 9 credits when topics vary. Repeatable to 9 credits. On demand.

GERM 409. Madness and Genius: An Introduction to German Intellectual History. 3 Credits.
Introduction to major intellectual, literary, and artistic movements of German-speaking cultures from Middle Ages to the present, with emphasis on the historical and philosophical environments in which they came to be. Prerequisite: GERM 308 with a grade of C or better. On demand.

GERM 413. Advanced German Grammar Review. 3 Credits.
Topics vary: Literary periods and genres, individual authors, or interdisciplinary topics. May be taught in French or English. Possible course topics include Holocaust literature, the Grimms' fairy tales, the monstrous, the uncanny, and the fantastic. Repeatable to 9 credits when topics vary. Repeatable to 9 credits. On demand.

GERM 414. Individual French Readings. 1-3 Credits.
Topics for this course may include genre studies, survey of literary and or social/political movements, a specific author, or a specific time period. Depending on the topic and the range of interest outside the major, the course may be taught in French or English. For major or minor credit, written work must be done in French. Repeatable up to 12 credits. Prerequisite: FREN 202 with a grade of C or better for French placement exam or consent of instructor. Repeatable to 12 credits. On demand.

LANG Courses

LANG 101. First Year Foreign Language I. 4 Credits.
Study of the fundamentals of grammar, oral use, and reading of a non-English language. Course credits available to students who demonstrate proficiency in a non-English language not offered at the university. Students who believe they may be eligible for these credits should contact the Department of Modern Classical Languages Literatures for information regarding the course. These credits may or may not fulfill language requirements in majors or programs with such requirements; students should consult with their major department for such a determination. S/U grading. On demand.

LANG 102. First Year Foreign Language II. 4 Credits.
Continued study of the fundamentals of grammar, oral use, and reading of a non-English language. Course credits available to students who demonstrate proficiency in a non-English language not offered at the university. Students who believe they may be eligible for these credits should contact the Department of Modern Classical Languages Literatures for information regarding the course. These credits may or may not fulfill language requirements in majors or programs with such requirements; students should consult with their major department for such a determination. Prerequisite: LANG 101. S/U grading. On demand.

LANG 201. Second Year Foreign Language I. 4 Credits.
Continued study of the fundamentals of grammar, oral use, and reading of a non-English language. Course credits available to students who demonstrate proficiency in a non-English language not offered at the university. Students who believe they may be eligible for these credits should contact the Department of Modern Classical Languages Literatures for information regarding the course. These credits may or may not fulfill language requirements in majors or programs with such requirements; students should consult with their major department for such a determination. Prerequisite: LANG 101 and LANG 102. S/U grading. On demand.
LANG 202. Second Year Foreign Language II. 4 Credits.
Continued study of the fundamentals of grammar, oral use, and reading of a non-English language. Course credits available to students who demonstrate proficiency in a non-English language not offered at the university. Students who believe they may be eligible for these credits should contact the Department of Modern Classical Languages Literatures for information regarding the course. These credits may or may not fulfill language requirements in majors or programs with such requirements; students should consult with their major department for such a determination. Prerequisites: LANG 101, LANG 102, and LANG 201. S/U grading. On demand.

LANG 250. Topics in World Languages and Cultures. 1-4 Credits.
Beginning or intermediate instruction on subjects not covered by regular departmental offerings. No prerequisite unless one is specifically announced in the Time Schedule. Repeatable with change of topic. Repeatable. On demand.

LANG 318. Individual Arranged Study Abroad. 1-12 Credits.
Participation in individually arranged programs of study abroad. For major or minor credit, the language used abroad must correspond to the language being studied at UND. The Department reserves the right to test the student upon his or her return to Grand Forks. Repeatable to 12 credits. Prerequisite: Permission of department. Repeatable to 12 credits. S/U grading. F.S.SS.

LANG 319. University Sponsored Study Abroad. 1-12 Credits.
Participation in UND-sponsored programs of study abroad. For major or minor credit, the language used abroad must correspond to the language being studied at UND. Repeatable when programs or topics within a program vary. Repeatable to 12 credits. Prerequisite: LANG 102 or equivalent. Repeatable to 12 credits. S/U grading. On demand.

LANG 320. Faculty-Led Study Abroad. 1-12 Credits.
Short-term, faculty-led study abroad course intended to complement our common LANG course offerings; investigation of global issues through immersion in another language and culture. Repeatable to 12 credits. On demand.

LANG 331. Foreign Literature in Translation. 1-3 Credits.
The faculty in the various foreign languages will lead reading and discussion in English of representative translations from their fields of specialty. Course may be taken in partial fulfillment of the Humanities requirement, but would not apply toward a language major or minor. Topics to be announced. Repeatable to 6 credits. Repeatable to 6 credits. F.S.

LANG 333. Colloquium In Lang & Letters. 1-3 Credits.
Prerequisite: LANG 102 or equivalent. Repeatable to 12 credits.

LANG 380. Global Gateways. 3 Credits.
An introduction to the interdisciplinary nature of cultural practices and traditions around the world, this course will explore an understanding of culture as historical, literary, linguistic, visual, and performative. Through reading, writing, and discussion to foster advanced communication, students will be expected to engage and examine intercultural contexts and complexities. Repeatable when topics vary. Repeatable to 6 credits. F.S.

LANG 389. Honors Tutorial. 1-4 Credits.
Supervised independent study of topics of mutual interest to students and members of the departmental faculty. May apply toward graduation with Senior Honors. Prerequisite: LANG 302 or equivalent and consent of department. On demand.

LANG 397. Cooperative Education. 1-6 Credits.
Compensated and practical work experience in various areas of the language of study. Coop credits may not be substituted for any required course. Repeatable to 6 credits. Prerequisites: Recommendation of language unit and approval of Department. Repeatable to 6 credits. S/U grading. F.S.SS.

LANG 400. Methods and Materials of Teaching Middle and Secondary School Foreign Language. 3 Credits.
Various teaching methods, strategies and materials used in teaching middle and secondary school foreign language. Prerequisite: T&L 345. Corequisite: T&L 486. F.

LANG 480. Capstone: Global Connections. 3 Credits.
Open to majors and non-majors. Literature, linguistics and/or culture course organized by genre, movement, topic or period with a focus on promoting complex engagement with the subject through in-depth analytical writing and discussion. Taught in English. Prerequisite: Second semester Junior, or Senior status, or instructor approval. Repeatable to 6 credits. F.S.

LANG 489. Senior Honors Thesis. 1-15 Credits.
Supervised independent study culminating in a thesis. Repeatable to 15 credits. Prerequisites: Consent of Department and approval of the honors committee. F.S.

LING Courses

LING 450. Articulatory Phonetics. 2 Credits.
Introduction to the theory and practice of articulatory phonetics. SS.

LING 451. Phonology I. 3 Credits.
Introduction to phonological analysis; intensive practice in applying theoretical principles to problem solving and to field techniques. Prerequisite: LING 450 or with permission of the instructor ENGL 209 as a prerequisite and LING 450 as a corequisite. SS.

LING 452. Syntax and Morphology I. 3 Credits.
Fundamentals of analyzing the grammatical and morphological structures of languages; analytical skills developed through graded problems based on a wide variety of languages. SS.

LING 455. Phonetics of Signed Languages. 2 Credits.
Introduction to the theory and practice of sign language phonetics. Intensive drill in recognition and production of a wide range of manual and non-manual phonetic elements that are used in natural signed languages, along with terminology for describing those elements precisely. Practice in reading and writing one or more notational systems that are useful in recording phonetic details when conducting research on signed languages. SS.

LING 470. Introduction to Sociolinguistics and Language Development. 2 Credits.
Introduction to language variation as influenced by social interaction, with special attention to participatory language development in multilingual societies. SS.

LING 480. Learner-Directed Second Language Acquisition. 3 Credits.
Equips the student for success in learner-directed acquisition of language/culture without dependence on formal classroom instruction, especially in little-studied languages with few or no published pedagogical resources. The core of the course is an intensive practicum (40-45 hours), working with a native speaker of a language that is very different from languages the student already knows, in sessions led first by a teaching assistant and later by students. Separate lecture-discussion sessions present the theoretical foundation for the practicum. An understanding of second language acquisition is instilled that combines Sociocultural Theory with the psycholinguistic study of comprehension and production along with a detailed multiphase strategy for long-term language/culture learning. Corequisite recommended: LING 450 or LING 455. SS.

NORW Courses

NORW 101. First Year Norwegian I. 4 Credits.
Introduction to the basic Norwegian language skills: reading, writing, speaking and listening; fundamentals of grammar. F.

NORW 102. First Year Norwegian II. 4 Credits.
Basic Norwegian language skills; continuation of fundamentals of grammar. Prerequisite: NORW 101 with a grade of C or better. S.

NORW 201. Second Year Norwegian I. 4 Credits.
Selected cultural and literary readings, review of the structure of the language, and continued development of readings, writing, speaking, and listening skills. Prerequisite: NORW 102 or equivalent. F.

NORW 202. Second Year Norwegian II. 4 Credits.
Selected cultural and literary readings, continued review of the structure of the language and development of language skills. Prerequisite: NORW 201 or equivalent. S.

NORW 350. Norwegian Culture. 3 Credits.
Taught in English. Open to non-majors. A systematic analysis of Norwegian culture through the centuries. Repeatable when topics vary. Repeatable. F.

NORW 403. Great Literary Works of Norway. 3 Credits.
Taught in English. Open to non-majors. Reading and analysis of selected texts by a major Norwegian author. Repeatable when topics vary. Repeatable. S.

NORW 431. Advanced Norwegian. 3 Credits.
Reading of selected works by leading Norwegian authors, interpretation and discussion. Prerequisite: NORW 202 or equivalent. F.
NORW 432. Advanced Norwegian. 3 Credits.
Reading of selected works by leading Norwegian authors, interpretation and discussion. Prerequisite: NORW 202. S.

NORW 433. Norwegian Literature. 3 Credits.
Norwegian literature, with special attention given to recognized masterpieces, past and present. Prerequisite: NORW 202. F.

NORW 434. Norwegian Literature. 3 Credits.
Norwegian literature with special attention given to recognized masterpieces, past and present. Prerequisite: NORW 202. S.

NORW 494. Individual Norwegian Readings. 1-3 Credits.
May be repeated to a total of six hours. Prerequisites: Six credits of other 400-level Norwegian courses and consent of department. Repeatable to 6 credits. F,S.

SPAN Courses

SPAN 101. First Year Spanish I. 4 Credits.
 Pronunciation and fundamental grammatical principles introduced through the development of skill and listening comprehension and speaking, followed by practice in reading and writing. F,S.

SPAN 102. First Year Spanish II. 4 Credits.
 Continued study of pronunciation and fundamental grammatical principles through the development of skill in listening comprehension and speaking, followed by practice in reading and writing. Prerequisite: SPAN 101 with a grade of a C or better. S,SS.

SPAN 201. Second Year Spanish I. 4 Credits.
 Review of the structure of the language, readings in Spanish, practice in oral and written expression. Prerequisite: SPAN 102 or an equivalent approved by the department. F,S.

SPAN 202. Second Year Spanish II. 4 Credits.
 Review of the structure of the language, readings in Spanish, practice in oral and written expression. Prerequisite: SPAN 201 or an equivalent approved by the department. S,SS.

SPAN 304. Spanish Phonetics. 3 Credits.
 A theoretical and practical approach to Spanish pronunciation. Prerequisite: SPAN 202 or equivalent permission of instructor. On demand.

SPAN 308. Spanish Conversation. 3 Credits.
 Practice in a variety of forms of oral Spanish. Prerequisite: SPAN 202 or an equivalent approved by the department. On demand.

SPAN 309. Spanish Composition. 3 Credits.
 Practice in a variety of forms of written Spanish. Prerequisite: SPAN 202 or an equivalent approved by the department. On demand.

SPAN 312. Spanish for the Professions. 3 Credits.
 A study of terminologies, cultural contexts, and professional etiquette. Topics will vary. Prerequisites: SPAN 202 or equivalent permission of instructor. On demand.

SPAN 420. Early Spanish Literature & Culture. 3 Credits.
 Lectures, readings, analysis and discussion of representative Early Spanish literary cultural texts. Students will be expected to engage the texts by examining intellectual histories, cultural contexts and complexities of social power and difference as an artistic expression of the human experience. Repeatable when topics vary. Prerequisite: SPAN 308 or SPAN 309, with preference for SPAN 309. On demand.

SPAN 421. Modern & Contemporary Spanish Literature & Culture. 3 Credits.
 Lectures, readings, analysis and discussion of representative Modern Contemporary Spanish literary cultural texts. Students will be expected to engage the texts by examining intellectual histories, cultural contexts and complexities of social power and difference as an artistic expression of the human experience. Repeatable when topics vary. Prerequisite: SPAN 308 or SPAN 309, with preference for SPAN 309. On demand.

SPAN 422. Early Latin American Literature & Culture. 3 Credits.
 Lectures, readings, analysis and discussion of representative Early Latin American literary cultural texts. Students will be expected to engage the texts by examining intellectual histories, cultural contexts and complexities of social power and difference as an artistic expression of the human experience. Repeatable when topics vary. Prerequisite: SPAN 308 or SPAN 309, with preference for SPAN 309. On demand.

SPAN 423. Modern & Contemporary Latin American Literature & Culture. 3 Credits.
 Lectures, readings, analysis and discussion of representative Modern Contemporary Latin American literary cultural texts. Students will be expected to engage the texts by examining intellectual histories, cultural contexts and complexities of social power and difference as an artistic expression of the human experience. Repeatable when topics vary. Prerequisite: SPAN 308 or SPAN 309, with preference for SPAN 309. On demand.

SPAN 450. Advanced Spanish Grammar. 3 Credits.
 An in-depth examination of the grammar of the Spanish language. Emphasis will be placed on those elements of Spanish which present the greatest difficulties for native speakers of English. Prerequisite: SPAN 309 or permission of instructor. S.

SPAN 462. Seminar in Hispanic Literature, Culture and Linguistics. 3 Credits.
 Advanced work on a specific aspect of the Hispanic literary, linguistic, and/or cultural tradition. Repeatable with different topic. Prerequisite: SPAN 308 or SPAN 309, with preference for SPAN 309. Repeatable. On demand.

SPAN 494. Individual Hispanic Readings. 1-3 Credits.
 Independent study on specific topic pre-arranged with professor. Prerequisites: SPAN 307 or equivalent and consent of the department. Repeatable to 3 credits. F,S.

Bachelor of Arts with a Major in Chinese Studies

Bachelor of Arts with a Major in Classical Studies

Required: 43 credits distributed among Parts A (16 credits), B (21 credits) and C (6 credits):

I. Essential Studies Requirements (see University ES listing).
Francophone perspectives regarding socio-cultural contemporary world issues. The program offers upper-division courses in the following categories:

Category 1: the study and practice of spoken and written French in national and international contexts
- FREN 301 Third Year French I
- FREN 302 Third Year French II
- FREN 305 French Conversation and Culture
- FREN 306 French Conversation and Culture II
- FREN 307 A Social and Cultural History of Québec
- FREN 340 Business French
- LANG 318 Individual Arranged Study Abroad
- LANG 319 University Sponsored Study Abroad
- FREN 413 Advanced French Grammar Review
- FREN 494 Individual French Readings

Category 2: an interdisciplinary approach to the study of Francophone literatures and films
- FREN 301 Third Year French I
- FREN 302 Third Year French II
- FREN 305 French Conversation and Culture
- FREN 306 French Conversation and Culture II
- FREN 307 A Social and Cultural History of Québec
- LANG 318 Individual Arranged Study Abroad
- LANG 319 University Sponsored Study Abroad
- FREN 371 Studies in European Francophone Literatures, Films and Cultures
- FREN 372 Studies in African, Asian, Caribbean, and/or Polynesian Francophone Literatures, Films and Cultures
- FREN 373 North American Francophone Cultures through Literature and Film
- FREN 491 Seminar in French and Francophone Studies
- FREN 494 Individual French Readings

Category 3: the understanding and analysis of Francophone perspectives regarding socio-cultural contemporary world issues
- FREN 305 French Conversation and Culture
- FREN 306 French Conversation and Culture II
- FREN 307 A Social and Cultural History of Québec
- LANG 318 Individual Arranged Study Abroad
- LANG 319 University Sponsored Study Abroad
- FREN 371 Studies in European Francophone Literatures, Films and Cultures
- FREN 372 Studies in African, Asian, Caribbean, and/or Polynesian Francophone Literatures, Films and Cultures
- FREN 373 North American Francophone Cultures through Literature and Film
- FREN 491 Seminar in French and Francophone Studies
- FREN 494 Individual French Readings

Bachelor of Arts with a Major in French

The French program offers a wide range of courses emphasizing language acquisition and an understanding of international cultural diversity. To achieve these goals, students learn to communicate in French and to address issues of cultural diversity as drawn from literature, film, and other forms of contemporary media from the cultural production of the more than 50 French-language countries of the world. The program offers upper-division courses in the following categories: the study and practice of spoken and written French in national and international contexts, an interdisciplinary approach to the study of Francophone literatures and films, and the understanding and analysis of Francophone perspectives regarding socio-cultural contemporary world issues.
Bachelor of Arts with a Major in German Studies

A major in German Studies consists of:

**Four introductory lower-division courses**
- GERM 101 First Year German I 4
- GERM 102 First Year German II 4
- GERM 201 Second Year German I 4
- GERM 202 Second Year German II 4

**27 total credits required**
12 must come from the following:
- GERM 307 Communicating Cultures I 3
- GERM 308 Communicating Cultures II 3
- LANG 380 Global Gateways 3
- LANG 480 Capstone: Global Connections 3

15 elective credits from the following:
- GERM 304 German Phonetics: History, Dialect, and the Living Language 3
- GERM 310 Screening German Cultures 3
- GERM 404 German Stories, German Histories 3
- GERM 405 Mediating Cultures: Social Discourse in German-Speaking Countries 3
- GERM 409 Madness and Genius: An Introduction to German Intellectual History 3
- GERM 413 Advanced German Grammar Review 3
- LANG 318 Individual Arranged Study Abroad 1-12
- LANG 319 University Sponsored Study Abroad 1-12

Outside of LANG 380 Global Gateways and LANG 480 Capstone: Global Connections, only 3 credits from GERM coursework can be taught in English.

Majors and minors are encouraged to make their interests known early in their academic career, including the desire to study in a German-speaking country, particularly for programs administered through partner institutions. In addition to the department-wide Arneberg and Larsen scholarships, the German Program, awards the Max Kade, Stoltz and Rogers scholarships as well as the Boswau Endowment Fund exclusively to qualified students of German.

**Bachelor of Arts with a Major in Languages/Teacher Certification**

Through a partnership with the College of Education and Human Development and the Department of Teaching and Learning, students may seek teacher licensure in a language. The following program of study must be completed:

I. Requirements for the B.A. with a major in a Language.

II. Humanities requirements:
- HIST 101 Western Civilization I 3
- HIST 102 Western Civilization II 3
- English courses beyond College Composition II 4
- Total Credits 10

III. Additional requirements for licensure in French, German or Spanish
- Phonetics (with grade no lower than B) 2
- Advanced Grammar (with grade no lower than B) 2

A course in civilization of the country or countries in which the language is spoken is also strongly recommended.

IV. Admission to the Teacher Education program, normally while taking T&L 250 Introduction to Education. (See College of Education and Human Development (https://education.und.edu) for admission and licensing requirements.)

V. The program in Secondary Education, to include:
- T&L 250 Introduction to Education 3
- T&L 252 Child Development 3
- T&L 319 Integrating Diverse Needs in Educational Settings 3
- T&L 339 Educational Technology 2
- T&L 345 Curriculum, Instruction, and Assessment 3
- T&L 386 Field Experience 1
- LANG 400 Methods and Materials of Teaching Middle and Secondary School Foreign Language 3
- T&L 432 Learning Environments 3
- T&L 433 Multicultural Education 3
- T&L 486 Field Experience 1
- T&L 487 Student Teaching ** 16
- T&L 488 Senior Seminar 1

Total Credits 42

* T&L 390 Special Topics, may be taken as an elective (supervised by Languages Department Faculty)
** A full semester of student teaching, normally taken during the semester of graduation

Language majors seeking teacher licensure must have an adviser in both the Languages Department and the Department of Teaching and Learning.
Bachelor of Arts with a Major in Norwegian

A major in Norwegian includes four introductory courses (NORW 101, 102, 201, 202) and a minimum of 24 credit hours of upper-division courses. Credits for the major can be selected from the following upper-division courses: NORW 350, 403, 431, 432, 433, 434; 6 of the 24 credits must consist of LANG 380 and the departmental capstone, LANG 480. With departmental approval, NORW 431, 432, 433, 434; 6 of the 24 credits must consist of LANG 380 and for the major can be selected from the following upper-division courses: NORW 201, 202) and a minimum of 24 credit hours of upper-division courses. Credits

Four introductory courses
- NORW 101 First Year Norwegian I 4
- NORW 102 First Year Norwegian II 4
- NORW 201 Second Year Norwegian I 4
- NORW 202 Second Year Norwegian II 4

Upper division courses (minimum 24 credit hours)
- NORW 350 Norwegian Culture 3
- NORW 403 Great Literary Works of Norway 3
- NORW 431 Advanced Norwegian 3
- NORW 432 Advanced Norwegian 3
- NORW 433 Norwegian Literature 3
- NORW 434 Norwegian Literature 3
- LANG 380 Global Gateways (Required) 3
- LANG 480 Capstone: Global Connections (Required) 3

Certificate in Chinese

Students who test out of language are eligible for the certificate if they complete a minimum of 4 credit hours at the 202 level. Those who major or minor in the language remain eligible for the certificate. Students will receive a certificate in Chinese for completing 16 credits:

Certificate in Classical Studies

Students who test out of language are eligible for the certificate if they complete a minimum of 4 credit hours at the 102 or 152 level. Those who major or minor in the language remain eligible for the certificate. Students will receive a certificate in Classical Language for completing 16 credit:

Certificate in French

Students who test out of language are eligible for the certificate if they complete a minimum of 4 credit hours at the 202 level. Those who major or minor in the language remain eligible for the certificate. Students will receive a certificate in French for completing 16 credits:

Certificate in German

Students who test out of language are eligible for the certificate if they complete a minimum of 4 credit hours at the 202 level. Those who major or minor in the language remain eligible for the certificate. Students will receive a certificate in German for completing 16 credits:
## Certificate in Norwegian

Students who test out of language are eligible for the certificate if they complete a minimum of 4 credit hours at the 202 level. Those who major or minor in the language remain eligible for the certificate. Students will receive a certificate in Norwegian for completing 16 credits:

</tr>
<tr>
<td>CLAS 151</td>
<td>4</td>
</tr>
<tr>
<td>CLAS 152</td>
<td>4</td>
</tr>
</tbody>
</table>

### Other courses as approved by Classical Studies adviser

**i.e., a student may not use the same courses to satisfy Part A and Part B.**

***A student may fulfill the language requirement in one of three ways.***

### Minor in French

A minor in French includes four introductory lower-division courses and a minimum of 15 credits at the 300 and 400 levels.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>FREN 101</td>
<td>4</td>
</tr>
<tr>
<td>FREN 102</td>
<td>4</td>
</tr>
<tr>
<td>FREN 201</td>
<td>4</td>
</tr>
<tr>
<td>FREN 202</td>
<td>4</td>
</tr>
</tbody>
</table>

Students are required to take a minimum of one 300/400 level course in each of the categories. The capstone course may be used to fulfill the minor but is not required. The majority of 300/400 level courses have the potential to fulfill more than one category. Therefore, once a course has been designated, either by the student or the advisor, as fulfilling the requirements in one category, it may not also be used to fulfill the requirements of a second category.

Students are encouraged to participate in programs of travel and study in one or more French speaking countries. Credits earned on such programs may be counted toward a major or a minor in French. However, all majors and minors are required to take on campus a minimum of one course in each of the three areas (see above), regardless of the number of credits acquired through transfer, including study abroad.
Minor in German

A minor in German consists of:

Four introductory lower-division courses
GERM 101 First Year German I 4
GERM 102 First Year German II 4
GERM 201 Second Year German I 4
GERM 202 Second Year German II 4

Upper-division courses (minimum 12 credit hours)
GERM 307 Communicating Cultures I 3
GERM 308 Communicating Cultures II 3

Electives
GERM 304 German Phonetics: History, Dialect, and the Living Language 3
GERM 404 German Stories, German Histories 3
GERM 409 Madness and Genius: An Introduction to German Intellectual History 3
GERM 413 Advanced German Grammar Review 3
LANG 318 Individual Arranged Study Abroad 1-12
LANG 319 University Sponsored Study Abroad 1-12
GERM 206 Germany in a Global World 3
GERM 306 Contextualizing Culture: Introduction to German Studies 3
GERM 310 Screening German Cultures 3
GERM 405 Mediating Cultures: Social Discourse in German-Speaking Countries 3
GERM 406 Literary Voices in Translation 3

A maximum of one English-language course (GERM 206 Germany in a Global World, GERM 306 Contextualizing Culture: Introduction to German Studies or GERM 406 Literary Voices in Translation) may count toward the minor.

Leadership Minor (Lead)

LEAD 101. Learning Leadership. 3 Credits.
An introduction to leadership as a discipline including the theories of leadership, the role of leadership in history and today’s society, communication and interaction with diverse individuals and groups, basic network-building concepts and assessment of application of leadership theory and skills. F.S.

LEAD 395. Special Topics. 1-4 Credits.
Topics will vary. Course will offer specialized knowledge in a specific area related to leadership. Prerequisite: Consent of the instructor. Repeatable to 4 credits. On demand.

LEAD 400. Advanced Leadership. 3 Credits.
An in-depth analysis of the applications of leadership skills in a variety of contexts, including an experiential analysis of self (and others) as a leader within context. Students will demonstrate creative and critical thinking about leadership, communicate effectively in oral and written format, and apply networking concepts and leadership skills in an applied setting. Prerequisites: LEAD 101, completion of one ethics course, and enrollment in the minor. S.

LEAD 494. Readings in Leadership. 1-4 Credits.
Selected readings in leadership developed individually for each student. Prerequisites: Consent of the instructor; must be enrolled in the Leadership Minor. Repeatable to 4 credits. F.S,SS.

Leadership Minor

The minor in leadership provides in-depth instruction on desired qualities of leaders, the relationship between leaders and followers, and explores what has contributed to successful leadership in a variety of fields. The courses and experiences provide the training necessary for UND graduates to serve as leaders in their community and professions. For further information, contact the Helland Family Office of Academic Advisement (http://business.und.edu/current-students/academic-advising) in the CoBPA 701.777.2975

LEAD 101 Learning Leadership 3
COMM 212 Interpersonal Communication 3
LEAD 400 Advanced Leadership 3
Select one of the following (Ethics):
PHIL 120 Introduction to Ethics 3
MGMT 360 Business Ethics and Social Responsibility 3
The total requirement for the minor is 20 credits, including the following:

- familiarity with a broad range of languages, especially minority languages.
- other subfields (including interdisciplinary and applied).
- The minor promotes the life and civic responsibilities.
- The courses are offered in three core subfields for informed decision-making about language-related issues in their daily life and civic responsibilities.
- Other further education in linguistics or related fields, and to prepare students for informed decision-making about language-related issues in their daily life and civic responsibilities. The minor promotes familiarity with a broad range of languages, especially minority languages.

**Linguistics (Ling)**

Minor in Linguistics (p. 146)

**Courses**

**LING 450. Articulatory Phonetics. 2 Credits.**
Introduction to the theory and practice of articulatory phonetics. SS.

**LING 451. Phonology I. 3 Credits.**
Introduction to phonological analysis; intensive practice in applying theoretical principles to problem solving and to field techniques. Prerequisite: LING 450 or with permission of the instructor ENGL 209 as a corequisite and LING 450 as a corequisite. SS.

**LING 452. Syntax and Morphology I. 3 Credits.**
Fundamentals of analyzing the grammatical and morphological structures of languages; analytical skills developed through graded problems based on a wide variety of languages. SS.

**LING 455. Phonetics of Signed Languages. 2 Credits.**
Introduction to the theory and practice of sign language phonetics. Intensive drill in recognition and production of a wide range of manual and non-manual phonetic elements that are used in natural signed languages, along with terminology for describing those elements precisely. Practice in reading and writing one or more notational systems that are useful in recording phonetic details when conducting research on signed languages. SS.

**LING 470. Introduction to Sociolinguistics and Language Development. 2 Credits.**
Introduction to language variation as influenced by social interaction, with special attention to participatory language development in multilingual societies. SS.

**LING 480. Learner-Directed Second Language Acquisition. 3 Credits.**
Equips the student for success in learner-directed acquisition of language/culture without dependence on formal classroom instruction, especially in little-studied languages with few or no published pedagogical resources. The core of the course is an intensive practicum (40-45 hours), working with a native speaker of a language that is very different from languages the student already knows, in sessions led first by a teaching assistant and later by students. Separate lecture-discussion sessions present the theoretical foundation for the practicum. An understanding of second language acquisition is instilled that combines Sociocultural Theory with the psycholinguistic study of comprehension and production along with a detailed multiphase strategy for long-term language/culture learning. Corequisite recommended: LING 450 or LING 455. SS.

**Minor in Linguistics**

Emphasizing both cognitive understanding and analytical skills, the undergraduate minor in Linguistics provides an introduction to the scientific study of language, as a supplement to a student’s primary academic concentration. Its purpose is to provide a foundation for a graduate degree or other further education in linguistics or related fields, and to prepare students for informed decision-making about language-related issues in their daily life and civic responsibilities. The courses are offered in three core subfields of linguistics: phonetics, phonology, and morphology/syntax, as well as other subfields (including interdisciplinary and applied). The minor promotes familiarity with a broad range of languages, especially minority languages.

The total requirement for the minor is 20 credits, including the following:

**Prerequisites to the minor**

Other upper-division or graduate courses whose content is linguistics, subject to approval by one of the program advisors.

Language requirement for the minor:

Three credits in a non-Indo-European language. If a suitable language is used to satisfy the language requirement of a student’s major, it may also be used to satisfy the language requirement of the minor. The following courses are among those that may be used to satisfy the language requirement:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIN 101</td>
<td>4</td>
</tr>
<tr>
<td>First Year Chinese I</td>
<td>4</td>

</tr>
<tr>
<td>Learner-Directed Second Language Acquisition (This course may be used to satisfy both the language requirement and the non-core requirement)</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits | 26 |

Other language courses in non-Indo-European languages may be used with the approval of a program advisor, including transfer courses.

The language requirement may also be satisfied by examination or by native competence in a suitable language, subject to approval by a program advisor.

Deaf students may, in consultation with a program advisor, substitute appropriate courses in the phonetics and phonology of sign language for LING 450 Articulatory Phonetics and LING 451 Phonology I if they also use a sign language to satisfy the non-Indo-European language requirement.

1. SIL requires a 2.8 GPA and junior standing in order for students to take its courses. Any exceptions to these requirements would need to be granted by the SIL director.

2. ENGL 418 Second Language Acquisition and LING 480 Learner-Directed Second Language Acquisition are distinct courses in content and aims. ENGL 418 Second Language Acquisition focuses more on a cognitive and theoretical understanding of second language acquisition, particularly for language teaching of world languages in a traditional classroom setting. LING 480 Learner-Directed Second Language Acquisition provides a practical approach to second language acquisition in a non-traditional, user-directed context where traditional instruction and resources are not available, as is typical in minority languages.

3. See footnote 2.

The minor is offered jointly by the English department and SIL; interested students should contact the English department for further information and advising.
Management (Mgmt)

B.B.A. with a Major in Management (p. 150)

B.B.A. with a Major in Human Resource Management (p. 150)

B.B.A. with a Major in Operations and Supply Chain Management (p. 149)

B.B.A. with a Major in Airport Management (p. 148)

B.B.A. with a Major in Aviation Management (p. 149)

Minor in Operations and Supply Chain Management (p. 151)

Courses

**MGMT 300. Principles of Management. 3 Credits.**
This course provides a survey of the traditional functions of management with primary emphasis on planning, organizing, controlling, and leading. This emphasis involves coverage of managerial decision making, leadership, motivation, interpersonal communication, staffing human resources, and organizational structure, design, and change and development. Additional topics include the history of managerial thought, management information systems, international management, and business ethics and social responsibility. Prerequisites or corequisites: A total of 30 or more credit hours, including courses in progress. F.S.

**MGMT 301. Operations Management. 3 Credits.**
This course introduces managerial issues and problems arising in the operations function of both service and manufacturing-oriented organizations. Topics include: aggregate planning, facility layout, forecasting, inventory control and management, introduction to linear programming, operations strategy, processes and technology, project management, quality control and management, scheduling, supply chain management, and waiting line analysis. Prerequisites: ECON 210 with grade of C or better, Junior or Senior standing, a GPA of 2.5, and declared COBPA majors only. F.S.

**MGMT 302. Human Resource Management. 3 Credits.**
A survey of the concepts, procedures, and programs associated with Human Resources Management in organizations. It includes an overview of the basic management functions and legal issues linked to the execution of the personnel functions of employment, performance appraisal, training, compensation, and development. Prerequisites: ECON 210 with grade of C or better, MGMT 300 with grade of C or better, Junior or Senior standing, and declared COBPA majors only. F.S.

**MGMT 309. Quantitative Methods for Managers. 3 Credits.**
Topics include decision analysis, forecasting, linear programming, integer and mixed programming, network models, queuing analysis, and simulation. Prerequisites: ECON 210 with grade of C or better, MGMT 301 with grade of C or better, Junior or Senior Standing, and declared COBPA majors only. F.S.

**MGMT 310. Organizational Behavior. 3 Credits.**
The objective of this course is to allow the student to become acquainted with and experience various ways of thinking about and responding to the issues of human relations and management. The course is designed to survey the following topics at the individual, group, and organizational levels: individual perceptions, attitudes, values, motivation, leadership, communication, group dynamics, and problem solving. Prerequisites: ECON 210 with grade of C or better, MGMT 300 with grade of C or better, Junior or Senior standing, and declared COBPA majors only. F.S.

**MGMT 322. Purchasing. 3 Credits.**
An introductory course in procurement/purchasing of products, services, equipment/technology, etc. The course addresses issues across various sectors of the economy such as services, retail, wholesale, manufacturing, government, not-for-profit, etc. Prerequisite or Corequisite: MGMT 301 with a grade of C or better. F.

**MGMT 360. Business Ethics and Social Responsibility. 3 Credits.**
This course explores responsible business practices at both the individual and organizational levels. Key concepts of business ethics are studied, with a focus on how managers can motivate employees and other stakeholders to support socially responsible business decisions and practices. Prerequisite: MGMT 300 with a grade of C or better. On demand.

**MGMT 361. Managerial Negotiations. 3 Credits.**
A survey of negotiation, mediation, arbitration, and emerging methods of alternative dispute resolution. Students will be required to engage in small and large group discussions, simulated negotiations and mediations in addition to regular reading assignments. This course is designed to help students understand their bargaining position in a variety of settings, devise negotiating strategies, and build their persuasive abilities and self-confidence in negotiations. Prerequisite: MGMT 300 with grade of C or better. On demand.

**MGMT 362. Leadership and Conflict Resolution. 3 Credits.**
This course will explore the nexus between leadership and the ability to navigate through the tough waters of conflict. Participants will be encouraged to reflect, explore, and apply concepts that will help them to achieve success in their professional and personal lives. On demand.

**MGMT 372. Fundamentals of Project Management. 3 Credits.**
This course covers the fundamental concepts and applied techniques for cost, resources, risk, scheduling, and stakeholder management of both long-term development programs and short-term projects. Project management deals with project proposals, charters, and the management of projects, those limited in scope, budget, and schedule. The course uses cases from a wide variety of industries, including construction, information systems, non-profit organizations, the government, and the military. Students will also become familiar with PM software tools and certification options. Using discussions and in group class work, students will learn how to apply the skills required of a project manager in today's climate. Prerequisite: MGMT 300 or LEAD 101 with a grade of C or better, or instructor approval. S.

**MGMT 395. Special Topics. 3 Credits.**
Specific topics will vary. Course will offer specialized knowledge in a specific area; e.g. Human Resource Management, Operations Management, Strategic Management. May be taken a maximum of two times for credit. Prerequisites: MGMT 300 with a grade of C or better, and declared COBPA majors; Management department may require additional prerequisites for specific sections; Management department approval. Repeatable to 6 credits. On demand.

**MGMT 397. Cooperative Education. 1-2 Credits.**
On-the-job compensated experience in general management or human resource management, operations or supply chain management. A maximum of 6 credits cumulative from MGMT 397 and MGMT 497 are allowed to be used towards the above mentioned degree programs. Prerequisites: MGMT 300 with a grade of C or better, GPA of 2.5 and consent of instructor. Repeatable to 6 credits. S/U grading. F.S.SS.

**MGMT 400. Organizational Theory and Analysis. 3 Credits.**
The course is designed to acquaint students with some of the alternative ways in which organizations may be designed to accomplish their tasks. The course reviews the development of organization theories, their current status, and their future. Emphasis is placed on the analyses of system theories pertaining to structure, process, and context. Prerequisites: MGMT 300 with grade of C or better, Junior or Senior standing, and declared COBPA majors only. Prerequisite or Corequisite: MGMT 310 with grade of C or better. F.S.

**MGMT 407. Wage and Salary Administration. 3 Credits.**
The role of a wage and salary administrator is studied. The course focuses on the fundamentals of wage theory, job evaluation and pricing, employee evaluation, individual and group incentive plans, benefits, and managerial/executive compensation. Prerequisites: MGMT 302 with grade of C or better, Junior or Senior standing, and declared COBPA majors only. F.

**MGMT 408. Performance Management and Human Resource Management Issues. 3 Credits.**
This class explores various performance management approaches used by human resource management professionals and managers to improve work performance in organizations. This course also investigates current issues in the field or human resource management that potentially impact the performance of work. Prerequisites: MGMT 302 with grade of C or better, Junior or Senior standing, and declared COBPA majors only. S.

**MGMT 409. Union-Management Relations. 3 Credits.**
This course provides the student with an overview of the role of labor unions in contemporary organizations. The primary emphasis of the course is on the collective bargaining process. Students are engaged in simulated collective bargaining processes involving negotiations, mediation, arbitration, and final contractual agreements. Causes of industrial disputes and grievance arbitration are also covered. Prerequisites: MGMT 302 with a grade of C or better, Junior or Senior standing, and declared COBPA majors only. On demand.
MGMT 410. Staffing: Recruitment and Selection. 3 Credits.
This course trains students in one of the major components (applicant recruitment and selection) for Human Resource professionals as well as managers. In doing so, students are introduced to the techniques of analyzing the effectiveness and appropriateness of various instruments used by professionals. Additionally, students are introduced to the strategies associated with the use of different recruitment and selection techniques. Prerequisites: MGMT 302 with grade of C or better, Junior or Senior standing, and declared COBPA majors only. S.

MGMT 412. Training and Development. 3 Credits.
This course trains students in one of the major components (employee training and development) for Human Resource professionals as well as managers. In doing so: students are introduced to the current state of employee training and development practices; acquire a basic understanding of key issues related to the structure, the methods, and the use of technology for the training of employees; and through readings, lectures, discussions, and presentations learn to apply learning theories in the development and implementation of a strategic employee training system. Prerequisites: MGMT 302 with grade of C or better, Junior or Senior standing, and declared COBPA majors only. F.

MGMT 413. Supply Chain Management. 3 Credits.
This course covers the set of approaches utilized to efficiently integrate activities of suppliers, operations/production, and distribution of goods and services. Topics include: logistics, inventory, information systems, integration, alliances, procurement, international issues, coordination of product/service and processes in a supply chain, customer value, and decision support. Prerequisites: MGMT 301 with grade of C or better and declared COBPA major. F.

MGMT 432. Supplier Relationship Management. 3 Credits.
This course focuses on the "upstream" portion of the supply chain and stresses managerial issues in supplier relations. Topics covered include: cross functional issues in supply management, social responsibility, buyer-supplier relationships, quality management, total cost of ownership, developing supply requirements, strategic sourcing, cost management, relationship management, and world-class supply management. Prerequisites: MGMT 301 with grade of C or better and declared COBPA majors. S.

MGMT 433. Logistics in the Supply Chain. 3 Credits.
The primary emphasis of this course is directed toward dealing effectively with the management problems associated with moving and storing goods throughout the supply chain. Major topics covered include: logistic network strategy and planning, transportation strategy, inventory strategy, location strategy, Prerequisites or Corequisites: MGMT 309 with grade of C or better and declared CoBPA majors only. S.

MGMT 475. Strategic Management. 3 Credits.
This is the capstone course in business. Students apply knowledge gained in accounting, economics, finance, management, and marketing to develop business strategies. Case studies, simulations, and other exercises are used to develop executive skills. Prerequisites: MGMT 300, MGMT 301, FIN 310, MRKT 305, 95 credits, and declared CoBPA majors only. F.S.

MGMT 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits. Prerequisite: HON 401. Repeatable to 9 credits. F.S,SS.

MGMT 494. Readings in Management. 1-4 Credits.
Selected readings in management. Prerequisites: Senior or graduate standing and consent of instructor. Repeatable to 8 credits. F.S.

MGMT 497. Internship in Management. 1-3 Credits.
Guided, practical experience in human resource management, production, operations supply chain management, or general management, with selected participating businesses or organizations. A maximum of 6 credits cumulative from MGMT 397 and MGMT 497 are allowed to be used towards a degree program. Prerequisites: MGMT 300 with a grade of C or better, GPA of 2.5, and consent of instructor. Repeatable to 6 credits. S/U grading. F.S,SS.

Bachelor of Administration with Major in Airport Management

Airport Management Major Requirements

Required 120 credit hours (36 of which must be numbered 300 or above) including:

I. Essential Studies Requirements (see University ES listing and consult with your advisor).

5. Complete at least half of the business courses that apply toward the degree and major at UND

**Minor in Operations and Supply Chain Management**

The Operations and Supply Chain Management minor provides students with a broad conceptual grounding in Operations and Supply Chain Management. The program includes significant background in management theory, practice, and skills development, providing students with managerial perspective that they will need to be successful in their careers. The minor also provides specific focus on operational issues in manufacturing and service organizations, as well as significant skill sets to facilitate operationally effective and efficient decision-making. Finally, the minor includes a balanced perspective by addressing relevant issues, practices, and principles of supplier management, supply chains, and logistics issues to assure that students are well grounded in supply chain management.

Students will be required to successfully complete all of the following courses, each of which is a 3-credit hour course.

- **MGMT 301** Operations Management 3
- **ISBC 217** Fundamentals of Computer Information Systems 3
- **MGMT 309** Quantitative Methods for Managers 3
- **MGMT 431** Supply Chain Management 3
- **MGMT 432** Supplier Relationship Management 3
- **MGMT 433** Logistics in the Supply Chain 3
- **MGMT 302** Human Resource Management 3
  or **MGMT 310** Organizational Behavior 3

Total Credits 21

Students are expected to complete the pre-requisite courses of the required courses listed above. Possible exceptions are noted below:

- ECON 210 Introduction to Business and Economic Statistics (which is a pre-requisite course for MGMT 301 Operations Management and MGMT 310 Organizational Behavior ) may be waived by providing evidence of an adequate background and, or training in applied statistics to the Management Department
- Non-COBPA majors may request that the ISBC department waive ISBC 117 Personal Productivity with Information Technology pre-requisite requirement for ISBC 217 Fundamentals of Computer Information Systems, based upon potentially acceptable alternative coursework that the ISBC department finds acceptable. Students should contact the ISBC department with their request.
- MGMT 300 Principles of Management (which is a pre-requisite for MGMT 302 Human Resource Management and MGMT 310 Organizational Behavior) may be waived by demonstration of acceptable alternative coursework. Requests should be directed to the Management Department.

This minor will not be available to any of the following ‘Management’-oriented majors: Management, Operations and Supply Chain Management, Human Resource Management.

**Marketing (MRKT)**

B.B.A with Major in Marketing (p. 152)

**Courses**

- **MRKT 201. Personal Marketing. 3 Credits.** The course applies the marketing concept to understanding personal brand, social identity, and planning of career tracks. Emphasis is placed on the development of individual marketing plans during the sophomore/junior year thus initiating a systematic career planning process in the context of worldview. Career planning prior to the senior year helps incorporate internships, job shadowing, and/or cooperative education into students’ program of study. Particular emphasis is placed on the application of the marketing concepts in professional career initiation and the development and delivery of presentations to culturally diverse audiences. The course also incorporates attitude testing, mock interviews, discussion of job search using the Internet, networking, time management strategies, and portfolio development. F.S.
- **MRKT 305. Marketing Foundations. 3 Credits.** An overview of the scope and nature of market exchange and the buyer’s pivotal role. Prerequisites: ECON 201, Sophomore, Junior, or Senior Standing, a minimum total of 45 credit hours, and declared COBPA majors only. Prerequisites or Corequisites: ACCT 201 and ECON 210. F,S,SS.
- **MRKT 310. Consumer Behavior. 3 Credits.** Theoretical and applied analysis of consumption-related activities of individuals. Investigations of the reasons behind and the forces influencing the selection, purchase, use, and disposal of goods and services. Prerequisites: MRKT 305, Sophomore standing or higher, and declared COBPA majors only. F.S.
- **MRKT 311. Professional Selling. 3 Credits.** The professional selling process including prospecting, qualifying, need-discovery and development, relationship-building, presentations, handling objections, closing, and post-sale service. Prerequisites: MRKT 305, Sophomore standing or higher, and declared COBPA majors only. F.S.
- **MRKT 315. Retail Management. 3 Credits.** Application of marketing and financial principles to the planning and execution of retail management. Includes analyses of relevant institutions and interest groups. Prerequisites: MRKT 305; Sophomore, Junior or Senior Standing; declared CoBPA majors only. F.S.
- **MRKT 325. International Marketing. 3 Credits.** Survey of international business environment, with focus on elements of international marketing practices and their management. Prerequisites: MRKT 305; Sophomore, Junior or Senior Standing; declared CoBPA majors only. F.S.
- **MRKT 330. Marketing Research. 3 Credits.** The research process from a marketing perspective. Addresses problem formulation, research design, methodology, and appropriate statistical methods. Application of procedures appropriate for the analysis and interpretation of marketing data. Prerequisites: MRKT 305; Sophomore, Junior or Senior Standing; declared CoBPA majors only. F.S.
MRKT 340. Integrated Marketing Communications. 3 Credits.
This course focuses on the state-of-the-art strategic concept of integrated marketing communication (IMC). IMC incorporates advertising, sales promotions, publicity, public relations, personal selling, Internet, and any other means by which marketing information is communicated to people. The course will involve a synthesis of the theoretical, practical, and social considerations of IMC. Prerequisite: MRKT 305; Junior or Senior Standing; declared CoBPA majors only. F,S.

MRKT 347. Social Media. 3 Credits.
This course is an in-depth look at social networks, social media platforms and online advertising to offer students an advantage in many positions involving marketing, consulting and brand management both on the buyer and seller side of social media. Prerequisite: MRKT 305; Junior or Senior Standing; declared CoBPA majors. F.S.S.

MRKT 386. Field Experience in Marketing. 1-8 Credits.
Work opportunity to assist with marketing activities and understand the role of marketing for that company/organization (profit/nonprofit). Prerequisites: Minimum GPA of 2.5, MRKT 305, and consent of instructor. Repeatable to 8 credits. S/U grading. F.S.

MRKT 396. Directed Studies in Marketing. 1-3 Credits.
Research in some aspect of marketing. Written reports and collateral readings. Prerequisites: MRKT 310 and consent of instructor. F.S.S.S.

MRKT 397. Cooperative Education in Marketing. 1-2 Credits.
Compensated, on-the-job experience in various areas of marketing. Repeatable only to maximum of 8 credits. Prerequisites: MRKT 305 and consent of instructor. Repeatable to 8 credits. S/U grading. F.S.S.

MRKT 405. Brand and Product Management. 3 Credits.
The study of the theory and practice of managing brands and products as vital corporate assets and the focus of the marketing planning process. Prerequisites: MRKT 310 and MRKT 330; Junior or Senior Standing; declared CoBPA majors only. S.

MRKT 411. Sales Management. 3 Credits.
The practice of sales management including sales force recruiting, training, organization, motivation, compensation, and evaluation. Prerequisites: MRKT 305 and MRKT 311; Junior or Senior Standing; declared CoBPA majors only. S.

MRKT 430. Relationship Marketing. 3 Credits.
Relationship marketing is now a core, strategic element of virtually all marketing. Organizations increasingly stress the importance of cooperation with customers, communities, charities, and other partners. This course focuses primarily on marketing relationships in the Organization-to-Organization context. Prerequisites: MRKT 305 and MRKT 311; Junior or Senior Standing; declared CoBPA majors only. S.

MRKT 431. Customer Relationship Management (CRM). 3 Credits.
This course examines customer relationship management (CRM) and its application in marketing, sales, and service. It will include the use of Microsoft Dynamics CRM and Microsoft Social Engagement. Effective CRM strategies help companies align business processes with customer-centric strategies using people, technology, and knowledge. Companies strive to use CRM to optimize the identification, acquisition, growth and retention of desired customers to gain competitive advantage and maximize profit. Anyone interested in working with customers and CRM technology and would like to be responsible for the development of any major aspect of CRM will find this course beneficial. Emphasis is given on conceptual knowledge, real-world projects, and hands-on learning using Microsoft Dynamics CRM software. CRM training modules and software are used throughout the semester. Prerequisites: MRKT 305, Junior or Senior Standing, and declared CoBPA majors only. F.S.

MRKT 433. Negotiations for Sales and Relationship Managements. 3 Credits.
The primary focus of this course is placed on the theoretical, practical and experiential learning of the negotiations skills. Emphasis is placed on the specific negotiations skills required to successfully maneuver through the negotiated buyer-seller exchange environment. Prerequisite: MRKT 311 or consent of instructor. S.

MRKT 440. Special Topics in Marketing. 3 Credits.
Investigation of selected topics of importance to the marketing of goods, services, or ideas. May be taken a maximum of two times for credit. Prerequisites: MRKT 305; Junior or Senior Standing; declared CoBPA majors only. Repeatable to 6 credits. S.

MRKT 450. Marketing Management. 3 Credits.
Capstone course addressing the firm's micro and macro environments from a strategic marketing decision making perspective. Prerequisites: MRKT 305, MRKT 310, and MRKT 330; Senior Standing; declared CoBPA majors only. F.S.

MRKT 497. Internship in Marketing. 1-8 Credits.
Compensated, practical experience with selected participating firms. Repeatable only to maximum of 8 credits. Prerequisites: 9 hours of Marketing, GPA of 2.75, and consent of instructor. Repeatable to 8 credits. S/U grading. F.S.S.S.

Bachelor of Business Administration with Major in Marketing

Required 120 credit hours (36 of which must be numbered 300 or above) including:

I. Essential Studies Requirements (see University ES listing).

II. One of the following: MATH 103, or MATH 146, or MATH 165.

III. College of Business and Public Administration Requirements:

Total Credits: 24

V. College of Business & Public Administration Graduation Requirements:

1. Earn a minimum cumulative GPA of 2.50
2. Earn a minimum UND GPA of 2.50
3. Earn a minimum cumulative major GPA of 2.50 (business administration courses that apply toward the degree and major)
4. Earn a minimum UND major GPA of 2.50 (business administration courses that apply toward the degree and major)
5. Complete at least half of the business courses that apply toward the degree and major at UND

* No more than a total of 6 credits from MRKT 386 Field Experience in Marketing; MRKT 396 Directed Studies in Marketing; MRKT 397 Cooperative Education in Marketing; and MRKT 497 Internship in Marketing may be used to satisfy this requirement.

**Mathematics (Math)**

B.S. with Major in Mathematics (p. 155)

Minor in Mathematics (p. 155)

Minor in Mathematics for Elementary Education (p. 156)

Minor in Statistics (p. 156)

NOTE: PTP* indicates an appropriate score in the Placement Testing Program (PTP) is required.

**Courses**

MATH 103. College Algebra. 3 Credits.
Polynomial and rational functions, inverse functions, exponential and logarithmic functions, simple conics, systems of equations, determinants, arithmetic and geometric sequences, the Binomial Theorem. Sections meeting 5 days per week are offered for students determined eligible by the Math Department. Prerequisite: Appropriate score in the Placement Testing Program or MATH 93. F.S,SS.

MATH 105. Trigonometry. 2 Credits.
Angles, trigonometric functions and their inverses, solving triangles, trigonometric identities. Prerequisite: One year of high school geometry and either an appropriate score in the Placement Testing Program or MATH 93. S.

MATH 107. Precalculus. 4 Credits.
Equations and inequalities; polynomial rational, exponential, logarithmic and trigonometric functions; inverse trigonometric functions; algebraic and trigonometric methods commonly needed in calculus. Prerequisite: MATH 93 or an appropriate score in the Placement Testing Program. F.S,SS.

MATH 112. Transition to Calculus. 1 Credit.
This course is designed for students intending to take MATH 165. Calculus I who have mastered most of, but not all, the material covered in MATH 107. Pre-Calcus. Emphasis is therefore on topics such as inverse functions, partial fraction expansion, trigonometric identities, and applications of trigonometry, which are deemed most difficult for pre-calculus students. Prerequisite: MATH 107 or MATH 146 or an appropriate score in the Placement Testing Program. S/U grading. F.

MATH 115. Introduction to Mathematical Thought. 3 Credits.
The course will focus on analysis and interpretation of common types of mathematical arguments as well as having students construct their own arguments. A combination of topics will be included, such as: elementary combinatorics, probability, statistics, set theory, number theory, geometry and topology, mathematical logic, the mathematics of voting, etc. F.

MATH 146. Applied Calculus I. 3 Credits.
A nongrigorous introduction to differential and integral calculus. Topics include limits, continuity, differentiation and integration techniques, and applications. Prerequisites: MATH 103 or an appropriate score in the Placement Testing Program. F.S,SS.

MATH 165. Calculus I. 4 Credits.
Limits, continuity, differentiation, Mean Value Theorem, integration, Fundamental Theorem of Calculus. Prerequisite: an appropriate score in the Placement Testing Program or MATH 112 or completion of MATH 107 with a grade of C or better. F.S,SS.

MATH 166. Calculus II. 4 Credits.
Techniques and applications of integration, exponential and logarithmic functions, parametric equations, infinite sequences and series. Prerequisites: Completion of MATH 165 with a grade of C or better; or permission of the Mathematics Department. F.S,SS.

MATH 207. Introduction to Linear Algebra. 2 Credits.
A computational treatment of systems of linear equations, finite dimensional vector spaces, linear transformations, determinants, matrices, eigenvalues, eigenvectors, and diagonalizability. Prerequisite: MATH 165. F.S.

MATH 208. Discrete Mathematics. 3 Credits.
Introduction to Set Theory, Functions and Relations, Permutations and Combinations, Logic, Boolean Algebra, Induction, Difference Equations. Other topics from Graphs, Finite Automata and Formal Languages. Prerequisite: an appropriate score in the Placement Testing Program or MATH 103 or MATH 107. F.S,SS.

MATH 217. Introduction to Cultural Mathematics. 3 Credits.
This course covers mathematical concepts within the context of cultures. Mathematical ideas are investigated in topics such as number systems, calendars, art, kinship relations, divination, and games. Examples are taken from cultures in many parts of the world. The main emphasis in the course is on learning how cultural activities can be considered mathematical and often include non-trivial mathematical ideas. One or more case studies of particular cultures will also be included. The case studies will consist of investigations into several cultural aspects that have mathematical connections. Prerequisite: A grade of C or better in MATH 103. S. odd years.

MATH 265. Calculus III. 4 Credits.
Multivariate and vector calculus including partial derivatives, multiple integration, line and surface integrals, Green's Theorem, Stokes' Theorem, the Divergence Theorem. Prerequisite: MATH 166. F.S,SS.

MATH 266. Elementary Differential Equations. 3 Credits.
Solution of elementary differential equations by elementary techniques. Laplace transforms, introduction to matrix theory and systems of differential equations. Prerequisites: MATH 265 and proficiency in a programming language. F.S,SS.

MATH 277. Mathematics for Elementary School Teachers. 3 Credits.
Development of the number systems used in elementary schools. Includes some methods and work with laboratory materials. For elementary education majors only. Prerequisites: Admission to Teacher Education and either an appropriate score in the Placement Testing Program or MATH 103. F.S.

MATH 308. History of Mathematics. 3 Credits.
This course is on the conceptual and chronological history of mathematics. The course involves the interpretation and analysis of how and why mathematical ideas have developed over time, including political and cultural considerations. Topics include: numbers and counting systems, non-Western developments, mathematics of Egypt, Babylonia and Greece, early European developments, the Renaissance, the Scientific Revolution and the development of calculus, women in mathematics, twentieth century mathematics. Prerequisite: MATH 166 or equivalent, or consent of instructor. S.

MATH 315. Topics in Computational Mathematics. 1-3 Credits.
An introduction to mathematical methods useful in the computational analysis of problems in applied mathematics. Topics may include numerical methods, numerical simulation, symbolic computation, and theory of computation. May be repeated for credit with consent of instructor up to six credits. Prerequisites: MATH 266 and proficiency in a programming language, or consent of instructor. Repeatable to 6 credits. On demand.

MATH 321. Applied Statistical Methods. 3 Credits.
Introductory statistics for students with a background in single-variable calculus. Topics include descriptive statistics, continuous and discrete probability density functions, sampling distributions, point and interval estimation, and tests of hypotheses. Prerequisite: MATH 166. F.S.

MATH 330. Proof, Set Theory, and Logic. 3 Credits.
Methods of proof, axioms and operations on sets, mathematical logic, relations and functions, development of the natural and real number systems, including field axioms and the completeness axiom for the real numbers. Prerequisite: MATH 166 or consent of instructor. F.S.

MATH 352. Introduction to Partial Differential Equations. 3 Credits.
Partial differential equations, Fourier series, special functions, series solutions to ordinary differential equations. Prerequisite: MATH 266. S.
MATH 377. Geometry Elementary Teachers. 1-3 Credits. Experimental and inductive discovery in building geometric concepts at the elementary school level. Prerequisite: For elementary education majors only. On demand.

MATH 397. Cooperative Education. 1-8 Credits. A practical work experience with an employer closely associated with the student's academic area. 1-8 credits repeatable to 18. Arranged by mutual agreement among student, department, and employer. A maximum of 6 cooperative education credits may be applied against requirements for a Math major. Prerequisites: 15 completed credits in math including MATH 165, MATH 166, and MATH 265, in addition to standard co-op requirements (see department for approval). Repeatable to 18 credits. S/U grading. F,S,SS.

MATH 405. Selected Topics in Mathematics. 1-3 Credits. May be repeated to maximum of six credits. Prerequisite: Permission of the Mathematics Department. Repeatable to 6 credits. On demand.

MATH 408. Combinatorics. 3 Credits. Introduction to the techniques and reasoning needed in combinatorial problem-solving. The course may include topics related to combinatorics, such as graph theory. Prerequisites: MATH 166 and MATH 208. S. odd years.

MATH 409. Geometry. 3 Credits. Metric and synthetic approach to Euclidean geometry. The usual topics in elementary geometry treated in a mathematically logical way. Topics include congruence, inequalities, parallelism, similarity, area, solid geometry and the circle. Prerequisite: MATH 208 or MATH 330. F.

MATH 412. Differential Equations. 3 Credits. Basic types of ordinary differential equations. Existence and uniqueness of solutions. Prerequisite: MATH 266. S. even years.

MATH 415. Topics in Applied Mathematics. 1-3 Credits. An introduction to selected areas in applied mathematics chosen from a variety of topics including: Applied algebra, difference equations, linear programming, modeling and simulation, optimization, partial differential equations and computers in mathematics. Topics to be considered will be illustrated with examples and practical applications. May be repeated for credit with consent of instructor up to a maximum of six credits. Prerequisites: MATH 265 and consent of instructor. Repeatable to 6 credits. On demand.

MATH 416. Topics in Statistics. 1-3 Credits. An introduction to a variety of topics in statistics including: Linear models in categorical analysis, Bayesian methods, decision theory, ridge regression, Non parametric techniques, stochastic games and models. The number of topics to be considered during a semester will be limited to permit greater depth of coverage and sufficient practical illustrations. May be repeated for credit with consent of instructor up to six credits. Prerequisites: MATH 265 and MATH 321 or consent of instructor. Repeatable to 6 credits. On demand.

MATH 421. Statistical Theory I. 3 Credits. Discrete and continuous random variables, expectation, moments, moment generating functions, properties of special distributions, introduction to hypothesis testing, sampling distributions, Central Limit Theorem, curve of regression, correlation, empirical regression by least squares, maximum likelihood estimation, Neyman-Pearson lemma, likelihood ratio test, power function, chi-square tests, change of variable, "t" and "F" tests, one and two-way ANOVA, nonparametric methods. Prerequisite: MATH 265. F.

MATH 422. Statistical Theory II. 3 Credits. Discrete and continuous random variables, expectation, moments, moment generating functions, properties of special distributions, introduction to hypothesis testing, sampling distributions, Central Limit Theorem, curve of regression, correlation, empirical regression by least squares, maximum likelihood estimation, Neyman-Pearson lemma, likelihood ratio test, power function, chi-square tests, change of variable, "t" and "F" tests, one and two-way ANOVA, nonparametric methods. Prerequisite: MATH 421. S.

MATH 425. Cryptological Mathematics. 3 Credits. This course develops the math behind elementary symmetric-key cryptoschemes and a variety of public-key schemes. Modern block ciphers may be discussed. Prerequisite: MATH 208. F, odd years.

MATH 431. Introduction to Analysis I. 3 Credits. Development of the real number system, functions, sequences, limits, continuity, and differentiation. Prerequisite: MATH 330 or consent of instructor. F.

MATH 432. Introduction to Analysis II. 3 Credits. A continuation of MATH 431. topics in the second semester include integration, partial differentiation, infinite series, power series and vector analysis. Prerequisite: MATH 431. S.

MATH 435. Theory of Numbers. 3 Credits. Basic properties of numbers, including divisibility, primes, congruences, Diophantine equations and residue theory. Prerequisite: MATH 208 or 330. S.

MATH 441. Abstract Algebra. 3 Credits. Rings, integral domains, fields, elements of group theory. Prerequisite: MATH 330 or consent of instructor. F.

MATH 442. Linear Algebra. 3 Credits. A theoretical treatment of systems of linear equations, matrices, vector spaces, linear transformations and elementary canonical forms. Prerequisites: MATH 207 and MATH 330 or consent of instructor. S.

MATH 460. Mathematical Modeling. 3 Credits. The primary goal of the course is to present the mathematical analysis provided in scientific modeling. Topics may include population modeling, mechanical vibrations, traffic flow, epidemic modeling, queues and decay processes. Prerequisites: MATH 266 and MATH 207 or consent of instructor. On demand.

MATH 461. Numerical Analysis. 3 Credits. Numerical techniques for: the solution of equations in one or several unknowns, approximate integration, differential equations, approximation theory, optimization theory and matrix analysis. Corresponding error analysis will be discussed. Prerequisites: MATH 266 and a scientific programming language. On demand.

MATH 471. Introduction to Complex Variables. 3 Credits. The complex plane, analytic functions, complex integration, power series, the theory of residues and contour integration, conformal mapping, Fourier and Laplace transformations, and applications. Prerequisite: MATH 265. F, even years.

MATH 477. Topics in Elementary School Mathematics. 1-3 Credits. Selected topics from mathematical concepts appropriate to the elementary school curriculum. May be repeated for credit up to six credits. Prerequisite: Elementary education majors only. Repeatable to 6 credits. On demand.

MATH 479. Topics in Mathematics Education. 1-3 Credits. Selected topics from mathematical concepts appropriate for K-12 educators. May be repeated for up to six credits. Prerequisite: Instructor consent. Repeatable to 6 credits. On demand.

MATH 488. Senior Capstone. 3 Credits. This course is designed to help students transition into working mathematicians. Thus the course will address 1) written and oral expression of mathematical material and concepts, 2) research and problem solving in mathematics, and 3) technology in mathematics, and its appropriate use. Material will build on the core areas of calculus, linear algebra, and differential equations. Prerequisites: Senior standing with a major in mathematics. F.

MATH 494. Reading Course in Mathematics. 1-3 Credits. Directed individual reading on selected topics not developed in other courses. Repeatable to six credits. Prerequisites: Consent of instructor. Repeatable to 6 credits. F,S,SS.

MATH 495. Readings in Mathematics. 1-3 Credits. Directed individual reading on selected topics not developed in other courses. Repeatable to six credits. Prerequisite: Consent of instructor. Repeatable to 6 credits. F,S,SS.
MATH 92. Algebra Prep II. 2 Credits.
This course continues the development of the fundamental skills required for the successful completion of studies in college level mathematics courses. Topics include the solutions of linear equations and inequalities, formula manipulation, Cartesian geometry and the graphing of linear equations and inequalities, systems of equations, and an introduction to functions. Study skills will be incorporated throughout the course. Credit earned does not count toward any degree, nor does it transfer. Prerequisite: Placement by appropriate ACT Math sub-score or Math Placement Exam score. F,S,SS.

MATH 93. Algebra Prep III. 2 Credits.
This course continues the development of the fundamental skills required for the successful completion of studies in college level mathematics courses. Topics include exponents and radicals, algebraic manipulation involving polynomial and rational forms, and unit analysis. Study skills will be incorporated throughout the course. Credit earned does not count towards any degree, nor does it transfer. Prerequisite: MATH 92 or Placement by appropriate ACT Math sub-score or Math Placement Exam score. F,S,SS.

Bachelor of Science with Major in Mathematics

All students are urged to take courses in disciplines which make use of mathematics such as Physics, Chemistry, Engineering, Computer Science and Biology. Students considering graduate school are strongly urged to take MATH 441 Abstract Algebra, and MATH 432 Introduction to Analysis II. Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing).

II. Non-Mathematics Requirements:

Computer Science course as approved by the Mathematics Department.

III. The Following Curriculum of 38 Major Hours:

A. Mathematics Core

<table>
<thead>
<tr>

D. Electives

Math courses numbered 208 and above, excluding MATH 277 Mathematics for Elementary School Teachers, MATH 399 Methods for Secondary Teachers: Mathematical Content Knowledge, MATH 377 Geometry Elementary TeachersMATH 400 Methods for Teaching Middle and Secondary Mathematics; Pedagogical Content Knowledge, MATH 477 Topics in Elementary School Mathematics (3-9 to bring the total number of credits to 38)

Teacher Licensure

Through a partnership with the College of Education and Human Development and the Department of Teaching and Learning, students may seek secondary licensure in Mathematics. The following program of study must be completed:

I. Mathematics program of study

1. The Essential Studies, Non-Mathematics, and Mathematics Core requirements as described above.
2. The following courses to satisfy the breadth requirement:
   a. Theoretical Mathematics: MATH 409 Geometry
   c. Teaching Content Requirements: MATH 208 Discrete Mathematics, MATH 308 History of Mathematics
3. The following sequence:
   MATH 435 Theory of Numbers & MATH 441 Abstract Algebra

II. Admission to the Secondary Program, normally while taking T&L 250 Introduction to Education. (See College of Education and Human Development (https://education.und.edu) for admission and licensing requirements.)

III. The program in Secondary Education (see Teaching & Learning (p. 206)):

Mathematics majors seeking secondary licensure must have an advisor in both the Mathematics Department and the Department of Teaching and Learning.

Minor in Mathematics

Required 20 credits as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 165</td>
<td>Calculus I</td>
<td>8</td>
</tr>
<tr>
<td>&amp; MATH 166</td>
<td>and Calculus II</td>
<td>8</td>
</tr>
<tr>
<td>Math electives numbered 207 or higher</td>
<td>12</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 20

University of North Dakota
not including MATH 217 Introduction to Cultural Mathematics, MATH 277 Mathematics for Elementary School Teachers, MATH 377 Geometry Elementary Teachers, MATH 400 Methods for Teaching Middle and Secondary Mathematics; Pedagogical Content Knowledge and MATH 477 Topics in Elementary School Mathematics.

MATH 405 Selected Topics in Mathematics, MATH 415 Topics in Applied Mathematics, MATH 416 Topics in Statistics, MATH 494 Reading Course in Mathematics, and MATH 495 Readings in Mathematics may be used only with prior approval from the Mathematics Department.

**Minor in Mathematics for Elementary Education**

Required 20 credits of Mathematics, including:

- MATH 115 Introduction to Mathematical Thought 3
- MATH 277 Mathematics for Elementary School Teachers 3
- MATH 377 Geometry Elementary Teachers 3
- MATH 477 Topics in Elementary School Mathematics 3

Select at least one of the following: 3-4

- MATH 146 Applied Calculus I
- MATH 165 Calculus I
- MATH 166 Calculus II
- MATH 208 Discrete Mathematics

All electives may be selected from Mathematics courses above Math 093.

**Minor in Statistics**

**Minor in Statistics (Plan A)**

**Prerequisites**

- MATH 165 Calculus I 4
- MATH 166 Calculus II 4
- MATH 265 Calculus III 4

**Required courses**

- MATH 421 Statistical Theory I 3
- MATH 422 Statistical Theory II 3

Select one of the following: 3

- BIOL 470 Biometry
- EFR 513 Large Dataset Management and Analysis
- EFR 514 Discourse Analysis
- CHE 515 Design of Engineering Experiments
- ECON 410 Empirical Methods in Economics I
- EE 411 Communications Engineering
- MATH 321 Applied Statistical Methods
- MATH 403 Theory of Probability
- MATH 415 Topics in Applied Mathematics
- PSYC 541 Advanced Univariate Statistics
- PSYC 542 Multivariate Statistics for Psychology
- PSYC 543 Experimental Design
- SOC 521 Advanced Statistical Methods

Total Credits 21

**Minor in Statistics (Plan B)**

**Prerequisites**

- MATH 146 Applied Calculus I 3

**Required courses**

- BIOL 470 Biometry 4
- EFR 513 Large Dataset Management and Analysis 3
- EFR 514 Discourse Analysis 3
- EFR 516 Statistics II 3
- CHE 515 Design of Engineering Experiments 3

Select one of the following: 3

- ECON 210 Introduction to Business and Economic Statistics
- PSYC 241 Introduction to Statistics
- SOC 326 Sociological Statistics

Total Credits 22

**Mechanical Engineering (ME)**

B.S. in Mechanical Engineering (p. 158)

**Courses**

**ME 101. Introduction to Mechanical Engineering. 3 Credits.**

This course encourages the development of visualization, technical communication, documentation, and fabrication skills including 3-D geometric modeling as applied to CAD/CAM applications using current methods and techniques commonly found in industry. Students will receive an introduction to engineering design and the analysis of a machine or system, including team problem solving. Approximately two-thirds of the course is classroom-based instruction and one-third is laboratory (computer lab and/or shop) instruction and experimentation. Prerequisites: Mechanical Engineering major. F,S.

**ME 102. Professional Assessment and Evaluation. 1 Credit.**

This course is designed for students with industrial experience. Students complete a portfolio documenting educational and work experiences for evaluation, and individualized curriculum plans are developed. Various academic programs in engineering are also introduced. Based on the assessment and evaluation, some engineering requirements may be waived. S/U grading only. Prerequisites: Work experience and/or technician school training plus completion of CHEM 121, CHEM 121L, PHYS 251, PHYS 252, MATH 165, MATH 166, and MATH 265. S/U grading. F,S,SS.

**ME 201. Student Design. 2 Credits.**

Team problem solving with design and build of a machine or mechanism, typically ASME Design Contest project. Machine shop safety and introduction to fabrication processes. Special topic lectures on contemporary Mechanical Engineering issues and research activities. Prerequisite: ME 101 or ENGR 101. Corequisites: PHYS 251 or ENGR 201. F.

**ME 290. Laboratory Problems. 1-3 Credits.**

Laboratory investigations of interest to student and faculty. Repeatable to a maximum of 6 credits. Prerequisite: Consent of instructor. Repeatable to 6 credits. On demand.

**ME 301. Materials Science. 3 Credits.**

The theory of the structure of matter, the prediction and evaluation of engineering properties of materials. Prerequisites: CHEM 121 with a grade of C or better, PHYS 252 with a grade of C or better, and admission to the professional Mechanical Engineering program. F.

**ME 306. Fluid Mechanics. 3 Credits.**

Fluid properties; fluid statics and dynamics; transport theory and transport analogies, conservation of mass, energy, and momentum; dimensional analysis; boundary layer concepts; pipe flows; compressible flow; open channel flow. Prerequisites: PHYS 251 and MATH 265, both with a grade of C or better. F,S.
ME 313. Material Properties and Selection. 3 Credits.
Study of relationships between materials, manufacture and design of engineering component. Prerequisite: ME 301 and admission to the professional Mechanical Engineering program. On demand.

ME 322. Design of Machinery. 3 Credits.
Analytical study of motions, velocities, accelerations and forces for design of machine elements. Introduction to spatial mechanisms, robotics, and actuator selection. Prerequisites: ENGR 200 with a grade of C or better, ENGR 202 with a grade of C or better, and admission to the professional Mechanical Engineering program. F,S.

ME 323. Machine Component Design. 3 Credits.
Design of machine elements such as shafts, bearings, gears, clutches, springs, threaded components, and bolted, riveted, welded, and bonded joints. Stress and failure theory analyses of the implementation of machine components are covered. Prerequisites: ENGR 203 with a grade of C or better, and admission to the professional Mechanical Engineering program. Corequisite: ME 323L. S.

ME 323L. Machine Component Design Laboratory. 1 Credit.
Application of design and analysis tools developed in the Machine Component Design course. Laboratory emphasizes creative design, analysis techniques, construction methods, and design report writing. Prerequisite: Admission to the professional Mechanical Engineering program. Corequisite: ME 323. S.

ME 341. Thermodynamics. 3 Credits.
Fundamental energy relationships applied to both closed and open systems. Determination of thermodynamic properties, first and second laws of thermodynamic processes and basic cycles. Prerequisites: PHYS 251 and MATH 166, both with a grade of C or better. F,S.

ME 342. Intermediate Thermodynamics. 3 Credits.
Power and refrigeration cycles. Exergy analysis, psychrometrics, reacting and non-reacting mixtures. Prerequisite: ME 341 with a grade of C or better and admission to the professional Mechanical Engineering program. On demand.

ME 370. Engineering Disasters and Ethics. 3 Credits.
Engineering disasters will be the basis for teaching an ethics course to engineering students. Starting with the premise that most people know the difference between right and wrong (this is not a course on criminal activity!), the course explores how engineers, in spite of their best intentions, sometimes create disastrous situations. The effect of cumulative adverse detail is difficult to teach except with case studies. Also explored is cost vs. safety trade-offs, the role of lawsuits, and government regulation. Prerequisites: Junior or Senior standing. F.

ME 388. Undergraduate Research in Mechanical Engineering. 3 Credits.
Students will conduct a supervised independent study in a research lab or as part of a design team culminating in a research report. Prerequisite: Approval from department chair and faculty sponsor. S.

ME 397. Cooperative Education. 1-2 Credits.
A practical work experience with an employer closely associated with the student's academic area arranged by mutual agreement among student, department and employer. Repeatable to 12 credits. Prerequisite: Admission to the professional Mechanical Engineering program. Repeatable to 12 credits. S/U grading. F,S,SS.

ME 418. Manufacturing Processes. 3 Credits.
Descriptive and analytical study of manufacturing methods and economics as they pertain to machining, metrology and automation. Prerequisites: ENGR 203 with a grade of C or better, ME 301, and admission to the professional Mechanical Engineering program. S.

ME 418L. Manufacturing Processes Laboratory. 1 Credit.
Application of manufacturing methods in the Manufacturing Processes course including casting, machining, welding/soldering/brazing, forming (metals and plastics), heat treatment, metrology and automation. Prerequisite or Corequisite: ME 418. S,SS.

ME 420. Composite Materials. 3 Credits.
Prerequisites: ME 301 and admission to the professional Mechanical Engineering program. On demand.

ME 424. Systems Dynamics and Control. 3 Credits.
Theory, analysis, and design of linear closed-loop control systems containing electronic, hydraulic, and mechanical components. Differential equations, LaPlace transforms, Nyquist and Bode diagrams are covered. Prerequisites: MATH 266, ME 322, and admission to the professional Mechanical Engineering program. On demand.

ME 425. Numerical Methods for Engineers Using Advanced MATLAB Programming Techniques. 3 Credits.
In this course, numerical methods for solving differential equations, advanced Matlab programming techniques and their applications to practical engineering problems will be presented. Topics covered include Matlab programming, solving systems of equations, linear algebra, function and data manipulation, and differential equations. For students who enroll for graduate credit, they will apply class concepts to solve an engineering problem related to their research problems as a course project. Prerequisites: ENGR 202, MATH 266, and admission to PDP. S.

ME 426. Mechanical Vibrations. 3 Credits.
Vibration analysis and design as it applies to single and multi degree freedom mechanical systems, isolation and absorption of vibration, vibration of continuous systems, numerical methods of solution. Prerequisites: ENGR 202 with a grade of C or better, MATH 266, and admission to the professional Mechanical Engineering program. S.

ME 428. Advanced Manufacturing Processes. 3 Credits.
Individual projects involving the manufacturing economics and flow charts for selected products and basic technical principles of manufacturing processes. Includes laboratory. Prerequisites: ME 418 and admission to the professional Mechanical Engineering program. On demand.

ME 429. Introduction to Finite Element Analysis. 3 Credits.
Finite element analysis is introduced as a design tool. Emphasis is given to modeling techniques and element types. Matrix methods are used throughout the class. Prerequisites: ENGR 203 with a grade of C and admission to the professional Mechanical Engineering program. On demand.

ME 439. Introduction to Robotics. 3 Credits.
A systems engineering approach to robotics. Presents an introduction to manipulators, sensors, actuators, and end effectors for automation. Topics covered include kinematics, dynamics, control, programming of manipulators, pattern recognition, and computer vision. Prerequisites: ENGR 200 with a grade of C or better, MATH 166 with a grade of C or better, and admission to the professional Mechanical Engineering program. On demand.

ME 446. Gas Turbines. 3 Credits.
General principles, thermodynamics, and performance of gas turbine engines. Design consideration of engine components. Prerequisites: ME 341 with a grade of C or better and admission to the professional Mechanical Engineering program. On demand.

ME 449. Internal Combustion Engines. 3 Credits.
Fundamentals of spark ignition and compression ignition engines, related components and processes. Prerequisites: ME 342 and admission to the professional Mechanical Engineering program. On demand.

ME 451. Heating and Air Conditioning. 3 Credits.
Psychrometrics, heating and cooling loads and analysis of air conditioning systems. Prerequisites: ME 342 and admission to the professional Mechanical Engineering program or consent of instructor. Corequisite: ME 474. S.

ME 454. Computational Fluid Dynamics. 3 Credits.
Provides a practical experience using computational fluid dynamics and provides supporting material in fluid dynamics, which is useful in understanding the need to resolve grids in boundary layers and other regions of high velocity gradients. The course is structured as half lecture and half laboratory. The lecture covers topics related to laminar and turbulence boundary layers with and without acceleration, turbulence modeling, wakes and jets. The laboratory provides experience in building grids using the program GAMBIT, the solid/fluid modeling and meshing program, and calculating solutions using FLUENT, a commercial flow solver. Prerequisites: ME 306, MATH 266, and admission to the professional Mechanical Engineering program. On demand.

ME 466. Aerodynamics. 3 Credits.
ME 466 Aerodynamics is an introductory course on the fundamentals of aerodynamics for engineers. The class will cover a review of fluid mechanics including boundary layers and compressible flow. The course topics include parameters for airfoil and wings, incompressible flow over airfoils and wings of infinite and finite span, compressible and transonic flow over wings and aircraft, supersonic flow over thin airfoils, and supersonic flow over wings and airplane configurations. The course will follow a standard text "Aerodynamics for Engineers," 6th Edition by Bertin and Cummings. The course will qualify as either a thermal fluid science elective or an aerospace concentration elective. Prerequisites: ME 306 and ME 341. S, odd years.
ME 474. Fundamentals of Heat and Mass Transfer. 3 Credits.
Convection, conduction, radiation, dimensional analysis and design of heat transfer equipment. Prerequisites: MATH 266, ME 306, ME 341 with a grade of C or better, and admission to the professional Mechanical Engineering program. S.

ME 476. Intermediate Fluid Mechanics. 3 Credits.

ME 477. Compressible Fluid Flow. 3 Credits.
Introduction to the theory and application of one-dimensional compressible flow. Course topics include isentropic flow in converging and converging-diverging nozzles, normal shock waves, oblique shock waves, Prandtl-Meyer flow, flow with friction and heat addition. Prerequisite: Admission to the professional Mechanical Engineering program. Prerequisites or Corequisites: ME 341 with a grade of C or better and ME 306. On demand.

ME 480. Mechanical Engineering Seminar. 3 Credits.
Reports and presentations on current developments in mechanical engineering and engineering ethics. Prerequisites: Senior Standing and admission to the professional Mechanical Engineering program. F.

ME 483. Mechanical Measurements Laboratory. 3 Credits.
Experiments and written reports on the operation and performance of instruments and basic mechanical engineering equipment. Prerequisites: ENGR 206 and admission to the professional Mechanical Engineering program. F.

ME 484. Ground Vehicle Dynamics. 3 Credits.
ME 484 is a junior and senior level elective course. This course deals with the design of ground vehicle suspension and steering systems. Vehicle ride, handling and safety systems are covered along with passive and active suspension control. Prerequisite: ME 322 and admission to the professional Mechanical Engineering program or consent of instructor. On demand.

ME 485. Multiphysics Modeling. 3 Credits.
Theory and techniques of modeling coupled thermal, fluid, mechanical, and/or electrical fields in components design. The focus is on the fundamental techniques used to simultaneously derive and solve coupled equations and the use of commercial multi physics finite element software. Prerequisite: ME 323. S.

ME 487. Engineering Design. 2 Credits.
The first course of a two-course sequence in Engineering Design, students will establish important features of the machine or system to be designed, perform market analysis, establish design objectives, explore alternatives, conduct research, specify constraints. Prerequisites: ME 322, ME 323, ME 323L, ME 474 or any one elective from the thermal science group, and admission to the professional Mechanical Engineering program. Corequisite: ME 483. Prerequisite or Corequisite: ENGR 460. F.

ME 488. Engineering Design. 3 Credits.
Systematic study and practice essential to the optimal design of a complete machine or system, utilizing economic and social constraints together with current mechanical and thermal design techniques. The course is a continuation of ME 487 taken the preceding semester. Prerequisites: ME 487 and admission to the professional Mechanical Engineering program. S.

ME 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Repeatable to 9 credits. Prerequisites: Consent of the Department, approval of the Honors Committee, and admission to the professional Mechanical Engineering program. Repeatable to 9 credits. F.S.

ME 490. Special Laboratory Problems. 1-3 Credits.
Laboratory investigations of interest to students and faculty. Repeatable to maximum of 6 credits. Prerequisites: Consent of instructor and admission to the professional Mechanical Engineering program. Repeatable to 6 credits. On demand.

Bachelor of Science in Mechanical Engineering

Required 129 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

Technical Electives and Optional Concentrations

One technical elective must be taken from each stem unless the student is pursuing the Aerospace Concentration (see below). Students may receive an optional concentration, documented on the transcript, in one of the listed stems as indicated. Students who satisfactorily complete two full-time (40 hours/wk) or three part-time (20 hours/wk) ME 397 Cooperative Education experiences for a combined total of at least three credit hours are granted a waiver for one technical elective, provided one of the Cooperative Education experiences lasts for the duration of either a fall or spring semester. The waived technical elective is considered as elective at large and is not specified into any one of the three stems listed below.

I. Mechanical Design Stem

Manufacturing and Materials Concentration - 129 hours

Requirements: ME 418 Manufacturing Processes and any four of the Manufacturing and Materials Stem technical electives.

IV. Aerospace Concentration - 134 hours

Requirements: students must complete AVIT 102 Introduction to Aviation (5 credits) plus six technical electives. AVIT 102 Introduction to Aviation includes earning a private pilot license and is recommended for the summer session between the freshman and sophomore years.

Technical electives must be chosen from the aerospace group of electives as identified by # in the above technical elective listing. One of the technical electives must be either ME 429 Introduction to Finite Element Analysis or ME 464 Computational Fluid Dynamics. ME 490 Special Laboratory Problems or an AE 590 Special Topics may also be included in the aerospace group at the discretion of the Mechanical Engineering Chair.

Medical Laboratory Science (MLS)

B.S. in Medical Laboratory Science (p. 161)
Certificate in Medical Laboratory Science (4+1 Track) (p. 162)

Courses

MLS 101. Orientation to Medical Laboratory Sciences. 2 Credits.
Introduction to the role, ethics, conduct, certification, education, employment, and fundamental knowledge and skills related to medical laboratory science. F.

MLS 234. Human Parasitology. 2 Credits.
Physiological aspects of human parasites, their symbiotic host parasite relationships and clinical diagnostic techniques. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.S.S.S.

MLS 234L. Human Parasitology Laboratory. 1 Credit.
Laboratory methods for the identification and diagnosis of human parasites. Prerequisites: MLS, Categorical Certificate Clinical Chemistry/Urinalysis, Categorical Certificate Hematology/Hemostasis, Categorical Certificate Immunohematology or Categorical Certificate Microbiology students only. F.

MLS 301. Immunology. 3 Credits.
Principles of clinical immunology focusing on the cellular and molecular nature of antigens and immunoglobulin, the immune response, immunogenetics, and immune mediated disease. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.
MLS 325. Hematology. 3 Credits.
Identification of normal and abnormal blood cells in various hematological disorders. Theory and application of hematology procedures. Theory and mechanisms of hemostasis. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

MLS 325L. Hematology Laboratory. 2 Credits.
Morphologic examination of blood and bone marrow and laboratory testing used in hematological study. F,S,SS.

MLS 336. Laboratory Calculations. 1 Credit.
Calculations used in the clinical laboratory including measurement systems, dilutions, graphing, solution chemistry, statistics of quality control and research interpretation. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

MLS 340. Molecular Diagnostics. 2 Credits.
An introduction to specific molecular biology application in the laboratory and a discussion of cell biology, DNA chemistry, genetics, nucleic acid extraction and modification, blotting, polymerase chain reactions, and probes in relation to diagnostic investigations. Prerequisites: MLS program students only. S.

MLS 340L. Molecular Diagnostics Laboratory. 1 Credit.
Application of molecular techniques including the operation of molecular based instrumentation, DNA extraction and measurement, blotting, polymerase chain reactions, and utilization of probes. Prerequisites: MLS program students only. S.

MLS 380. Professional Issues in Clinical Laboratory Science. 1 Credit.
Discussion of CLS professional issues, ethics, current topics of healthcare delivery, governmental regulations, societal concerns, cultural diversity, disease prevention, research and environment. Prerequisites: MLS Program Students Only. SS.

MLS 394. Medical Microbiology. 2 Credits.
Medically important microorganisms are identified using a wide variety of clinical techniques. Included in the discussion will be susceptibility studies and the correlation of the presence of microorganisms to health and disease. Prerequisites: MLS, Categorical Certificate Clinical Chemistry/Urinalysis, Categorical Certificate Hematology/Hemostasis, Categorical Certificate Immunohematology or Categorical Certificate Microbiology students only. S.

MLS 399. Special Topics in Clinical Laboratory Science. 1-13 Credits.
Lecture, discussion, and readings on topics of current interest in the clinical laboratory sciences. Prerequisites: MLS Program Students Only. Repeatable to 13 credits. F,S,SS.

MLS 430. Clinical Practicum I. 12 Credits.
Applied theory and practice at the clinical affiliate. S/U grading. F.

MLS 440. Clinical Practicum II. 12 Credits.
Techniques and practice in the clinical affiliate. S/U grading. S.

MLS 460. Laboratory Practice. 2 Credits.
This course represents an overview of standard laboratory practices including safety, glassware, microscopes, centrifuges, balances, specimen collection and handling. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F,S,SS.

MLS 464. Clinical Review. 3 Credits.
Emphasis is on concepts related to the role of a clinical laboratory scientist. Analysis and evaluation focuses on the theories of immunohematology, clinical chemistry, microbiology, hematology and other areas contributing to clinical application. F.

MLS 465. Clinical Laboratory Management. 3 Credits.
Management practices in the clinical laboratory including concepts related to service and quality, information management, financial management, personnel management, laboratory education and research. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F,S,SS.

MLS 471. Clinical Chemistry I. 2 Credits.
Theories and principles of clinical chemistry procedures are discussed as well as how the results of these procedures correlate to health and disease. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. SS.

MLS 472. Pre-analytical Skills. 1 Credit.
Theory and practice of phlebotomy in the clinical setting, specimen processing, review of state and federal regulations, safety and biohazard compliance, interpersonal relationship skills. Prerequisites: MLS Program Students Only. SS.

MLS 473. Clinical Hemostasis I. 2 Credits.
Physiologic mechanisms of normal human hemostasis as well as hereditary and acquired defects. Laboratory techniques performed and discussed are screening tests and specific assays for abnormalities, procedures to monitor therapeutic measures and practice and maintenance of current instrumentation. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. SS.

MLS 474. Clinical Urinalysis I. 2 Credits.
Theory, techniques and practice of microscopy and urinalysis with emphasis on identification of elements in the sediment. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. SS.

MLS 477. Clinical Immunohematology I. 1 Credit.
Theory of modern transfusion techniques, component therapy, and quality assurance. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. SS.

MLS 477L. Clinical Immunohematology I Lab. 1 Credit.
Practical application of modern transfusion techniques, component therapy, and quality assurance. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. SS.

MLS 478. Clinical Microbiology I. 2 Credits.
Groups of medically important bacteria are studied and correlated to laboratory practice in identification. Included in the discussions are antibiotic susceptibility testing, quality control, and methods of identification including rapid, automated, and traditional methods. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. SS.

MLS 479. Clinical Hematology I. 2 Credits.
Emphasis on interpretive correlation of hematology findings and pathophysiology. Topics of current interest and advances in hematology. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. SS.

MLS 480. Clinical Immunohematology II. 2 Credits.
Applied theory and modern transfusion at the clinical affiliate. Offered annually. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only.

MLS 481. Clinical Chemistry II. 2 Credits.
Applied theory and practice in clinical chemistry at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

MLS 483. Clinical Hemostasis II. 1 Credit.
Techniques and practice in routine phlebotomy and hemostasis at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

MLS 484. Clinical Microbiology II. 2 Credits.
Applied theory and practice in clinical microbiology at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

MLS 485. Clinical Urinalysis II. 1 Credit.
Applied theory and practice in urinanalysis and observation, practice, or research in specialized areas or settings at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

MLS 487. Medical Mycology. 1 Credit.
Comparative morphology, physiology and pathogenicity of medically important fungi. Laboratory methods for identification emphasize interpretation and evaluation of results including the recognition of contaminating organisms. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.

MLS 488. Clinical Hematology II. 2 Credits.
Applied theory and practice in clinical hematology at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. F.
MLS 489. Clinical Body Fluids. 1 Credit.
Overview of the theory and practice in manual procedures of human body fluids. The body fluids to be discussed include: spinal, synovial and amniotic fluid, transudates and exudates, fecal specimens, gastric, sweat, and other body fluid secretions. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. S.

MLS 490. Financial and Quality Management of the Clinical Laboratory. 3 Credits.
A capstone course designed to provide senior students with the skills to manage a clinical laboratory. The course brings together previous content with a focus on laboratory profitability, quality management, and quality improvement. Offered annually. Prerequisites: Enrollment in clinical practicum coursework is the corequisite; MLS program students only. S.

MLS 491. Clinical Chemistry III. 2 Credits.
Techniques and practice in clinical chemistry at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. S.

MLS 492. Clinical Immunohematology III. 2 Credits.
Techniques and modern transfusion practices at the clinical affiliate. Prerequisites: MLS, Clinical Chemistry/Urinalysis, Hematology/Hemostasis, Immunohematology or Microbiology program students only. S.

MLS 493. Laboratory Calculations. 1 Credit.
A capstone course designed to provide senior students with the skills to manage a clinical laboratory. The course brings together previous content with a focus on laboratory profitability, quality management, and quality improvement. Offered annually. Prerequisites: Enrollment in clinical practicum coursework is the corequisite; MLS program students only. S.

Bachelor of Science in Medical Laboratory Science

The Medical Laboratory Science (MLS) courses are listed.

Required: 126 credits (36 of which must be numbered 300 or above, and 60 credits of which must be from a four-year institution) including:

I. Essential Studies Requirements (see University ES listing).
II. MLS Curriculum Requirements:

Certificate in Medical Laboratory Science Program (4+1 Track)

Students enrolled in the certificate program (4+1 track) have earned a baccalaureate degree from a regionally accredited college or university. Prior to entering the final clinical year of the professional program, the student must complete specific prerequisite courses. The final clinical year is the same as the traditional (2+2 track) and the Western College Alliance (3+1 track) student experience. The 4+1 student earns a certificate in Medical Laboratory Science from the University of North Dakota upon successful completion of all courses and is eligible to complete the national certification exam. If a student wishes to earn a second baccalaureate degree in Medical Laboratory Science from the University of North Dakota, the student must also have completed coursework to meet the Essential Studies requirements.

* Available online from the MLS Program
** Offered as an intensive laboratory on campus in May

When a student is registered in 300 and 400 level MLS courses a specific MLS tuition is assessed.

Upon successful completion of the prerequisite coursework, the 4+1 student applies to the second year of the professional program (see BS MLS Professional Curriculum Year 2 previously listed). The applicant must have a cumulative GPA of 2.8, and no more than one D in any math or science course. Exceptions for acceptance and continuance may be made by petitioning the Department of Medical Laboratory Science Professional and Academic Standards Committee.

Upon successful completion of the 4+1 program of study, the student will earn a certificate in MLS from UND and will be eligible to complete the national certification examination and become a certified Medical Laboratory Scientist.

When a student is registered in 300 and 400 level MLS courses, a specific MLS tuition is assessed.

Categorical Certificate Training Program

The Medical Laboratory Science Categorical Certificate Training Program from the University of North Dakota provides advanced skills to baccalaureate prepared students, enabling them to work in high complexity clinical laboratories. The program includes four individual certificate categories: Clinical Chemistry/Urinalysis; Hematology/Hemostasis; Immunohematology; and Microbiology.

Upon successful completion of one categorical category, the student is eligible to complete the ASCP (American Society of Clinical Pathology) national certification exam in the specific categorical area. If the student completes all four categorical categories, the student is eligible to complete the ASCP national certification medical laboratory science (MLS) exam.

Admission Requirements

To be admitted to the UND MLS Categorical Program(s), the student must meet the following requirements:

- Hold a baccalaureate degree from a regionally accredited college or university
- Have a minimum of 20 semester credit hours in the biological, chemical and/or medical sciences (these credits can be part of, or in addition to the B.S. degree)
- Have the support of an accredited medical laboratory to facilitate the student’s clinical experience

When a student is registered in 300 and 400 level MLS courses, a specific MLS tuition is assessed.

**Courses**

**MED 100. Introduction to Health Sciences Professions. 1 Credit.**
Introduction to the roles, ethics, certification, education, employment and fundamental knowledge and skills related to the health science professions. F,S,SS.

**MED 205. Medical Terminology. 1 Credit.**
Knowledge of medical terminology learned through the study of different body systems. F,S,SS.

**Microbiology and Immunology (MBio)**

**Courses**

**MBIO 202. Introductory Medical Microbiology Lecture. 3 Credits.**
An introductory medical microbiology course primarily for nursing and clinical lab science students but open to allied health students with permission of the instructor. This course provides a background in all aspects of microbial agents and disease. Three hours lecture per week. Prerequisite: CHEM 116 or CHEM 121 with a grade of C or higher. F.

**MBIO 202L. Introductory Medical Microbiology Laboratory. 2 Credits.**
An introductory laboratory course in the isolation and identification of all types of microorganisms with an emphasis on those that cause disease. Four hours laboratory per week. Prerequisite: CHEM 116 or 121 with a grade of C or higher. Corequisite: MBIO 202. F.

**MBIO 302. General Microbiology Lecture. 2 Credits.**
An introduction to general microbiology with emphasis on the morphology, classification, and physiology of bacteria, fungi, parasites, and viruses. The significance of microorganisms in food processing, waste disposal, and in maintaining our environment is discussed. Two hours lecture per week. Prerequisites: BIOL 150 and CHEM 116 or CHEM 121, with a grade of C or better in both prerequisite courses or permission of instructor. S.

**MBIO 302L. General Microbiology Laboratory. 2 Credits.**
The growth, isolation, and identification of microorganisms from a variety of sources using procedures such as staining, microscopy, pure culturing, and biochemical tests. Four hours laboratory per week. Prerequisite or Corequisite: MBIO 302. S.

**MBIO 328. Introduction to Immunology. 3 Credits.**
An introduction to the fundamentals of immunology including immunochemistry, humoral and cellular response, hypersensitivity, immunodeficiency, immunogenetics, tolerance and immunodiagnosis. Prerequisite: A grade of C or higher in BIOL 150 or BIOL 151 or BMB 301. F.

**Military Science (MS)**

Minor in Military Science (p. 164)

**Courses**

**MS 101. Military Science I. 2 Credits.**
This beginner class introduces you to the personal challenges and competencies that are critical for effective leadership and communication. You will learn how the personal development of life skills such as cultural understanding, goal setting, time management, stress management, and comprehensive fitness relate to leadership, officer-ship, and the Army profession. Participation in a weekend exercise is optional. F.

**MS 101L. Leadership Lab I. 1 Credit.**
An introduction to individual and team aspects of military team building and leadership in small unit operations. Includes basic drill and ceremony, marksmanship training and fundamental concepts of leadership. Corequisite: MS 101. F.

**MS 102. Military Science I. 2 Credits.**
Introduces you to the professional challenges and competencies that are needed for effective execution of the profession of arms and Army communication. Through this course, you will learn how Army ethics and values shape your army and the specific ways that these ethics are inculcated into Army culture. Prerequisite: MS 101. S.

**MS 102L. Leadership Lab I. 1 Credit.**
An introduction to individual and team aspects of military team building and leadership in small unit operations. Includes operation order writing, team level movement techniques and continue concepts of leadership. Corequisite: MS 102. S.

**MS 141. Army Conditioning I. 1 Credit.**
This course is designed for beginners, emphasizing on the Army components of physical fitness; cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition. A key objective is for each student to achieve a minimum score of 180 points total, in three events of the Army Personal Fitness Test (APFT): push-ups, sit-ups and a two mile run. Corequisites: MS 101 MS 101L. F.

**MS 142. Army Conditioning II. 1 Credit.**
This course is designed for intermediate level instruction, emphasizing on the Army components of physical fitness; cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition. A key objective is for each student to achieve a minimum score of 180 points total, in three events of the Army Personal Fitness Test (APFT); push-ups, sit-ups and a two mile run. S.

**MS 143. Army Conditioning III. 1 Credit.**
This course is designed for advanced level instruction, emphasizing on the Army components of physical fitness; cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition. A key objective is for each student to achieve a minimum score of 270 points total, in three events of the Army Personal Fitness Test (APFT): push-ups, sit-ups and a two mile run. F,S.

**MS 201. Military Science II. 2 Credits.**
This class primarily is drawn from the Adaptability Army Learning Area (ALA). The outcomes are demonstrated through Critical and Creative Thinking and the ability to apply Troop Leading Procedures (TLP). Comprehension of the officer's role in Leading Change by applying Innovative Solutions to Problems in concert with the Principles of Mission Command. The Army Profession is also stressed through leadership forum and a leadership self-assessment. Prerequisites: MS 101 and MS 102. F.

**MS 201L. Leadership Lab II. 1 Credit.**
Learn and apply the principles of effective leadership. Reinforce self confidence. Includes drill and ceremony, weapon qualification and leadership principles. Corequisites: MS 201 and MS 241. F.

**MS 202. Military Science II. 2 Credits.**
This class begins the journey to understand and demonstrate Cross-Cultural Competencies as they relate to Army doctrine and how they apply in a combatant commander's Engagement Strategies. Army Values, Teamwork, and Warrior Ethos and their relationship to the Law of Land Warfare and philosophy of military service are also stressed. The ability to lead and follow is also covered through Team Building exercises in small units up to squad level. Prerequisites: MS 101, MS 102, and MS 201. S.

**MS 202L. Leadership Lab II. 1 Credit.**
Learn and apply the principles of effective leadership. Reinforce self confidence. Includes small unit tactics, land navigation and FLRO (Field Leadership Reaction Course). Corequisites: MS 202 and MS 242. S.
MS 215. Conflict Simulation. 1 Credit.
A course analyzing military strategy and tactics through the use of war gaming activities based upon historical renderings. F.S.

MS 341. Military Physical Conditioning II. 1 Credit.
Building on concepts of the 100 level class, emphasizing on the Army components of physical fitness; cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition. A key objective is for each student to achieve a minimum score of 230 points total, in the three events of the Army Personal Fitness Test (APFT): pushups, sit-ups, and a timed two-mile run. Corequisites: MS 201 and MS 201L. F.

MS 242. Military Physical Conditioning II. 1 Credit.
Continuation of 201 with emphasis on leadership of a squad during physical training, supervising each individual's correct performance of stretching and calisthenics, as well as following assigned students progression and taking responsibility for mentoring subordinates. A key objective is for each student to achieve a minimum score of 230 points total, in the three events of the Army Personal Fitness Test (APFT): pushups, situps, and a timed two-mile run. Corequisites: MS 202 and MS 202L. S.

MS 290. ROTC Basic Course. 4 Credits.
This course allows those students to receive credit for completing Basic Training and AIT; A DD214 is required or completion of CIET (Cadet Initial Entry Training). Both options an also be used to enter the advanced course Army ROTC. It can also be used by military veterans to receive credit for completion of basic training and advanced occupational skill training; A DD214 is required with RE code listed (Member 4 copy). F,S,SS.

MS 301. Military Science III. 3 Credits.
Series of practical opportunities in leadership and problem solving used to lead small groups, receive personal assessments and encouragement, and lead again in situations of increasing complexity. Uses small unit tactics and opportunities to plan and conduct training for lower division students both to develop such skills and as vehicles for practicing leadership skills. Plan and execute a leadership lab class for the ROTC Battalion. Participation in one weekend exercise is also required, and one or two more weekend exercises may be offered for optional participation. Prerequisites: MS 101, MS 102, MS 201, MS 202 or Basic Combat Training or (CIET) Cadet Initial Entry Training. Corequisites: MS 301L and MS 341. F.

MS 301L. Leadership Lab III. 1 Credit.
Series of practical opportunities to lead small groups, receive personal assessments, and lead again in situations of increasing complexity. Corequisites: MS 301 and MS 301L. F.

MS 302. Military Science III. 3 Credits.
Continues methodology of MSci 301. Analyze tasks; prepare written or oral guidance for team members to accomplish tasks. Delegate tasks and supervise. Plan for and adapt to the unexpected in organizations under stress. Examine and apply lessons from leadership case studies. Examine importance of ethical decision making in setting a positive climate that enhances team performance. Plan and execute a leadership lab class for the ROTC Battalion. Participation in one weekend exercise is required; two other weekend exercises may be offered for optional participation. Prerequisites: MS 101, MS 102, MS 201, MS 202, and MS 301. Corequisites: MS 302L and MS 342. S.

MS 302L. Leadership Lab III. 1 Credit.
Series of practical opportunities to lead small groups, receive personal assessments. Use small unit tactics and opportunities to plan and conduct training for lower division students. Prerequisites: MS 301. Corequisites: MS 302 and MS 302L. S.

MS 341. Military Physical Conditioning III. 1 Credit.
Instruction is on leadership of a company sized element and the phases of fitness conditioning, preparatory conditioning, and maintenance. A key objective is for each student to achieve a minimum score of 260 points total, in the three events of the Army Personal Fitness Test (APFT): pushups, sit-ups, and a timed two-mile run. Corequisites: MS 302 and MS 302L. S.

MS 342. Military Physical Conditioning III. 1 Credit.
Continuation of 341 with instruction on leadership of a company sized element and the phases of fitness conditioning, preparatory conditioning, and maintenance. A key objective is for each student to achieve a minimum score of 260 points total, in the three events of the Army Personal Fitness Test (APFT): pushups, sit-ups, and a timed two-mile run. Corequisites: MS 302 and MS 302L. S.

MS 401. Military Science IV. 3 Credits.
The focus of this semester is leadership development, critical thinking, and the final preparation for commissioning as an Army Lieutenant. There is an instructional mixture of leadership, professional competence, adaptability, teamwork, lifelong learning, comprehensive fitness, and the Army as a profession. Course includes leadership laboratories and field exercises to further leader development and preparation as a future Army leader. Prerequisites: MS 101, MS 102, MS 201, MS 202, MS 301 and MS 302. Corequisites: MS 401L and MS 441. F.

MS 401L. Leadership Lab IV. 1 Credit.
A culmination of all the concepts learned in the previous classes with emphasis on writing operation orders for company level and higher. Responsible for all Army ROTC Cadet Battalion training involving a series of practical exercises and evaluation of training. Corequisites: MS 401 and MS 441. F.

MS 402. Military Science IV. 3 Credits.
This course is the culmination of a well-rounded four year educational experience. It is during this semester that the Cadet is undergoing final preparation for commissioning and integration into the Army. The emphasis is placed on skills that the newly commissioned officer will need to succeed in their first unit of assignment, demonstrating the ability to plan, prepare, execute, and assess platoon-level training strategies to enable mission accomplishment. Course includes leadership laboratories and field exercises. Prerequisites: MS 101, MS 102, MS 201, MS 202, MS 301, MS 302, and MS 401. Corequisites: MS 402L and MS 442. S.

MS 402L. Leadership Lab IV. 1 Credit.
A culmination of all of the concepts learned in the previous classes with emphasis on writing operation orders for company level and higher. Responsible for all Army ROTC Cadet Battalion training involving a series of practical exercises and evaluation of training. Corequisites: MS 402 and MS 442. S.

MS 441. Military Physical Conditioning IV. 1 Credit.
Putting together all of the personal fitness concepts learned in the previous classes with emphasis on leadership of a battalion sized organization, including planning and coordination of all physical fitness for the ROTC Battalion and evaluation of the personal fitness training and trainers. Coordination of individual training specific to fitness ends. An essential objective for each student is to achieve a minimum score of 270 points total, in the three events of the Army Physical Fitness Test (APFT): pushups, sit-ups, and a timed two-mile run. Corequisites: MS 401 and MS 401L. F.

MS 442. Military Physical Conditioning IV. 1 Credit.
Continuation of 441 with emphasis on grasping the Army's policy on physical fitness, fitness maintenance, and safety. Become familiar with Army regulations and forms pertaining to physical fitness. Responsible for documentation, testing and briefing of the ROTC Battalion's Physical Fitness Program. An essential objective for each student is to achieve a minimum score of 270 points total, in the three events of the Army Physical Fitness Test (APFT): timed pushups, sit-ups, and a two-mile run. Corequisites: MS 402 and MS 402L. S.

MS 499. Special Topics. 1-3 Credits.
Special Topics for the Department of Military Science. Repeatable to 6 credits. Repeatable to 6 credits. F,S.

Music (Musc)

B.M. with a Major in Performance (p. 170)
B.M. with a Major in Music Education (p. 169)
B.A. with a Major in Music (p. 168)

College of Arts and Sciences

Minor in Music

College of Education and Human Development

Minor in Music

MUSC 100. Introduction to the Understanding of Music. 3 Credits.
Introduction of elements, genres, media, and historical and stylistic periods of music. Designed for the non-music major. F, S.

MUSC 101. Fundamentals of Music. 3 Credits.
Introduction to fundamental elements of music through the study of scales, chords, basic harmonic progressions, rhythms, and terminology. F, S.

MUSC 399. Special Topics. 1-3 Credits.
Specially arranged seminars or courses on variable topics not covered by regular departmental offerings. May be repeated for credit up to 6 hours. Prerequisite: Consent of instructor. Repeatable to 18 credits. F, S.

MUSC 490. Seminar in Music. 3 Credits.
A seminar on various topics in the history and literature of music. Final project will consist of a substantial research paper. Repeatable when topics vary. Prerequisites: Senior standing, MUSC 310, and MUSC 311. Repeatable. S.

MUSC 491. Seminar. 3 Credits.
Prerequisite: Instructor consent. On demand.

MUSC 492. Senior Project. 2 Credits.
Presentation of a recital, research paper, original composition, or similar project that meets the approval of the department. Prerequisite: Senior standing. F, S.

MUSC 494. Special Projects. 1-3 Credits.
Individual study in an approved area of interest to the student. May be repeated for credit up to 8 hours. Repeatable to 8 credits. F, S.

Music Theory and Composition

MUSC 130. Music Theory I. 3 Credits.
The study of diatonic harmonic and melodic principles of Western European music from 1600 to 1900. Topics include harmonic progressions, melodic patterns, rhythmic patterns, and voice leading. Material is learned through part writing, keyboard skills, and music analysis. Corequisite: MUSC 131. F.

MUSC 131. Aural Skills I. 1 Credit.
Training in reading at sight and in aural recognition involving dictation, keyboard, and singing skills. Corequisite: MUSC 130. F.

MUSC 132. Keyboard Skills I. 1 Credit.
Beginning classroom instruction in keyboard. Prerequisite: Open to Music majors or permission of department. F.

MUSC 133. Keyboard Skills II. 1 Credit.
Continuation of the development of keyboard technique and repertoire. Prerequisites: MUSC 131 and MUSC 132, with a grade of C or better. Corequisite: MUSC 134. F.

MUSC 134. Keyboard Skills III. 1 Credit.
Continuation of the development of keyboard technique and repertoire. Prerequisites: MUSC 133 and MUSC 134, with a grade of C or better. Corequisite: MUSC 231. F.

MUSC 135. Keyboard Skills IV. 1 Credit.
Continuation of the development of keyboard technique and repertoire. Prerequisites: MUSC 131 and MUSC 132, with a grade of C or better. Corequisite: MUSC 133. S.

MUSC 230. Music Theory III. 3 Credits.
The continued study of chromatic materials covered in MUSC 134. Material is learned through part writing, keyboard skills, and music analysis. Prerequisites: MUSC 133 and MUSC 134, with a grade of C or better. Corequisite: MUSC 231. F.

MUSC 231. Aural Skills II. 1 Credit.
Training in reading at sight and in aural recognition involving dictation, keyboard, and singing skills. Prerequisite: MUSC 131 with a grade of C or better. Corequisite: MUSC 134. F.

MUSC 232. Keyboard Skills II. 1 Credit.
Continuation of the development of keyboard technique and repertoire. Prerequisites: MUSC 131 and MUSC 132, with a grade of C or better. Corequisite: MUSC 133. F.

MUSC 233. Keyboard Skills III. 1 Credit.
Continuation of the development of keyboard technique and repertoire. Prerequisites: MUSC 132 and MUSC 133, with a grade of C or better. Corequisite: MUSC 234. F.

MUSC 234. Music Theory IV. Music Theory since 1900. 3 Credits.
Music thought, techniques, and theories of the 20th century and beyond. Material is learned through musical analysis and original compositions. Prerequisite: MUSC 230 or MUSC 232 with a grade of C or better. Corequisite: MUSC 235. S.

MUSC 235. Aural Skills IV. 1 Credit.
Continuation of the development of sight reading and aural recognition skills involving music dictation. Prerequisite: MUSC 231 with a grade of C or better. Corequisite: MUSC 234. S.

MUSC 236. Keyboard Skills IV. 1 Credit.
Continuation of the development of keyboard technique and repertoire. Prerequisites: MUSC 232 and MUSC 233, with a grade of C or better. Corequisite: MUSC 235. F.

MUSC 423. Instrumental and Choral Arranging. 2 Credits.
Scoring techniques for instrumental and vocal ensembles, including band, orchestra, jazz ensemble, choir and children's chorus. Specific areas of focus to be determined by abilities and interests of the students. Prerequisite: MUSC 134, F, odd years.

MUSC 426. Electronic Music. 3 Credits.
Electronic music composition and sound synthesis using digital synthesizers and processors, recording equipment, and computers. Study of technological developments, important recordings, styles, composers, and trends. On demand.

MUSC 427. Analysis of Musical Form. 2 Credits.
Analysis of the principal forms of musical composition. Prerequisite: MUSC 230 or MUSC 232 with a grade of C or better. F, even years.

MUSC 428. Counterpoint. 2 Credits.
Analysis and construction of basic counterpoint. Prerequisite: MUSC 230. F, even years.

MUSC 429. Composition. 2 Credits.
Original composition in smaller forms for vocal and instrumental solos and ensembles. Prerequisite: MUSC 234 or instructor permission. F.

MUSC 430. Composition Lessons. 1 Credit.
Individual or small group instruction in music composition. Repeatable. Prerequisite: MUSC 429 or instructor permission. Repeatable. F, S.
Music History and Literature

MUSC 200. Music in America. 3 Credits.
A historical survey of music in America from pre-colonial times through the twentieth century, including Classical, Ethnic, Folk, and Popular Traditions. Designed for non-majors; will include listening techniques and writing about music. On demand.

MUSC 201. Rock and Roll History I: From World War II to 1975. 3 Credits.
This class will give students a survey of the major styles, periods, and influence-streams that make up the extremely large and varied category of “Rock” music produced between World War II and 1975. The course covers many styles, but the focus is on English-language mainstream popular music.

MUSC 203. Music and Culture. 3 Credits.
Exploration of how human culture is expressed through music.

MUSC 276. Collegium Musicum. 1-4 Credits.
Study and performance of vocal and instrumental music of the Medieval, Renaissance, and Baroque eras, and other selected compositions which are rarely performed. Repeatable to 8 credits. On demand.

MUSC 310. Music History Survey I. 3 Credits.
A historical survey of western art music from Ancient Times to 1650. Prerequisite: MUSC 134 or instructors permission.

MUSC 311. Music History Survey II. 3 Credits.
A historical survey of western art music from 1650 to the present. Prerequisites: MUSC 133 and MUSC 134 or permission of instructor.

MUSC 414. Piano Literature. 3 Credits.
Study and analysis of keyboard music from the Baroque period to the present, with attention to the development of forms, techniques, and styles. Prerequisite: Piano, MUSC 354 or MUSC 355, or consent of instructor.

MUSC 415. Vocal Literature. 3 Credits.
An historical overview of the development of art song and opera incorporating reading, listening, score study and analysis. Prerequisites: MUSC 254 and MUSC 255. F, odd years.

MUSC 416. Choral Literature. 2-4 Credits.
Choral literature from the Renaissance to the present with particular attention given to the representative compositions in both large and small forms. Prerequisites: Three hours of Music History and Literature.

MUSC 417. Instrumental Literature. 2 Credits.
Wind instrument literature from the Renaissance to the present with particular attention given to the representative compositions in both large and small forms.

Music Therapy

MUSC 180. Introduction to Music Therapy. 3 Credits.
An overview of the field of music therapy, an introduction to its history and principles, different therapy models and techniques, and common populations served by the discipline. This course is open to all students interested in learning more about the field.

MUSC 280. Music Therapy Clinical Skills. 3 Credits.
An introduction to basic counseling skills and group leadership skills, study of the specific therapeutic uses of music, of the components of the treatment plan, and ethical considerations in the field. Prerequisites: MUSC 180 and the successful completion of the Sophomore Review as described in the Academic Catalog; department consent required.

MUSC 281. Music Therapy Techniques I. 2 Credits.
Basic therapeutic instrument mastery of guitar, autoharp, percussion and Orff instruments, tuning and maintenance, repertoire learning, developing basic vocal and percussion improvisation and songwriting skills, designing therapeutic interventions. Prerequisites: MUSC 180 and the successful completion of the Sophomore Review as described in the Academic Catalog; department consent required.

MUSC 282. Music Therapy Practicum I. 1 Credit.
Supervised field experience co-facilitating sessions for special populations in the community. In addition to clinical work, students attend an on-campus seminar. Prerequisites: Statewide (MN ND) and nationwide background checks with acceptable results within one year prior to the beginning of class, MUSC 180 and the successful completion of the Sophomore Review as described in the Academic Catalog; dept consent required.

MUSC 380. Music Therapy Theories and Methods II (Adults). 3 Credits.
In-depth demonstration, analysis and comparison of specific music therapy models, a study of the theories, methods and techniques associated with these models, with special emphasis on the treatment of adults. Prerequisite: MUSC 280.

MUSC 381. Music Therapy Techniques II. 2 Credits.
Students will work on developing musical skills and techniques for the design and implementation of music therapy activities in a variety of clinical settings. Prerequisite: MUSC 281.

MUSC 382. Music Therapy Practicum II. 1 Credit.
Supervised field experience co-facilitating sessions for special populations in the community. In addition to clinical work, students attend an on-campus seminar. Prerequisites: Statewide (MN and ND) and nationwide background checks with acceptable results within one year prior to the beginning of class, and MUSC 282.

MUSC 383. Music Therapy Practicum III. 1 Credit.
Supervised field experience co-facilitating sessions for special populations in the community. In addition to clinical work, students attend an on-campus seminar. Prerequisites: Statewide (MN and ND) and nationwide background checks with acceptable results within one year prior to the beginning of class, and MUSC 382.

MUSC 397. Cooperative Education in Music. 1-2 Credits.
This course is intended for students seeking cooperative placements in the field of music. All placements will be conducted under the supervision of an appropriate music professional. Arranged by mutual agreement between student, department and placement supervisor. Repeatable to 4 credits. S/U grading. On demand.

MUSC 480. Psychological Foundations of Music Learning. 3 Credits.
An in-depth study of the psychological foundations of musical behavior including human response to music, music preference and ability; psychoacoustical parameters; and research in the field. Prerequisites: MUSC 383 and SOC 326. S, even years.

MUSC 481. Music Therapy Practicum IV. 1 Credit.
Supervised field experience co-facilitating sessions for special populations in the community. In addition to clinical work, students attend an on-campus seminar. Prerequisites: Statewide (MN and ND) and nationwide background checks with acceptable results within one year prior to the beginning of class, and MUSC 383.

MUSC 497. Internship in Music. 1-8 Credits.
This course is intended for students seeking internships in the field of music. All placements will be conducted under the supervision of an appropriate music professional. Arranged by mutual agreement between student, department and placement supervisor. Repeatable to 16 credits. S/U grading. On demand.

Music Education

MUSC 140. Methods: Woodwinds, Brass, Strings, Percussion, Voice. 1 Credit.
Offers music education students performance and pedagogical instruction on voice and instruments in the brass, woodwind, string and percussion families. Repeatable to 6 credits. Prerequisite: Music majors and minors only. Repeatable to 6 credits.

MUSC 340. Introduction to Music Technology. 2 Credits.
Introduction to acoustics, digital music software, and audio hardware.

MUSC 440. Methods and Materials for Elementary Music. 3 Credits.
Overview of methods and materials in elementary music for music majors and minors. Includes experiences for the practical application of course content. Corequisite: T&L 386.

MUSC 441. Methods and Materials for Middle and Secondary School Music. 3 Credits.
Strategies and materials used in teaching music in middle and secondary schools with emphasis on integration and practical application of course content and continuing development of professional music teaching competencies. Prerequisites: Admission to Teaching and Learning, passed Music Sophomore Review, and 75 total credit hours. Corequisite: T&L 486.

MUSC 442. Music for Elementary School Teachers. 3 Credits.
Survey of elementary school music. Development of teacher skills and knowledge emphasizing conceptual understandings and music competencies essential in the musical growth of children. Prerequisite: Admissions to Teacher Education; not open to music majors or minors.
MUSC 443. Music Methods and Materials for Elementary School Teachers. 3 Credits.
An overview of elementary methods and materials for non-majors with a musical background. S, odd years.

MUSC 445. Choral Methods. 3 Credits.
The primary goal of this course is to provide the student with the skills and knowledge in the teaching, directing and managing of choral ensembles. Topics covered will include classroom management, sight-reading instruction, sequencing, the adolescent changing voice, program management, effective rehearsal techniques, professional expectations, selecting appropriate literature, and assessment. Students will be engaged in learning through weekly readings, class discussions, lectures, guest speakers, special projects, recordings, videos, quizzes, exams, and more. F, even years.

MUSC 446. Instrumental Classroom Methods and Materials. 3 Credits. F, odd years.

MUSC 447. Jazz Pedagogy. 2 Credits.
Organization of and materials appropriate for the jazz band, methods of teaching the rhythmic and tonal problems inherent in its style. On demand.

MUSC 448. Orchestra Directors’ Course. 1 Credit.
Organizational and administrative problems of the orchestra director such as curriculum, recruiting, scheduling, programming, promotion of the string program, and literature. On demand.

MUSC 449. Music Education Special Topics. 1-3 Credits. Repeatable to 3 credits. F.S.

Music Performance

a. Conducting
MUSC 256. Basic Conducting. 2 Credits.
Development of basic conducting techniques, baton technique, and use of the left hand. Reading of choral and instrumental scores. Prerequisites: MUSC 130. F.

MUSC 357. Choral Conducting. 2 Credits.
Conducting problems and rehearsal techniques in relation to choral literature in various styles based on score, class performance, and recordings. Prerequisites: MUSC 236 and MUSC 256. S, odd years.

MUSC 358. Instrumental Conducting. 2 Credits.
Instrumental conducting, rehearsal techniques, and score reading through the use of instrumental literature of various styles and periods. Prerequisite: MUSC 256. S, even years.

b. Pedagogy
MUSC 444. Applied Music Pedagogy. 2 Credits.
Readings, instruction, and application of pedagogical principles and materials relevant to the student's major instrument(s). May be repeated for credit up to 5 hours. Prerequisites: MUSC 254 or MUSC 255. Repeatable to 6 credits. F, even years.

c. Music Ensembles
MUSC 260. Concert Choir. 1 Credit.
Select mixed choir performing the finest choral literature from every historical era. Repeatable to 12 credits. F.S.

MUSC 261. University Chamber Choir. 1 Credit.
Select small mixed choir focusing on a different kind of choral music every semester, from early music to jazz and theater. Repeatable to 12 credits. F.S.

MUSC 263. Varsity Bands Men's Chorus. 1 Credit.
Men's vocal ensemble specializing in traditional shorter choral works, folk songs, spirituals, and lighter fare. Repeatable to 12 credits. F.S.

MUSC 264. Women's Chorus. 1 Credit.
Women's vocal ensemble specializing in shorter choral works, folk songs, spirituals, and lighter fare. Repeatable to 12 credits. F.S.

MUSC 266. Old English Christmas Feast. 1 Credit.
Participation in all scheduled activities for the Old English Christmas Feast, to include singing (large groups and strolling minstrels), serving meals, acting, and ushering. Repeatable to 12 credits. F.

MUSC 269. Opera Workshop. 1 Credit.
Production and presentation of chamber operas, scenes from larger works, and major productions, fully staged and costumed. Repeatable to 12 credits. S.

MUSC 270. Wind Ensemble. 1 Credit.
Select ensemble of wind and percussion students performing the finest concert band literature. Repeatable to 12 credits. F.S.

MUSC 271. University Band. 1 Credit.
Concert band open to all university students without audition, performing a wide variety of contemporary band literature. Repeatable to 12 credits. F.S.

MUSC 272. Marching/Athletic Band. 1 Credit.
The Pride of the North Band is open to all students on campus, and performs on the field and in the stands at all home games for the UND football, men's and women's basketball, and hockey teams. Repeatable to 12 credits. F.S.

MUSC 273. Instrumental Jazz Ensemble. 1 Credit.
Big band jazz ensemble performing music ranging from the swing era to the sounds of today. Repeatable to 12 credits. F.S.

MUSC 274. Symphony Orchestra. 1 Credit.
Ensemble for performance of works for large orchestra. Repeatable to 12 credits. F.S.

MUSC 275. University Chamber Orchestra. 1 Credit.
Ensemble for chamber performance of works for small orchestra. Repeatable to 12 credits. F.S.

MUSC 276. Collegium Musicum. 1-4 Credits.
Study and performance of vocal and instrumental music of the Medieval, Renaissance, and Baroque eras, and other selected compositions which are rarely performed. Repeatable to 8 credits. On demand.

MUSC 277. Chamber Music Groups. 1 Credit.
Any combination of strings, brass, woodwind, voices, percussion, or keyboard instruments on an ad hoc basis by a faculty member to utilize the particular talents of advanced students in exploring and performing chamber music literature. These groups will prepare compositions in such media as string quartets and trios, woodwind quintets, and vocal quartets. Repeatable to 20 credits. F.S.

MUSC 278. Collaborative Piano. 1 Credit.
The student will gain experience in learning accompanying techniques and literature. Repeatable without limitation. Repeatable. F.S.

d. Applied Music (Group Instruction)
MUSC 150. Class Lessons. 1 Credit.
Beginning class instruction in any of the following instrumental classes: Brass, Woodwind, Percussion, and String Class; Piano Class; Voice Class; Guitar Class. May be repeated for credit without limitation. Repeatable. F.S.

MUSC 151. Class Lessons. 1 Credit.
Intermediate class instruction in any of the following instrumental classes: Brass, Woodwind, Percussion, and String Class; Piano Class; Voice Class; Guitar Class. May be repeated for credit without limitation. Repeatable. F.S.

MUSC 152. Class Guitar for Music Majors. 1 Credit.
Beginning class instruction on guitar for music majors. Prerequisite: Instructor permission. F.

MUSC 242. Diction for Singers. 1 Credit.
Rules for and practical application of two of the major languages used in song literature: Italian/English or French/German. May be repeated for credit up to 2 hours when topics vary. Offered Fall odd years and Spring even years. Prerequisite: Two semesters of private voice lessons.

MUSC 252. Class Guitar for Music Majors. 1 Credit.
Intermediate class instruction on guitar for music majors. Prerequisites: MUSC 152 and permission of instructor. S.

e. Applied Music (Individual Lessons*)
MUSC 153. Individual Lessons for Non-Majors. 1 Credit.
Beginning college-level applied study of the stated instrument or voice, for non-Music majors. Half hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Repeatable. Does not count toward music degree credit. Prerequisite: Permission of instructor. Repeatable to 12 credits. F.S.
MUSC 154. Individual Lessons. 1 Credit.
Applied study of the stated instrument or voice at the freshman level. Half hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Repeatable. Prerequisite: Permission of instructor; Music Education, Music Therapy, Music Majors, and Music Minors only. Repeatable. F.S.

MUSC 155. Individual Lessons. 2 Credits.
Applied study of the stated instrument or voice at the freshman level for Bachelor of Music in Performance students and others. One-hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Course is repeatable. Prerequisite: Permission of the instructor. Repeatable. F.S.

MUSC 253. Individual Lessons for Non-Majors. 1 Credit.
Intermediate college-level applied study of the stated instrument or voice, for non-Music majors. Half hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Course is repeatable. Prerequisite: MUSC 154 and permission of instructor. Repeatable. F.S.

MUSC 254. Individual Lessons. 1 Credit.
Applied study of the stated instrument or voice at the sophomore level. Half hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Prerequisites: MUSC 154 and permission of the instructor. Repeatable. F.S.

MUSC 255. Individual Lessons. 2 Credits.
Applied study of the stated instrument or voice at the sophomore level for Bachelor of Music in Performance students and others. One-hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Repeatable. Prerequisites: MUSC 254 and permission of the instructor; open to Music Education, Music Therapy, Music Majors, and Music Minors only. Repeatable. F.S.

MUSC 354. Individual Lessons. 1 Credit.
Applied study of the stated instrument or voice at the junior level. Half hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Course is repeatable. Prerequisites: MUSC 254 and permission of instructor. Repeatable. F.S.

MUSC 355. Individual Lessons. 4 Credits.
Applied study of the stated instrument or voice at the junior level for Bachelor of Music in Performance students and others. One-hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Course is repeatable. Prerequisite: MUSC 254 or MUSC 255. Corequisite: MUSC 354 or MUSC 355. S/U grading. F.S.

MUSC 454. Individual Lessons. 1 Credit.
Applied study of the stated instrument or voice at the senior level. Half hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Prerequisites: MUSC 354 and permission of instructor; open to Music Education, Music Therapy, Music Majors, and Music Minors only. Repeatable. F.S.

MUSC 455. Individual Lessons. 4 Credits.
Applied study of the stated instrument or voice at the senior level for Bachelor of Music in Performance students and others. One-hour lesson. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis. Course is repeatable. Prerequisites: MUSC 354 and permission of the instructor. Repeatable. F.S.

MUSC 495. Senior Recital. 1-2 Credits.
The presentation of a senior recital. No regular student may take an Applied Music course without credit or on other than a letter grade basis. Prerequisite: MUSC 354 or MUSC 355. Corequisite: MUSC 454 or MUSC 455. S/U grading. F.S.

- In registering for private lessons in voice, piano, organ, or any band or orchestra instrument, “Voice” or the name of the instrument serves as the title of the course. An audition with appropriate Music Faculty is a prerequisite for all students’ enrollment in Individual Lessons. For the final examination, the student will perform before a faculty committee (jury). No regular student may take an Applied Music course without credit or on other than a letter grade basis.

**Bachelor of Arts with a Major in Music**

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum:

Music majors must achieve a grade of C or better in every music course taken toward the degree in order to pass the Sophomore Proficiency.

**Core Courses**

- **MUSC 130**  Music Theory I  3
- **MUSC 131**  Aural Skills I  1
- **MUSC 133**  Keyboard Skills I (or Piano Proficiency Level I & II)  1
- **MUSC 134**  Music Theory II  3
- **MUSC 135**  Aural Skills II  1
- **MUSC 136**  Keyboard Skills II  1
- **MUSC 203**  Music and Culture  3
- **MUSC 230**  Music Theory III  3
- **MUSC 231**  Aural Skills III  1
- **MUSC 234**  Music Theory IV: Music Theory since 1900  3
- **MUSC 235**  Aural Skills IV  1
- **MUSC 310**  Music History Survey I  3
- **MUSC 311**  Music History Survey II  3
- **MUSC 340**  Introduction to Music Technology  2
- **MUSC 490**  Seminar in Music  3

**Other Supportive Courses**

- **MUSC 154**  Individual Lessons (2 semesters)  2
- **MUSC 254**  Individual Lessons (2 semesters)  2
- **MUSC Electives in Theory/Comp., History/Lit., Conducting or Applied**  7
- **Major Ensemble (4 semesters)**  4
- **MUSC 492**  Senior Project  2

**Requisites in other departments**

A concentration in a single supplementary field other than Music is also required of all Bachelor of Arts in Music majors. The concentration may be satisfied in one of two ways: 1) Level IV language proficiency in a modern foreign language; or 2) 20 credit hours, at least 9 of which must be numbered 300 or above in any single subject area* taught at this university.

Total Credits  49

- Defined as courses with the same registration prefix or within a single degree major or minor area.

Students must take additional elective credits to fulfill the 120 credit hours required for degree completion.

**Composition Emphasis**

Must include the following courses, which may substitute for electives:
**Bachelor of Music with Major in Music Education**

### Instrumental or Choral Emphasis

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

**I. Essential Studies Requirements** (see University ES listing).

**II. The Following Curriculum:**

**Core Courses**

Bachelor of Music with Major in Performance

**Music Education**
- **MUSC 140**: Methods: Woodwinds, Brass, Strings, Percussion, Voice 2
- **MUSC 150**: Class Lessons 1
- **MUSC 180**: Introduction to Music Therapy 3
- **MUSC 242**: Diction for Singers 1
- **MUSC 440**: Methods and Materials for Elementary Music 3
- **MUSC 441**: Methods and Materials for Middle and Secondary School Music 3
- **MUSC 444**: Applied Music Pedagogy 2

**Music Technology**
- **MUSC 340**: Introduction to Music Technology 2

**Total Credits**: 49

* Credits apply toward T&L 390 Special Topics

**Optional Instrumental Licensure Track**
This additional coursework meets the criteria for Instrumental Licensure in Music Education in North Dakota.

**Instrumental Option**
- **MUSC 46**: Instrumental Classroom Methods and Materials 3
- **MUSC 47**: Instrumental Literature 2
- **MUSC 270**: Wind Ensemble 1
- **MUSC 271**: University Band 1
- **MUSC 274**: Symphony Orchestra 1
- **MUSC 275**: University Chamber Orchestra 1
- **MUSC 357**: Choral Conducting 2
- **MUSC 140**: Methods: Woodwinds, Brass, Strings, Percussion, Voice 1

**Total Credits**: 9

* Included in Vocal/Choral Emphasis

**Bachelor of Music with Major in Performance**

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ER listing).

II. The Following Curriculum:

Music majors must achieve a grade of C or better in every music course taken toward the degree in order to pass the Sophomore Proficiency.

**Core Courses**
- **MUSC 099 Perform (Minimum 5 semesters required before graduation)** 0
- **MUSC 203**: Music and Culture 3
- **MUSC 310**: Music History Survey I 6
- **MUSC 311**: and Music History Survey II 3
- **MUSC 490**: Seminar in Music 3
- **MUSC 256**: Basic Conducting 2

**Harmony and Theory Sequence**
- **MUSC 130**: Music Theory I 3
- **MUSC 134**: Music Theory II 3
- **MUSC 230**: Music Theory III 3
- **MUSC 234**: Music Theory IV: Music Theory since 1900 3
- **MUSC 357**: Choral Conducting 4
- **MUSC 358**: and Instrumental Conducting 4
- **MUSC 499**: Senior Recital 1

**Total Credits**: 49

* Included in Vocal/Choral Emphasis

**Vocal Majors**

**Performance Courses**
- **MUSC 242**: Diction for Singers 2
- **MUSC 269**: Opera Workshop 2
- **MUSC 415**: Vocal Literature 3

**Electives - Keyboard must include:**
- **MUSC 414**: Piano Literature 12

**Foreign Language Requirement**
Select one of the following:
- **FREN 101**: First Year French I 8
- **GERM 101**: First Year German I 8

**Other Electives**
- **Electives in disciplines other than the major** 6

**Total Credits**: 99-103

**Instrumental Majors**

**Performance Courses on Primary Instrument**
- **MUSC 278**: Seminar for Collaborative Piano 8
- **MUSC 277**: Chamber Music Groups 4
- **MUSC 414**: Piano Literature 12

**Other Electives**
- **Electives in discipline other than the major** 9

**Total Credits**: 33

**Minor in Music**

**College of Arts & Sciences**

Required 20 credits:
- **Musicianship (3-4 credits)**
- **MUSC 101**: Fundamentals of Music 3-4

OR
Minor in Nonprofit Leadership

**Core Requirements**
- POLS 200: Introduction to the Nonprofit Sector
- POLS 450: Capstone Experience and Development
- POLS 361: Nonprofit Management (Undergrad)
- POLS 480: Administrative Internship

**Electives (see course list below)**

**Total Credits**: 19-21

Elective courses for the Certificate and Minor in Nonprofit Leadership. Choose one 3-credit course from each area.

Select one from each of the following:

**Organizational**
- ESSP 160: Sustainability & Society
- ENTR 316: Entrepreneur Law & Operations
- A&S 294: Directed Studies
- ENTR 410: Marketing and Management Concepts for Entrepreneurship
- PSYC 301: Industrial and Organizational Psychology
- COMM 401: Organizational Communication

**Service and Community**
- GEOG 250: Introduction to Geopolitics
- RHS 200: Helping Skills in Community Services
- COMM 102: Introduction to Communication
- SOC 115: Social Problems
- COMM 212: Interpersonal Communication
- PSYC 250: Developmental Psychology
- T&L 252: Child Development
- SOC 306: Social Change and Social Movements
- A&S 294: Directed Studies
- IDS 495: Service and Citizenship

**Diversity**
- COUN 250: Dialogue on U.S. Diversity
- ANTH 465: Culture, Illness and Health
- WGS 200: Introduction to Gender Studies
- ANTH 171: Introduction to Cultural Anthropology
- ANTH 371: Cultural Dynamics
- ANTH 379: Culture Area Studies
- PHIL 120: Introduction to Ethics
- IS 121: Introduction to American Indian Studies
- MUSC 203: Music and Culture
- RELS 216: Contemporary Issues in Rehabilitation
- SOC 250: Diversity in American Society
- WGS 225: The Study of Women
- COMM 402: Intercultural/International Communication
- PSYC 421: Diversity Psychology

**Note**: Students may “double use” courses for the Certificate and for their majors or minors.
NURS 300. Nursing Pharmacology I. 3 Credits.
This is the first in a two part series of courses that reinforces the concepts of pharmacokinetics, pharmacodynamics, and introduces safe medication preparation, administration and documentation. Using a concept-based approach, examples of medications as they relate to major nursing concepts and human body systems across the lifespan will be discussed. This course will include classroom and laboratory experiences. Prerequisites: Admission to the undergraduate nursing program and PPT 315. Corequisites: NURS 300, NURS 301, NURS 310, NURS 312, and NURS 313. F,S.

NURS 310. Health & Illness I. 2 Credits.
This course introduces the student to the role of the generalist nurse in providing evidence-based interventions for patients in a variety of health care settings across the life span. The student will learn to recognize altered health states and understand interventions that will promote health, prevent disease/injury and restore a state of optimal health for individuals. Clinical reasoning skills will be developed, with a goal of achieving safe, quality outcomes. Prerequisite: Admission to the undergraduate nursing program. Corequisites: NURS 300, NURS 301, NURS 304, NURS 312, and NURS 313. F,S.

NURS 312. Pathophysiology I. 2 Credits.
This is the first in a two part series of courses that focuses on the concepts of altered health in the development of clinical manifestations of disease and illness throughout the lifespan. This course will explore altered function and structure of the human body using a conceptual approach. Prerequisite: Admission to the undergraduate nursing program. Corequisites: NURS 300, NURS 301, NURS 304, NURS 310, and NURS 313. F,S.

NURS 313. Clinical Practicum I. 2 Credits.
This clinical course initiates the student's journey in developing the generalist role as a provider of care. The student will learn to apply evidence-based knowledge, skills, attitudes and patient care technologies that will promote a state of optimal health for their patients. Students will professionally interact with individuals across the lifespan and in diverse populations to provide safe, quality and patient-centered care. Prerequisite: Admission to the undergraduate nursing program. Corequisites: NURS 300, NURS 301, NURS 304, NURS 310, and NURS 312. F,S.

NURS 324. Public Health Nursing Theory. 2 Credits.
The course emphasizes population-based health and the role of the public health nurse. Lecture. Corequisite: NURS 374. SS.

NURS 326. Evidence-Based Practice. 2 Credits.
The course focuses on evidence-based practice in nursing with the emphasis on the philosophy, models, and application of evidence to practice. Students will apply research findings, clinical expertise, and patient preferences to a clinical problem. S.

NURS 330. Health & Illness II. 4 Credits.
This clinical course focuses on developing the generalist role in managing patient care as a member of the health care team. The student will competently apply evidence-based knowledge, skills, attitudes and patient care technologies that will promote a state of optimal health for their patients. Students will professionally interact with individuals across the lifespan and in diverse populations to provide safe, quality and patient-centered care. Prerequisites: NURS 300, NURS 301, NURS 304, NURS 310, NURS 312, and NURS 313. Corequisites: NURS 334, NURS 332, NURS 333, and NURS 331. F,S,SS.

NURS 331. Patient & Family-Centered Nursing. 3 Credits.
This course focuses on compassionate, patient-centered, evidence-based care that respects patient and family preferences across the lifespan to achieve optimal healthcare outcomes. Prerequisites: NURS 300, NURS 301, NURS 304, NURS 310, NURS 312, and NURS 313. Corequisites: NURS 330, NURS 332, NURS 333, and NURS 334. F,S,SS.

NURS 332. Pathophysiology II. 2 Credits.
This is the second course in a two part series focusing on concepts of altered health in the development of clinical manifestations of disease and illness across the lifespan. Pathophysiological concepts of high incidence, prevalence and severity will be emphasized. Prerequisites: NURS 300, NURS 301, NURS 304, NURS 310, NURS 312, and NURS 313. Corequisites: NURS 330, NURS 331, NURS 333, and NURS 334. F,S,SS.

Nursing (Nurs)

B.S. in Nursing On-Campus (p. 174)

R.N. to B.S. in Nursing Online (p. 176)

Courses

NURS 282. Health Promotion. 2 Credits.
This course focuses on the promotion of health across the lifespan based on national health objectives. Lecture. F.

NURS 300. Foundations of Nursing Practice. 5 Credits.
This introductory nursing course combines basic health assessment skills with therapeutic interventions using a concept-based approach. Students will demonstrate cognitive and psychomotor competencies for the care of patients across the lifespan with emphasis on interviewing techniques, physical exam, and therapeutic skills performance. Awareness of cultural, developmental, and risk factors that affect the patient's health will be explored through classroom and laboratory experiences. Prerequisite: Admission to the undergraduate nursing program. Corequisites: NURS 301, NURS 304, NURS 310, NURS 312, and NURS 313. F,S.

NURS 301. Professional Nurse I. 2 Credits.
This introductory nursing course provides the foundation for learning about the behaviors and attributes of the professional nurse. Knowledge, skills and attitudes important for safe and effective nursing care are explored, including leadership, legal and ethical concepts, and interpersonal communication. Nursing values will be discussed with respect to the baccalaureate generalist practice role. Prerequisite: Admission to the undergraduate nursing program. Corequisites: NURS 300, NURS 304, NURS 310, NURS 312, and NURS 313. F,S.

NURS 302. Pathophysiology. 3 Credits.
The focus of this course is the application of concepts of altered health in the development of clinical manifestations of disease and illness. Lecture. F.
NURS 333. Clinical Practicum II. 4 Credits.
This clinical course focuses on developing the generalist role in managing patient care as a member of the health care team. The student will competently apply evidence-based knowledge, skills, attitudes and patient care technologies that will promote a state of optimal health for their patients. Students will professionally interact with individuals across the lifespan and in diverse populations to provide safe, quality and patient-centered care. Prerequisites: NURS 300, NURS 301, NURS 304, NURS 310, NURS 312, and NURS 313. Corequisites: NURS 330, NURS 331, NURS 332, and NURS 334. F,S,SS.

NURS 334. Nursing Pharmacology II. 2 Credits.
This is the second in a two part series of courses that will advance student knowledge of pharmacokinetics, and pharmacodynamics by learning about different categories of drugs. Drug classifications provide the framework for understanding the action, use, adverse effects and nursing implications of drugs. Using a concept-based approach, examples of medications as they relate to human body systems across the lifespan will be discussed. This course will include classroom and laboratory experiences. Prerequisites: NURS 300, NURS 301, NURS 304, NURS 310, NURS 312, and NURS 313. Corequisites: NURS 330, NURS 331, NURS 332, and NURS 333. F,S,SS.

NURS 350. Nursing in Transition. 3 Credits.
This course covers two distinct essentials for nurses returning for their bachelor's or master's degree. The first portion of the course explores concepts preparing the registered nurse student for entry into baccalaureate nursing and continuing socialization in the profession. The second portion provides an orientation to resources essential for successful program completion. F.

NURS 374. Public Health Nursing Clinical. 2 Credits.
Students will apply the concepts of population-based practice through various public health nursing roles. Clinical. Corequisite: NURS 324. SS.

NURS 393. Academic Nursing Internship. 1 Credit.
Academic Nursing Internship (ANI) integrates nursing knowledge, skills and actions while working as a member of an interdisciplinary healthcare team. This course is designed to utilize the student's prior nursing course work to continue to develop clinical reasoning skills. Qualified nursing students are employed by selected healthcare agencies while enrolled in NURS 393 for academic credit. Hours are arranged by mutual agreement between student, ANI faculty coordinator, and employer. Prerequisites: Successful completion of first two semester of nursing courses and consent of Nursing Department. Repeatable to 4 credits. F,SS.

NURS 394. Independent Study. 1-4 Credits.
Supervised independent study of non-honors students in nursing. Prerequisite: Only open to juniors and seniors in the nursing program. Repeatable to 9 credits. On demand.

NURS 397. Cooperative Education: Nursing. 1-2 Credits.
An experiential learning experience in nursing integrating clinical work experience, nursing theory and evaluation. Designed to enhance the student's prior course work in nursing. Qualified nursing students are employed by selected healthcare agencies on either the parallel or summer plan. Hours are arranged by mutual agreement among student, coordinator, and employer. Clinical. Prerequisites: Successful completion of first two semesters of nursing courses and consent of Nursing Department. Repeatable to 24 credits. S/U grading. SS.

NURS 400. Special Topics. 1-4 Credits.
Elective opportunities offered in the College of Nursing which may be a combination of special projects, seminars, and clinical experience. Repeatable to 12 credits.

NURS 403. Nursing Across the Lifespan Practicum. 2 Credits.
This course expands the nursing students' knowledge about the healthcare continuum and patients throughout the lifespan through simulated and/or clinical interaction in diverse settings and specialty areas. Students will learn to integrate conceptual knowledge of altered health states as a basis for providing comprehensive care. Clinical reasoning skills will be applied to achieve safe, quality outcomes for patients in diverse populations with complex health conditions. Prerequisites: NURS 330, NURS 331, NURS 332, NURS 333, and NURS 334. Corequisites: NURS 404, NURS 406, NURS 420, NURS 430, and NURS 433. F,S.

NURS 404. Professional Nurse II. 2 Credits.
This course provides a focus on the refinement of the professional nursing role within a complex and dynamic health care environment. This is accomplished with exploration of health promotion, caregiving, safety systems, technology and informatics, and health care quality within the baccalaureate generalist practice roles. Prerequisites: NURS 330, NURS 331, NURS 332, NURS 333, and NURS 334. Corequisites: NURS 403, NURS 406, NURS 420, NURS 430, and NURS 433. F,S.

NURS 405. Informatics in Nursing. 3 Credits.
This web-enhanced course introduces students to the role of nursing informatics in identifying, collecting, processing, and managing information uniquely relative to nursing and healthcare. Students learn how to assess, develop and use nursing information systems to work more efficiently and effectively, and to improve patient care. The learning environment emphasizes the development of proficiency in the use of the computer as a critical thinking and decision making tool. Prerequisites: Basic keyboard and internet utilization skills. S.

NURS 406. Evidence Informed Practice. 2 Credits.
Concepts of evidence-informed practice and nursing research are explored. Methods for critical appraisal of qualitative and quantitative research will be applied. Critical appraisal is performed to inform the delivery of safe and quality nursing care. Students will apply research findings, clinical expertise, and patient preferences to a clinical problem. Prerequisites: NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, and SOC 326 or PSYC 241 or ECON 210. Corequisites: NURS 404, NURS 420, NURS 430, NURS 433, and NURS 403. F,S.

NURS 410. Clinical Reasoning for Safety and Quality Outcomes. 3 Credits.
This course emphasizes the development of higher level clinical reasoning skills with an outcome based focus on safety and quality. F.

NURS 415. Interprofessional Collaborations For Improving Health Care Systems Outcomes. 3 Credits.
Utilizing opportunities to collaborate with other health care professionals in their home communities and online, students will explore the theory and practice of improving health care systems while providing an opportunity for interprofessional educational experience. S.

NURS 420. Interprofessional Health Care. 1 Credit.
The focus of this course is learning to work effectively with an interprofessional health care team using a shared patient-centered approach. Case studies will be the primary teaching strategy. Professions include: physical therapy, nursing, occupational therapy, medicine, social work, communication science disorders, clinical lab science, physician assistant, and dietetics. Seminar. F,S.

NURS 430. Health & Illness III. 4 Credits.
This course is the third in a series using concept based curriculum exemplars to emphasize the nurse's role in managing the care of patients experiencing acute and chronic illness across the life span. Students will recognize complex altered health states and apply evidence-based interventions to promote a state of optimal health for their patients. Clinical reasoning skills will be broadened with a goal of achieving safe, quality outcomes for complex patient conditions. Prerequisites: NURS 330, NURS 331, NURS 332, NURS 333, and NURS 334. Corequisites: NURS 403, NURS 404, NURS 406, NURS 420, and NURS 433. F,S.

NURS 433. Clinical Practicum III. 4 Credits.
This clinical course broadens the student's development of clinical skills needed for safe, competent provision of care for diverse patients with multiple/complex problems across the life span. Students will work with other members of the inter-professional team to plan, implement and evaluate safe, quality care for patients based on concepts that complement the Health Illness III course. The course emphasizes proficiency and efficiency in applying evidence-based knowledge, skills, attitudes and patient care technologies that will promote a state of optimal health for patients. Prerequisites: NURS 330, NURS 331, NURS 332, NURS 333, and NURS 334. Corequisites: NURS 403, NURS 404, NURS 406, NURS 420, and NURS 433. F,S.

NURS 410. Clinical Reasoning for Safety and Quality Outcomes. 3 Credits.
This course emphasizes the development of higher level clinical reasoning skills with an outcome based focus on safety and quality. F.

NURS 415. Interprofessional Collaborations For Improving Health Care Systems Outcomes. 3 Credits.
Utilizing opportunities to collaborate with other health care professionals in their home communities and online, students will explore the theory and practice of improving health care systems while providing an opportunity for interprofessional educational experience. S.

NURS 420. Interprofessional Health Care. 1 Credit.
The focus of this course is learning to work effectively with an interprofessional health care team using a shared patient-centered approach. Case studies will be the primary teaching strategy. Professions include: physical therapy, nursing, occupational therapy, medicine, social work, communication science disorders, clinical lab science, physician assistant, and dietetics. Seminar. F,S.

NURS 430. Health & Illness III. 4 Credits.
This course is the third in a series using concept based curriculum exemplars to emphasize the nurse's role in managing the care of patients experiencing acute and chronic illness across the life span. Students will recognize complex altered health states and apply evidence-based interventions to promote a state of optimal health for their patients. Clinical reasoning skills will be broadened with a goal of achieving safe, quality outcomes for complex patient conditions. Prerequisites: NURS 330, NURS 331, NURS 332, NURS 333, and NURS 334. Corequisites: NURS 403, NURS 404, NURS 406, NURS 420, and NURS 433. F,S.

NURS 433. Clinical Practicum III. 4 Credits.
This clinical course broadens the student's development of clinical skills needed for safe, competent provision of care for diverse patients with multiple/complex problems across the life span. Students will work with other members of the inter-professional team to plan, implement and evaluate safe, quality care for patients based on concepts that complement the Health Illness III course. The course emphasizes proficiency and efficiency in applying evidence-based knowledge, skills, attitudes and patient care technologies that will promote a state of optimal health for patients. Prerequisites: NURS 330, NURS 331, NURS 332, NURS 333, and NURS 334. Corequisites: NURS 403, NURS 404, NURS 406, NURS 420, and NURS 433. F,S.
NURS 441. Population Based Health. 3 Credits.
The course emphasizes population-based health and the role of the public health nurse. Concepts and theories related to providing health care to complex systems and aggregates in community, state, nation and world are explored. Concepts of evidence-informed practice and nursing research are explored with the use of population health data. Emphasis is placed on prevention, promotion and protection of health, utilizing epidemiological data to identify health risks of populations. Social determinants of health, as a basis for population health, are emphasized. Prerequisites: NURS 403, NURS 404, NURS 406, NURS 420, NURS 430, and NURS 433. Corequisites: NURS 450, NURS 442, NURS 443, and NURS 453. F,S.

NURS 442. Health Care Infrastructure. 3 Credits.
This course focuses on the baccalaureate nurse role in the broader context of a health care system. An overview of health care organizations and health care system infrastructure is examined. The role of health care economics, health care law, quality improvement, and regulatory policy that shape the nature, quality and safety of the practice environment are examined. Prerequisites: NURS 403, NURS 404, NURS 406, NURS 420, NURS 430, and NURS 433. Corequisites: NURS 441, NURS 443, NURS 450, and NURS 453. F,S.

NURS 443. Clinical Practicum IV. 2 Credits.
Concepts and theories from Population-Based Health are applied to the health care of individuals, groups, communities and populations. There is a concentrated focus on health promotion and disease/injury prevention. An epidemiological approach is used to analyze health problems at local, state, and national levels. Students apply knowledge of primary, secondary, and tertiary levels of prevention using a population-based perspective. Roles of public health nurses are studied and implemented through a variety of clinical experiences with public and private agencies. Prerequisites: NURS 403, NURS 404, NURS 406, NURS 420, NURS 430, and NURS 433. Corequisites: NURS 441, NURS 443, NURS 450, and NURS 453. F,S.

NURS 444. Baccalaureate Nursing Review Course. 1 Credit.
In this course, the student will participate in a comprehensive review and synthesis of nursing knowledge developed throughout the curriculum, and the study skills, stress management techniques and test-taking strategies that will prepare them for the National Licensure Examination-Registered Nurse (NCLEX-RN). Prerequisites or Corequisites: NURS 442 and successful completion of semester 3 nursing courses. F,S.

NURS 450. Transition to Practice: Seminar. 2 Credits.
This seminar course prepares students to transition from student status to a professional nursing role. It allows the student to synthesize and integrate previous learning experiences. Emphasis is placed on the role of the nurse as a provider of indirect and direct care; designer, manager and coordinator of care; and member of the profession. This writing intensive course along with Clinical Practicum V, is a UND Essential Studies Capstone requirement with an emphasis on advanced communication. Prerequisites: NURS 403, NURS 404, NURS 406, NURS 420, NURS 430, and NURS 433. Corequisites: NURS 441, NURS 442, NURS 450, and NURS 453. F,S.

NURS 453. Clinical Practicum V: Transition to Practice. 3 Credits.
A preceptor model of learning provides clinical opportunities to synthesize and integrate previous learning experiences. Emphasis is placed on the role of the nurse as a provider of indirect and direct care; designer, manager and coordinator of care; and member of the profession. The focus is on individual transition to the professional nursing role, recognizing the organizational, social, political, economic, ethical and legal context in which interdisciplinary health care is delivered in a selected clinical setting. Prerequisites: NURS 403, NURS 404, NURS 406, NURS 420, NURS 430, and NURS 433. Corequisites: NURS 441, NURS 442, NURS 443, and NURS 453. F,S.

NURS 474. Professional Development II. 3 Credits.
Focus is on the development of the professional nursing role within a complex and dynamic health care environment, with exploration of issues critical to leadership in nursing. Lecture/Discussion/CLinical. SS.

NURS 489. Senior Honors Thesis. 1-8 Credits.
Supervised independent study culminating in a thesis. Prerequisites: Nursing majors only; Consent of the department and approval of the Honors Committee. Repeatable to 9 credits. F,S.

NURS 490. Transcultural Health Care Theories, Research, and Practice. 3 Credits.
Analysis of theories, principles, and research related to transcultural health care. Students develop awareness of the biological, psychological, and sociological aspects of clients of selected cultural groups and identify their specific health care values and practices. Prerequisites: Nursing major and junior standing; or permission of instructor. F,S.

Bachelor of Science in Nursing

On-Campus Program

On-Campus Traditional BSN Program

The graduate receives the Bachelor of Science in Nursing (B.S.N.) degree and is eligible to take the NCLEX-RN, the national examination required for registered nurse licensure. UND Nursing programs are accredited by the Commission on Collegiate Nursing Education (CCNE) and are approved by the North Dakota Board of Nursing. Students must complete a formal application to the College of Nursing and Professional Disciplines (CNPD) and be approved for admission by the Nursing program before enrolling in the nursing curriculum. All persons who wish to apply for admission to the undergraduate nursing major are advised to become informed of all admission requirements and to follow the suggested curriculum leading to the Bachelor of Science in Nursing. All qualified students, whether currently enrolled at or planning to transfer to UND, are considered on merit. Since the College of Nursing and Professional Disciplines strives to reflect current trends in the nursing profession, there may be on-going changes in the curriculum. Information on any newly approved programs or changes in programs/major will be available on the Nursing website.

The nursing program admits students twice during the calendar year. The application deadline is February 1 (for admission to fall class), and July 1 (for admission to spring class). The application process is online and may be accessed at: http://app.cnpd.und.edu/application/.

Pre-Nursing Declaration

Students who wish to pursue an undergraduate degree in nursing must first apply to UND as a pre-nursing major in the College of Nursing and Professional Disciplines. Once the student has successfully been admitted to UND as a pre-nursing major, a nursing Office Student Services (OSS) advisor will be assigned.

Nursing Program Application

Students are admitted each semester based on availability of clinical and faculty resources. The nursing program admits students who meet criteria for direct admission and standard admission.

Direct Admission:

Direct admission is a criterion-based early admission program for pre-nursing students who have exemplary academic performance during high school. Direct admission will be offered to approximately the 20 most qualified candidates. Direct admissions will occur once per academic year in the fall semester. Students who are not selected for direct admission must apply for admission to the traditional BSN program through the standard admission process

Standard Admission:

The undergraduate nursing program admits students twice during the calendar year. The application deadlines are posted on the CNPD nursing website. The application process is online and may be accessed at: http://app.cnpd.und.edu/application/.

Core nursing prerequisite coursework may be repeated or withdrawn from a maximum of one time per course.

ENGL 110 College Composition I 3
ENGL 130 Composition II: Writing for Public Audiences 3
CHEM 115 Introductory Chemistry 4
& 115L Introductory Chemistry Laboratory
Admission Acceptance Criteria

Upon notice of admission to the Traditional BSN On-Campus Nursing Program, students must submit the signed acceptance form and a non-refundable deposit by the date indicated on the Acceptance form. Failure to return the acceptance form and deposit by deadline will result in loss of nursing placement. Current verifications and a designated background check, with acceptable results, will be required. Details regarding required immunizations and background check process will be provided in the admission packet.

The following courses or equivalents must be completed with a “C” or better prior to beginning nursing courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 250</td>
<td>Developmental Psychology</td>
<td>4</td>

</tr>
<tr>
<td>or ECON 210</td>
<td>Introduction to Business and Economic Statistics</td>
<td></td>
</tr>
</tbody>
</table>

NOTE: Students will be automatically assigned to the UND catalog active at the time of admission to the Nursing program unless they request otherwise.

Students may petition to establish credit through special examinations according to University policy. Equivalency of courses taken on other campuses than UND should be verified by contacting the College of Nursing and Professional Disciplines as early as possible.

Admission Criteria for Transfer Nursing Students:

Students transferring to the nursing major from other accredited nursing programs must fulfill the same minimum prerequisite requirements as current University of North Dakota students. Transfer nursing students seeking admission to the UND nursing program must meet UND and standard admission criteria. Additional prerequisite courses will be required in accordance with the level of requested admission. Transfer nursing students must provide a letter of good standing from their prior nursing program. During the admission process, the student’s transfer work will be evaluated.

Additional Expenses

In addition to the regular university tuition and fees, nursing students are charged a nursing program fee each semester. Costs of laboratory tests, immunizations, and health insurance required for the protection of the student and patients are the responsibility of the student. There are additional expenses related to background checks, uniforms and clinical equipment, graduation, and licensure. An estimated program cost sheet is available from the College of Nursing and Professional Disciplines web pages. Students are responsible for transportation related to clinical experience. Use of a car, especially for public health nursing, is necessary. Students may complete the practicum course at a distant site which will require travel and housing costs associated with that affiliation.

Standardized Testing

To facilitate success on the licensure exam, students participate in standardized testing as they progress through the curriculum and prior to graduation.

Curriculum

Required 120 credits (36 of which must be numbered 300 or above) including:

I. Essential Studies (ES) Requirements, including 9 credits of Fine Arts and Humanities and 9 credits of Communication. A minimum of six (6) credits of the Essential Studies requirements must meet the US and Global Diversity designations (See University ES listing on web). The curriculum provides a framework for completion of ES requirements prior to beginning the undergraduate nursing curriculum. Completion of ES and general education requirements prior to beginning nursing courses is strongly encouraged.

II. A minimum overall grade point average of 2.75.

III. The following curriculum:

Progression and Graduation Requirements

Students should note that nursing courses are sequenced to build on one another over four semesters. Careful attention should be paid to pre-and co-requisites. Each semester is to be completed in its entirety before progressing to the next semester. Students who need to extend or shorten the number of semesters to complete the curriculum, i.e., part-time attendance or LPNs, must see their OSS adviser.

1. A 2.75 overall GPA is required for progression in the nursing program at the end of each semester.
2. A student must attain a letter grade of at least a “C” in each of the courses required in the undergraduate nursing curriculum, including all the nursing and support courses, to progress to the next semester of nursing courses and for graduation from the College of Nursing and Professional Disciplines. A student earning a “D” or an “F” in any required nursing course may repeat the course only once.
3. A student may only repeat one required nursing course.
4. Benchmark scores on ATI progression assessments and predictor exam must be achieved or the remediation process successfully completed. Students who do not meet the academic progression criteria will be placed on probation. The nursing program also reserves the right to place students on probation, to suspend, or to dismiss any student in nursing who does not meet the ATI content exam policy requirements, does not uphold professional standards or conduct, or whose performance in relation to client care is unsatisfactory. Additional details and any modifications in policies may be obtained from the Dean of the College, and are available in the College of Nursing and Professional Disciplines undergraduate student handbook.

Bachelor of Science in Nursing Online Program

RN to BSN Online Option

The RN/BSN option is designed for students who hold an associate (diploma) degree in nursing and are seeking to obtain a baccalaureate degree in nursing. Students in the RN/BSN option program may attend classes either full or part-time. Thirty one semester credits of UND nursing coursework are required (see below). In addition, students must complete all UND Essential Studies requirements, RN/BSN program pre-requisites and UND graduation requirements. A minimum of 120 credits and a minimum overall grade point average of 2.75 are required for graduation. Online tuition/fees and the nursing program fee apply.

RN to BSN Admission Process

Completed online applications received by July 1 will be considered for the following fall admission. Applications will be accepted once per calendar year. Applications are accepted from licensed RNs, from either an accredited Diploma program or an accredited Associate Degree Program. The application process is online and may be accessed at https://app.cnpd.und.edu/rnbsn_application.

RN to BSN Curriculum

1. Total 31 credits
2. Two options:
   a. Full-time (completion in 12 months)
   b. Part-time (completion in 24 months)

Courses are offered online through distance delivery. NURS 374 Public Health Nursing Clinical course requires daytime clinical hours and can be conducted in a community near the student based on agency availability and UND nursing program approval. UND may not be able to accommodate clinical experiences in some states due to specific state board of nursing regulations. For additional information, contact the College of Nursing and Professional Disciplines or visit the RN/BSN area on the College website.

RN/BSN Progression and Graduation Requirements

Students should note that nursing courses are sequenced to build on one another. Careful attention should be paid to pre- and co-requisites. Enrollment may be either full- or part-time.

1. A 2.75 overall GPA is required for progression at the end of each semester.
2. A student must attain a letter grade of at least a “C” in each of the courses required in the undergraduate nursing curriculum, including all the nursing and support courses, to progress to the next semester of nursing courses and for graduation from the College of Nursing and Professional Disciplines.
3. A student earning a “D” or an “F” in any required nursing course may repeat that course only once.
4. A student may only repeat one required nursing course. Students who do not meet the academic progression criteria will be placed on probation. The nursing program also reserves the right to place students on probation, to suspend, or to dismiss any student in nursing who does not uphold professional standards of conduct or whose performance in relation to client care is unsatisfactory. Additional details and any modifications in policies may be obtained from the Dean of the College, and are available in the College of Nursing and Professional Disciplines undergraduate student handbook.

Nutrition and Dietetics (N&D)

B.S. in Dietetics (p. 179)
B.S. in Human Nutrition (p. 178)
Minor in Nutrition (p. 179)

Courses

N&D 100. Introduction to Nutrition and Dietetics. 1 Credit.
The philosophy, history, future trends, and career options in nutrition and dietetics will be discussed. S/U grading. S.

N&D 220. Foodservice Safety and Sanitation. 1 Credit.
The study of food safety and sanitation throughout the foodservice system. Upon successful completion of the course material and examination, the student will hold ServSafe® Certification. S.

N&D 240. Fundamentals of Nutrition. 3 Credits.
This introductory course focuses on basic elements of nutrition science. Emphasis is placed on nutrients, their functions and food sources, and discussion about how food behavior translates into nutritional health. The course also includes current topics such as fad diets, phytochemicals, and sports nutrition. Students learn to apply the principles of nutrition to their own food intake to improve their nutritional health. F,S,SS.

N&D 250. Consumer Food Issues. 3 Credits.
Students will explore all aspects of meal management with consideration of the importance of palatability and presentation of food as a means to improve nutritional status. Emphasis will be placed on preparing students with practical skills and knowledge needed to effectively assist consumers, clients and groups with informed food choices. Topics considered by the course include: food composition, purchasing, palatability and quality, meeting nutritional needs through menu planning, budgeting and organizational skills. The impact of various regulatory agencies on protection and distribution of the food supply will be examined. Content will be presented through classroom lectures and activities with opportunity to apply and develop skills in lab sessions. The course will meet for 2 hours of lecture and 2 hours of lab per week. Prerequisites: N&D 240. F.

N&D 260. Principles of Foods and Food Science. 3 Credits.
Introduction to food selection and preparation principles, sensory evaluation of food, role of ingredients, and food technology. Emphasizes application of scientific principles in relationship to food composition, physical properties, and chemical reactions during food preparation. Prerequisite: A college level chemistry course. S.

N&D 325. Nutrition Through the Life Cycle. 3 Credits.
Optimal growth and development throughout the lifespan requires proper nutrition that begins prior to conception. This course examines nutritional needs of individuals rior to conception, during pregnancy and lactation, and throughout childhood, adolescence, and all of adulthood. The course will study the nutrient needs for each phase of the life cycle. Students will learn about the influence of nutrition on growth and development, as well as the physiological and developmental basis for food choice and dietary recommendations. Prerequisite: N&D 240. F.

N&D 335. World Food Patterns. 3 Credits.
Examination of the food patterns of selected world population groups considering the effect of social, cultural, and economic practices on nutritional values. F.

N&D 344. Nutrition Education and Counseling. 3 Credits.
Introduces students to counseling and learning theories for application with individuals and groups in clinical or community settings. Students will develop basic skills necessary to design and implement nutrition education programs and will practice application of principles learned in nutrition counseling. Prerequisite: N&D 240. F.
N&D 345. Community Nutrition. 3 Credits.
This course allows the student to develop the knowledge and skills necessary to plan programs and promote nutritional well-being to the public. Through readings, lectures and class discussions, students work in teams to select a community to assess, research it relative to interrelated health, social and economic concerns, and identify nutrition priorities that need to be addressed in that community. A graduated series of assignments culminates in a written program proposal and oral presentation to address the needs of the community. Students hone speaking and writing skills, and learn how to assess the work of others, to give helpful feedback, and to work effectively to complete group and individual assignments. Prerequisites or Corequisites: N&D 325 and N&D 344. F.

N&D 348. Sports Nutrition. 3 Credits.
Sports Nutrition is an overview of the specialized nutritional needs of recreational and competitive athletes. It presents the scientific basis for the role of food and nutrients during athletic training, performance, and recovery. Prerequisite: N&D 240. S.

N&D 350. Medical Nutrition Therapy I. 3 Credits.
An evidence-based study and application of the nutrition care process. This includes nutritional assessment techniques, pathophysiology in disease, and medical nutrition therapy for common medical conditions. Prerequisite: N&D 325 and PPT 301. F.

N&D 380. Food Service Production and Management. 3 Credits.
Introduces students to the many facets of a quality and quantity food service department. Course content will apply concepts learned in N&D 250 - Consumer Food Issues and N&D 260 - Food Science to food service in a quantity setting. Students will apply management principles to the food service environment. Prerequisites: N&D 250 and N&D 260. Prerequisite or Corequisite: MGMT 300. S.

N&D 441. Nutritional Biochemistry. 4 Credits.
A comprehensive investigation of the nutritional needs of humans with emphasis on nutritional biochemistry and current issues. Prerequisites: A grade of C or better in N&D 240, CHEM 116 or CHEM 340, and PPT 301. S.

N&D 450. Medical Nutrition Therapy II. 3 Credits.
An advanced level of evidence-based study and application of the nutrition care process. This includes pathophysiology in disease and medical nutrition therapy for medical conditions and comorbidities. Prerequisites: N&D 350 and N&D 441. F.

N&D 480. Interprofessional Health Care. 1 Credit.
The focus of this course is learning to work effectively with an interprofessional health care team using a shared patient-centered approach. Case studies will be the primary teaching strategy used. Prerequisite: Senior standing in Dietetics. S/U grading. F.

N&D 488. Foundations of Dietetic Practice. 3 Credits.
This course introduces the student to responsibilities associated with dietetic professional practice. Professional issues related to dietetic practice includes the Code of Ethics, legal credentialing (licensure laws), Standards of Professional Performance and future trends in the profession. The goal is to provide an opportunity for students to learn and continue to use professional skills and resources characteristic of nutrition and dietetics professionals in preparation for life-long learning. Prerequisites: Enrollment in the Coordinated Program in Dietetics; senior status. S.

N&D 494. Research in Nutrition and Dietetics. 1-4 Credits.
This course will provide an introduction to the research process, responsible conduct in research, and explore major types of study design in nutrition. Students will examine the literature to evaluate evidence about nutrition problems and interventions. Prerequisites: A minimum of 12 credits in Nutrition and Dietetics. Prerequisite or Corequisite: Completion of a statistics course. Repeatable to 4 credits. S.

N&D 497. Supervised Practice in Human Nutrition. 1-6 Credits.
Development of professional skills and competencies in human nutrition through supervised practice with learning experiences requiring knowledge and theory to be applied to simulated and real-life situations. Prerequisite: Enrollment in the Human Nutrition program; department consent required. Prerequisites or Corequisites: N&D 344 and N&D 345. Repeatable to 6 credits. On demand.

N&D 498. Supervised Practice in Dietetics. 1-12 Credits.
Development of professional skills and competencies through planned learning experiences in which knowledge and theory are applied to simulated and real-life situations in nutrition and dietetics. Prerequisite: Enrollment in the Coordinated Program in Dietetics; Dietetics majors require consent of instructor one semester prior to enrollment. Repeatable to 31 credits. F.S.S.

N&D 499. Special Topics in Nutrition and Dietetics. 1-4 Credits.
Special topics and/or in depth independent study in selected content areas relative to nutrition and dietetics. Prerequisite: Instructor consent. Repeatable to 6 credits. On demand.

Bachelor of Science in Human Nutrition

Students must meet all University graduation requirements.

I. Required Courses:

N&D 100 Introduction to Nutrition and Dietetics 1
N&D 220 Foodservice Safety and Sanitation 1
N&D 240 Fundamentals of Nutrition 3
N&D 250 Consumer Food Issues 3

ANAT 204L Anatomy for Paramedical Personnel Laboratory 2
PPT 301 Human Physiology 4
SOC 326 Sociological Statistics 3

Total Credits 72

II. Choice of either Option A or Option B.

Option A Health Promotion: Choose a minimum of five courses

N&D 260 Principles of Foods and Food Science 3
N&D 380 Food Service Production and Management 3
MGMT 300 Principles of Management 3
PHE 301 Principles and Foundation of Health Education 3
PHE 307 Methods and Materials of Health Education 3
KIN 240 Introduction to Wellness 2
T&L 252 Child Development 3
PSYC 250 Developmental Psychology 4
PSYC 355 Adulthood and Aging 3
SOC 352 Aging and Society 3

Bachelor of Science in Human Nutrition
Bachelor of Science in Dietetics

Admission Requirements

1. Completion of prerequisite courses and currently enrolled or eligible for enrollment at UND.
2. Students must have a grade of "C" or better in undergraduate courses in nutrition and science courses. Recency of courses will be evaluated.
3. A cumulative Grade Point Average (GPA) of at least 3.0 for all undergraduate work (based on A=4.0).
4. Completion of 50 hours of service learning.
5. Submission of the online application materials including three letters of recommendation, a statement of goals, résumé, and service learning hours form.
6. Professional interview.
7. Student applying to the accelerated BS/MS program must meet minimum requirements for admission set by the School of Graduate Studies, including English proficiency.

Degree Requirements

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be UND institutional credit) including:

I. Essential Studies Requirements (see University ES listing).
II. The following curriculum:

Pre-professional requirements:
Pre-Dietetics students complete required prerequisite courses during their first two years of enrollment at the University of North Dakota. Applications to the Coordinated Program in Dietetics are accepted annually with a due date of February 15th. Students typically apply during the spring semester of their sophomore year.

Total Credits 58-62

Minor in Nutrition

Students in other majors may elect to earn a minor in nutrition. The requirements of the minor are the completion of 20 semester hours of credit in nutrition-related courses. To develop the program of study, students should consult an adviser in the Department of Nutrition and Dietetics.

Occupational Therapy (OT)

See School of Graduate Studies (p. 511) section

Peace Studies (PS)

GEOG 161. World Regional Geography. 3 Credits.
Development of the concept of region with analysis of the relationship of physical and cultural features to the contemporary world situation. F.S.

GEOG 250. Introduction to Geopolitics. 3 Credits.
As a branch of political geography, the study of Geopolitics is concerned with the spatial dynamics of power relations especially at the international level. From a geographic perspective, this course surveys changing relations among states and the influences of national and transnational actors and events. The course attempts to help students apply a broad range of theoretical perspectives to the analysis of global and regional issues and events, and develop insights into what is happening in the world today. From war and terrorism to economic globalization, human rights and sustainable development, this course will explore a myriad of important issues and challenges that face the world today. S.

PHIL 120. Introduction to Ethics. 3 Credits.
This course investigates the nature of the Good Life, of moral principles, and the application of moral systems to contemporary debate. These may include questions about the morality of war, capital punishment, sexual behavior, welfare, and so forth. F.S.

HIST 335. Nuclear Weapons and the Modern Age. 3 Credits.
An introduction to the history of: nuclear weapons and their delivery systems, their development and use during World War II, the nuclear arms race between the U.S. and the U.S.S.R., popular disarmament movements, and diplomatic efforts to control nuclear weapons and their proliferation. A final section will deal with the nuclear implications of the end of the Cold War and the development of new nuclear states in the last years of the 20th century. The course will include—from an historian's point of view—some technical material necessary to a reasonable and realistic understanding of the subject. S, even years.

HUM 283. Evidenced Based Reasoning Across Disciplines. 3 Credits.
In this course, students will examine chosen issues in the sciences, social sciences, and humanities and will gain a general familiarity with the academic and popular forms of writing, evidence based reasoning, and research in each discipline. They will become familiar with the research methodologies of each discipline and learn to integrate the different methods and perspectives with their own analysis. F.S.

PS 394. Independent Study. 1-4 Credits.
Supervised reading, study or research on an individual topic. Prerequisite: Consent of instructor. Repeatable to 6 credits. On demand.

IDS 491. Capstone Interdisciplinary Seminar. 1-3 Credits.
This seminar will be organized by the director of the Interdisciplinary Studies Program to act as a point of reference for students working on their Senior Projects in the program. The projects will vary from semester to semester, so the focus will shift accordingly. Not repeatable. Prerequisite: IDS 280. Corequisite: IDS 498. S.

PS 497. Internship. 3-16 Credits.
Provides direct experience in a peace-related, social change, human service/human rights or international agency. Prerequisites: Junior standing and advisory approval. Repeatable to 16 credits. S/U grading. F.S.

HUM 408. Writing Across the Disciplines. 3 Credits.
This senior level course will provide students with an intensive writing experience that focuses on methods and strategies in the humanities, social sciences, and sciences. Students will gain an understanding of the theoretical underpinnings of the disciplines while they engage in the process of integrating disciplinary materials and writing tactics as well as formulating written responses to topics of current concern. Prerequisites: ENGL 120 or ENGL 125 or ENGL 130 and Junior/Senior standing. F.S.

IDS 495. Service and Citizenship. 3 Credits.
Students will design community service projects, or will join existing projects, and engage in volunteer action during the semester. Class meetings on campus will center on a critical discussion of volunteerism and community service; current literature on service learning will be studied. Self-assessment of experiential learning outcomes, as well as a portfolio and essay will be required. Prerequisite: Junior or Senior standing. F.S.S.S.

Petroleum Engineering (PtrE)

B.S. in Petroleum Engineering (p. 182)

Certificate in Petroleum Engineering (p. 182)

Courses

PTRE 201. Introduction to Petroleum Engineering. 3 Credits.
Introducing students to the broad aspects of petroleum engineering. The student will gain an appreciation for exploration, discovery, and commercial recovery of oil and gas industry. Prerequisite: Petroleum Engineering major. Prerequisites or Corequisites: GEOL 101 or GEOE 210; all the prerequisites must be completed with a "C" or higher. S.

PTRE 201B. Introduction to Petroleum Engineering. 3 Credits.
Introducing students to the broad aspects of petroleum engineering. The student will gain an appreciation for exploration, discovery, and commercial recovery of oil and gas industry. S/U grading. S.

PTRE 301. Reservoir Rock Properties. 3 Credits.
Systematic theoretical and practical study of physical properties of petroleum reservoir rocks; lithology, porosity, relative and effective permeability, fluid saturations, capillary characteristics, compressibility, rock stress, and fluid-rock interaction. Prerequisites: PTRE 201, GEOL 101 and GEOL 101L, MATH 165; all the pre-requisites must be completed with a "C" or higher. F.

PTRE 301B. Reservoir Rock Properties. 3 Credits.
Systematic theoretical and practical study of physical properties of petroleum reservoir rocks; lithology, porosity, relative and effective permeability, fluid saturations, capillary characteristics, compressibility, rock stress, and fluid-rock interaction. S/U grading. F.

PTRE 311. Petroleum Fluid Properties. 3 Credits.
Phase behavior of naturally occurring hydrocarbon system; evaluation and correlation of physical properties of petroleum reservoir fluids under various conditions of pressure and temperature, including laboratory and empirical methods. Prerequisite: CHEM 122; all prerequisites must be completed with a "C" or higher. Corequisite: ME 341. Prerequisite or Corequisite: PTRE 301. S.

PTRE 311B. Petroleum Fluid Properties. 3 Credits.
Phase behavior of naturally occurring hydrocarbon system; evaluation and correlation of physical properties of petroleum reservoir fluids under various conditions of pressure and temperature, including laboratory and empirical methods. S/U grading. S.

PTRE 361. Petroleum Engineering Laboratory I. 1 Credit.
To introduce the students to different lab equipment in order to measure physical properties of the reservoir rock. Prerequisite or Corequisite: PTRE 301; all prerequisites must be completed with a "C" or higher. S.

PTRE 401. Well Logging. 3 Credits.
This course covers topics on methods of how to measure and interpret the physical and chemical properties of formation through the well logging tools. Prerequisites: PTRE 301; all prerequisites must be completed with a "C" or higher. F.

PTRE 401B. Well Logging. 3 Credits.
This course covers topics on methods of how to measure and interpret the physical and chemical properties of formation through the well logging tools. S/U grading. F.

PTRE 405. Petroleum Eng. Economy and Law. 3 Credits.
Presenting the principles of asset management with emphasize on applications to the upstream oil and gas activities and discussing the legal aspects of petroleum exploration and production in the US and internationally. F.
PTRE 405B. Petroleum Eng. Economy and Law. 3 Credits.
Presenting the principals of asset management with emphasize on applications to the upstream oil and gas activities and discussing the legal aspects of petroleum exploration and production in the US and internationally. S/U grading. F.

PTRE 411. Drilling Engineering. 3 Credits.
Concepts, processes, equipment, and engineering principals used to drill oil and gas wells and near-surface wells common in geotechnical, environmental, and water well applications. Prerequisites: GEOE 210 or GEOL 101, PTRE 201; all prerequisites must be completed with a "C" or higher. F.

PTRE 411B. Drilling Engineering. 3 Credits.
Concepts, processes, equipment, and engineering principals used to drill oil and gas wells and near-surface wells common in geotechnical, environmental, and water well applications. S/U grading. F.

PTRE 421. Production Engineering. 3 Credits.
Design, evaluation, and optimization of petroleum production system using nodal analysis. Analysis and design of well flow systems, artificial lift systems, and surface separation/treating facilities. Prerequisites: PTRE 431 and ME 306; all prerequisites must be completed with a "C" or higher. F.

PTRE 421B. Production Engineering. 3 Credits.
Design, evaluation, and optimization of petroleum production system using nodal analysis. Analysis and design of well flow systems, artificial lift systems, and surface separation/treating facilities. S/U grading. F.

PTRE 431. Reservoir Engineering. 3 Credits.
Discussing general concepts in reservoir engineering, material balance equation for oil, gas, and water, determining reserves under different drive mechanisms, and fluid flow in different oil and gas reservoirs. Prerequisites: PTRE 311. Prerequisite or Corequisite: ME 306; all prerequisites must be completed with a "C" or higher. F.

PTRE 431B. Reservoir Engineering. 3 Credits.
Discussing general concepts in reservoir engineering, material balance equation for oil, gas, and water, determining reserves under different drive mechanisms, and fluid flow in different oil and gas reservoirs. S/U grading. F.

PTRE 441. Petroleum Evaluation & Management. 3 Credits.
Expected value and investment decision analysis, estimation of oil and gas reserves, measures of profitability, production, decline curve analysis, and oil and gas reserves evaluations. Prerequisites: PTRE 311, PTRE 431, PTRE 411, and PTRE 421. S.

PTRE 441B. Petroleum Evaluation & Management. 3 Credits.
Expected value and investment decision analysis, estimation of oil and gas reserves, measures of profitability, production, decline curve analysis, and oil and gas reserves evaluations. S/U grading. On demand.

PTRE 445. Well Testing. 3 Credits.
Well test analysis using type curve techniques, Material balance for oil and gas reservoirs, Water influx calculations, Immiscible displacement and fractional flow calculations, Well test analysis to estimate reservoir properties, Pseudo functions, Enhanced oil recovery. Prerequisites: PTRE 431 and MATH 266 with a grade of C or higher. S.

PTRE 445B. Well Testing. 3 Credits.
Well test analysis using type curve techniques, Material balance for oil and gas reservoirs, Water influx calculations, Immiscible displacement and fractional flow calculations, Well test analysis to estimate reservoir properties, Pseudo functions, Enhanced oil recovery. S/U grading. S.

PTRE 451. Advanced Drilling Engineering. 3 Credits.
Advanced topics in drilling which are part of well construction will be covered in this course. The sequence of constructing a well will be discussed and practiced through class projects and assignments. Prerequisite: PTRE 411, all prerequisites must be completed with a "C" or higher. S.

PTRE 451B. Advanced Drilling Engineering. 3 Credits.
Advanced topics in drilling which are part of well construction will be covered in this course. The sequence of constructing a well will be discussed and practiced through class projects and assignments. S/U grading. S.

PTRE 461. Natural Gas Engineering. 3 Credits.
Estimation of gas properties; gas field development and material balance analysis; study of production and reservoir characteristics of gas and gas-condensate reservoirs; design and optimization of well bore and surface facilities for separation, processing, transportation, and metering; gas hydrates. Prerequisites: ME 306 and PTRE 311; all prerequisites must have a grade of C or higher. S.

PTRE 461B. Natural Gas Engineering. 3 Credits.
Estimation of gas properties; gas field development and material balance analysis; study of production and reservoir characteristics of gas and gas-condensate reservoirs; design and optimization of well bore and surface facilities for separation, processing, transportation, and metering; gas hydrates. S/U grading. S.

PTRE 462. Petroleum Engineering Laboratory II. 1 Credit.
To introduce the students to different lab equipment in order to measure geomechanical properties of the rock and flow behavior of the reservoir fluid. Prerequisites or Corequisites: PTRE 421 and PTRE 465. S.

PTRE 465. Petroleum Geomechanics. 3 Credits.
A brief review of fundamental of rock mechanics. The major focus of the course will be on different applications of Geomechanics in Petroleum Eng with focus on wellbore instability. Prerequisite: PTRE 411; all prerequisites must be completed with a "C" or higher. F.

PTRE 465B. Petroleum Geomechanics. 3 Credits.
A brief review of fundamental of rock mechanics. The major focus of the course will be on different applications of Geomechanics in Petroleum Eng with focus on wellbore instability. S/U grading. F.

PTRE 471. Numerical Reservoir Simulation. 3 Credits.
Use of mathematics and computer programs to solve reservoir flow problems. This course will discuss: Fundamental reservoir calculations, multiphase flow concepts, fluid displacement, fluid flow equations and discretization concepts, as well as history matching and reservoir performance forecast. Prerequisites: PTRE 431 and MATH 266; all prerequisites must be completed with a C or higher. F.

PTRE 471B. Numerical Reservoir Simulation. 3 Credits.
Use of mathematics and computer programs to solve reservoir flow problems. This course will discuss: Fundamental reservoir calculations, multiphase flow concepts, fluid displacement, fluid flow equations and discretization concepts, as well as history matching and reservoir performance forecast. S/U grading. F.

PTRE 475. Well Completions. 3 Credits.
Introduction to well problems including causes and remediation; near wellbore formation damage mechanism, control and prevention; sand and water production mechanisms; control and management; scale deposition removal and prevention; corrosion control and prevention; principles and practices of well workover and intervention operations; an overview of production logging tools and their various applications including production log interpretation, familiarization with new technology and reservoir stimulation by fracturing with emphasis on design and estimation; stimulation to improve productivity. Prerequisite: PTRE 421 with a grade of "C" or higher. S.

PTRE 475B. Well Completions. 3 Credits.
Introduction to well problems including causes and remediation; near wellbore formation damage mechanism, control and prevention; sand and water production mechanisms; control and management; scale deposition removal and prevention; corrosion control and prevention; principles and practices of well workover and intervention operations; an overview of production logging tools and their various applications including production log interpretation, familiarization with new technology and reservoir stimulation by fracturing with emphasis on design and estimation; stimulation to improve productivity. S/U grading. S.

PTRE 484. Research Design. 3 Credits.
This course is designed to prepare students to develop the essential skills in employing verbal and nonverbal communication in a variety of settings in academic and professional environments. Fundamentals of research methods, research design and also the essential written communication skills are taught to provide a basis for students to apply and practice communication principles in several informative and persuasive presentations that are focused, well organized, substantially supported and confidently delivered throughout the semester. In this course, students will learn and practice the essential skills that are required for the successful completion of the final year engineering design Capstone course and must be undertaken prior to PTRE 485 Senior Design. In the meantime, students in this course will work on assignments that will be used and are integral part of next semester's PTRE 485 Senior Design. Prerequisites: PTRE 401 and GEOL 407; all prerequisites must be completed with a "C" or higher. F.
Bachelor of Science in Petroleum Engineering

Required 129 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum:

All students must meet each semester with their academic advisor.

Geology courses 300 level or higher may be used as technical electives, dependent upon departmental approval.

* All ENGR and Geol courses must be completed with a grade of "C" or better.

Certificate in Petroleum Engineering

Admission Requirements

1. Interest in learning about Petroleum Engineering Topics.
2. Adequate experience in the field of petroleum engineering.

Certificate Requirements

1. A total of sixteen (16) credit hours must be completed from the following courses in the PE undergraduate curriculum:

2. Courses must be passed with the following requirements below:

Courses shall only count as credit toward fulfilling the requirements listed above when a grade of S (for S/U) or C or higher has been awarded at the completion of the course.

**Pharmacology, Physiology and Therapeutics (PPT)**

**Undergraduate Courses**

PPT 301. Human Physiology. 4 Credits.
A study of the normal function of the human body with particular consideration given to the necessary background needed by students pursuing a course of study in Allied Health Sciences. There are five hours of formal classroom study including two hours of laboratory and an optional review period each week. Prerequisites: ANAT 204 and either BIOL 150/150L or CHEM 116/116L or CHEM 121/121L; open to Athletic Training, CLS, Community Nutrition, Cytotechnology, Dietetics, Pre-Dietetics, Nursing, Pre-Nursing, Pre-OT, PT, and OT majors only. F.S.

PPT 315. Human Pharmacology. 3 Credits.
A survey of the more important drugs used in medicine, including basic principles, clinical uses and possible adverse effects. Prerequisites: PPT 301 and CHEM 116L, or CHEM 121 and CHEM 121L, or CHEM 122 and CHEM 122L. S.

PPT 410. Drugs Subject to Abuse. 2 Credits.
Biochemical, pharmacological, behavioral and therapeutic aspects of substance abuse. Prerequisite: Advanced undergraduate standing. S.

PPT 499. Readings in Pharmacology, Physiology and Therapeutics. 1-4 Credits.
Topics and credits to be arranged with the instructor. Prerequisite: Consent of instructor. Repeatable to 4 credits. F.S.S.

**Philosophy and Religious Studies (Phil)**

B.A. with Major in Philosophy and Religious Studies: Philosophy Concentration (p. 185)

B.A. with Major in Philosophy and Religion: Religious Studies Concentration (p. 186)

B.A. with Major in Philosophy and Religious Studies: Pre-Law Concentration (p. 185)

Minor in Philosophy & Religious Studies: Philosophy Concentration (p. 186)

Minor in Philosophy & Religion: Religious Studies Concentration (p. 186)

Minor in Ethics (p. 186)

**Philosophy**

PHIL 101. Introduction to Philosophy. 3 Credits.
An introductory survey of the discipline of philosophy. Students will join the thoughtful search, in which philosophers have engaged through reading and discussion since ancient days, into the problems of reality (metaphysics), of truth and meaning (logic and philosophy of language), of moral standards (ethics), of knowledge (epistemology), of beauty (aesthetics), and other fundamental questions. F.S.

PHIL 110. Forward or Delete? An Introduction to Logic. 3 Credits.
A theoretical and practical introduction to the principles of reasoning—formal and informal, deductive and inductive. Students will study language and patterns of reasoning as vehicles for and obstacles to critical thinking. The central characteristics of deduction and validity; the role of hypotheses, inductive reasoning, probability estimates in scientific and quasi-scientific investigations and other models of critical thinking and their limits will be covered. F.

PHIL 120. Introduction to Ethics. 3 Credits.
This course investigates the nature of the Good Life, of moral principles, and the application of moral systems to contemporary debate. These may include questions about the morality of war, capital punishment, sexual behavior, welfare, and so forth. F.S.

PHIL 130. Introduction to Political Philosophy. 3 Credits.
An exploration of the central themes in political theory. Students will study topics such as justification of the state, liberty, justice, equality, rights, democratic participation. The course will include readings from classic and contemporary philosophers, emphasizing the connection between the theoretical issues addressed and contemporary political debates. S.

PHIL 240. Getting Fit with Aristotle. 3 Credits.
How excellent of a person are you? Can you become better? These are the questions Aristotle asks in his Ethics. In this course, we will read Aristotle to see if his words can actually improve us. We will supplement his classic text with more modern studies in fitness, nutrition, friendship, cognitive science, food, and other topics. Additionally, this course is geared towards skill-development. It is designed to foster argumentation, writing, comprehension, and oral skills through in-depth reading, writing, and oral assignments. Students are expected to be able to understand challenging texts and write summaries, comparisons, and criticisms that represent both the philosopher's ideas and the students' own observations about those ideas. On demand.

PHIL 253. Environmental Ethics. 3 Credits.
The course centers on the way that ethics helps us to understand environmental issues. We examine a broad cross-section of environmental issues from a variety of traditional and contemporary ethical frameworks. Issues include sustainability, animal rights, energy consumption, habitat loss, biodiversity, land conservation, and pollution. Class members will explore such issues through case studies in a context of relevant ethical history and theory. Offered Fall every 3 years.

PHIL 282. Asian Philosophy. 3 Credits.
Study of major philosophical systems of India, China and/or Japan. On demand.

PHIL 300. History of Philosophy I (Ancient/Modern). 3 Credits.
The ancient Greeks and Romans laid the foundations for even the focus on Ancient Philosophy will investigate the foundations of Western philosophy through the study of ancient Greek and Roman thinkers like Socrates, Plato, Aristotle, Cicero, Lucretius, and Seneca, who raised and attempted to answer questions about topics such as: the nature of truth and knowledge; what is and how can we live the good life; and what is justice. The focus on Modern Philosophy will highlight 17th and 18th century rationalist and empiricist philosophers like Descartes, Spinoza, Leibniz, Hume, and Kant. Their influence on Enlightenment thought, including issues like doubt, certainty, free-will, perception, and belief will be explored in this version of the course. Course is repeatable, given the different emphases of Ancient and Modern Philosophy (Fall of odd years will be Ancient, even years will be Modern). Repeatable to 6 credits. F.

PHIL 301. History of Philosophy II (Medieval/19th Century). 3 Credits.
The focus on Medieval Philosophy will examine philosophical arguments on the existence of God, conceptions of the afterlife, arguments on whether humans have free-will or are subject to predestination, and the nature of sin, morality, and forgiveness, among other topics. Representative Medieval thinkers that may be studied include: Aquinas, Anselm, Augustine, Boethius, Dante, Ibn Tufayl, and Plotinus. The focus on 19th Century Philosophy will cover how philosophers responded to Kant's Enlightenment philosophy and the growing challenges to traditional value systems, paying special attention to the formation of the modern Western subject and the philosophy of history. Thinkers covered will include: Kant, Hegel, Feuerbach, Kierkegaard, Nietzsche, Marx, and Freud. Course is repeatable, given the different emphases of Medieval and 19th Century Philosophy (Spring of even years will be Medieval, odd years will be 19th Century.). Repeatable to 6 credits. S.
PHIL 304. Existentialism & Phenomenology. 3 Credits.
The focus on Existentialism will explore questions about human existence and its relationship to experiences like freedom, solitude, anxiety, disgust, boredom, and personal identity. By examining the works of such philosophers and literary figures as Kafka, Dostoevsky, Kierkegaard, Nietzsche, Sartre, Camus, and Beauvoir, students will investigate the ways in which human construct identity and meaning, often in the face of a seemingly absurd world. The focus on Phenomenology will explain phenomenology as a method that attempts to describe these lived human experiences from the embodied subject’s point of view. Students will practice phenomenology as part of the class by undertaking guided experiments of description and narration. The course may investigate common human experiences of empathy, self-deception, forgiveness, fear, desire, or hospitality, through accounts by thinkers like Husserl, Levinas, and Merleau-Ponty. The course is repeatable, given the different emphases of Existentialism and Phenomenology. Repeatable to 6 credits. S, odd years.

PHIL 310. Philosophy of Art, Literature, & Film. 3 Credits.
This course will investigate the philosophical questions pertaining to artistic expression (aesthetics), including the visual arts (e.g., painting, sculpture, and film), literature, and music. Questions that may be explored include: whether definitions of art or beauty are possible; what the relationship between form and substance is in art; whether or not art should be valued as a product or process; how have new technologies affected art and its reception in society; and what role, if any, does art play in politics. This course will utilize representative texts from the history of philosophy, as well as a variety of examples from the arts. The course is repeatable when the course topic is different. Repeatable to 6 credits. S, even years.

PHIL 312. American Philosophy. 3 Credits.
This course will consider some of the major figures of 20th and 21st century American Philosophy and Pragmatism through the theme of democracy and its relation to education, along with related issues of privilege/class/race in the U.S.; protest movements and activism; anti-intellectualism; and individualism and the common good. Philosophers studied may include: Ralph Waldo Emerson, Henry David Thoreau, William James, Jane Addams, James Baldwin, John Dewey, W. E. B. Du Bois, and Cornel West. F, odd years.

PHIL 315. Philosophy of Race & Postcolonialism. 3 Credits.
This course will investigate philosophical issues surrounding race, racism, and postcolonialism. Topics that may be explored include: the role philosophers have played historically in shaping these discourses and practices; epistemic foundations for the concept of race; scientific treatments of race; theories of civilization, nationalism, and ethno-nationalism; and the ethical, social, and political consequences of race-thinking and postcolonialism and contemporary philosophical responses. Repeatable to 6 credits. F, even years.

PHIL 331. Contemporary European Philosophy. 3 Credits.
This course will investigate philosophical trends in contemporary (i.e., late 20th century until the present) European philosophy (aka Continental Philosophy). Students will read recent philosophical works on timely thematic issues such as: technology and society; identity; political sovereignty and resistance; theories of language and communication; and the nature of power. Repeatable to 6 credits. F, odd years.

PHIL 342. Advanced Ethics. 3 Credits.
This course will examine contemporary (20th and 21st century) ethical theories as well as moral problems affecting societies around the world. Topics may include human rights, sexual ethics, ethical consumerism, and ways in which science and technology have affected moral deliberation and judgment. S, odd years.

PHIL 355. Social and Political Philosophy. 3 Credits.
This course examines core issues in society and governance: the nature of justice, the limits of freedom, the role of religion, family and pluralism in the modern community, and a few examples of possible topics. Students in the course may examine both classical and contemporary theories of political society. Offered Fall every 3 years (2008).

PHIL 360. Feminist Philosophy. 3 Credits.
This course will investigate theories and major ideas of feminist philosophers. The course may be approached as an historical examination of the different “waves” of feminism, or topically, by considering themes like: women and the body, the feminine and the spirit, philosophy of sex/gender, feminist art, postmodern feminism, etc. Central figures in feminist philosophy who may be studied include: Charlotte Perkins Gilman, Simone de Beauvoir, Susan Bordo, Catharine MacKinnon, Luce Irigaray, Audre Lorde, Judith Butler, Donna Haraway, Sara Ahmed, and Chandra Talpade Mohanty. S, even years.

PHIL 371. Philosophy of Law. 3 Credits.
An investigation of the nature of both law and legal reasoning. Study of the nature of law focuses on theories of natural law, legal positivism, and legal realism. Legal reasoning concerns justified interpretation of precedent and statute within the common law tradition. Additional topics dealt with as time allows, encompass such issues as the justification of punishment and enforcement of morality. S, even years.

PHIL 450. Philosophy, Economics, and Politics. 3 Credits.
This course provides an introduction to the discipline sometimes called “political economy” and illustrates its connection to political philosophy in general. It focuses on the relationship between political and economic structures, with a special emphasis on the nature and problems of liberal capitalist democracies. Students will read classic and contemporary thinkers, and primary and secondary sources. Offered Spring every 3 years.

PHIL 451. Current Topics in Political Philosophy. 3 Credits.
This course provides an in-depth study of the nature of citizenship, with special emphasis on how citizens deliberate collectively and individually. It focuses on questions of rationality, political activism, political education, and cosmopolitanism. Students will read classic and contemporary thinkers, and primary and secondary sources. Repeatable to 6 credits. On demand.

PHIL 480. Public Philosophy. 3 Credits.
Public philosophy is the process of engaging in philosophical reflection with non-philosophers. This course provides the opportunity for students to take existing work in academic philosophy and “translate” it into more accessible media. Students will write magazine articles, blog entries, opinion pieces suitable for newspapers, and engage in other activities that help philosophy expand past its home at the university. Prerequisite: 75 total credit hours. F.

Religious Studies

PHIL 103. Introduction to Religious Studies. 3 Credits.
This course is designed as an introduction to the academic study of religion. Topics discussed include problems with defining "religion," approaches to the subject in the humanities and social sciences, and the roles played by religion in the contemporary world. F.S.

PHIL 104. Religions of the West. 3 Credits.
This course is an introduction to the comparative study of the many cultural manifestations of Judaism, Christianity, and Islam. S.

PHIL 105. Religions of Asia. 3 Credits.
This course is an introduction to the characteristic beliefs and practices of selected religions that developed in Asia: Hinduism, Buddhism, Confucianism, Daoism and Shinto. We will devote special attention to scriptures and other classic literature of the traditions. Students will gain an appreciation of the vitality and enduring significance of each of the religions as a way of life for large numbers of people. F.

PHIL 201. Introduction to the Bible. 3 Credits.
This course is designed to introduce the student to the academic study of the Bible and to the relevant comparative material drawn from the surrounding cultures. F.

PHIL 216. Sex, Gender, and Religion. 3 Credits.
This course presents issues generated by the interrelationship of sex, sexual orientation and gender with religion. Included in our investigation are examination of the various interpretations of sacred texts which produce discourses of sexual control, establish moral authority and seek to define sexual identity. Other discourses are those recreated from other religious experiences and therefore resist those of the dominant society. On demand.

PHIL 217. Religion in America. 3 Credits.
This course examines the role that religion has played in the political, social, cultural, and intellectual history of America. F.

PHIL 227. Mysticism and Spirituality in Religion. 3 Credits.
A study of mystics and their writings from the Eastern and Western traditions and the application of methods of religious inquiry into the presence of mystical phenomena. S, even years.

PHIL 245. Death and Dying. 3 Credits.
An examination of various perspectives on death and dying in our own and other cultures with a view to coping with the problems of mortality and immortality. Medical, psychological, philosophical, and religious aspects contributing to an understanding of the meaning of death will be offered by resource people whose experience will lend assistance to the student’s confronting the reality of death and dying. Lecture and discussion. F.
PHIL 311. Atheism and Secularism. 3 Credits.
A systematic and critical examination of the fundamental concepts, ideas, and history of atheism and secularism. S, odd years.

PHIL 316. Daoism and Confucianism. 3 Credits.
An introduction to two major religious and philosophical traditions indigenous to China and important throughout East Asia. Attention will also be directed to the relations of Daoist and Confucian traditions to the social and political order, from ancient times through the contemporary period. S, odd years.

PHIL 320. Hinduism. 3 Credits.
The Indian subcontinent is one of the great historic centers of world civilization, and it has extended its cultural influence throughout Asia and the world; like China, it now also comprises about one-fifth to one-sixth of the earth's population. This class will introduce students to the region's preponderant religious and philosophical tradition of Hinduism, treating topics such as understandings of God or gods, teachings of a universal Self, reincarnation, views for and against the caste system, and Hinduism and globalization. We will treat examples of Hinduism from the ancient to contemporary periods, devoting special attention to selections of classic texts. S, even years.

PHIL 326. Religious Violence. 3 Credits.
A critical examination of the theories used to explain and the history associated with violent acts attributed to "religious" actors and/or motivations. F, odd years.

PHIL 334. Judaism. 3 Credits.
Comparative Jewish thought in cultural context and as manifest in Jewish literature. Topics to be studied include the sacred, the human community, the role of Israel, ethics, the Holocaust. On demand.

PHIL 338. Christianity. 3 Credits.
A systematic and comparative investigation of the many varieties of Christianity that have occurred in the past and that exist in the contemporary world. S, even years.

PHIL 356. Islam. 3 Credits.
Beginning with pre-Islamic Arabian culture, this course provides an academic survey of the genesis of Islam, including the life of the prophet Muhammad and formative events in the early Islamic community, Qur'an and Hadith, common beliefs, rituals, and practices, the development of schools of Islamic jurisprudence and theology, Sufism, and Islamic art and literature. F, even years.

PHIL 380. Buddhism. 3 Credits.
A historical and critical survey of different Buddhist schools in India, China, Tibet, and Japan. F, even years.

PHIL 485. Seminar in Theory and Method. 3 Credits.
This course is required of all Religious Studies students and will fulfill the Essential Studies capstone requirement. Although the specific focus of the course may change each time it is offered, in every case it will focus critical attention on a variety of interdisciplinary approaches to the academic study of religion. Prerequisite: Junior or Senior standing. On demand.

**Philosophy and Religious Studies**

**PHIL 399. Topics. 1-3 Credits.**
This course provides an opportunity for detailed examination of important topics in Philosophy and Religious Studies. Topics will vary depending on faculty and student interests. Investigations into philosophy of religion, foundations of logic, African American philosophic schools, political correctness, and many others are possible. Repeatable to 6 credits. On demand.

**PHIL 491. Seminar. 3-6 Credits.**
A consideration of selected problems in Philosophy or Religious Studies, or the investigation of classic texts of mutual interest to departmental faculty and more advanced students. Previous work in Philosophy, Religious Studies, or related disciplines is recommended. Prerequisites: Junior or senior standing and consent of instructor. On demand.

**PHIL 494. Independent Study. 1-3 Credits.**
Supervised tutorial on an individual basis. Typically, a student will work independently to a considerable extent. In other cases, the course may take the form of regularly scheduled meetings. Prerequisite: Instructor consent. Repeatable to 6 credits. On demand.

**PHIL 497. Projects. 1-3 Credits.**
Projects is a course that allows students to engage in non-traditional, non-classroom based projects in Philosophy or Religious Studies. Projects may include internships, practicums, research or teaching assistantships, community engagement activities, or other projects that may differ from semester to semester. Students may enroll in this course with permission of instructor, but some projects (e.g., internships) may be selective and subject to an application process. Prerequisite: Instructor consent. Repeatable to 12 credits. On demand.

**Bachelor of Arts with Major in Philosophy and Religious Studies: Philosophy Concentration**

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from a UND) including:

I. Essential Studies Requirements (see University ES listing).

II. Philosophy Concentration requirements.

36 major hours, including:

**Courses in Philosophy**

Since a major in philosophy involves a rigorous study of basic questions about human life and action, knowledge, truth, and values, it is recognized as providing a sound base for those who plan to continue their education in one of the professional specialties such as law, medicine, or the ministry. More recently, liberal arts degrees in fields which “make you think” have become increasingly valued in business and government. Majors in philosophy also prepares a student for graduate work in any of the humanities (most notably philosophy); in most cases the graduate will pursue a doctoral degree to teach at the college level.

Students majoring in other fields who find themselves seriously interested in the theoretical aspects of their disciplines — e.g. ethical implications of practice, the functions of knowledge in the field, the legitimacy of methods — may want to consider a special concentration, minor, or second major in philosophy to explore that interest.

**Bachelor of Arts with Major in Philosophy and Religious Studies: Pre-Law Concentration**

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing).

II. Pre-Law Concentration requirements.

36 major hours, including:

**Required Courses:**

Bachelor of Arts with Major in Philosophy and Religion: Religious Studies Concentration

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing).

II. Religious Studies Concentration Requirements (36 credit hours):

Select one of the following (Western Traditions):

- PHIL 104 Religions of the West
- PHIL 201 Introduction to the Bible
- PHIL 334 Judaism
- PHIL 338 Christianity
- PHIL 356 Islam

Select one of the following (Asian Traditions):

- PHIL 105 Religions of Asia
- PHIL 316 Daoism and Confucianism
- PHIL 320 Hinduism
- PHIL 380 Buddhism

Students may elect any 15 credits in Religious Studies not to include the 6 required credits (PHIL 103 and PHIL 485), the 3 required credits in Western Traditions, and the 3 required credits in Asian Traditions.

Students may elect any 9 credits of Philosophy courses.

Total Credits 36

Courses in Religious Studies

Religions at the University are seen as creative, living modes of experience, culture, beliefs, rituals and ethics—that enable people around the globe to make sense of their lives. By studying them, we are better able to appreciate the outlooks and values of other societies and gain new insight into what gives meaning and worth to our own lives. The academic study of religion is not based upon assumptions regarding the truth or falsity of any particular religious tradition. Rather, we guide students to learn a variety of scholarly approaches in order to develop their own critical understandings of the subject.

The study of religion is an integral part of a liberal education. It is also an enrichment for courses of study in preparation for careers in business, education, health care, social and psychological services. Courses in religion are a good preparation for many areas of postgraduate studies, including law, medicine, and the ministry. Our curriculum is designed to prepare students to engage actively as responsible citizens in the global community.

Minor in Ethics

Ethics, the study of right action and the good life, lies at the core of the human experience. It is also essential for those who wish to engage in business, politics, relationships, and self-examination. What ought we to do? How should we live? When should we help others and how often should we help ourselves? Everyone has asked these questions but few have allowed themselves the opportunity to really study them and to examine their own beliefs. The minor in ethics provides just such an occasion.

Through the minor in ethics, students will be able to examine classic texts (of philosophy, religion, and other subjects) and apply their lessons to day-to-day life. Through debates and discussions, students and teachers will identify the assumptions and beliefs that guide people’s actions and ask whether some are preferable to others or, even, whether any ethical approach is defensible at all. The classes in the minor work well with those of other disciplines—whatever your major, ethics can help you do your job better, learn more from your current classes, and prepare yourself for whatever comes your way.

Required Courses:

- PHIL 120 Introduction to Ethics
- PHIL 130 Introduction to Political Philosophy
- PHIL 342 Advanced Ethics
- PHIL 480 Public Philosophy

Select three of the following:

- PHIL 240 Getting Fit with Aristotle
- PHIL 253 Environmental Ethics
- PHIL 304 Existentialism & Phenomenology
- PHIL 312 American Philosophy
- PHIL 315 Philosophy of Race & Postcolonialism
- PHIL 331 Contemporary European Philosophy
- PHIL 355 Social and Political Philosophy
- PHIL 360 Feminist Philosophy
- PHIL 450 Philosophy, Economics, and Politics
- PHIL 451 Current Topics in Political Philosophy

Total Credits 36

Minor in Philosophy and Religious Studies: Philosophy Concentration

Required 21 credits including:

Any 21 credits of Philosophy courses (PHIL prefix)

Total credits 21

Minor in Philosophy and Religion: Religious Studies Concentration

Required 21 credits including:

Any 21 credits of Religious Studies courses (RELS prefix)

Total Credits 21
Courses

PT 101. Orientation Physical Therapy. 1 Credit.  
Overview of the educational requirements, practice issues, and opportunities in the profession of physical therapy. Course content includes multimedia presentations, lectures, and observation in clinical settings.

PT 402. Professional Communication and Behavior. 2 Credits.  
Lecture and practice in interprofessional and interpersonal communication including professional behavior, ethics, patient education, and written documentation. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 409. Clinical Pathology I. 3 Credits.  
Selected pathological conditions affecting the musculoskeletal system. Associated orthopedic diagnoses, surgical interventions, the influences of co-morbidities and pharmaceutical interventions, and safety concerns are discussed with an application to physical therapy patient/client management during orthopedic rehabilitation. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.

PT 410. Clinical Pathology II. 3 Credits.  
Selected pathological conditions of body systems, associated surgical interventions, the influence of co-morbidities, pharmaceutical interventions, and safety concerns are discussed with application to physical therapy patient/client management. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.

PT 412. Biomechanics and Kinesiology. 4 Credits.  
Biomechanics and kinesiology of musculature acting on the extremities and trunk. Clinical applications and evaluation of joint integrity and mobility, gait, range of motion and muscle performance. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.

PT 413. Exercise in Health and Disease. 3 Credits.  
Basic foundation for theoretical and practical application of exercise science principles for physical therapists. Exercise science principles are applied to healthy individuals and individuals with disease, impairments, and/or functional limitations. Examination and intervention procedures incorporate aerobic capacity/endurance, anthropometric characteristics, and muscle performance activities. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.

PT 415. Motor Control. 3 Credits.  
Lecture and laboratory work in therapeutic exercise to establish and maintain muscular control and coordination, including muscle re-education, facilitation, and relaxation. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 417. Clinical Exam and Evaluation I. 4 Credits.  
Emphasizes patient/client management elements of examination and evaluation. Emphasis is given to the musculoskeletal and neurological systems. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 420. Musculoskeletal System Examination. 2 Credits.  
Principles of musculoskeletal examination and evaluation including identification and palpation of surface anatomy, range of motion (ROM), measurement of joint ROM, and evaluation of muscle performance. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. F.

PT 422. Anatomy for Physical Therapy. 5 Credits.  
Detailed lectures and demonstrations on musculoskeletal anatomy and neuroanatomy. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 423. Neuroscience for Physical Therapy. 4 Credits.  
Structure and function of the human nervous system including pathophysiology and clinical applications relevant to physical therapy practice. Prerequisite: Registered in Professional Physical Therapy Curriculum.

PT 426. Manual Therapy I. 2 Credits.  
Introduction to joint mobilization/manipulation techniques. Emphasis is on mobilization/manipulation as it relates to peripheral joints and soft tissues of the human body. Basic examination, evaluation, and intervention techniques for the spine are also presented. Laboratory. Prerequisite: Registered in Professional Physical Therapy Curriculum. S.

PT 435. Introduction to Patient/Client Care and Interventions. 4 Credits.  
Basic physical therapy patient care skills addressing multiple areas of physical therapy practice. A sample of topics address injury to the integument, select interventions for all patients, positioning of patients, vital signs, aseptic technique, and basic wheelchair techniques. Laboratory. Prerequisite: Registered in professional physical therapy curriculum. F.

PT 490. Special Topics: Physical Therapy. 1-4 Credits.  
Introduction and investigation of advanced clinical procedures and topics. Topics discussed will be dictated by student and faculty interests. Prerequisite: Registered in Professional Physical Therapy Curriculum. Repeatable to 4 credits.

PT 491. Independent Study. 1-4 Credits.  
Research and independent study in a specialized area of Physical Therapy. Prerequisite: Registered in Professional Physical Therapy Curriculum.

Physics and Astrophysics (Phys)

B.S. with Major in Physics (p. 189)
B.S./M.S. with Major in Physics (p. 189)
Minor in Physics (p. 190)
Minor in Astrophysics (p. 190)

Courses

PHYS 101. Survey of Physics & Astrophysics. 1 Credit.  
A survey of a broad range of topics in physics ranging from nanoscience to astrophysics and physics-related educational and career opportunities. Intended to help physics majors and students interested in majors in physics make informed academic decisions early in their college life. S/U grading. F.

PHYS 110. Introductory Astronomy. 3 Credits.  
An introductory study of the universe: The solar system, stars, stellar evolution, galaxies, black holes, big bang cosmology, and the accelerating universe. The astronomy laboratory 110L is optional for 1 credit. F.S.

PHYS 110L. Introductory Astronomy Lab. 1 Credit.  
An introductory study of the universe: The solar system, stars, stellar evolution, galaxies, black holes, big bang cosmology, and the accelerating universe. The astronomy laboratory 110L is optional. F.S.

PHYS 130. Natural Science-Physics. 4 Credits.  
For non-science majors, this is a hands-on, inquiry-based course on the workings of science. Emphasis is on critical thinking and the use of the scientific method. Topics will include: electricity, force, motion, and energy. The laboratory is a component of this course. S.

PHYS 140. Physics for Poets. 3 Credits.  
An introduction to the fundamental concepts of physics, especially those developed in the twentieth century. A knowledge of elementary algebra is recommended, but the course is designed for students with a limited mathematical background. No laboratory. On demand.

PHYS 150. Physics for Aerospace Sciences. 5 Credits.  
An introduction to the principles and concepts of physics as they apply to the study of aerospace sciences. Topics: Newtonian mechanics, gravitation, work, energy, fluids, electricity, magnetism. F.S.

PHYS 161. Introductory College Physics I. 4 Credits.  
An introduction to the principles and concepts of physics with the application of minimal mathematics, sufficient to show the logical progression from one topic to the next. General physics for those who do not plan to take an advanced course in science. Topics: Newtonian mechanics and gravitation, work and energy, solids and fluids, vibrations and waves, electricity and magnetism, light and optics. The laboratory is a component of this course. No mathematical prerequisite is required, but knowledge of elementary algebra is recommended. F.

PHYS 162. Introductory College Physics II. 4 Credits.  
An introduction to the principles and concepts of physics with the application of minimal mathematics, sufficient to show the logical progression from one topic to the next. General physics for those who do not plan to take an advanced course in science. Topics: Newtonian mechanics and gravitation, work and energy, solids and fluids, vibrations and waves, electricity and magnetism, light and optics. The laboratory is a component of this course. Prerequisite: PHYS 161. S.
PHYS 211. College Physics I. 4 Credits.
This non-calculus general physics course is recommended for pre-medical or pre-professional students. Topics: Newtonian mechanics and gravitation, work and energy, solids and fluids, heat and thermodynamics. The laboratory is a component of this course. A student may not receive credit for PHYS 211 and PHYS 212, and also PHYS 161 and PHYS 162. Prerequisite: MATH 103. F.

PHYS 211C. College Physics I. 3 Credits.
This non-calculus general physics course is recommended for pre-medical or pre-professional students. Topics: Newtonian mechanics and gravitation, work and energy, solids and fluids, heat and thermodynamics. Students requiring a laboratory must take PHYS 211CL. Prerequisite: MATH 103. F.

PHYS 211CL. College Physics I Laboratory. 1 Credit.
The laboratory part of Physics 211C. Prerequisite: PHYS 211C or consent of instructor. S/U grading. SS.

PHYS 212. College Physics II. 4 Credits.
The non-calculus general physics course sequence recommended for pre-medical or pre-professional students. Topics: vibrations and waves, electricity and magnetism, light and optics, and an introduction to modern physics. The laboratory is a corequisite for this course. The laboratory is a component of this course. A student may not receive credit for PHYS 211 and PHYS 212, and also PHYS 161 and PHYS 162. Prerequisite: PHYS 211. S.

PHYS 212C. College Physics II. 3 Credits.
The non-calculus general physics course sequence recommended for pre-medical or pre-professional students. Topics: vibrations and waves, electricity and magnetism, light and optics, and an introduction to modern physics. Students requiring a laboratory with this course must take PHYS 212CL. Prerequisite: PHYS 211C or PHYS 211. S.

PHYS 212CL. College Physics II Laboratory. 1 Credit.
The laboratory part of Physics 212C. Prerequisite: PHYS 212C or consent of instructor. S/U grading. SS.

PHYS 213. College Physics III. 4 Credits.
A survey of modern physics covering physical optics, special theory of relativity, quantum theory, atomic physics, molecular and solid state physics, nuclear physics and radioactivity, particle physics, and astrophysics. The laboratory is a component of this course. Prerequisite: PHYS 212. F.

PHYS 251. University Physics I. 4 Credits.
The university physics sequence is for students majoring in science and engineering. Topics normally covered in PHYS 251 include Newtonian mechanics and gravitation, work and energy, rotational dynamics, vibrations and waves, mechanics of solids and fluids, basic kinetic theory, equations of state and the first and second laws of thermodynamics. The laboratory is a component of this course. Prerequisite: MATH 165. F, S.

PHYS 252. University Physics II. 4 Credits.
Topics normally covered include electricity, magnetism, electromagnetic waves, light and geometrical optics. The laboratory is a component of this course. Prerequisites: MATH 166 and PHYS 251. F, S.

PHYS 253. University Physics III. 4 Credits.
Modern physics, a survey covering physics of the 20th and 21st centuries. Topics normally covered include theory of relativity, discovery of quantum phenomena, basic quantum mechanics, overview of atomic, nuclear and solid state physics, statistical physics, quantum fluids and superconductivity, fundamental forces and the physics of elementary particles. This course is a prerequisite for most courses in advanced physics. The laboratory is a component of this course. Prerequisites: MATH 265 and PHYS 252. S.

PHYS 294. Selected Topics. 1-4 Credits.
Prerequisite: 8 hours of college physics or consent of instructor. Repeatable to 4 credits. On demand.

PHYS 317. Mechanics I. 3 Credits.
Motion of a single particle under central forces and simple oscillatory systems. Prerequisites: PHYS 251 and MATH 266, or approval of department. F.

PHYS 318. Mechanics II. 3 Credits.
Rigid body motion, Lagrangian and Hamiltonian dynamics, relativity, continuum mechanics. Prerequisite: PHYS 317 or approval of instructor. S.

PHYS 320. Introduction to Materials Science. 3 Credits.
An introduction to solid state physics with emphasis on applications. Prerequisite: PHYS 253 or approval of department. F, every even year.

PHYS 324. Thermal Physics. 3 Credits.
Thermodynamics with an introduction to statistical physics. Prerequisite: PHYS 253 or approval of instructor. S, every even year.

PHYS 325. Optics. 3 Credits.
Geometrical and physical optics with an emphasis on physical optics. Prerequisite: PHYS 253 or approval of department. S, every odd year.

PHYS 325L. Optics Laboratory. 1 Credit.
Laboratory to accompany Physics 325. Corequisite: PHYS 325. S, every odd year.

PHYS 327. Electricity and Magnetism I. 3 Credits.
A quantitative treatment of electromagnetic theory with an introduction to Maxwell's equations. Prerequisite: PHYS 253 or approval of instructor. F, odd years.

PHYS 328. Electricity and Magnetism II. 3 Credits.

PHYS 402. Computers in Physics. 3 Credits.
Computer applications in physics, including computer simulation, symbolic and algebraic programming, parallel computing, computer interfacing and/or experimental physics applications. Prerequisites: PHYS 252 and knowledge of a higher-level computer programming language, or consent of instructor. On demand.

PHYS 415. Undergrad Research Experience. 3 Credits.
The students will engage in research activities of a UND physics faculty member or may take part in a physics department approved external research program such as an NSF-funded REU program. Prerequisite: PHYS 253 or advisor's consent.

PHYS 420. Advanced Topics in Materials Science. 3 Credits.
The application of physics to design, synthesis and characterization of materials of current interest. Prerequisite: PHYS 320. S, every odd year.

PHYS 428. Advanced Physics Laboratory. 2 Credits.
Advanced undergraduate experiments in physics, using modern techniques and instrumentation. Classic experiments leading to the current understanding of physical theory. Prerequisite: PHYS 253 or approval of instructor. F, every even year.

PHYS 431. Quantum Mechanics I. 3 Credits.
An introduction to quantum mechanics with applications to atomic structure. Prerequisite: PHYS 253. Prerequisite or Corequisite: PHYS 317 or approval of department. F, every even year.

PHYS 432. Quantum Mechanics II. 3 Credits.
Further development of basic quantum theory with application to atomic, molecular, solid state and nuclear physics. Prerequisite or Corequisite: PHYS 431 or consent of instructor. S, every odd year.

PHYS 434. Nuclear Physics. 3 Credits.
Introduction to the theory of atomic nuclei, fundamental forces and sub-atomic particles. Prerequisite: PHYS 253 or approval of instructor. F, odd years.

PHYS 437. Introductory Solid State Physics. 3 Credits.
A general introduction to solid state phenomena. Prerequisite: PHYS 253 or approval of instructor. F, every even year.

PHYS 460. Introduction to Astrophysics. 3 Credits.
Nature of stars. Topics include celestial mechanics, relativity, optics, stellar birth, stellar interiors and evolution, nucleosynthesis, stellar death, compact objects, black holes, neutron stars, white dwarfs, binaries and variable stars. Some topics include the use of computer tools to solve problems. Prerequisite: PHYS 460 or approval of instructor. F, even years.

PHYS 461. Introduction to Astrophysics II. 3 Credits.
Galaxies and the universe. Topics include structure and evolution of galaxies, the Milky Way, stellar populations, globular clusters, interstellar medium, big bang, Hubble and the distance scale, radio galaxies, quasars, jets, blazars, clusters and superclusters of galaxies and cosmology. Some topics include the use of computer tools to solve problems. Prerequisite: PHYS 460 or approval of instructor. S, odd years.

PHYS 489. Senior Honors Thesis. 1-15 Credits.
Selected problems in physics or astrophysics. Prerequisite: Approval of the department. Repeatable to 9 credits. On demand.
Bachelor of Science with Major in Physics

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES guidelines and course listings).

II. The Following Curriculum:

Each track leads to a Bachelor of Science with Major in Physics, awarded through the College of Arts and Sciences. A total of 120 credits is required for graduation. In addition to other University Graduation Requirements and the courses specified for one of the five options listed below, all Physics majors must complete successfully the following set of core courses:

<table>
<thead>
<tr>

</table>

To provide proper advisement, the Department of Physics and Astrophysics requires its majors to meet with their physics adviser prior to registration each semester. This ensures each student is enrolled in appropriate classes and helps the department schedule certain courses in a timely manner. A hold is placed on registration for physics majors until this advisement session takes place. It is the student’s responsibility to schedule the advisement session.

Beyond completion of the core listed above and the general education requirements, all physics majors must complete one of the following options together with additional electives for a total of 120 credits.

I. General Physics option: This is a general physics degree offering maximum flexibility. It is appropriate for students who may seek advanced degrees, for instance, or who are interested in medical school. Beyond the core, the student must complete an additional 9 credits of Physics numbered above 300. No more than 3 credits of these 9 may be in PHYS 492 Special Problems.

<table>
<thead>
<tr>

<tr>
<td>EE 313</td>
<td>Linear Electric Circuits</td>
<td>3</td>
</tr>
<tr>
<td>EE 313L</td>
<td>Circuits Laboratory II</td>
<td>1</td>
</tr>
</tbody>
</table>

II. Applied Physics track: This choice will provide interdisciplinary training in applied physics and applied electronics with emphasis on instrumentation and measurement technique. The aim is to prepare the student to work as part of a research team in an industrial, government or academic setting. In addition to the core, the student must complete:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EE 321</td>
<td>Electronics</td>
<td>3</td>
</tr>
<tr>
<td>EE 321L</td>
<td>Electronics Laboratory I</td>
<td>1</td>
</tr>
<tr>
<td>PHYS 402</td>
<td>Computers in Physics</td>
<td>3</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>15</td>
</tr>
</tbody>
</table>

In addition, students electing the applied physics track should select an instrumentation project as a means of satisfying the research core requirement, PHYS 415 Undergrad Research Experience.

III. Astrophysics track: This option is for students with special interest in astronomy, astrophysics, space exploration or aerospace applications. The following are required.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 110</td>
<td>Introductory Astronomy</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 110L</td>
<td>Introductory Astronomy Lab</td>
<td>1</td>
</tr>
<tr>
<td>PHYS 434</td>
<td>Nuclear Physics</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 460</td>
<td>Introduction to Astrophysics</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 461</td>
<td>Introduction to Astrophysics II</td>
<td>3</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>13</td>
</tr>
</tbody>
</table>

To satisfy the research requirement, PHYS 415 Undergrad Research Experience, students in the astrophysics track should select an approved astrophysics project.

IV. Computers in Physics track: This choice provides extensive experience using computers for running experiments, analyzing data, doing computer simulations and calculations in physics. The student should be prepared to learn programming languages. The following are required.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 160</td>
<td>Computer Science I</td>
<td>4</td>
</tr>
<tr>
<td>CSCI 161</td>
<td>Computer Science II</td>
<td>4</td>
</tr>
<tr>
<td>PHYS 402</td>
<td>Computers in Physics</td>
<td>3</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>11</td>
</tr>
</tbody>
</table>

For the Computers in Physics track, students should seek out computational research projects for PHYS 415 Undergrad Research Experience, or laboratory projects involving computer instrumentation.

V. Materials Science track: This option provides the strongest foundation in solid state and materials science. Required are:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 320</td>
<td>Introduction to Materials Science</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 420</td>
<td>Advanced Topics in Materials Science</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 437</td>
<td>Introductory Solid State Physics</td>
<td>3</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>9</td>
</tr>
</tbody>
</table>

Students in this track should select approved research projects in materials science as a means of satisfying the PHYS 415 Undergrad Research Experience requirement.

Five-Year Bachelor of Science-Master of Science Degree Program in Physics

The program will use only the existing courses in the Department of Physics and Astrophysics, Department of Mathematics, and Department of Chemistry.

The program course requirements include the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 251</td>
<td>University Physics I</td>
<td>4</td>

<td>15</td>
</tr>
</tbody>
</table>
Minor in Astrophysics

A minor in astrophysics is offered for students who are interested in an understanding of the astrophysics of stars, galaxies, and the universe. The astrophysics minor cannot be combined with a major or minor in physics.

Required 25 credits, including:

- PHYS 110 Introductory Astronomy 3
- PHYS 110L Introductory Astronomy Lab 1
- PHYS 211 College Physics I 4
- & PHYS 211L and
- PHYS 212 College Physics II 4
- & PHYS 212L and
- PHYS 213 College Physics III 4
- & PHYS 213L or PHYS 251
- & PHYS 251L and
- PHYS 252 College Physics II 4
- & PHYS 252L and
- PHYS 253 College Physics III 4
- & PHYS 253L and
- PHYS 460 Introduction to Astrophysics 3
- PHYS 461 Introduction to Astrophysics II 3

Select one of the following:
- PHYS 415 Undergrad Research Experience 3
- PHYS 434 Nuclear Physics
- SPST 425 Observational Astronomy

Total Credits 33

Minor in Physics

Required 20 credits in Physics. The specific courses should be chosen in consultation with the department.

Political Science (Pols)

B.A. in Political Science (p. 192)

B.A. in Political Science: 3+3 Year Plan (Law Program) (http://und-public.coursesleaf.com/undergraduateacademicinformation/ departmental/coursesprograms/politicalscience/pols-law)

Minor in Political Science (p. 192)

Courses

POLS 115. American Government I. 3 Credits.
An introduction to political science through the study of the American political system: the Constitution; the political processes; the structure, powers and procedures of the Presidency, Congress, and the Judiciary. F.S.

POLS 116. State and Local Government. 3 Credits.
Structure, function and problems of state and local government; executive, legislative, and judicial processes; federalism and metropolitan government. F.S.

POLS 120. Global Perspectives. 3 Credits.
This course is designed to help students think critically about global awareness, diversity, and multiculturalism. This course will provide a foundation for students to later complete a designated global engagement experience. The course explores globalization and its consequences and builds a foundation for students to be informed and globally engaged citizens. F.

POLS 200. Introduction to the Nonprofit Sector. 3 Credits.
Historically, nonprofit institutions have filled the gaps in commerce left by government and the for-profit organizations, with the intention of serving populations with special needs. The range of nonprofit services are far reaching, serving groups with diverse public purpose such as charitable organizations, religious institutions, museums, professional associations, and philanthropic foundations. This course will introduce and examine how nonprofits operate, the various roles they play on the local, national, and international levels, and the structures and processes of organizational governance. The course will utilize readings, class discussion, and written assignments to expand awareness of the scope and number of nonprofits in the US, examine the inner working of the nonprofit sector, and give the student a foundation for further study of these topics. The College of Arts and Sciences is deleting the course from their curriculum independently of this action. F.S.

POL 306. American Constitution-Civil Liberties. 3 Credits.
An introduction to comparative politics with emphasis on the democratic system: the Constitution; the political processes; the structure, powers and procedures of the Presidency, Congress, and the Judiciary. F.S.

POL 307. Comparative Politics. 3 Credits.
An introduction to comparative politics with emphasis on the democratic systems of Europe. F.

POL 309. American Constitution-Governmental Powers. 3 Credits.
American Constitution studied in light of U.S. Supreme Court decisions and interpretations; focus on government powers, federal relationships, and economic regulation. F.

POL 310. American Constitution-Civil Liberties. 3 Credits.
Analyzes U.S. Supreme Court decisions and interpretations which focus on civil liberties; equal protections, due process, First Amendment rights. Prerequisite: POLS 115. F.

POL 311. American Constitution-Governmental Powers. 3 Credits.
Analyzes the growing interrelationship of federal, state and local governments with emphasis on financial aspects.
POL 310. Introduction to Political Thought. 3 Credits.
Political thought from classical times to the 19th century with emphasis on issues raised in the works of Plato, Aristotle, St. Augustine, Machiavelli, Hobbes, Locke, Rousseau, Mill, Marx and Nietzsche. F.

POL 318. American Political Thought. 3 Credits.
A historical analysis of the major thinkers and of the streams of thought which molded the political life and institutions of the United States from the Puritans to the present. F.

POL 320. Foreign Policies. 3 Credits.
Examination of the roles of major powers in the international system, with emphasis on the foreign policies of the United States and other major powers. S.

POL 321. International Human Rights. 3 Credits.
Examination of factors that contribute to human rights violations and domestic, multilateral and bilateral efforts to combat such violations with emphasis placed on the changing nature of the international system of states.

POL 322. Internal Conflict and Political Stability. 3 Credits.
Examination of the internal challenges to the political stability of states, including a diverse range of topics such as the causes of civil war, ethnic violence, and terrorism. Other topics include insurgency and counter insurgency and the role of the international community in stabilizing internal conflicts through intervention, peacekeeping, and mediation. F, even years.

POL 324. Chinese Politics. 3 Credits.
The course evaluates the politics of China following two underlying themes: assessing the changes that have taken place in China since the death of Mao and China’s place of prominence on the global stage. Focus is placed on Chinese politics since the economic reforms in the 1970s and the political implications of these reforms. The course also evaluates Chinese public policy with regard to critical issues facing China today. S, odd years.

POL 325. Politics of the Modern Middle East. 3 Credits.
The Middle East and North Africa are crucial areas to the world’s economy and security. The mere threat of disrupted shipping lanes between the Persian Gulf and the world is sufficient to spark discussions of a war between global and regional powers. Western governments have been dealing with a rise in global terror incidents originating from this region since the mid-1900s from both secular and religious organizations. Despite recent efforts to focus American foreign policy towards the Pacific Rim, the Middle East continues to draw U.S. resources and attention. Islamic State of Iraq and Syria (ISIS/ISIL) attacks on western targets and interests have re-embroiled the Western military forces into the region in the past few years. It is therefore critical that students interested in international relations, policy, or security understand this tumultuous region. Comprehending the Middle East and North Africa’s political history is pivotal for comprehending the myriad of forces that drive current actors in the region. To that end, we will focus on the comparative politics of different Middle Eastern states and how outcomes differed from state to state in the region. The ultimate goal, though, is to understand how the people of the Middle East and North Africa have understood, developed, and rejected their national identities. This course does not require students possess prior knowledge of the Arab World or a formal background in political science theory. Students of all backgrounds interested in the region are welcome and encouraged to attend. The course hints at theories within comparative politics, such as rational choice theory, institutionalism and path dependency, political culture, and modernization theory. However, the frequency of regime change events in the Middle East will require students to learn about theories of social transformation (e.g. revolution) in this course, albeit in a less strict manner than formal theoretical courses. Given the sheer size of the Middle East and its history, this course will be taught through thematic vehicles using case examples rather than requiring the memorization of each individual country’s political trajectory. On demand.

POL 326. Terrorism and Its Context. 3 Credits.
This is a class about spectacular political violence and its societal context. We will deal with classic debates in terrorism such as “is there a meaningful distinction between an insurgency and a terrorist campaign?”, “does ideology motivate people in the absence of other motivating factors to commit terror attacks?”, and “what is terrorism?” From the FLN in Algeria to the LTTE in Sri Lanka, this class will span the world and provide you with a global perspective on international terror with French-speaking Maghreb Arab insurgencies and violent Buddhist movements. We will discuss the social psychology of martyrdom, resistance movements, political institutionalization, and the difference between military and political solutions to terror campaigns. The fundamental teaching mechanism for this class is discussion and critical thinking. With every reading, you should be asking yourself: “do I find this compelling? If so, why? Is there something that the author is omitting (a case example or implication from his or her argument) that could strengthen his or her argument?” Similarly, when you find an article unconvincing, you need to ask yourself “why do I find this unconvincing? Is there some implication to the argument that is unconvincing? Is there something the author is omitting (a case example or implication from his or her argument) that weakens his or her argument?” It is not sufficient to have a feeling about something. You need to have a rationale and you need to defend that rationale. At the same time, you should read texts charitably. On demand.

POL 328. Legislative Processes. 3 Credits.
Emphasis will be placed on the structure, functions, and duties of Congress, as well as congressional elections, patterns of congressional leadership, policy successes and failures, and the relationship between Congress and the federal courts and Congress and the U.S. Presidency. S, even years.

POL 329. Presidential Institutions and Management. 3 Credits.
This course focuses on the intersection of politics and management with the executive branch. Special emphasis is placed on the roles of institutions and critical executive branch actors such as the President in the management and execution of public policy. S, odd years.

POL 351. Women and Politics. 3 Credits.
Role of women in politics, including selection of women for political offices, the political attitudes and behavior of women; and the development of public policy initiatives as they affect or are likely to affect women. S,SS.

POL 356. Nonprofit Management (Undergrad). 3 Credits.
This course is an overview of the management of nonprofit organizations. Content includes the history and legal foundation of nonprofits, leadership, marketing, management of employees and volunteers, and operations management. F, even years.

POL 393. Problems in Political Science. 1-3 Credits.
Students study special topics under the direction and supervision of a member of the staff. Repeatable when topics vary. Repeatable to 9 credits. On demand.

POL 397. Cooperative Education. 1-2 Credits.
Compensated on-the-job experience in various areas of political science. Prerequisites: GPA of 3.0, 12 hours in POLS, course related to cooperative experience, and permission of department. Repeatable to 6 credits. S/U grading. On demand.

POL 404. Urban Politics and Administration. 3 Credits.
Analysis of the socio-economic context of urban America and its impact on politics, policy, and administration. Prerequisite: POLS 115. S.

POL 405. Political Behavior. 3 Credits.
A review of the role of the public in a democracy focusing on the formation and content of public opinion, the means of communicating that opinion to government, and the impact of that opinion on policy. Prerequisite: POLS 115. F.

POL 432. Public Policy Making Process. 3 Credits.
Two-thirds of the class is devoted to understanding the stages of the policy process: (1) Problem Identification and Agenda Setting; (2) Policy Formulation; (3) Policy Adoption; (4) Policy Implementation; and (5) Policy Evaluation. The last third applies the model to substantive policy areas such as health, environment, education. Prerequisite: POLS 115. S.
POLS 450. Capstone Experience and Development. 3 Credits.
The capstone experience and development is intended to serve as a culminating experience in the Nonprofit Leadership Program. The course encourages students to draw on courses and co-curricular experiences throughout the curriculum to create and develop a portfolio. This course will prepare students to use skills they have developed through the program to develop a community project that addresses social issues within our community. At the conclusion of this course, students with have demonstrated skills commensurate with the core competencies and displayed a level of knowledge necessary for effectively managing a nonprofit organization as a competent leader. Prerequisite: POLS 200. S.

POLS 480. Administrative Internship. 1-3 Credits.
On-the-job training in a governmental or non-profit organization position with final report and analysis of the agency by the intern. Prior approval of instructor required before enrollment. Prerequisites: GPA of 3.0, 12 hours in POLS, course related to cooperative experience, and permission of department. Repeatable to 3 credits. S/U grading. On demand.

POLS 489. Senior Honors Thesis. 1-15 Credits.
POLS 491. Readings in Political Science. 1-3 Credits.
Selected readings with oral and written reports. Consent of instructor required prior to enrollment. Prerequisites: GPA of 3.0 or higher, 12 hours in POLS, course related to readings, and consent of department. F.S.

POLS 493. Professional Project Public Administration. 3 Credits.
An independent study where students will independently develop a paper under supervision, which demonstrates the ability to use the knowledge and skills of public administration to address public administration issues. Prerequisite: Senior standing. S.

POLS 495. Senior Colloquium in Political Science and Public Administration. 3 Credits.
A capstone course in Political Science designed to integrate the subareas of the discipline. The development of the discipline, its great thinkers, and current directions will be examined. This course is designed for majors only. Prerequisite: Senior standing and 21 hours of POLS credit or consent of the instructor. S.

POLS 497. Senior Tutorial. 2 Credits.
A course which requires mentoring introductory students in Political Science. Further, students will undertake supervised independent research culminating in a major paper. Prerequisite: Senior standing or consent of instructor. Corequisites: POLS 432 and POLS 495. S.

Bachelor of Arts in Political Science

Required 120 credits (36 of which must be numbered 300 or above) including:
I. Essential Studies Requirements (see University ES listing).
II. BA in Political Science Program Requirements:
   a. At least a 2.50 GPA overall
   b. At least a 2.50 GPA for courses required within the major
III. Core Curriculum:

A Capstone experience

| POLS 495 Senior Colloquium in Political Science and Public Administration | 3 |

Political Science students also will take 9 hours of electives, normally at the 300-level or above. Up to three (3) credits at the 200-level may be counted towards this elective requirement without prior departmental approval. Majors may take up to six (6) hours of these electives, at the 300-level or above from relevant courses outside the department with prior departmental approval.

Total Credits 54

* Students may substitute POLS 308 Intergovernmental Relations with departmental approval.

Minor in Political Science

Students who minor in political science will complete 21 hours of coursework, including 15 hours of Core courses and at least 6 hours of electives. The minor’s Core normally will include the following courses:

<table>
<thead>
<tr>
<th>Introductory-level coursework</th>
<th></th>

Electives (intermediate level or above) 6

Total Credits 24

Psychology (Psyc)

B.A./B.S. with Major in Psychology (p. 194)

Minor in Psychology (p. 195)

Certificate in Behavioral Health (p. 195)

Certificate in Cyberpsychology (p. 195)

Certificate in Forensic Psychology (p. 195)

PSYC 111 is the prerequisite for all other Psychology courses.
Courses

PSYC 111. Introduction to Psychology. 3 Credits.
A survey of the scientific study of behavior and mental processes, with consideration of the nature and scope of psychology as a science and a profession. F.S.

PSYC 210. Human Sexuality. 3 Credits.
This course provides an overview of human sexuality—covering anatomical and physiological aspects, psychological aspects, behavioral aspects, and social/cultural aspects. Prerequisite: PSYC 111. S.

PSYC 241. Introduction to Statistics. 4 Credits.
Descriptive and inferential statistics as applied to psychological measurement and experimentation. Prerequisites: PSYC 111 and MATH 103. F.S.

PSYC 250. Developmental Psychology. 4 Credits.
A survey of the psychology of human life span development including intellectual, social, and emotional aspects of the normal individual and emphasizing childhood and adolescent development. Prerequisite: PSYC 111. F.S.

PSYC 270. Abnormal Psychology. 3 Credits.
A survey of the classification, symptoms, and etiology of psychological disorders and behavior pathology. Prerequisite: PSYC 111. F.S.

PSYC 294. Individual Research. 1-4 Credits.
Introductory experience as a research assistant in a research laboratory. A total of 45 hours is typically required over the course of the semester per credit. Prerequisite: Consent of instructor. Repeatable to 4 credits. S/U grading. F.S,SS.

PSYC 299. Special Topics in Psychology. 1-3 Credits.
Repeatable when topics vary. Prerequisite: Consent of instructor. Repeatable. On demand.

PSYC 301. Industrial and Organizational Psychology. 3 Credits.
Selection, training, motivation, leadership, job satisfaction, human engineering and working environments as applied to business and industry. Prerequisites: PSYC 111 and any basic statistics course. F.

PSYC 303. Research Methods in Psychology. 4 Credits.
Survey of research methods; exposure to and evaluation of psychological research; includes an overview of APA format. Prerequisites: MATH 103 or higher and PSYC 111. Prerequisite or Corequisite: PSYC 241. F, S, SS.

PSYC 304. Advanced Research Methods. 3 Credits.
An advanced research methods course. Students will learn how to plan and execute basic psychological experiments, analyze data, and correctly report research findings using APA style. Prerequisite: PSYC 241 and PSYC 303. F.S.

PSYC 313. Educational Psychology. 3 Credits.
The study of educational psychology involves both theory and practice. Focusing upon applying the principles of psychology and research to the practice of teaching, the ultimate goal is the understanding and improvement of instruction. Prospective teachers and other professionals in training who will interact with students need to understand how students learn and how that learning varies and is affected by each student's context, culture, and development. This course focuses on the effective application of psychological concepts and principles in the learning and instructional processes. Prerequisite: PSYC 111 or permission of the instructor. Prerequisite or Corequisite: PSYC 250 or permission of the instructor. On demand.

PSYC 320. Professional Development & Ethics. 2 Credits.
The purpose of this course is to introduce and to make students familiar with the types of career and advanced degree opportunities that are available upon earning their baccalaureate degree. The course will include exploration of professional undertakings commonly pursued by undergraduate students with a psychology major. Prerequisite: PSYC 303. F.S.

PSYC 330. Biological Bases of Behavior. 4 Credits.
This course will cover the biological bases of psychology in areas of evolution, genetics, the nervous system, and methodology as they pertain to human behavior. Prerequisites: Psychology major and BIOL 111 or BIOL 150 or BIOL 151 or ANAT 204. S.

PSYC 331. Behavior Modification and Therapy. 3 Credits.
Theory and practice in the application of operant and classical conditioning procedures to humans in applied settings. Prerequisite: PSYC 111. S.

PSYC 335. Health Psychology. 3 Credits.
A biopsychosocial approach is used to examine basic concepts, theories, and research in health psychology from the perspectives of the patient, caregiver, health care provider, and researcher. Prerequisite: PSYC 111. F, odd years.

PSYC 355. Adulthood and Aging. 3 Credits.
Basic findings and theoretical issues in the study of human aging from biopsychological and socio-psychological perspectives with an emphasis on the individual. Prerequisites: PSYC 111 plus 3 credits of psychology. F.

PSYC 360. Introduction to Personality. 3 Credits.
Examination of basic concepts in the field of personality. Prerequisite: PSYC 111. F, S.

PSYC 361. Social Psychology. 3 Credits.
Research on individual behavior in its social context: how the individual acts upon the social environment, and interacts with other individuals. Prerequisite or Corequisite: PSYC 111. S.

PSYC 362. Psychology and Law. 3 Credits.
Psychological examination of the legal system, including what psychologists have learned about the law, the many different legal topics psychologists study, and the great promise that psychology holds for improving the legal system. Prerequisite: PSYC 111. F, odd years.

PSYC 365. Psychology of Women. 3 Credits.
Examination of topics relevant to women that are often ignored in traditional psychology courses, such as gender bias in research, gender identity and roles, sexuality and violence. Prerequisite: PSYC 111. S, even years.

PSYC 366. Conflict Management. 3 Credits.
This course provides students with an understanding of conflict, its dynamics, major theoretical explanations, and methods of resolution. Students will also learn some basic conflict resolution skills and processes. Prerequisite: PSYC 111.

PSYC 370. Cyber Security. Big Data, & Human Behavior. 3 Credits.
This course will discuss the connections between human behavior, cyber security and big data. Big data tools and techniques allow the integration of diverse data streams from multiple sources providing the potential for better understanding and prediction of human behavior. Improved predictive modeling emerging from big data has several implications including possibly strengthening the security of critical cyber systems. On demand.

PSYC 372. Behavioral Design & Digital Products. 3 Credits.
Understanding how people learn, think, feel, and behave can help you design technology/machines that are intuitive, appealing, and reduce human operating error! Digital technologies, including autonomous machines such as unmanned/autonomous aerial devices and driverless cars, are a fast developing area of technological design and manufacturing. Effective use of these increasingly complex products demands that designers understand and design for how people interact with digital technology. On demand.

PSYC 393. Psychology UGTA Seminar. 1 Credit.
This seminar is a pre-requisite or co-requisite to serving as an undergraduate Teaching Assistant with the Department of Psychology. Completion of the seminar is required for undergraduate students serving as teaching assistants. Prerequisites: Minimum overall GPA of 3.2, Junior status (60+ credits), earned an “A” in the course student will be serving as a teaching assistant for. F, S, SS.

PSYC 395. Practical Experiences in Psychology. 1-4 Credits.
A practical work or volunteer experience associated with the student's academic study of psychology. Arranged by mutual agreement among student, department, and placement site. Repeatable up to 8 credits. Prerequisites: PSYC 111 or junior status, and a minimum overall or major GPA of 3.0. Prerequisite or Corequisite: PSYC 320. Repeatable to 8 credits. S/U grading. F, S, SS.

PSYC 397. Cooperative Education. 1 Credit.
A practical work experience associated with the student's academic area of psychology. Arranged by mutual agreement among student, department and employer. Students need to contact the Cooperative Education office. Prerequisites: PSYC 111, junior or senior status, PSYC 303 with a grade of C or above, and a minimum GPA of 2.0. Repeatable to 8 credits. S/U grading. F, S, SS.

PSYC 405. History and Systems of Psychology. 3 Credits.
A consideration of the historical background and development of problem areas in psychology and a survey of contemporary psychological theories. Prerequisites: PSYC 303 and senior status. F, S.
PSYC 421. Diversity Psychology. 3 Credits.
Origins and consequences of psychological differences among individual and groups with special emphasis on sex differences and racial differences. Prerequisites: PSYC 111, PSYC 241, and PSYC 250 or consent of instructor. S, even years.

PSYC 433. Psychology of Learning. 4 Credits.
Principles of animal and human learning, with special emphasis on the acquisition, extinction and retention of learned behavior patterns. Course includes recitation and laboratory. Prerequisites: PSYC 111 and PSYC 303. F.

PSYC 436. Perception. 4 Credits.
Perceptual basis of behavior. Prerequisites: PSYC 303 and BIOL 111 or BIOL 150 or BIOL 151 or ANAT 204 or PSYC 330. S.

PSYC 437. Physiology of Behavior and Psychophysiological Measurement. 4 Credits.
An advanced course covering major topics of physiological psychology while also introducing students to psychophysiological recording techniques used in research. While physiology and anatomy of the central and peripheral nervous systems will be briefly reviewed, students are expected to have basic knowledge of neuroscience, behavioral science, and research methodology. Laboratory time will focus on demonstration and practice of psychophysiological recording techniques and data analysis. Prerequisites: PSYC 303 and BIOL 111 or BIOL 150 or BIOL 151 or ANAT 204 or PSYC 330. F, odd years.

PSYC 439. Cognitive Psychology. 4 Credits.
An examination of theory and research on attention, memory, language, comprehension, reasoning, problem-solving, and decision-making. Course includes recitation and laboratory. Prerequisites: PSYC 111 and PSYC 303. F, odd years.

PSYC 441. Case-Based Applied Statistics. 3 Credits.
Emphasis on the hands-on application and interpretation of a variety of descriptive and inferential statistical procedures using a computer software package (SPSS). Prerequisites: PSYC 111, PSYC 241 and PSYC 303. On demand.

PSYC 460. Advanced Social Psychology. 3 Credits.
In depth examination of the theoretical and empirical literature in social psychology focusing on attitudes, stereotyping and prejudice, interpersonal relationships, social cognition, personality and the self, and group behavior. Prerequisites: PSYC 111, PSYC 303, and PSYC 361 or SOC 361. F.

PSYC 470. Intro Clinical Psychology. 3 Credits.
A systematic survey of the field of clinical psychology; basic concepts in diagnosis, psychotherapy, research and professional problems. Prerequisites: PSYC 111, PSYC 241, and PSYC 270 or consent of instructor. F.

PSYC 475. Psychological Helping Skills. 2 Credits.
This course introduces students to basic helping skills used by mental health professionals and reviews empirically supported models of the helping and change process. Students are given frequent opportunities to apply the skills learned. Prerequisites: Senior status, PSYC 111, PSYC 270, and PSYC 303. Prerequisite or Corequisite: PSYC 320. F.

PSYC 486. Conflict Symposium. 3 Credits.
In-depth study of a current topic in the conflict field in the format of a week-long symposium. Prerequisite: Permission of instructor. SS.

PSYC 489. Senior Thesis. 1-6 Credits.
Supervised independent study culminating in a thesis. Prerequisites: PSYC 304, PSYC 494 (2 credits), GPA of 3.21 or higher, Junior status, and department permission. Repeatable to 6 credits. F,S,SS.

PSYC 492. Individual Projects in Psychology. 1-4 Credits.
This course is intended to provide students with indepth experiences not covered adequately in usual course offerings. These experiences may include independent research projects or extensive readings on topics of interest. Prerequisites: PSYC 111 and consent of instructor. Repeatable to 8 credits. F,S,SS.

PSYC 493. Instructional Experiences in Psychology. 2 Credits.
Students will receive training and practical experiences in providing instruction in psychology at the collegiate level. Such experiences include serving as an undergraduate teaching assistant or tutor for psychology courses with a faculty mentor. Prerequisites: Junior or senior status, "A" in course they are serving, minimum overall GPA of 3.2 or higher, and permission of instructor. Prerequisites or Corequisites: PSYC 320 and PSYC 492. Repeatable to 8 credits. S/U grading. F,S,SS.

PSYC 494. Advanced Individual Research. 1-4 Credits.
Advanced experience as a research assistant in a research laboratory. A total of 45 hours is typically required over the course of the semester per credit. Prerequisites: PSYC 303 and consent of instructor. Repeatable to 8 credits. F,S,SS.

PSYC 499. Advanced Special Topics in Psychology. 1-4 Credits.
Repeatable when topics vary. Prerequisites: PSYC 111 and consent of instructor. Repeatable. On demand.

Bachelor of Arts/Bachelor of Science with Major in Psychology

B.A. with Major in Psychology

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum:

At least 36 major hours, including:

- PSYC 111 Introduction to Psychology 3
- PSYC 241 Introduction to Statistics 4
- PSYC 303 Research Methods in Psychology 4
- PSYC 320 Professional Development & Ethics 2
- PSYC 405 History and Systems of Psychology 3
- PSYC 411 Introduction to Psychology 3
- PSYC 433 Psychology of Learning 4
- PSYC 436 Perception 4
- PSYC 437 Physiology of Behavior and Psychophysiological Measurement 4
- PSYC 439 Cognitive Psychology 4
- PSYC 441 Case-Based Applied Statistics 4
- PSYC 460 Advanced Social Psychology 2
- PSYC 470 Intro Clinical Psychology 2
- PSYC 475 Introductory Statistics 2
- PSYC 486 Conflict Symposium 3
- PSYC 492 Individual Projects in Psychology 4
- PSYC 493 Instructional Experiences in Psychology 2

Students must complete at least TWO 400-level courses from the following:

- PSYC 395 Practical Experiences in Psychology 1-4
- PSYC 475 Psychological Helping Skills 2
- PSYC 493 Instructional Experiences in Psychology 2

* PSYC 111 Introduction to Psychology is prerequisite to all other psychology classes.

Required in other departments:

Level II proficiency in a foreign language, or equivalent proficiency in American Sign Language 8

Select two of the following (with lab):

- BIOL 111 Concepts of Biology & 111L and Concepts of Biology Laboratory
- BIOL 150 General Biology I & 150L and General Biology I Laboratory
- BIOL 151 General Biology II & 151L and General Biology II Laboratory
- ANAT 204 Anatomy for Paramedical Personnel & 204L and Anatomy for Paramedical Personnel Laboratory
- PSYC 330 Biological Bases of Behavior (includes lab) 4

B.S. with Major in Psychology

Required 120 credits (36 of which must be numbered 300 or above and 30 of which must be from UND) including:
I. Essential Studies Requirements (see University ES listing).

II. The Following Curriculum:

At least 36 major hours, including:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 111</td>
<td>3</td>
</tr>
<tr>

Total Credits
RHS 250. Contemporary Issues in Rehabilitation. 3 Credits.
This course introduces students to the profession of rehabilitation and examines how persons with disabilities are treated in our society. Topics include: community and national rehabilitation agencies, political and social influences on rehabilitation programs, conceptualization of disability, attitude development and change, building accessible and inclusive communities, and transforming the media. Opportunities for involvement with agencies providing rehabilitation services will be provided. F, S, SS.

RHS 260. Inclusion in Recreation Settings. 3 Credits.
Study of individuals with disabling conditions and their leisure-related needs with emphasis on integration strategies and legislation that facilitate community involvement. F, S.

RHS 350. Overview of Disabilities. 3 Credits.
This course provides an overview of physical and mental disabilities for rehabilitation professionals, including the medical, psychological, social, and vocational aspects of specific disabilities. Medical terminology, etiology, treatment, interventions, and prognosis of various disabilities will be presented. Prerequisite: RHS 250 or consent of instructor. F.

RHS 375. Community Living Topics. 3 Credits.
This course provides an introduction to independent living for special populations, such as individuals with physical disabilities, developmental disabilities, or serious emotional disturbances. Topics include community-based programming, the deinstitutionalization movement, legislative issues, and the concepts of integration, inclusion, and normalization. Repeatable to a maximum of 6 credits. Repeatable to 6 credits. F, S, SS.

RHS 450. Vocational Assessment and Job Acquisition. 3 Credits.
Review of the basic principles of testing along with various instruments and techniques used in the assessment of persons with disabilities. Use of assessment information in the job acquisition process and the importance of work for individuals with disabilities are also addressed. S.

RHS 455. Rehabilitation Process. 3 Credits.
This course examines the history, philosophy, and ethical standards of the rehabilitation profession. Topics include the following: experiences of people with disabilities throughout history, legislation affecting persons with disabilities, public and private rehabilitation systems, case management principles, role and function of rehabilitation counselors, principles of independent living, and community resources utilized in rehabilitation programs. F.

RHS 493. Senior Capstone Seminar. 3 Credits.
This seminar is designed to integrate the rehabilitation and human services curriculum with actual rehabilitation practice while in the internship. This is accomplished through journals, written assignments, oral presentations, and seminar discussions. The philosophical and ethical base of the profession will be explored, along with the analysis of critical thinking and effective decision making skills. Prerequisite: RHS 455 or consent of instructor. F, S, SS.

RHS 497. Internship in Rehabilitation. 9 Credits.
This course will allow students to apply theory to practice within the field of rehabilitation services. A 400-hour educationally-focused internship in an approved rehabilitation setting will provide an opportunity to integrate rehabilitation knowledge, values, and skills at the beginning level of professional practice. Prerequisite: RHS 455 or consent of the instructor. Corequisite: RHS 493. S/U grading. F, S, SS.

RHS 499. Special Topics. 1-3 Credits.
Supervised instruction or research which explores topics related to rehabilitation and human services. Repeatable to 12 credits. Prerequisite: Consent of instructor. Repeatable to 12 credits. F, S, SS.

SWK 257. Human Behavior and the Social Environment I. 3 Credits.
Application of theories and knowledge from the liberal arts. Application of social work theory across the life span. An emphasis on social systems theory as the conceptual framework. Biopsychosocio-cultural aspects of human development. Prerequisites or Corequisites: PSYC 111 and SOC 110. F.S.

SWK 311. Child Welfare. 3 Credits.
Preparation for child welfare work. Child protection services, juvenile court procedures, day care services, the rights of children, foster homes and adoption. S.

SWK 312. Social Work and the Legal Process. 2 Credits.
Introduction to the legal system's interaction with the human service delivery system. F.

SWK 313. Orientation to Gerontology. 3 Credits.
Introduction to gerontology including an overview of the field of gerontology, theories of aging, interdisciplinary teaming, demographics, and programs. F.

SWK 315. Substance Use and Abuse. 2 Credits.
Introduction to the dynamics of drug addiction and related issues, with special emphasis on alcohol. S.

SWK 316. Interprofessional Health Care. 1 Credit.
The focus of this course is on developing skills needed to work effectively with an interprofessional health and mental health care team using a patient-centered approach. Case studies are the primary teaching strategy. Students enrolled include: social work, physical therapy, nursing, occupational therapy, medicine, communication science disorders, clinical lab science, physician assistant, and dietetics. Prerequisite: Admission in the BSSW Program. S/U grading. F,S.

SWK 317. Social Work Research. 3 Credits.
Provides students with an understanding of basic qualitative and quantitative research methods. In SWK 317, students also gain and apply skills related to the critical evaluation of research. This course provides students with foundational knowledge and skills necessary to understand and undertake practice evaluation in practice courses, field placements, and in entry-level practice settings. Prerequisite: Admission in the BSSW Program. Prerequisite or Corequisite: Statistics. F,S.

SWK 318. Mental Health. 2 Credits.
Overview of the mental health service delivery system with a focus on case management skills and the role of social work in the provision of mental health services. F.

SWK 357. Human Behavior and the Social Environment II. 3 Credits.
Application of social work theory and research across the life span, with social systems theory as the conceptual framework. Theories regarding development of groups, communities and organizations. Prerequisite: Admission in the BSSW Program. F.S.

SWK 397. Cooperative Education. 1-6 Credits.
Individually supervised experiences in a human service agency. Integrates social work theory with practice. Contact the Cooperative Education Office. Prerequisite: Consent of instructor. S/U grading. F,S,SS.

SWK 424. Generalist Social Work Practice with Individuals and Families. 3 Credits.
Generalist practice with individuals and families within the context of evidence-based interventions. Develop skills to engage, assess, intervene, and evaluate social work practice with individuals and families. Prerequisite: Admission in the BSSW Program. F.S.

SWK 434. Generalist Social Work Practice with Task and Treatment Groups. 3 Credits.
Generalist practice with task and treatment groups within the context of evidence-based interventions. Develop skills to engage, assess, plan, intervene, and evaluate social work practice with groups. Prerequisite: Admission to the BSSW program. Prerequisite or Corequisite: SWK 357. F.S.

SWK 442. Social Policy. 3 Credits.
Provides knowledge of social policy, and develops critical analysis skills to advance social and economic well-being and understanding of the interaction between research, practice and policy. Prerequisite: Admission in the BSSW Program. F.S.

SWK 454. Generalist Social Work Practice with Communities and Organizations. 3 Credits.
Generalist practice with organizations and communities within the context of evidence-based interventions. Develop skills to engage, assess, intervene, and evaluate social work practice with communities and organizations. Prerequisite: Admission to the BSSW program. Prerequisite or Corequisite: SWK 357. F.S.

SWK 481. Field Education I. 5 Credits.
Provides learning opportunities in generalist social work practice emphasizing the core competencies and demonstration of practice behaviors. Connect the theoretical and conceptual contributions of the classroom with the practical world of the internship setting. Also can be taken with SWK 483 for a one-semester block placement in an approved human service organization. Prerequisite: Admission to field program. Corequisite: SWK 482. S/U grading. F,S,SS.

SWK 482. Field Education Seminar I. 1 Credit.
Integrates classroom content with actual practice. Corequisite: SWK 481. F,S,SS.

SWK 483. Field Education II. 5 Credits.
Provides learning opportunities in generalist social work practice emphasizing the core competencies and demonstration of practice behaviors. Connect the theoretical and conceptual contributions of the classroom with the practical world of the internship setting. Corequisite: SWK 484. Prerequisite or Corequisite: SWK 481. S/U grading. F,S,SS.

SWK 484. Field Education Seminar II. 1 Credit.
Integrates classroom content with actual practice. Corequisite: SWK 483. F,S,SS.

SWK 489. Senior Honors Thesis. 1-3 Credits.
Supervised independent study culminating in a thesis. Repeatable to a maximum 6 credits. Repeatable to 6 credits. F,S.

SWK 493A. Special Topics. 1-3 Credits.
Individually or group supervised research or interdepartmental studies and seminars in social work related areas. Repeatable to a maximum 9 credits. Regular grading. Prerequisite: SWK 255 or consent of instructor. Repeatable to 9 credits. F,S,SS.

SWK 493B. Special Topics. 1-3 Credits.
Individually or group supervised research or interdepartmental studies and seminars in social work related areas. Repeatable to a maximum 9 credits. S-U grading. Repeatable to 9 credits. S/U grading. F,S,SS.

Bachelor of Science in Social Work

Campus students can apply to the Bachelors of Science Social Work any semester after completing SWK 255 and SWK 257, or while enrolled in these courses. Application due dates and requirements are listed at the Department website.

Applications are accepted for the part-time distance program once per year. Distance application due dates and requirements are listed at the Department website. Distance students must be admitted to the B.S. in Social Work program before completing any distance Social Work courses. This is a cohort program, and students cannot be concurrently enrolled in the campus and distance social work programs.

120 credits are required (36 of which must be numbered 300 or above and 30 credits from UND) including:

I. Essential Studies Requirements (see University ES listing).
II. The following curriculum.

Full-Time Second Degree Schedule for BSSW

The student who has secured a bachelor’s degree in a related field and wishes to secure a bachelor’s degree in social work can complete the “Second Degree Program.” The Second Degree Program allows a student to secure a BSSW in one year. Satisfactory completion of a bachelor’s degree in a related field is required. Second Degree students must fulfill essential studies requirements or have the equivalent to graduate with a BSSW degree from UND.

Students needing to fulfill essential studies requirements may require a longer period to complete the Fast Track.

Total Credits 39

**Sociology (Soc)**

B.A. with Major in Sociology (p. 202)

Minor in Sociology (p. 202)

Courses

**SOC 110. Introduction to Sociology. 3 Credits.**
A systematic examination of the social components of human behavior, including the norms, laws, cultural patterns, and economic forces that organize everyday life. Students will analyze theories of society, the structure of social institutions, social conflict and stratification, as well as social interactions among diverse groups of people. F.S, SS.

**SOC 115. Social Problems. 3 Credits.**
A sociological analysis of major social problems in America. F.S, S.

**SOC 250. Diversity in American Society. 3 Credits.**
Students will explore diverse American identities through the intersections of race, ethnicity, gender, social class, sexual orientation, age, and disability status. Theories of intergroup relations, prejudice and discrimination are covered. F, S.

**SOC 252. Criminology. 3 Credits.**
This course provides an in-depth investigation into the major criminological theories that explain the causation, occurrence and development of criminal behavior. Crime typologies and the social correlates of crime and victimization are discussed. Provides an explanation of the methods criminologists use to study crime trends and criminal patterns of behavior. F.S.

**SOC 253. Delinquency and Juvenile Justice. 3 Credits.**
This course focuses on theoretical explanations for the causes, dynamics, and consequences of juvenile delinquency. Students will explore a justice system specifically designed to handle American youth and will be introduced to basic terminology relating to juvenile delinquency and the juvenile justice system. F, S.

**SOC 301. Basic Sociological Theory. 3 Credits.**
A survey of the main trends in the history of sociological thought. Basic concepts and frames of reference central to sociological theory and analysis are emphasized. F.S.

**SOC 306. Social Change and Social Movements. 3 Credits.**
The focus of this course is on social change in American society in the context of current environmental and social problems. Topics include definitions, social change, patterns and causes of social change, theoretical explanations for social change, contemporary social movements and the theoretical explanation for their origins and planned social change strategies. On demand.

**SOC 309. Selected Topics. 1-4 Credits.**
Selected topics in sociology taught at the junior level. Repeatable to 40 credits with different topics. Repeatable to 40 credits. On demand.

**SOC 323. Sociological Research Methods. 3 Credits.**
This course explores various facets of the sociological research process. The main focus is on the design and implementation of quantitative research, with attention also given to other types of research, including qualitative research and content analysis. F.S.

**SOC 326. Sociological Statistics. 3 Credits.**
This course introduces students to calculation and application of basic statistical techniques employed by sociologists. Students perform statistical analyses of real data sets using SPSS software. Prerequisite: MATH 93 or any higher mathematics course. F.S.

**SOC 331. Community Sociology. 3 Credits.**
This course addresses one of the most fundamental concepts in human relationships: community. What is community? How is community related to the physical environment and place? Who defines community? These are some of the core questions of both urban and rural sociology that we will address in this course. On demand.

**SOC 335. Families in a Changing Society. 3 Credits.**
An exploration of how family forms, norms, and theories have changed over time; the social forces that influence families at each of the major life stages (such as courtship, marriage, parenthood, old age); how statuses such as race, class, gender, and sexuality influence a person's opportunities for family formation and experiences within families; and the social policies that help or hinder family functioning. F.

**SOC 340. Sociology of Gender. 3 Credits.**
This course is a sociological exploration of how gender dynamics have changed across time and vary globally. How gender creates barriers and opportunities - for both men and women - across multiple facets of social life is emphasized. S.

**SOC 352. Aging and Society. 3 Credits.**
An introduction to the multidisciplinary study of aging as a lifelong process. Biological, psychological, and sociological theories are reviewed to understand human development over the life course, including the transitions of marriage, work, retirement, and death. Demographic and social structural influences are also discussed in order to examine the effect of an aging population on society. S.

**SOC 354. Medical Sociology. 3 Credits.**
An examination of the social contexts of health and health care, including the political, economic, and environmental circumstances that shape illness and access to care. This includes a focus on medical institutions as social systems affected by social movements and social change, as well as the social forces that shape patient-provider interactions and the quality of care received. Implications for public policy and practice are considered. On demand.

**SOC 355. Drugs and Society. 3 Credits.**
Social factors affecting use and control of self-administered psychoactive drugs, including alcohol, cigarettes, marijuana and more illicit substances. Topics include social definitions, causes, controls and consequences of drug problems. S.

**SOC 361. Social Psychology. 3 Credits.**
The study of individual behavior in its social context: how the individual acts upon the social environment, is acted upon by the environment, and interacts with other individuals. S.

**SOC 397. Cooperative Education. 1-6 Credits.**
A practical work experience with an employer closely associated with student's academic area. Repeatable to 12 credits. Repeatable to 12 credits. S/U grading. F, S, SS.

**SOC 400. Internship in Sociology. 1-5 Credits.**
A learning experience in a selected community agency or organization determined by the student's area of interest. The student will select a Sociology professor to oversee the internship, and it is with this professor that the student will complete a contract for the course prior to enrolling. Fieldwork is under the supervision of agency personnel. Two to three hours per week are required in the field per credit hour for each week of the semester. Prerequisite: Instructor approval. Repeatable to 5 credits. S/U grading. F, S.

**SOC 407. Political Sociology. 3 Credits.**
Sociological analysis of political and parapolitical groups; voting behavior; political socialization process; power elites, societies and systems of government; power structures. On demand.

**SOC 409. Selected Topics in Sociology. 3 Credits.**
Topics in sociology taught at the senior level. Repeatable to 6 credits with different topics. Repeatable to 6 credits. On demand.

**SOC 431. Workplace Dynamics. 3 Credits.**
This course focuses on understanding contemporary workplace dynamics, informed by how the organization of work has changed across time. Theories underlying the organization of work are examined, with an emphasis on how workplaces are shaped by larger social forces, how they shape society, and how they interact with other organizations. The course concludes with an exploration of diversity in the workforce, especially the ramifications of social class, gender, and race/ethnicity in organizational settings. On demand.

**SOC 435. Racial and Ethnic Relations. 3 Credits.**
A survey of major USA racial and ethnic groups, the histories of their social encounters, and the theoretical perspectives associated with their experiences. On demand.

**SOC 436. Social Inequality. 3 Credits.**
SOC 437. Population. 3 Credits.
A basic consideration of formal and social demography. The determinants and consequences of population change. On demand.

SOC 450. Deviant Behavior. 3 Credits.
This course examines the nature, types and societal reactions to deviant behavior; special emphasis on the process of social typing, regulation of deviance, deviant subcultures, and identities. On demand.

SOC 475. Sociology Capstone. 3 Credits.
This course is a culminating experience for Sociology majors. Building on work in the major, students write an empirical research paper and present their findings to the Department. Prerequisites: SOC 110, SOC 301, SOC 323, SOC 326 and second semester junior standing. F.S.

SOC 489. Senior Honors Thesis. 1-15 Credits.
Supervised independent study culminating in a thesis. Total not to exceed fifteen credits. Prerequisite: Consent of department and approval of the Honors Committee. F.S.

SOC 492. Research Experience in Sociology. 1-5 Credits.
Students enrolled in this practicum work on a research project under the direction of one or more faculty. The practicum is designed to provide hands-on research and/or statistical experience for those enrolled. Repeatable for a maximum of 10 credits. Repeatable to 10 credits. S/U grading. F.S.

SOC 494. Readings in Sociology. 1-5 Credits.
Designed for students who want instruction in subjects not covered adequately in usual course offerings. Specific arrangements must be made with the instructor prior to registration. Prerequisite: Consent of instructor. Repeatable to 10 credits. F.S.

Bachelor of Arts with Major in Sociology

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (see University ES listing).

II. The following Curriculum:

33 credits, including:

SOC 301 Basic Sociological Theory 3
SOC 323 Sociological Research Methods 3
SOC 326 Sociological Statistics 3
SOC 475 Sociology Capstone 3

Additional credits numbered 400 and above * 6
Electives in Sociology 15

Total Credits 33

* excluding SOC 475 Sociology Capstone, SOC 492 Research Experience in Sociology and SOC 494 Readings in Sociology

A concentration in a single supplementary field other than sociology is required of all sociology majors. This concentration may be met in two ways:

1. a language proficiency of level IV in a modern foreign language; or
2. 20 credit hours (at least nine of which must be numbered 300 or above) in any single subject matter taught at this University.

Minor in Sociology

Required 22 credits, including:

SOC 301 Basic Sociological Theory 3
SOC 323 Sociological Research Methods 3
Courses numbered 300 and above 9
Electives 7

Total Credits 22

Space Studies (SpSt)

Minor in Space Studies (p. 204)

Courses

SPST 200. Introduction to Space Studies. 3 Credits.
An introduction to a range of topics in space studies including: an overview of planetary science, stellar evolution and the history of the universe; a brief view of the history of national and international activities, an examination of the fundamentals of space flight and human activity in space, a review of some current problems and issues in the space arena, and a projection of the future course of space activities in the coming decades. This is a required course for an undergraduate minor in space studies. F.S.

SPST 220. Space Science and Exploration. 3 Credits.
Revolutionary advances that have occurred in astronomy, the earth sciences and planetary science as a result of our entry into space. This course surveys the manned and robotic space missions which have gathered data for this new view of the Universe. The course introduces current concepts in cosmological theory as well as an overview of planetary evolution, solar system dynamical processes and physical characteristics of the planets. Prerequisite: SPST 200. S.

SPST 270. History of the Space Age. 3 Credits.
This course introduces students to the history of human endeavors in space. These include the development of rocketry, the influence of amateur societies and science fiction, the military development of ballistic missiles, and human and robotic spacecraft. Prerequisite: SPST 200 or HIST 102 or HIST 104. F.

SPST 300. The Case for Space. 3 Credits.
This is a multidisciplinary course that will examine the rationales for a wide variety of space exploration and development activities. Topics will include human space flight, space science missions, military and commercial space activities, space resource utilization, and the benefits and problems that society derives from these activities. The socioeconomic, socio-political and multi-cultural impact of space activities—nationally and globally—will be discussed and debated with the goal of providing students with a broad perspective of the varying effects of space activities on modern society. Prerequisite: SPST 200. F., even years.

SPST 310. Introduction to Dinosaurs. 3 Credits.
This course provides a broad introduction to dinosaurs and an examination of the extra-terrestrial influence that appears to have led to their extinction, and which thus redirected the evolution of life on Earth. Each of the major dinosaur groups (theropods such as T. rex, sauropods such as Brontosaurus (Apatosaurus), duckbills, armored dinosaurs such as Stegosaurus, horned dinosaurs such as Triceratops, etc.) is examined as well as their cousins in the air (pterosaurs) and sea (ichthyosaurs plesiosaurs). The course reviews our current models of their origin, evolution, lifestyles, diet, reproductive behavior, and physiology. The course also places the dinosaurs such as Triceratops, etc.) is examined as well as their cousins in the air (pterosaurs) and sea (ichthyosaurs plesiosaurs). The course looks at current models of their origin, evolution, lifestyles, diet, reproductive behavior, and physiology. The course also places the dinosaurs in the context of Earth as a geologically evolving planet. The various theories for the dinosaur extinction will be outlined and evaluated. Learning tools include videos (both scientific and popular), dinosaur fossils, and scale models. On demand.

SPST 360. NASA. 3 Credits.
An examination of the National Aeronautics and Space Administration (NASA). NASA was formed in 1958 out of the existing National Advisory Committee on Aeronautics (NACA) and elements from the Army and Navy -- but not the Air Force -- space programs. This course will examine the technologies, the history and the politics involved in each of the NASA elements -- including the one "new" center not inherited from earlier organizations: the Johnson Space Center in Houston. The course will conclude with a picture of NASA today. Prerequisite: SPST 200 or consent of instructor. F.

SPST 405. Space Mission Design. 3 Credits.
A team design project to develop the requirements for a space mission. The specific mission will vary from time to time. Design teams will work on selected portions of the mission. Accompanying lectures will provide background material. Prerequisite: SPST 200. S.
SPST 410. Life Support Systems. 3 Credits.
A review of the physiological effects of living in space including a discussion of current and near-term life support systems equipment for the provision of oxygen, water, food, and radiation protection. In addition, a review will be made of the issues associated with the development of fully closed ecological life-support systems that will be essential to the long-term development of space. Prerequisite: SPST 200. On demand.

SPST 425. Observational Astronomy. 3 Credits.
This course explores aspects of observational astronomy including monochromatic imaging, astrometry, and photometry. Basic observing techniques, astronomical equipment, characteristics of the night sky, data reduction, interpretations, as well as image processing techniques will be taught. Students will learn to operate a remotely controllable Internet telescope and CCD camera. A broadband Internet connection is recommended. Night observing is required. Prerequisite: PHYS 110. S.

SPST 450. International Space Programs. 3 Credits.
This course will introduce students to the major governmental space programs around the world. The history, activities and future directions of the Russian/Soviet, European/ESA, Chinese, Japanese, Indian and other space programs will be explored. International collaborations between the various programs will also be studied. Prerequisite: SPST 200. On demand.

SPST 460. Life in the Universe. 3 Credits.
This course examines the nature and evolution of life on Earth from its origin to the present time in the context of cosmological evolution, chemical evolution, planetary evolution, biological evolution, and cultural evolution. The possibility of life elsewhere in the universe is considered based on the conditions under which life could arise and flourish. Human changes to the Earth are placed within this context. The future of life on Earth is discussed and the social and cultural implications arising from the discovery of extraterrestrial life are explored. On demand.

SPST 470. Special Topics in Space Studies. 1-3 Credits.
Lecture, discussion and readings on specific topics of current interest. May be repeated for credit if topic is different up to a total of 6 credits. Prerequisite: SPST 200. Repeatable to 6 credits. On demand.

SPST 480. Readings in Space Studies. 1-3 Credits.
Directed student readings designed to develop advanced knowledge in a specific area. A written report is required. May be repeated for a total of six credits. Prerequisite: SPST 200 or consent of instructor. Repeatable to 6 credits. F,S,SS.

SPST 491. Independent Study. 2 Credits.
An independent study project culminating in a paper on an approved topic in Space Studies. Requires regular meetings with the instructor. Prerequisites: SPST 200, senior standing, 15 hours of Space Studies, and consent of instructor. F,S,SS.

Minor in Space Studies

Required 20 credits, including:
SPST 200 Introduction to Space Studies 3

Remaining credits from:
SPST 220 Space Science and Exploration 3

SPST 270 History of the Space Age 3

SPST 300 The Case for Space 3

SPST 310 Introduction to Dinosaurs 3

SPST 360 NASA 3

SPST 405 Space Mission Design 3

SPST 406 Course SPST 406 Not Found 3

SPST 407 Course SPST 407 Not Found 3

SPST 408 Course SPST 408 Not Found 3

SPST 410 Life Support Systems 3

SPST 425 Observational Astronomy 3
Minor in Space Studies

Required 20 credits, including:

- SPST 200 Introduction to Space Studies 3

Remaining credits from:

- SPST 220 Space Science and Exploration 3
- SPST 270 History of the Space Age 3
- SPST 300 The Case for Space 3

Up to a maximum of 6 credits may also be obtained from the following:

- AVIT 403 Aerospace Law 3
- GEG 374 Environmental Remote Sensing and Environmental Remote Sensing Laboratory 3
- GEOG 475 Digital Image Processing 3
- PHYS 460 Introduction to Astrophysics 3
- PHYS 461 Introduction to Astrophysics II 3

Total Credits 70-74
SPST 310 Introduction to Dinosaurs 3
SPST 360 NASA 3
SPST 405 Space Mission Design 3
SPST 410 Life Support Systems 3
SPST 425 Observational Astronomy 3
SPST 430 Earth System Science 3
SPST 435 Global Change 3
SPST 450 International Space Programs 3
SPST 460 Life in the Universe 3
SPST 470 Special Topics in Space Studies 1-3
SPST 480 Readings in Space Studies 1-3
SPST 491 Independent Study 2
Up to a maximum of 6 credits may also be obtained from the following:
AVIT 403 Aerospace Law 3
GEOG 374 Environmental Remote Sensing 3
GEOG 374L and Environmental Remote Sensing Laboratory 3
GEOG 475 Digital Image Processing 3
PHYS 460 Introduction to Astrophysics 3
PHYS 461 Introduction to Astrophysics II 3
Total Available Credits 58-62

Sports Medicine

B.S. in Athletic Training (p. 205)

Courses

SMED 101. Orientation to Athletic Training. 1 Credit.
Overview of the field of athletic training. Survey of the role of the athletic trainer. Films, lectures, and observation in clinical settings. F.S.

SMED 200. Understanding Medicine. 3 Credits.
An overview of the broad parameters of sports medicine. Various facets of athletic training and sports medicine are discussed. S.

SMED 205. Anatomy for Athletic Trainers. 2 Credits.
A course to learn and palpate human anatomy structures and their functions. Prerequisite: Department consent. F.

SMED 207. Prevention and Care of Athletic Injuries. 2 Credits.
An introductory course into the care and treatment of athletic injuries. Corequisite: SMED 207L. S.

SMED 207L. Laboratory Prevention and Care of Athletic Injuries. 1 Credit.
A practical laboratory to develop athletic taping skills taught in FMed 207. Corequisite: SMED 207. S.

SMED 208. Procedures in Athletic Training. 1 Credit.
This course serves as an orientation class for incoming sports health majors. Policies and procedures as well as record keeping are covered. Prerequisites: SMED 207 and SMED 207L. Corequisite: SMED 205 and SMED 208L. F.

SMED 208L. Laboratory Procedures in Athletic Training. 1 Credit.
A course designed to allow students to get practical experiences in injury management, modality usage and record keeping skills taught in FMed 208. Prerequisites: SMED 207 and SMED 207L. Corequisite: SMED 205 and SMED 208. F.

SMED 211. Beginning Clinical Practicum I in Athletic Training. 1 Credit.
A clinical course designed to allow the student to develop specified clinical competencies in a directed, progressive manner. Prerequisites: SMED 101, SMED 207 and SMED 207L. Corequisite: SMED 208 and SMED 208L. F.

SMED 213. Beginning Clinical Practicum II in Athletic Training. 1 Credit.
A clinical course designed to allow the student to develop specified clinical competencies in a directed, progressive manner. Prerequisites: SMED 208 and SMED 208L. S.

SMED 311. Intermediate Clinical Practicum I in Athletic Training. 2 Credits.
A clinical course designed to allow the student to develop specified clinical competencies in a directed progressive manner. Prerequisite: SMED 213. F.

SMED 312. Medical Aspects of Sports. 2 Credits.
A course designed to introduce students to various medical specialties and medical problems and their effects on athletic participation. Prerequisite: Permission of instructor. F.

SMED 313. Intermediate Clinical Practicum II in Athletic Training. 2 Credits.
A clinical course designed to allow students to develop specified clinical competencies in a directed progressive manner. Prerequisite: SMED 481. Corequisite: SMED 320, SMED 321 and SMED 321L. S.

SMED 320. Athletic Training Modalities. 2 Credits.
A course designed to present the theoretical and applied principles and techniques for the application of modalities in sports injury care. Prerequisite: SMED 481. S.

SMED 320L. Laboratory Athletic Training Modalities. 1 Credit.
A course designed to practice the theoretical and applied principles and techniques as they apply to athletic injuries. Prerequisite: SMED 481. Corequisite: SMED 321L. S.

SMED 321. Athletic Training Rehabilitation Techniques. 2 Credits.
A clinical course designed to explain the principles and techniques of rehabilitation to alternate concepts of care. Repeatable up to 6 credits with instructor permission. Prerequisite: SMED 481. Corequisite: SMED 321L. S.

SMED 321L. Laboratory Athletic Injury Rehabilitation Techniques. 1 Credit.
A course designed to allow students practical skill development of rehabilitation techniques utilized in athletic injury care as taught in FMed 321. Prerequisite: SMED 481. Corequisite: SMED 321L. S.

SMED 325. Pharmacology in Sport. 2 Credits.
This course is designed to teach students the theories and principles of Pharmacology as it relates to Athletic Training. S.

SMED 343. Organizational Administration of Athletic Training. 3 Credits.
A course designed to acquaint students with the theories and principles of administration. Administrative functions as they relate to the athletic trainer will be explained. Prerequisite: Senior standing or consent of instructor. S.

SMED 411. Advanced Clinical Practicum I in Athletic Training. 2 Credits.
A clinical course designed to allow the student to develop specified clinical competencies in a directed progressive manner. Prerequisite: SMED 313. F.

SMED 413. Advanced Clinical Practicum II in Athletic Training. 2 Credits.
A clinical course designed to allow the student to develop specified clinical competencies in a directed progressive manner. Prerequisite: SMED 313. S.

SMED 481. Athletic Injury Assessment. 4 Credits.
A course designed to instruct the student in the theories and skills of injury evaluation. Prerequisite: SMED 213. F.

SMED 490. Learning of Systems in Athlete Training. 3 Credits.
Healthcare is interdisciplinary and is best practiced with a team approach. This course will illustrate the team approach in different work settings for athletic trainers and the environment within different health care systems. Students will broaden the knowledge in working with other professions and entities as a part of a team. Topics include trend analysis, case studies, and interviews of health care professionals. Prerequisite: SMED 213. F.

SMED 491. Seminar in Athletic Training. 2 Credits.
Advanced work in athletic training to include surgical and conservative injury management, rehabilitation and injury. Repeatable to 4 credits. Prerequisite: Permission of instructor. Repeatable to 4 credits. F.S.

SMED 494. Directed Studies in Athletic Training. 1-4 Credits.
An in-depth study in a subject area selected by the student under tutorial supervision. Repeatable to 6 credits. Prerequisite: Instructor approval. Repeatable to 6 credits. F.S, SS.

SMED 497. Internship in Athletic Training. 3 Credits.
Off campus athletic training experience designed to expose the student to alternate concepts of care. Repeatable to 6 credits with instructor permission. Prerequisite: SMED 313. Repeatable to 6 credits. On demand.

Bachelor of Science in Athletic Training

Required 120 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:
The following professional courses are required for the B.S. in Athletic Training:

- ANAT 204: Anatomy for Paramedical Personnel (3 credits)
- ANAT 204L: Anatomy for Paramedical Personnel Laboratory (2 credits)
- SMED 208: Procedures in Athletic Training (1 credit)
- SMED 208L: Laboratory Procedures in Athletic Training (1 credit)
- SMED 200: Understanding Medicine (3 credits)
- SMED 211: Beginning Clinical Practicum I in Athletic Training (1 credit)
- SMED 213: Beginning Clinical Practicum II in Athletic Training (1 credit)
- SMED 311: Intermediate Clinical Practicum I in Athletic Training (2 credits)
- SMED 312: Medical Aspects of Sports (2 credits)
- SMED 313: Intermediate Clinical Practicum II in Athletic Training (2 credits)
- SMED 320: Athletic Training Modalities (2 credits)
- SMED 320L: Laboratory Athletic Training Modalities (1 credit)
- SMED 321: Athletic Training Rehabilitation Techniques (2 credits)
- SMED 321L: Laboratory Athletic Injury Rehabilitation Techniques (1 credit)
- SMED 325: Pharmacology in Sport (2 credits)
- SMED 343: Organizational Administration of Athletic Training (3 credits)
- SMED 411: Advanced Clinical Practicum I in Athletic Training (2 credits)
- SMED 413: Advanced Clinical Practicum II in Athletic Training (2 credits)
- SMED 481: Athletic Injury Assessment (4 credits)
- SMED 490: Learning of Systems in Athletic Training (3 credits)
- SMED 491: Seminar in Athletic Training (repeated to 4 credits) (2 credits)
- N&D 240: Fundamentals of Nutrition (3 credits)
- KIN 332: Biomechanics (2 credits)
- KIN 402: Exercise Physiology (3 credits)
- PPT 301: Human Physiology (4 credits)

**Teaching and Learning (T&L)**

- B.S.ED. with Major in Early Childhood Education (p. 211)
- B.S.ED. with Major in Elementary Education (p. 211)
- B.S.ED. Double Major in Elementary Education and Early Childhood (p. 210)
- B.S.ED. with Major in Science (p. 212)
- B.S.ED. with Composite Major in Social Studies (p. 209)
- B.S.ED. Double Major in Elementary and Middle Level Education (p. 210)
- B.S.ED. with Major in Middle Level Education (p. 212)
- B.S.ED. in Secondary Education (p. 209)

Secondary Education Licensure (p. 214)

ELL or Bilingual Endorsement (p. 213)

- Kindergarten Endorsement (p. 213)
- Minor in Early Childhood Education (p. 213)
- Minor in Middle Level Education (p. 214)
- Minor in Literacy Education (p. 213)
- Minor in Special Education (p. 214)

**Courses**

**T&L 220. Lakota Linguistics for Teachers 1. 3 Credits.**

This is an introductory course on Lakota linguistics designed for Lakota language teachers. It focuses on three main components of Lakota grammar: (i) Lakota pronunciation and alphabet, (ii) Lakota inflectional morphology, and (iii) Lakota sentence structure (syntax). The first component is a thorough introduction to Lakota phonemic inventory, historic and current writing systems and methodology on how to teach pronunciation, listening comprehension and how to develop phonemic awareness in second language acquisition of Lakota. The second component offers a comprehensive coverage of Lakota conjugation of all verb classes and types. The third component introduces Lakota sentence structure up to intermediate level. On demand.

**T&L 250. Introduction to Education. 3 Credits.**

This course is designed for students exploring the profession of teaching in early childhood, elementary, middle, or secondary schools. You will study what it means to be a teacher, the role of schools in a diverse society, and the foundations of education. You will participate in field experiences in schools, role-playing, simulations, and peer-teaching to explore teaching in today's schools. F.S.

**T&L 251. Understanding Individuals with Different Abilities. 3 Credits.**

This course is designed to introduce students to foundational knowledge of individuals with different abilities addressing the identification, supports, range of services, assessment components, and evidence-based teaching practices. Historical, legal, cultural, and societal influences that impacts educational success will be explored. F.S.SS.

**T&L 252. Child Development. 3 Credits.**

Study of the growth and developmental process through adolescence. A basis for understanding basic needs of the normal child and means of meeting them in the child's home and community environment. F.S.

**T&L 286. Field Experience. 1 Credit.**

Supervised tutorial or apprentice teaching experience in an early childhood, K-12 classroom, university or community setting approved by the program area. S/U grading. Prerequisite: Consent of instructor. Repeatable to 3 credits. S/U grading. F.S.
T&L 310. Introduction to Early Childhood Education. 3 Credits.
An overview of the early childhood education field, including an introduction to its historical roots; current theories, program models and issues; curriculum development; and typical and atypical development of young children. There will be a minimum of six hours of observation and/or activities in the field. F.S.

T&L 311. Observing and Assessing Children. 3 Credits.
This course acquaints the student with a variety of ways of observing, recording, and analyzing the behavior and development of children. Assessment of children will be analyzed by looking at a variety of assessment activities that can be done with children. There will be a minimum of eight hours of field experience. Prerequisites: Admission to Teacher Education Program and T&L 310. F.S.

T&L 313. Language Development and Emerging Literacy. 3 Credits.
This course examines both typical and atypical development of language and thought in children ages birth-8. Children's emergent literacy is studied within the context of language development. There will be a minimum of eight hours of field experience. Prerequisite: Admission to the Teacher Education program. F.

T&L 316. Behavioral Assessment and Tiered Supports in Education. 3 Credits.
The study of behavior management within a multi-tiered system of support (MTSS) for the educational advancement of children and youths in schools. Behavior concepts, assessments, and interventions are applied within the MTSS framework as defined by contemporary special education laws and regulations. Prerequisite or Corequisite: TL 315. F.S.

T&L 319. Integrating Diverse Needs in Educational Settings. 3 Credits.
This course introduces students to the shared, collaborative responsibility of professionals in education. It emphasizes understanding of different emotional and learning abilities and underscores the requirement that teachers create and modify learning environments and adapt evidence-based teaching strategies and methods. Integrated into this course are concepts of accountability, building collaborative partnerships and facilitating educational programming for inclusive success. F.S.S.S.

T&L 320. Infant and Toddler. 3 Credits.
This course is a study of the child's growth and development from birth to 36 months. It will give the student a basis for understanding normal developmental needs of children and means of meeting them in the children's home and community environments. Prerequisite: T&L 252 or PSYC 250 or permission of instructor. S.S.S.

T&L 322. Administration and Leadership in Early Childhood Education. 3 Credits.
An investigation of patterns of administration, curriculum organization, spatial resources, and staffing in early childhood settings, serving children 0-8 years old. Topics include federal and state laws and emerging trends in preschool and primary education in the state, region, and nation. Sixteen (16) hours of field experience. Prerequisite: Admission to the Teacher Education program. S.

T&L 324. Integrating the Arts in the Elementary Classroom. 3 Credits.
Learn why integrating the arts in the elementary classroom is critical for student learning and engagement. Design lessons that engage children in learning elementary content through the arts as well as foster children's creative expression. Prerequisite: Admission to the Teacher Education program. F.S.

T&L 328. Survey of Children's Literature. 3 Credits.
Students survey the broad range of literature written for children. Emphasis is placed on gaining familiarity with the multicultural aspects of literature. Understanding the distinguishing characteristics of genre, developing visual literacy with respect to illustration, and acquiring the ability to evaluate literature, as well as its use, with an understanding of children's developmental needs. F.S.

T&L 329. Young Adult Literature. 3 Credits.
Discussion and critical evaluation of contemporary literature, both adolescent and adult, which is of interest to young adults, with an emphasis on fiction, drama, poetry, essays, and biographies. On demand.

T&L 330. Lakota Linguistics for Teachers 2. 3 Credits.
This course builds on LLT I and offers a comprehensive coverage of Lakota inflectional and derivational morphology, allowing the students to identify, use and teach all types of Lakota verbs in all their forms. Secondly, the course provides a thorough introduction to Lakota sentence structure (syntax). Prerequisite: T&L 220. On demand.

T&L 333. Methods and Materials: Pre-Kindergarten. 3 Credits.
Exploration of curriculum, methods and materials for use in pre-kindergarten educational settings. Includes selection of materials, creative environments, and planning for the individual needs of children within a group setting. Prerequisites: T&L 310 and admission to the Teacher Education program. Corequisite: T&L 486. F.S.

T&L 335. Understanding Readers and Writers. 3 Credits.
This foundational course explores the developmental nature of literacy learning, the reading and writing processes, and the conditions for successful literacy learning. Holistic methods for assessing literacy are studied to understand individual language learners. Prerequisite: Admission to the Teacher Education program. F.S.

T&L 336. Social and Emotional Development and Guidance of Children. 3 Credits.
This course examines both typical and atypical social and emotional development in children ages 0-8 as a basis for understanding and working with children in educational settings. The course will also focus on child guidance and behavior issues affecting classroom climate. S.S.S.

T&L 338. Home, School and Community Relations. 3 Credits.
The course is an exploration of home school relations. The content will include history, parental involvement in schools, parent-teacher conferences, home visits, parent programs, and resources for parents. F.S.S.

T&L 339. Educational Technology, 2 Credits.
Students will demonstrate a sound understanding of technology concepts and operations that not only support classroom curriculum but provide an avenue for continuing professional development. Students will learn to apply technology to facilitate a variety of effective assessment and evaluation strategies. The class will help students understand the social, ethical, legal and human issues that surround the use of technology in PK-12 schools. Prerequisite: Admission to the Teacher Education program. F.S.S.S.

T&L 341. Foundations of Middle Level Education. 2 Credits.
This course promotes understanding the needs of early adolescent students and of the interdisciplinary, collaborative teaching approaches associated with the middle school philosophy. The course addresses the components of organization. Prerequisite: Admission to the Teacher Education program. F.

T&L 345. Curriculum, Instruction, and Assessment. 3 Credits.
A general curriculum development and instruction course designed for the undergraduate pre-service middle school and/or secondary teacher across all disciplines. It introduces and provides practice in planning, multiple instructional strategies, and methods of formal and informal assessment. It considers the impact of historical foundations, teaching philosophy, discipline standards, knowledge of diverse learners and special needs, and technology on curriculum development. Prerequisites: Admission to Teacher Education Program and T&L 250. F.S.

T&L 350. Development and Education of the Adolescent. 3 Credits.
A comprehensive examination of the characteristics and behavior of the adolescent student with implications for curriculum and instruction in the junior/ middle and high schools. Topics covered will be transition from childhood to adolescence, including cognitive development, self-concept, physiological changes, social needs and values, and values and attitudes of adolescents. This course will provide an understanding of the wide range of differences in developmental patterns of children and the influences of economic, sociological and psychological factors in development. A field experience is part of the course. Prerequisites: Admission to Teacher Education Program and T&L 250. F.S.

T&L 370. Differentiated Instruction. 3 Credits.
An introduction to the principles of differentiation including responsive instructional and assessment strategies, learner preferences, and the dynamics of a differentiated learning environment. Managing and organizing a differentiated approach to teaching is also presented. S.

T&L 386. Field Experience. 1 Credit.
Supervised tutorial or apprentice teaching, experience in an early childhood, K-12 classroom, university or community setting approved by the program area. Optional. Prerequisites: Admission to Teacher Education Program and T&L 250. S/U grading. F.S.

T&L 390. Special Topics. 1-3 Credits.
May be repeated. Prerequisite: Admission to the Teacher Education Program. Repeatable.
T&L 400. Methods and Materials. 3 Credits.
Various teaching methods and strategies and the materials used in teaching in a subject area. (Some Methods and Materials courses carry an academic department prefix and number. The number of methods courses required by a department may vary. Consult with an adviser.) Some offered F only: some F,S. See adviser. Prerequisites: T&L 250 and T&L 345, and admission to the Teacher Education program. Corequisites: T&L 486. Repeatable to 18 credits. F,S.

T&L 401. School Safety Science. 1 Credit.
Prepares students to plan for and communicate about a wide variety of classroom and lab safety issues. Health and safety issues are examined for the classroom teacher and the students in all science courses, including electrical safety, biological safety, chemical use, storage and disposal, legal issues, liability reduction and cost control are also addressed in detail. Prerequisites: Admission to Teacher Education Program. Corequisite: T&L 400. F.

T&L 404. Assessment in the Elementary Classroom. 1 Credit.
Elementary teachers must know how to design and use classroom assessments across all content areas as a way to monitor student learning and achievement, and to inform their decisions about instruction and the learning environment. This course will outline procedures for designing or selecting, administering, scoring, and interpreting a variety of formative and summative assessments for use in elementary classrooms. By exploring assessments aligned to educational objectives and standards, students will evaluate student learning outcomes across the elementary grades and content areas. In addition, students will become familiar with measures to assess learners with special needs and to assess learners from linguistically and culturally diverse backgrounds.

T&L 405. Data Literacy for Teachers. 1 Credit.
Teachers in all grade levels and program areas must know how to effectively and responsibly use student assessment data to inform their practice and address individual student needs and learning goals. This course will introduce students to various sources of assessment data, how to analyze patterns and themes in the data in order to make individual and programmatic decisions, and how to discuss data trends with colleagues as part of a professional learning community. Through careful examinations of real student data and discussions with community educators and administrators, students in this course will gain an understanding of the role and purpose of data and how to meaningfully use it to guide instruction. F,S,SS.

T&L 409. Reading in the Content Areas. 3 Credits.
This course emphasizes instructional strategies for reading and writing, as well as the use of varied texts, in the content area classroom. Prerequisite: Admission to the Teacher Education program. S.

T&L 410. Teaching Reading in the Elementary School Classroom (TEAM). 3 Credits.
A study of methods for teaching and assessing reading in the elementary school classroom with an emphasis on planning instruction that is child-centered, process-oriented and literature-based. Prerequisite: Admission to the Teacher Education program; see department for approval. F,S.

T&L 411. Primary Reading and Language Arts. 2 Credits.
This course explores a wide variety of developmentally-appropriate instructional practices for teaching primary level children multiple ways of communicating and experiencing language. This course emphasizes integrating reading, writing, speaking and listening as forms of creative and personal expression. Effective methods of teaching children to decode and encode print are studied. Prerequisites: T&L 335 and admission to the Teacher Education program. Prerequisite or Corequisite: T&L 328. F,S.

T&L 413. Assessing and Correcting Reading Difficulties. 2 Credits.
The focus of this course and practicum is to learn about current approaches to assessment and methods to assist students who are having difficulty with reading and writing. Observations, running records, interviews, and other evaluation procedures are used to learn about reader and writers, and these assessments are used to plan for instruction. Prerequisites: T&L 335 and admission to the Teacher Education program. Corequisites: T&L 414, SS.

T&L 414. Corrective Reading Practicum. 2 Credits.
Applying the knowledge and skills learned in T&L 413, students in this practicum assess, plan for and teach children who are having difficulty with reading and/or writing. Prerequisites: T&L 335 and admission to the Teacher Education program. Corequisites: T&L 413. SS.

T&L 415. Language and Literacy Development of English Language Learners. 3 Credits.
This course includes study of various approaches to ELL/bilingual education, methods of instruction, assessment of English language proficiency and classroom learning, and teaching academic content to ELs in the general education classroom. Prerequisite: Admission to the Teacher Education program or permission of instructor. F.

T&L 416. Adolescent Literacy Development. 3 Credits.
A study of adolescent literacy development with emphasis on instructional strategies and practices for reading and responding to texts, helping struggling readers, and engagement in literacy. Prerequisite: Admission to the Teacher Education program or permission of instructor. F.

T&L 417. Writing & Language Arts Methods. 2 Credits.
A study of methods for teaching writing and language arts to children in grades K-6. Emphasis is placed on process-oriented writing approaches; spelling and grammar; ways of using language for creative, personal, and content area expression. Prerequisites: Admission to Teacher Education Program and T&L 335 and T&L 328. F,S.

T&L 422. Development of the Gifted and Talented. 2 Credits.
Research and theory for understanding the development needs of the more able child in early childhood and in educational experiences. S.

T&L 423. Assessment and Individualized Planning in Special Education. 3 Credits.
A study of the principles and practices of: (1) obtaining diagnostic information on school-related problems of a student; (2) assimilating this information and prescribing appropriate alterations based on continuous measurement data. Prerequisites or Corequisites: TL 315 and T&L 319. F,S.

T&L 428. Assistive Technology. 1 Credit.
An overview of the various forms of technology (e.g., communication boards, switches, software) that may be used to assist students with disabilities. F,SS.

T&L 430. Social Studies in the Elementary School (Team). 3 Credits.
To understand and analyze the different modes of teaching social studies, to gain the competencies necessary for organizing a unit in the social studies, to gain an understanding of the values and multiple perspectives inherent within the various teaching strategies, to develop a preferred perspective on the ideal nature of Social Studies education. Prerequisite: Admission to the Teacher Education program; see department for approval. F,S.

T&L 432. Learning Environments. 3 Credits.
The purpose of this class is to study psychological, social, and cultural factors that influence classroom behavior and to examine elements that contribute to a positive learning environment. A field experience is included in the course. Prerequisite: Admission to the Teacher Education program. F,S,SS.

T&L 433. Multicultural Education. 3 Credits.
This class takes an anthropological view of multicultural education. It will help students better understand students in culturally diverse classrooms as well as preparing them to teach about cultural diversity. This class examines several cultures but is particularly interested in Native Americans of North Dakota. Prerequisite: Admission to the Teacher Education program. F,S,SS.

T&L 440. Mathematics in Elementary School (Team). 3 Credits.
Students explore how to facilitate the learning of mathematics in a constructivist environment through the use of investigations, manipulatives, technology, and holistic forms of assessment. Current trends in teaching mathematics are emphasized, with particular attention to documents created by the National Council of Teachers of Mathematics. Prerequisite: Admission to the Teacher Education program; see department for approval. F,S.

T&L 443. Mathematics for Primary Grades. 2 Credits.
Math for Primary Grades focuses on curriculum and methods for teaching mathematics in kindergarten through the third grade. Students actively engage in projects and activities that help them develop a conceptual understanding of teaching mathematics in a cooperative and constructivist environment where children view themselves as mathematicians. Emphasis is placed on the use of manipulative, problem solving activities and children's literature in the planning and organizing of developmentally appropriate classroom activities and lessons. Prerequisite: Admission to the Teacher Education program. F,S.
T&L 444. Assessing and Correcting Mathematics Difficulties. 2 Credits.
The focus of this course and the co-requisite practicum is to learn about current approaches to assessment and methods to assess students who are having difficulty with mathematics. Observations, error pattern analysis, interviews, and other evaluation procedures are used to learn about elementary students’ mathematical abilities, and these assessments are used to plan for instruction. Corequisites: T&L 413 and T&L 486. F.

T&L 453. Methods and Materials: Kindergarten. 2 Credits.
Exploration of curriculum, methods, and materials for use in kindergarten settings. Prerequisites: Admission to Teacher Education Program and T&L 310. F,S,SS.

T&L 456. Early Childhood Ed Seminar. 1 Credit.
This seminar continues the exploration of curriculum, methods, and materials issues as they are presented in the particulars of the student teaching experience. Prerequisites: T&L 333 and admission to Teacher Education Program. Corequisite: T&L 487. F,S.

T&L 465. Middle Level Curriculum and Methods. 5 Credits.
This methods course takes a hands-on approach to increasing understanding and application of the various methods and strategies for teaching early adolescent students. This course addresses techniques, strategies, materials, and a content area knowledge base necessary for promoting student learning and success in a middle school setting. Prerequisite: T&L 341. Corequisite: T&L 486. S.

T&L 470. Science in the Elementary School (TEAM). 3 Credits.
A survey of teaching strategies, materials, and resources appropriate for promoting science inquiry in elementary classrooms. Prerequisite: Admission to the Teacher Education program; see department for approval. F,S.

T&L 471. Physical Science in the Elementary School. 1-4 Credits.
Hands-on approach to learning basic physical science topics such as electricity, sound, light, and force. Effective teaching strategies are also emphasized. F,S.

T&L 472. Teaching Life Science in the Elementary School. 2 Credits.
Hands-on approach to learning basic biology topics such as cells, plants, animals, and ecosystems. Effective teaching strategies are also emphasized. F,S.

T&L 473. Earth and Space Science. 1-4 Credits.
Hands-on approach to learning basic earth and space science topics such as erosion, plate tectonics, water quality, pollution, astronomy, planets, and the solar system. Effective teaching strategies are emphasized. SS.

T&L 486. Field Experience. 1-4 Credits.
Supervised tutorial or apprentice teaching experience in an early childhood, K-12 classroom, university, or community setting approved by the program area. Prerequisite: Admission to the Teacher Education program. Repeatable to 16 credits. S/U grading. F,S.

T&L 487. Student Teaching. 4-16 Credits.
Provides student with the opportunity to assume the role of a classroom teacher in an educational setting under the supervision of a cooperating teacher and a University faculty member. Prerequisites: Permission of program, senior standing only. Prerequisite or Corequisite: T&L 488. Repeatable. S/U grading. F,S.

T&L 488. Senior Seminar. 1 Credit.
A discussion of problems, professional obligations, and careers in teaching. To be taken concurrently with or the semester prior to student teaching. Prerequisite: T&L 488 to be taken concurrently with or the semester prior to student teaching. S/U grading.

T&L 489. Senior Capstone: Responsive Teaching. 3 Credits.
Course is taken with student teaching. Teacher candidates engage in written communication and critical thinking in the context of student teaching. Course engagements require candidates to develop and implement curriculum and assessment; analyze and reflect on assessment results to respond to learners’ needs; and synthesize professional artifacts to demonstrate ability to plan, implement, assess and reflect on teaching and learning. Corequisite: Acceptance into Student Teaching. F,S.

T&L 493. Workshop. 1-4 Credits.
Special problems in Special Education; consideration of special problems of concern to the Special Education teacher and other educators. Repeatable to 8 credits. F,S.

T&L 495. Independent Study. 1-4 Credits.
This course is designed for the interested student’s pursuit of an area of study not offered through regular courses. In addition, students can continue to pursue subject matter covered in courses in greater depth. Repeatable to 8 credits.

T&L 498. Special Projects. 1-8 Credits.
Course number reserved for committee approved proposals, independent study, special colloquia, or experimental courses.

Bachelor of Science in Education in Secondary Education

Required 125 credits (36 of which must be numbered 300 or above, and 60 which must be from a 4-year institution) including:

I. Essential Studies Graduation Requirements (see University ES listing).

II. EHD General Graduation Requirements (see EHD listing).

III. The Following Curriculum:

Check with your advisor for your science and social studies requirements.

V. Subject Matter Areas of Concentration
Students completing a double major in Elementary and Middle Level Education must take coursework in two content areas in addition to the Elementary and Middle Level major programs of study. These programs must be planned carefully between the student and the advisor in both programs of study to ensure that the requirements for teaching in the subject areas have been met. Examples of content areas include but are not limited to: English, mathematics, science, social studies, health, and technology education.

These requirements may be impacted by changes at the federal and state level. Middle level advisers have lists of courses that may be recommended or required in certain areas.

In this combined major program, courses in Middle Level Education fulfill elective requirements in Elementary Education.

**Bachelor of Science in Education with Major in Early Childhood Education**

Required 125 credits (36 of which must be numbered 300 or above, and 30 which must be from UND). Please see an Early Childhood academic adviser for the most accurate program planning.

I. Essential Studies Graduation Requirements (see University ES listing).

II. EHD General Graduation Requirements (see EHD listing).

A. Students admitted Fall 2019 and after are required to take the following:

**Communications — 9 credits**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 110</td>
<td>College Composition I</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 130</td>
<td>Composition II: Writing for Public Audiences</td>
<td>3</td>
</tr>
<tr>
<td>COMM 110</td>
<td>Fundamentals of Public Speaking</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits: 9

**Social Sciences — 9 credits**

From 2 departments, including T&L 252 Child Development (required)

**Arts and Humanities — 9 credits**

From 2 departments

**Math, Science, Technology — 9 credits**

Must be taken in at least 3 departments, must include 1 science course with corresponding lab.

III. The following Early Childhood Education curriculum:

<table>

Total Credits: 12

* A higher level math or qualify score on the math placement test may be substituted.

A. Science Requirement:

One science with corresponding lab

Additionally, students must take a science course in the following four science areas: physical, biological, earth, and space studies. This coursework may be selected from the Essential Studies course list or from T&L 400-level science courses. Note that T&L science courses count as elective courses in the major and cannot be applied towards Essential Studies graduation requirements.

IV. Minor or Specialty Area:

Each student must have a minor or specialty area consisting of 20 credits. Two courses or a maximum of six credits may be transferred from your Essential Studies to your minor or specialty area. Select from: Anthropology, Art, English Language Learner/Bilingual Education, Early Childhood Education, Economics, English, Fine Arts, Foreign Language, Geography, History, Indian Studies, Kindergarten Endorsement, Literacy Education, Mathematics, Middle School, Music, Physical Education, Political Science, Psychology, Science, Social Studies, Sociology, Special Education, Technology Education or Visual Arts.

V. Introductory Courses:
T&L 250    Introduction to Education             3
T&L 328    Survey of Children's Literature       3
T&L 251    Understanding Individuals with Different Abilities  3

Total Credits  9

VI. Post Admission Courses:

MATH 277    Mathematics for Elementary School Teachers  3
Select one of the following:                 3
T&L 335    Understanding Readers and Writers                3
T&L 339    Educational Technology                           2
KIN 305    Health/Physical Education for Early Childhood and Elementary Education Teachers 3
T&L 324    Integrating the Arts in the Elementary Classroom 3
T&L 432    Learning Environments                           3
T&L 404    Assessment in the Elementary Classroom          1
T&L 405    Data Literacy for Teachers                       1
T&L 433    Multicultural Education                         3
T&L 417    Writing & Language Arts Methods                  2

Total Credits  27

VII. Education Methods Courses:

TEAM (Taken as a block of courses)

T&L 410    Teaching Reading in the Elementary School Classroom (TEAM) 3
T&L 430    Social Studies in the Elementary School (Team)                3
T&L 440    Mathematics in Elementary School (Team)                    3
T&L 470    Science in the Elementary School (TEAM)                       3
T&L 486    Field Experience                                            2

Total Credits  14

VIII. Student Teaching and Related Courses:

T&L 487    Student Teaching                                     13
T&L 488    Senior Seminar                                       1
T&L 489    Senior Capstone: Responsive Teaching                  3

Bachelor of Science in Education with Major in Middle Level Education

Required 125 credits (36 of which must be numbered 300 or above, and 60 of which must be from a 4-year institution) including:

I. Essential Studies Graduation Requirements (see University ES listing).

The Integrated Studies Program is recommended.

II. EHD General Graduation Requirements (see EHD listing).

III. The following Middle Level Education (Grades 5-8) Curriculum:

T&L 250    Introduction to Education                          3
T&L 315    or T&L 319 Integrating Diverse Needs in Educational Settings 3
T&L 339    Educational Technology                           2

Admission to teacher education is required for enrollment in all of the following courses:

T&L 341    Foundations of Middle Level Education              2
T&L 350    Development and Education of the Adolescent         3
T&L 409    Reading in the Content Areas                      3
T&L 432    Learning Environments                              3

T&L 433    Multicultural Education                          3
T&L 465    Middle Level Curriculum and Methods             5
T&L 486    Field Experience                                1-4

A minimum of two methods courses in each area of concentration (see below) from the secondary education program and corequisite field experience (8)

T&L 487    Student Teaching                                       13
T&L 488    Senior Seminar                                      1
T&L 489    Senior Capstone: Responsive Teaching                 3

Requires 24 credits in each area of concentration: see the middle level adviser for required coursework.

In order to be considered a highly qualified teacher at the Middle Level, candidates must take coursework in two content areas in addition to the Middle Level major program of study. This program must be planned carefully between the student and the middle school advisor to ensure that the requirements for teaching in the subject areas have been met. Examples of content areas include but are not limited to: English, mathematics, science, social studies, health, and technology education.

*These requirements may be impacted by changes at the federal and state level.

Bachelor of Science in Education with Major in Science

Required 132 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including:

I. Essential Studies Graduation Requirements (see University ES listing).

II. EHD General Graduation Requirements (see EHD listing).

III. The following Science Curriculum:

A. Minimum of 24 semester hours in ONE of the four science areas (biology, chemistry, physics or earth science) through completion of a minor (24)

B. Minimum of 12 semester hours in your choice of each of two other areas as follows, plus a minimum of four semester hours in the fourth area (28)

or BIOL 332 General Ecology
& 332L and Gen Ecology Lab
or BIOL 336 Systematic Botany

Math (Minimum 8 credits)
Select one of the following Math courses:
MATH 103 College Algebra (For students electing the life science 3
physics option (College Physics 211, 212, and/or 213))
MATH 165 Calculus I (For students taking the physical science 4
physics option (University Physics 251, 252, and/or 253))

Select one of the following Statistics courses: 3-4
PSYC 241 Introduction to Statistics
ECON 210 Introduction to Business and Economic Statistics

IV. In addition to the Secondary Education Licensure Preparation, B.S.Ed. Science Students must take T&L 401 School Safety Science (1 cr).

English Language Learner or Bilingual Education Endorsement

Students who complete the courses listed below will be eligible for North Dakota endorsement in English Language Learner (ELL) or Bilingual Education. Students must be certified to teach in Elementary, Middle Level or Secondary classrooms.

T&L 415 Language and Literacy Development of English 3
& Language Learners
T&L 433 Multicultural Education 3
T&L 486 Field Experience 1-4
ENGL 209 Introduction to Linguistics 3
ENGL 309 Modern Grammar 3
ENGL 370 Language and Culture 3
ENGL 418 Second Language Acquisition 3
ENGL 419 Teaching English as a Second Language 3

The bilingual education endorsement requires proficiency in the language of instruction. These requirements may be impacted by change at the federal and state level.

Kindergarten Endorsement

Undergraduate students who wish a Kindergarten Endorsement but do not wish to complete the double major in elementary and early childhood education must take the following courses as part of 15 hours of required kindergarten coursework. In addition, they are required to student teach in a kindergarten classroom.

T&L 310 Introduction to Early Childhood Education 3
T&L 311 Observing and Assessing Children 3
T&L 313 Language Development and Emerging Literacy 3
T&L 338 Home, School and Community Relations 3
T&L 453 Methods and Materials: Kindergarten 2
T&L 487 Student Teaching 4-16

These requirements may be impacted by change at the federal and state level.

Minor in Early Childhood Education

21 credits including:
T&L 310 Introduction to Early Childhood Education 3
T&L 311 Observing and Assessing Children 3
T&L 313 Language Development and Emerging Literacy 3
T&L 320 Infant and Toddler 3
T&L 333 Methods and Materials: Pre-Kindergarten 3
T&L 338 Home, School and Community Relations 3
T&L 453 Methods and Materials: Kindergarten 2
T&L 486 Field Experience 1

Total Credits 21

Minor in Literacy Education

The Literacy Education minor is open to students majoring in a field which leads to teacher certification at the early childhood, elementary, middle or secondary level. Students must be admitted to the Teacher Education program. Students from related disciplines such as Communication Science and Disorders may also be admitted. The program consists of 20 credits, which includes required and elective courses.

Students who complete the Literacy Education minor are eligible to apply for the North Dakota Reading Credential, which enables teachers to work as reading specialists at one of the following levels in North Dakota: K-6 (Elem or Elem/ECDE double majors), 5-8 (Elem and Secondary with MLE minor or MLE major), 7-12 (Generalist Credential for English, Social Studies or Science majors). NOTE: in North Dakota there is no Early Childhood Reading Credential. The coursework meets the requirements for the North Dakota Reading Credential.

Note: All courses completed for the minor must be taken in addition to those taken for the major. It is recommended that all students pursuing this minor complete T&L 335 Understanding Readers and Writers early in the course sequence as it is a prerequisite for more advanced reading courses.

Required Courses for the Elementary Education Major and Early Childhood/Elementary Education Double Major (20 credits):

T&L 319 Integrating Diverse Needs in Educational Settings (Fall & Spring) 3
T&L 409 Reading in the Content Areas (Spring) 3
T&L 413 Assessing and Correcting Reading Difficulties (Summer) 2
T&L 414 Corrective Reading Practicum (Summer) 2
T&L 415 Language and Literacy Development of English Language Learners (Spring) 3

Select three of the following: 7
T&L 313 Language Development and Emerging Literacy (Fall) 3
T&L 411 Primary Reading and Language Arts (Fall & Spring - Elementary only) 3
T&L 416 Adolescent Literacy Development (Fall) 3
T&L 486 Field Experience (in Literacy or ESL) 3
T&L 329 Young Adult Literature
Minor in Middle Level Education

The Middle Level minor is open to students majoring in a field which leads to teacher licensure at the elementary or secondary level. The following Middle Level Education (Grades 5-8) Curriculum is required (23 credits):

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>T&amp;L 315 Educational Technology</td>

Total Credits 25-28

Students completing the Middle Level minor with a major in Elementary Education have exceeded the endorsement requirement for a highly qualified teacher (grade 7 or 8). Although, Elementary Education majors with a Middle Level minor will need to complete a major equivalence in a core academic subject. Students are encouraged to meet with the middle school adviser to ensure that the requirements for teaching in the middle school have been met.

Students completing the Middle School minor with a major in a Secondary Education academic area will be considered highly qualified in that core content area.

* These requirements may be impacted by changes at the federal and state level.
THEA 120. Voice and Movement I. 2 Credits.
Development of the student's physical and vocal awareness. Emphasis on freeing the actor and identifying personal habitual response patterns. F, odd years.

THEA 161. Acting I. 3 Credits.
Basic principles of acting with emphasis on movement; basic character development through improvisation and script. F.S.

THEA 201. Theatre Practicum. 1 Credit.
Participation in theatre pre-performance and performance capacities, both technical and acting, under faculty direction. Repeatable to 8 hours. Repeatable to 8 credits. F.S.

THEA 204. Introduction to Acting for Musical Theatre. 3 Credits.
An introduction to the unique style of performance techniques for musical theatre including voice and movement work, acting, and staging. Prerequisite: THEA 161. F, even years.

THEA 210. Selected Topics in Theatre. 1-3 Credits.
Topics of special interest to faculty and students, such as Stage Management, and others. Repeatable up to 9 credits. Repeatable to 9 credits. On demand.

THEA 220. Voice and Movement II. 2 Credits.
A sequential continuation of Theatre 120: Voice and Movement I with focus on freeing the channel for sound, improving range, and articulation. Emphasis in movement will be on posture and introducing somatic techniques. Prerequisite: THEA 120 or consent of instructor. S, even years.

THEA 225. Makeup for the Stage. 3 Credits.
Introduction to the basic techniques of makeup for the stage design and application. F.

THEA 230. Text Analysis. 3 Credits.
An analysis of the dramatic text from the standpoint of production and performance. Prerequisites: THEA 110 or THEA 130. S, odd years.

THEA 240. Ballet I. 2 Credits.
An introductory ballet class designed to introduce students to the fundamentals of ballet. This class will contain a ballet barre, warm-up, barre stretch, an adagio center combination and floor exercises designed to enhance alignment, flexibility, strength and center. Repeatable to 6 credits. F.

THEA 241. Jazz Dance I. 2 Credits.
This course is designed to introduce the student to principles and techniques characteristic of jazz dance. Students will execute movement combinations in a variety of jazz styles. Emphasis will be placed on movement fundamentals of alignment, flexibility, endurance, dynamic range, and strength. Repeatable to 6 credits. F, odd years.

THEA 242. Tap Dance. 1 Credit.
This class is designed to introduce the student to the basic principles of tap dance. Warm-up, exercises, and combinations in tap technique will provide opportunities for the student to develop an efficient use of weight, alignment, articulation of footwork, coordination, and musicality. Repeatable to 4 credits. F, even years.

THEA 243. Contemporary Dance I. 2 Credits.
Introduction to the elements of contemporary dance and practice of the fundamentals of the technique with attention given to both the art and craft of the dance form. Emphasis on postural alignment, shape, sequence, flexibility, as well as the body in relation to space, time, force, and movement initiation. Repeatable to 6 credits. F.

THEA 250. Readings in Dramatic Literature. 3 Credits.
Readings in dramatic literature from ancient to contemporary, with a strong emphasis on written and verbal analysis of realist texts. On demand.

THEA 260. Costume Craft. 3 Credits.
An introduction to the basic principles, theory, and techniques of costume construction. This hands-on class will reach from basic to advanced skills. S, odd years.

THEA 270. Stagecraft. 3 Credits.
This course is intended to teach the basic functions, aesthetics, history, methods and materials of scenery, properties, lighting and sound. Practical experience, shop procedures are tied to hands-on experience in departmental productions. F.

THEA 271. Intermediate Acting I: The Actor in You. 3 Credits.
An introduction to the Meisner Technique and to scene study. Special emphasis will be placed on using and trusting yourself to inform your work, working together, and applying rehearsal techniques to scripted work. Prerequisite: THEA 161 or consent of instructor. F, odd years.

THEA 300. Play Direction I. 3 Credits.
Principles and techniques of directing for the theatre. Student laboratory directing experiences. Prerequisites: THEA 161 and THEA 230. F, odd years.

THEA 326. Lighting for Stage. 3 Credits.
The principles, mechanics and design of stage and lighting; its relationship to set, makeup and costume design; plus laboratory participation in University productions. Prerequisite: THEA 270 or consent of instructor. Repeatable to 6 credits. S, odd years.

THEA 330. Contemporary Theatre. 3 Credits.
Readings in dramatic literature from 1800s to contemporary times. Strong emphasis on written and verbal analysis of current dramatic techniques beyond realism. S, odd years.

THEA 335. Stage Management. 3 Credits.
An introduction to the procedures, responsibilities, and best practices for stage management. F.

THEA 339. Production Design. 3 Credits.
Exploration of needs for putting together a successful theatrical production. Topics include conceptual work, drafting, model-making and rendering, and scenic painting. Prerequisites: THEA 270 and THEA 300 or consent of instructor. Repeatable to 6 credits. F, odd years.

THEA 340. Ballet II. 2 Credits.
Ballet II is a continuation of Ballet I. Students will continue to develop advanced ballet skills and technique in relationship to form, strength, flexibility, center, line, choreography and physical expression. Prerequisite: THEA 240 or consent of instructor. Repeatable to 6 credits. S.

THEA 341. Jazz Dance II. 2 Credits.
This course is designed to be a continuation of THEA 241. Students continue to explore the principles and techniques characteristic of jazz dance through a variety of jazz dance styles. Emphasis will be placed on applying efficient form and dynamic energy to intermediate level movement combinations in center and across the floor. Prerequisites: THEA 241. Repeatable to 6 credits. S.

THEA 342. Contemporary Dance II. 2 Credits.
In this course students will continue to refine the skills learned in Contemporary Dance I and explore the principles and techniques characteristic of contemporary dance. Emphasis will be placed on correct alignment, spatial awareness, musicality, and dynamic energy as applied to intermediate level movement combinations. Prerequisite: THEA 243 or consent of instructor. Repeatable to 6 credits. S.

THEA 344. Musical Theatre Dance Style. 2 Credits.
In this course students will learn the vocabulary, styles, and techniques associated with musical theatre dance. Building upon the movement basics learned in the prerequisite courses, students will refine their dance skills and increase their knowledge base through the practice and assimilation of repertory from the classic musical theatre. Prerequisite: THEA 241 or consent of instructor. F, odd years.

THEA 371. Advanced Acting: Advanced Scene Study. 3 Credits.
Advanced script analysis applied to plays that place advanced demands on the actor. Prerequisites: THEA 272 or consent of instructor. F.

THEA 397. Cooperative Education. 1-6 Credits.
A practical work experience with an employer closely associated with the student's academic area. Arranged by mutual agreement among student, department, and employer. Repeatable to 12 credits. Prerequisites: GPA of 2.5 and junior standing. Repeatable to 12 credits. F, S, SS.

THEA 401. Theatre Study Abroad. 3 Credits.
This course is designed in conjunction with a study abroad trip. Students will research the impact of theatre in the designated region. Locations for the study abroad trip will vary. Repeatable to 12 credits. S.

THEA 404. Acting for the Music Theatre. 3 Credits.
Appreciation of and performance techniques for musical theatre including: voice and movement work, acting, and staging. Prerequisite: Consent of instructor. S, odd years.
THEA 415. Selected Problems in Theatre Arts. 1-3 Credits.
Topics of special interest to faculty and students, such as Theatre Management, Women's Issues in Drama, Polish Theatre and Drama, Improvisation, Scene Painting, and others. Repeatable up to 9 credits. Repeatable to 9 credits. On demand.

THEA 421. History of Period Styles for Theatrical Design. 3 Credits.
A survey of period styles focusing on developments such as clothing and architecture from the Greek period to the present. An emphasis is placed on the research process for theatrical design. S, even years.

THEA 423. History of the Theatre: Classical, Medieval and Renaissance. 3 Credits.
The theatre in performance. The origins of theatrical forms and their relationships to acting style, physical theatre and audience with the cultural environment. F, even years.

THEA 424. History of the Theatre: Seventeenth Century to the Present. 3 Credits.
A continuation of topics covered in THEA 423 beginning with the Seventeenth Century and continuing to the present. Student need not take THEA 423 prior to enrolling in THEA 424. S, odd years.

THEA 425. Play Direction II. 3 Credits.
A continuation of THEA 300 with emphasis on contemporary theories, analysis, research, conceptualization, and implementation. Laboratory experience. Prerequisite: THEA 300 or consent of instructor. S, even years.

THEA 426. Scene Design for the Stage. 3 Credits.
The analysis, research, and conceptualization of the physical context of theatre productions. Emphasis on individual creative projects. Repeatable up to 6 hours. Prerequisite: THEA 270. Repeatable to 6 credits. F.

THEA 427. Costume Design. 3 Credits.
Elements, principles, and styles of design applied to the visual creation of a dramatic character. Repeatable up to 6 credits. Prerequisites: THEA 260 or consent of instructor. Repeatable to 6 credits. S, even years.

THEA 442. Choreography. 3 Credits.
An introduction to choreography that offers the student training in the sequential application of basic principles of movement and form to a small group of dancers. Prerequisites: THEA 342 or consent of instructor. S, odd years.

THEA 450. Musical Theatre History. 3 Credits.
A survey of the history of musical theatre in performance, genre and world presence. Prerequisite: THEA 204. F, even years.

THEA 471. Advanced Acting III: Shakespeare. 3 Credits.

THEA 481. Theatre Practicum. 1-2 Credits.
Projects in all areas of theatre and interpretation in a supervisory capacity. Specific assignments in production/planning with faculty approval. Repeatable to 8 hours. Repeatable to 8 credits. F,S.

THEA 488. Playwriting. 3 Credits.
The playwright's problems as revealed through practice of writing plays; experimental productions of the student's creative work whenever possible. Repeatable up to 6 hours. Prerequisite: Sufficient background in theatrical arts and creative writing and consent of instructor. Repeatable to 6 credits. F, odd years.

THEA 494. Senior Project. 4 Credits.
Individual work in an approved area. Prerequisite: Theatre BA or BFA students only. F,S.

Bachelor of Arts with Major in Theatre Arts

Required 120 credits (36 of which must be numbered 300 or above, and 30 of which must be from UND) including:

I. Essential Studies Requirements (Thea 424 fulfills the Essential Studies Capstone requirement.) 39 cr.

II. 28 credits in the Theatre Core for all BA students

III. Selection of a Subplan from either Acting, Design/Tech, or Generalist

IV. The following curriculum:

28 credits, including:

Minor in Dance

Required 20 credits, including:

Select six of the following (Dance Technique):

- THEA 240 Ballet I
- THEA 241 Jazz Dance I
- THEA 242 Tap Dance
- THEA 243 Contemporary Dance I
- THEA 340 Ballet II
- THEA 341 Jazz Dance II
- THEA 342 Contemporary Dance II
- THEA 344 Musical Theatre Dance Style
  & THEA 161 and Acting I
- THEA 442 Choreography

Select two of the following:

- THEA 201 Theatre Practicum

Additional technique class/classes

* Course number for individual lessons determined at registration.

Minor in Theatre Arts

Required 25 credits, including:

- THEA 110 Introduction to Theatre Arts
- THEA 161 Acting I
- THEA 201 Theatre Practicum
- THEA 330 Contemporary Theatre

Select one of the following:

- THEA 260 Costume Craft
- THEA 270 Stagecraft

Select one of the following:

- THEA 300 Play Direction I
- THEA 335 Stage Management

Select one of the following:

- THEA 423 History of the Theatre: Classical, Medieval and Renaissance
- THEA 424 History of the Theatre: Seventeenth Century to the Present

Select two of the following:

- THEA 225 Makeup for the Stage
- THEA 230 Text Analysis
- THEA 271 Intermediate Acting I: The Actor in You
- THEA 326 Lighting for Stage
- THEA 425 Play Direction II
- THEA 426 Scene Design for the Stage
- THEA 427 Costume Design
- THEA 488 Playwriting

Total Credits 25

University Courses (UNIV)

Courses

UNIV 101. Introduction to University Life. 2 Credits.
This course is designed to promote the personal and academic success of new students. This course covers all facets of student transition to University Life including academic success, intellectual skill development, personal growth, wellbeing, intercultural skills, and connections across the University with peers, faculty, staff, and advisors. This course aims to help students develop skills that will ensure their success at UND. Prerequisite: Freshman Only. F.

UNIV 110. First Year Seminar. 3 Credits.
This seminar course is specifically meant to help first-year students make a successful transition to college, and has been designed to engage students in the academic life of the university through the study of a topic or theme. To accomplish these goals, students in this course will consider and practice being reflective about their own learning, being an active and engaged learner, and studying effectively. Only students in their first year at UND may register for this course. Prerequisite: Only students in their first year at UND may register for this course. On demand.

UNIV 115. First Year Research. 3 Credits.
This course is specifically meant to help first-year students make a successful transition to college, and has been designed to engage students in the academic life of the university through an intensive research experience. To accomplish these goals, students in this course will consider and practice being reflective about their own learning, being an active and engaged learner, and studying effectively. Only students in their first year at UND may register for this course. Prerequisite: Only students in their first year at UND may register for this course. On demand.
UNIV 125. Introduction to Effective Study Skills. 2 Credits.
This course explores issues relevant to both a student's academic and personal lives. As its name implies, a large portion of this course is devoted to effective study skills and habits. The course examines various aspects of learning styles, studying skills, test taking strategies, etc. This information is helpful in assisting students to succeed. (A maximum total of 2 credits from UNIV 125, UNIV 126, and UNIV 127 may be counted toward degree requirements.) Academic issues involving this course will be handled through the College of Arts and Sciences. F.S.

UNIV 126. College Reading. 2 Credits.
This course is designed to assist college students progress from a pre-college reading level to a college reading level. It also presents a systematic way of approaching college textbook material that can help students to become more efficient in study skills integral to their college success. Comprehension skills will be introduced early in the course and integrated throughout the class. The exercises prepare students to read a selection and give them an opportunity to apply comprehension and study skills during and after reading. (A maximum total of 2 credits from UNIV 125, UNIV 126, and UNIV 127 may be counted toward degree requirements.) Academic issues involving this course will be handled through the College of Arts and Sciences. F.S.

UNIV 127. Critical Thinking Strategies for College. 2 Credits.
This course is designed for students who want to develop and improve advanced academic techniques, to successfully engage in active learning through critical thinking, metacognitive skills, acquire learning attitudes, and prepare for success in academics and the workplace environment. (A maximum total of 2 credits from UNIV 125, UNIV 126, and UNIV 127 may be counted toward degree requirements.) Academic issues involving this course will be handled through the College of Arts and Sciences. F.S.

UNIV 228. Non-UND Affiliated Study Abroad.
Course required of students studying abroad to maintain student status; required Sophomore status and cumulative GPA of 2.50; prior to registration, students will be involved in study abroad procedures inclusive of study abroad application, pre-departure orientation, credit transfer, and related study abroad processes outlined in the Study Abroad Handbook; courses to be taken during the study abroad semester must have pre-approval of appropriate academic department, and courses and grades earned are entered as transfer credit upon transfer back to UND (repeatable with permission of the student's academic department). Academic issues involving this course will be handled through the College of Arts and Sciences. Repeatable. F,S,SS.

UNIV 229. Study Abroad.
1 to 12 credit equivalents in any one semester (repeatable with permission of the student's academic department); course required of students studying abroad to maintain full-time status; required Sophomore status and cumulative GPA of 2.50; prior to registration, students will be involved in study abroad procedures inclusive of study abroad application, pre-departure orientation, credit transfer, and related study abroad processes outlined in the Study Abroad Handbook; courses to be taken during the study abroad semester must have pre-approval of appropriate academic department, and courses and grades earned are entered as transfer credit upon transfer back to UND. Academic issues involving this course will be handled through the College of Arts and Sciences. Prerequisites: Sophomore status and a cumulative GPA of 2.5. Repeatable. F,S,SS.

UNIV 401. Design Thinking for Social Innovation. 3 Credits.
This course will explore human-centered design, a creative problem solving model used to simplify complex challenges. Human-centered design process consists of steps such as: empathy, defining the problem, ideation, prototyping and testing, and reframing. Students will learn this process using a combination of academic and applied lessons in an interdisciplinary group of students. Completion of this course prepares students for design thinking and innovation professional certification by the International Association of Innovation Professionals (IAIOP). Passage of the course and the certification exams further prepares students for an internship opportunity through the UND Innovation Studio where interdisciplinary teams will use the human centered design process with an industry partner to collaborate on solving a complex, industry-specific challenge they are facing. F.S.

UNIV 410. Design Thinking Internship. 1-3 Credits.
The UND Innovation Studio identifies an interdisciplinary student team to work alongside an industry partner to identify new solutions and/or help support implementation of new solution to solve a complex, industry-specific challenge. Students participating in the studio internship will have successfully completed a design thinking training course and passed a certification exam with the International Association of Innovation Professionals. The studio internship experience is designed so students apply the innovation process through real-world application of their design thinking training to address a current industry challenge. Upon completion of this experience, students will have developed a stronger understanding of their creative problem solving abilities, refined their communication and collaboration skills, and have an assessment of their strengths and weaknesses as an innovative young professional. Prerequisite: UNIV 401 or by permission. Repeatable to 9 credits. S/U grading. F,S,SS.

Women and Gender Studies (WGS)
B.G.S. in Women & Gender Studies (p. 218)
Minor in Women and Gender Studies (p. 219)

Courses
WGS 200. Introduction to Gender Studies. 3 Credits.
An introduction to the social construction of gender, a concept that underlies research in women studies and the new masculinity studies—indeed, of much work in the humanities and social sciences, generally. Topics may include the role of gender in the formation of human symbol systems and institutions worldwide, as well its capacity to shape individual bodies, identities, and kinship relations. F.S.

WGS 225. The Study of Women. 3 Credits.
An introduction to the study of women as subjects of scholarly inquiry, with emphasis on transnational feminism and assessments of women's contributions around the globe. The course will provide an interdisciplinary focus on the central issues and questions posed by the new scholarship on women, and introduce students to the perspectives and methodologies of a variety of disciplines. F.S.

WGS 480. Feminist Theory. 3 Credits.
Feminist theory examines the foundations of American feminism from enlightenment liberal to postmodern and standpoint theories. The course first develops then critiques these fundamental approaches. Opportunities are provided to integrate mainstream and marginal experiences of feminist theory and its practice. Prerequisites: WGS 200 or WGS 225. On demand.

WGS 492. Senior Study: Women and Gender Studies. 1-4 Credits.
Supervised independent study involving a theory paper, practicum experience, or a combination of the two. Prerequisites: WGS 200 or WGS 225. On demand.

Bachelor of General Studies: Women and Gender Studies

Major in Interdisciplinary Studies: Women and Gender Studies
I. Essential Studies Requirements (see University ES listing).
II. A minimum of 36 credits, including 9 required WGS course credits (WGS 200, WGS 225, WGS 480) and 27 elective credits (list below is not all-inclusive of elective possibilities). Please consult Women and Gender Studies Director to confirm plan of study:

Students may declare a major or minor through the College of Arts and Sciences and should also contact the Director of Women and Gender Studies to design a program of study.
Four Year Plans

Four-year plans are designed to help full-time degree-seeking undergraduate students to determine the best way to select a major and progress through coursework required to complete their bachelor's degree.

Students are encouraged to review their major’s four-year plan, and to work with their academic advisor to ensure they meet the degree requirements, can plan for distinctive education engagement experiences such as internships, and successfully complete their program of study for graduation.

Four-year plans:
- Specify degree requirements for each major
- Provide semester-based course schedule models to complete in four years
- Incorporate Essential Studies and elective course requirement progressions
- Allow departments and advisors to create graduation progression benchmarks and review progress with student

The plans for each major can be found for each of the colleges and schools. Please use the links in the left navigation.

This is an example of a course of study leading to a BA in American Indian Studies. Plans of courses differ between even and uneven years. Please visit with an American Indian Studies faculty member to determine a personalized plan. Students need to satisfy all published Essential Studies requirements. To
determine how to best fulfill these requirements and the electives requirements in the American Indian Studies major, students should visit with an American Indian Studies faculty member.

You must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies).

This plan of study represents just one way in which a student can complete the requirements for the Bachelor of Arts in Anthropology. Because of the large number of ways to complete the degree requirements for this major, students should always consult their adviser for assistance regarding their specific plan of study.

You must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements (https://und.edu/academics/essential-studies).

This is one possible way to complete the degree in 4 years. The B.S. with Major in Biology is designed to be flexible to allow students to customize the program of study to their own needs including allowing for semesters with internships or study abroad. Students are highly encouraged to meet with their advisor to personalize their program of study. 1 = Recitations are optional but if desired should be taken at the same time as the lecture course. 2 = Students are required to take 4 upper level lab courses, 3 = Organic electives are any 300 and 400 level biology courses not used to meet other program requirements (i.e., not a core course or capstone course). Students can use up to 2 life sciences courses offered outside the Biology Department toward the Biology Electives (e.g., Anat 204, MBio 302, MBio 328, PPT 301). There are some restrictions so students should check the catalog carefully or talk with their advisor if thinking about using outside courses.

You must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)
### Integrated-Enhanced Applied Life Science

B.S. with Major in Biology, Molecular and Essential-Studies (Departmental, and Essential Studies requirements. Please Note: Every student must fulfill all University, 125. Special Emphasis courses can fulfill an essential studies requirement You must complete enough electives to bring total credit hours up to the 342/342L, and BMB 301 because some medical schools require or prefer this consideration for medical school are encouraged to take Chem 341/341L, Chem 341/L & 342/L, or Chem 341/L & BMB 301, or Chem 340/L. Students require to take 4 upper level labs. These courses meet the upper level lab requirement. 3 = Organic chemistry requirement can be met either by taking Biochemistry of Proteins and Information Flow 17-18 Total Credits 120-135

The B.S. with Major in Molecular and Integrative Biology with the Basic Life Science option is designed for students interested in integrating knowledge across levels of biological organization and provides a strong foundation for students planning to continue their studies in medical science, graduate, or professional programs. This is one possible way to complete the degree in 4 years but there is flexibility to allow students to customize the program of study to their own needs including allowing for semesters with internships or study abroad. Students are highly encouraged to meet with their advisor to personalize their program of study. 1 = Recitations are optional but if desired should be taken at the same time as the lecture course. 2 = Students are required to take 4 upper level labs. These courses meet the upper level lab requirement. 3 = Organic chemistry requirement can be met either by taking Chem 341/341L, or Chem 341/L & BMB 301, or Chem 340/L. Students considering medical school are encouraged to take Chem 341/341L, Chem 342/342L, and BMB 301 because some medical schools require or prefer this combination.

You must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

The B.S. with Major in Molecular and Integrative Biology with the Enhanced Applied Life Science option is designed for students interested in integrating...
knowledge across levels of biological organization and who are interested in pursuing technical positions or further training in applied health science and biotechnology. This is one possible way to complete the degree in 4 years but there is flexibility to allow students to customize the program of study to their own needs including allowing for semesters with internships or study abroad. Students are highly encouraged to meet with their advisor to personalize their program of study. 1 = Recitations are optional but if desired should be taken at the same time as the lecture course. 2 = Students are required to take 4 upper level labs. These courses meet the upper level lab requirement. 3 = Organic chemistry requirement can be met either by taking Chem 341/L & 342/L, Chem 341/L & BMB 301, or Chem 340/L. Students considering medical school are encouraged to take Chem 341/341L, Chem 342/342L, and BMB 301 because some medical schools require or prefer this combination. 4 = Students in this major interested in a career in the biotechnology industry are strongly encouraged to gain research experience which could be done for credit through BIOL 492.

You must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

The B.S. with Major in Biology with Pre-Health Science Emphasis is designed for students interested in medicine or allied medical fields. This is one possible way to complete the degree in 4 years but there is flexibility to allow students to customize the program of study to their own needs including allowing for semesters with internships or study abroad. Students are highly encouraged to meet with their advisor to personalize their program of study. 1 = Recitations are optional but if desired should be taken at the same time as the lecture course. 2 = Students are required to take 4 upper level labs. Biol 341L could go toward the upper level lab requirement but students do not have to take Biol 341L. 3 = Organic chemistry requirement can be met either by taking Chem 341/L & 342/L, Chem 341/L & BMB 301, or Chem 340/L & BMB 301. Note that Chem 340/L and BMB 301 are offered in the same semester so it takes 2 years to complete that option. Students considering medical school are encouraged to take Chem 341/341L, Chem 342/342L, and BMB 301 because some medical schools require or prefer this combination. 4 = A minimum of 21 credits of Biology Electives are required with at least 9 credits from the following list (Anat 204/204L, Biol 364/364L, Biol 369/369L, Biol 378, Biol 380, Biol 390, Biol 415, Biol 418, Biol 420, Biol 442/442L, MBio 302/302L, MBio 328). Students can use up to 3 life sciences courses offered outside the Biology Department toward the Biology Electives (e.g., Anat 204, BMB 401, BMB 403, MBio 302, MBio 328, PPT 301). There are some restrictions so students should check the catalog carefully or talk with their advisor if thinking about taking outside courses.

You must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

**Credits: 15**

**Total Credits: 120**

**REQUIRED 125 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including: I. Essential Studies Requirements [see University ES guidelines and course listings]. II. The Following Curriculum: Major Requirements - 51 hours of Chemistry including the courses listed above. FOOTNOTES: 1 = If a student is not ready for Math 165, the math sequence may be moved back one semester and Math 107 (also Math 103, if needed) should be taken in the first semester. 2 = Suggested electives are courses in Physics, Mathematics, Biochemistry, Biology, Languages, Computer Science, Chemical Engineering, Business Management, and Speech. 3 = Chem 44x (441, 442 and 443) courses are offered within a regular, two-year cycle. Students can take Chem 44x courses in any order and that order may differ from one shown above. To complete the degree in 4 years, students must start their Junior Year by taking the first available Chem 44x course of the cycle. 4 = Graduate level courses in chemistry may be taken as electives.

You must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

5 = Two semesters of a foreign language are required. If a student wishes to pursue Study Abroad, taking language courses earlier is recommended. 6 = If the student has another major, a non-chemistry capstone course may be taken. If so, the student must take 1 credit of either Chem 392, Special Problems in Chemistry, or Chem 492, Senior Research.

**Total Credits**

120

REQUIRED 125 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including: I. General Education Requirements (see University GER listing). II. The Following Curriculum: Major Requirements - 37 hours of Chemistry including the courses listed above. 

FOOTNOTES: 1 = Biology 150 and 151 can be taken in the sophomore year. They are prerequisites to other required biology courses. 2 = If a student is not ready for Math 146, Math 103 should be taken in the first semester. If a student would like the option to change into the B.S. in Chemistry or the B.S. with Major in Chemistry with emphasis for the Physical Science Option at a later date, be aware that Math 165, 166, and 265 are required. If a student who begins either the B.S. in Chemistry or the B.S. with Major in Chemistry with emphasis for the Physical Science Option wishes to change to the Biochemistry Option, Math 165 will substitute for Math 146. 3 = Electives must include 3 credit hours from Cell Biology (Biol 341), Genetics (Biol 315), or Microbiology (MBio 302L) and 1 credit hour from either Special Problems in Chemistry (Chem 392) or Senior Research (Chem 492). Other suggested electives are courses in Physics, Mathematics, Biochemistry, Biology, Languages, Computer Science, Chemical Engineering, Business Management, and Speech.

You must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

4 = Two semesters of a foreign language are required. If a student wishes to pursue Study Abroad, taking language courses earlier is recommended.

REQUIRED 125 credits (36 of which must be numbered 300 or above and 60 of which must be from a 4-year institution) including: I. Essential Studies Requirements (see University ES guidelines and course listings). II. The Following Curriculum: Major Requirements - 51 hours of Chemistry including the courses listed above. FOOTNOTES: 1 = If a student is not ready for Math 165, the math sequence may be moved back one semester and Math 107 (also Math 103, if needed) should be taken in the first semester. 2 = Suggested electives are courses in Physics, Mathematics, Biochemistry, Biology, Languages, Computer Science, Chemical Engineering, Business Management, and Speech. 3 = Chem 44x (441, 442 and 443) courses are offered within a regular, two-year cycle. Students can take Chem 44x courses in any order and that order may differ from one shown above. To complete the degree in 4 years, students must start their Junior Year by taking the first available Chem 44x course of the cycle. 4 = One credit hour must be from either Special Problems in Chemistry (Chem 392) or Senior Research (Chem 492). Graduate level courses in chemistry may be taken as electives.

You must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. ([https://und.edu/academics/essential-studies](https://und.edu/academics/essential-studies))

5 = Two semesters of a foreign language are required. If a student wishes to pursue Study Abroad, taking language courses earlier is recommended.

**Computer Science**

**B.A. with Major in Computer Science**

### Freshman Year

#### Fall

- CS 160: Computer Science I 4
- MATH 103 or MATH 107: College Algebra or Precalculus 3
- ENGL 110: College Composition I 3
- Foreign Language I 4

**Credits:** 14

#### Spring

- CS 161: Computer Science II 4
- ENGL 130: Composition II: Writing for Public Audiences 3
- MATH 208: Discrete Mathematics 3
- Foreign Language II 4

**Credits:** 14

### Sophomore Year

#### Fall

- CSCI 242: Algorithms and Data Structures 3
- EE 201: Introduction to Digital Electronics 2
- EE 202: Introduction to Circuits 1
- E.S. Fine Arts Elective 3
- COMM 110: Fundamentals of Public Speaking 3
- Foreign Language III (recommended) 4

**Credits:** 16

#### Spring

- CSCI 230: Systems Programming 3
- CSCI Elective 3
- ENGL 209: Introduction to Linguistics 3
- Foreign Language IV (recommended) 4
- E.S. Social Science Elective 3

**Credits:** 16

### Junior Year

#### Fall

- CSCI 435: Formal Languages and Automata 3
- CSCI Elective 3
- PHIL 221 or PHIL 110: Symbolic Logic or Forwards or Delete? An Introduction to Logic 3
- ECON 210: Introduction to Business and Economic Statistics 3
- E.S. Lab Science Elective 3

**Credits:** 16

#### Spring

- CSCI 365: Organization of Programming Languages 3
- CSCI 370: Computer Architecture 4
- CSCI Elective 3
- E.S. Social Science Elective 3
- UND Elective 3

**Credits:** 16

### Senior Year

CJ 401 Administration of Criminal Justice Systems 3
Course in Concentration Area (300 or above) 3
General Electives 3
General Electives 1

Credits 13

Total Credits 120-121

This plan of study represents just one way in which a student can complete the requirements for the Bachelor of Science in Criminal Justice Studies within four years. Because of the large number of ways to complete the degree requirements for this major, students should always consult their adviser for assistance regarding their specific plan of study.

You must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

Economics

B.A. with Major in Economics

Freshman Year
Fall Credits
ECON 201 Principles of Microeconomics 3
ENGL 110 College Composition I 3
COMM 110 Fundamentals of Public Speaking 3
MATH 103 College Algebra 3
Essential Studies: Arts and Humanities (FA) 3

Credits 15

Spring
ENGL 130 Composition II: Writing for Public Audiences 3
MATH 146 Applied Calculus I 3
ECON 202 Principles of Macroeconomics 3
Essential Studies: Arts and Humanities (HUM) 3
Essential Studies/Special Emphasis: United States Diversity 3

Credits

Sophomore Year
Fall
ECON 210 Introduction to Business and Economic Statistics 3
ECON 308 Intermediate Microeconomic Theory 3
Essential Studies: Social Science (Non-economics) 3
Open Electives 7

Credits 16

Spring
ECON 303 Money and Banking 3
ECON 309 Intermediate Macroeconomic Theory and Policy 3
Essential Studies: Lab Science 4
Essential Studies/Special Emphasis: Advanced Communication 3
Open Electives 6

Credits 19

Junior Year
Fall
ECON 410 Empirical Methods in Economics I 3
Essential Studies: Global Diversity 3
Electives in Economics 3
Open Electives 6

Credits 15

Spring
Electives in Economics 3
Open Electives 9
ECON 338 International Economics 3

Credits 15

Senior Year
Fall
Electives in Economics 3
Open Electives 12

Credits 15

Spring
Open Electives 9
Essential Studies Capstone 3
### Electives in Economics

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits**: 15

In place of Economics Electives, interested students may select electives from Option B, which includes math classes for the quantitative option. Students must pay attention to the number of credits at courses numbered 300 or above for graduation.

You must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. ([https://und.edu/academics/essential-studies](https://und.edu/academics/essential-studies))

### English

**B.A. with Major in English**

**B.A. with Major in English - Teacher Licensure**

**B.A. with Major in English**

**Freshman Year**

<table>
<thead>
<tr>
<th>Semester</th>
<th>Course</th>

| Credits | 15 |

**Second Semester**

| English Elective | 3 |
| Electives/Essential Studies | 9 |
| ENGL 415 Seminar in Literature | 3 |

| Credits | 15 |

**Total Credits**: 120

The English major is flexible and this plan of study offers only one possible path through the major. One of the advantages of a liberal arts education is the ability for students to take courses in a wide variety of areas, and we encourage English majors to explore other fields. All students should meet with their advisers regularly to chart a personalized course of study that best fits with their interests and needs.

You must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. ([https://und.edu/academics/essential-studies](https://und.edu/academics/essential-studies))

### Sophomore Year

**Fall**

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>English Elective</td>
<td>6</td>
</tr>
</tbody>
</table>

One English elective needs to satisfy the historical requirement for the major and focus on the literature of an earlier historical period.

| T&L 250 Introduction to Education | 3 |
| Praxis 1 exam should be taken this semester | 3 |

| ENGL 271 Reading and Writing about Texts | 3 |
| ENGL 301 Survey of English Literature I or ENGL 303 Survey of American Literature | 3 |

Students are required to take one of the two-course 300-level surveys. While we recommend fulfilling that requirement early, students may opt to take these courses later in their career.

| Credits | 15 |

**Spring**

- Essential Studies Elective [3]
- Essential Studies Elective [3]

**Credits**: 15-16
### Spring
- **North American History Course**: See options in course catalog 3
- **World History Course**: See options in course catalog 3
- **Essential Studies**: 6-7
- **Open Electives**: 3

**Credits**: 15-16

### Junior Year

#### Fall
- **European History Course**: See options in course catalog 3
- **Essential Studies**: 6-7
- **Open Electives**: 6

**Credits**: 15-16

#### Spring
- **History 300 or 400 level elective**: Speak with your adviser before registering for classes 3
- **North American History Course**: See options in course catalog 3
- **Essential Studies**: 3-4
- **Open Electives**: 6

**Credits**: 15-16

### Senior Year

#### Fall
- **HIST 440**: Research Capstone, Speak with your adviser before registering for classes 3
- **European History Course**: See options in course catalog 3
- **Open Electives**: 9

**Credits**: 15-16

#### Spring
- **History 300 or 400 level elective**: Speak with your adviser before registering for classes 3
- **Open Electives**: 12

**Credits**: 15

**Total Credits**: 120-126

The History Department recommends that you speak with your adviser before registering for classes.

You must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

### Honors

**B.A. or B.S. in Honors**

#### First Year

##### Summer
- **Study Abroad - optional**

**Credits**: 0

##### Fall
- **HON 101**: Research Scholars Cornerstone 3
- **or HON 102**: Leaders in Action Cornerstone 3
- **or HON 103**: Inquiry in the Sciences 3

Only one course from HON 101, 102, or 103 is allowed.

**Essential Studies requirements, Second Major requirements, or other areas of interest**: 9

Optional: Honors sections of the following courses may be taken in conjunction with an Honors Inquiry course: BIOL 150L, COMM 110, ENGL 130, or PSYC 111.

**Credits**: 15

#### Second Semester
- **HON 395**: Prospectus Development 1

Optional: Advanced Colloquium

**Essential Studies Requirements/Second Major Requirements/Other areas of interest**: 12

**Credits**: 15

### Second Year

#### First Semester
- **HON 391**: Advanced Colloquium in the Humanities 3
- **or HON 372**: Advanced Social Science Colloquium on US Diversity 3
- **or HON 392**: Colloquium in the Humanities 3
- **or HON 393**: Colloquium in the Social Sciences 3

**Essential Studies Requirements/Second Major Requirements/Other areas of interest**: 12

**Credits**: 15

#### Summer
- **Study Abroad - optional**

**Credits**: 15

### Third Year

#### First Semester
- **HON 395**: Prospectus Development 1

Optional: Advanced Colloquium

**Essential Studies Requirements/Second Major Requirements/Other areas of interest**: 15

**Credits**: 16

#### Second Semester
- **HON 489**: Senior Project: Honors Research 4-5

Optional: Advanced Colloquium

**Second Major Requirements/Other areas of interest**: 10-12

**Credits**: 14-17

### Fourth Year

#### First Semester
- **HON 489**: Senior Honors Thesis 5-4

Remaining Requirements in Second Major or Essential Studies 9-10
This is an example of ONE Possible course of study but is not the only course of study that could be used to complete graduation/degree requirements in 4 years. It is essential that Honors students meet with their adviser at least once per semester to determine the best selection of courses. A student may receive a B.A. or B.S. in Honors depending on their second major and/or the field of concentration of the majority of their courses. Students may enter the Honors Program after their first or second semester, transfer students are welcome in the program. These students should visit with an Honors adviser to plan an individualized course of study.

Every student must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

### Instrumental Performance

**B.M. with a Major in Instrumental Performance (Even Fall Entry)**

**B.M. with a Major in Instrumental Performance (Odd Fall Entry)**

B.A. with Major in Language: Norwegian

**Freshman Year**

**Fall**
- NORW 101 First Year Norwegian I 4
- Essential Studies/Electives 11

**Credit Total** 15

**Spring**
- NORW 102 First Year Norwegian II 4
- Essential Studies/Electives 11

**Credit Total** 15

**Sophomore Year**

**Fall**
- NORW 201 Second Year Norwegian I 4
- Essential Studies/Electives 11

**Credit Total** 15

**Spring**
- NORW 202 Second Year Norwegian II 4
- Essential Studies/Electives 11

**Credit Total** 15

**Junior Year**

**Fall**
- NORW 350 Norwegian Culture 3
- NORW 432 Advanced Norwegian 3
- LANG 380 Global Gateways (can be taken in spring) 3
- Essential Studies/Electives 6

**Credit Total** 15

**Spring**
- NORW 403 Great Literary Works of Norway 3
- NORW 431 Advanced Norwegian 3

**Credit Total** 15
This is only an example. It is highly recommended that any student interested in a Norwegian major see a faculty member for an individualized plan. This is also true for those students who start the Norwegian major after their Freshman year.

You must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

This is only a representative plan. This plan assumes that the student will use Math 421-Math 422 to satisfy the departmental depth requirement, Math 330 to satisfy the breadth requirement in Theoretical Mathematics, and Math 352 to satisfy the Applications of Mathematics requirement. Math 421 satisfies the Probability and Statistics requirement. Two additional three credit math electives would be required. Please consult your academic adviser to develop your individual 4-year plan.

Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

Essential Studies courses

Credits 15

Second Year
First Semester
THEA 204 Introduction to Acting for Musical Theatre 3
THEA 225 Makeup for the Stage 3
THEA 242 Tap Dance 1
THEA 270 Stagecraft 3
MUSC 133 Keyboard Skills I 1
MUSC 254 Individual Lessons 1
Essential Studies courses 3

Credits 15

Second Semester
THEA 201 Theatre Practicum 1
THEA 230 Text Analysis 3
MUSC 255 Individual Lessons 2
MUSC 260 Concert Choir or MUSC 263 or Varsity Bards Men's Chorus 1
MUSC 264 or MUSC 265 or Women's Chorus 1
Essential Studies/THEA Elective courses 8

Credits 15

Third Year
First Semester
THEA 271 Intermediate Acting I: The Actor in You 3
THEA 300 Play Direction I 3
THEA 344 Musical Theatre Dance Style 2
MUSC 355 Individual Lessons 4
Essential Studies/THEA elective courses 3

Credits 15

Second Semester
THEA 371 Advanced Acting: Advanced Scene Study 3
MUSC 355 Individual Lessons 4
Essential Studies/THEA elective courses 8

Credits 15

Fourth Year
First Semester
THEA 241 Jazz Dance I 2
THEA 423 History of the Theatre: Classical, Medieval and Renaissance 3
THEA 450 Musical Theatre History 3
MUSC 455 Individual Lessons 4
Essential Studies/THEA elective course 3

Credits 15

Second Semester
THEA 404 Acting for the Music Theatre 3
THEA 424 History of the Theatre: Seventeenth Century to the Present 3
THEA 494 Senior Project 4
MUSC 455 Individual Lessons 4
THEA/General Elective 1

Credits 15

Total Credits 120

This is an example only. Note that some courses are offered every other semester, so this plan may vary depending on the exact year the student enrolls. Students are required to meet with their adviser before registering for classes.

Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

Philosophy and Religion

B.A. with Major in Philosophy and Religion: Philosophy Concentration

B.A. with Major in Philosophy and Religion: Pre-Law Concentration

B.A. with Major in Philosophy and Religion: Religion Concentration

B.A. with Major in Philosophy and Religion: Philosophy Concentration

Freshman Year
First Semester
PHIL 110 Forward or Delete? An Introduction to Logic 3
ENGL 110 College Composition I 3
Electives/Essential Studies 9

Credits 15

Second Semester
PHIL 120 Introduction to Ethics 3
ENGL 130 Composition II: Writing for Public Audiences 3
Electives/Essential Studies 9

Credits 15

Sophomore Year
First Semester
PHIL 300 History of Philosophy I (Ancient/Modern) 3
Religious Studies Elective (200 level or higher) 3
Electives/Essential Studies 9

Credits 15

Second Semester
PHIL 301 History of Philosophy II (Medieval/19th Century) 3
Philosophy Elective (300 level or higher) 3
Electives/Essential Studies 9

Credits 15

Junior Year
First Semester
Philosophy Elective (300 level or higher) 3
Religious Studies Elective (200 level or higher) 3
Elective/Essential Studies 9

Credits 15

Second Semester
Philosophy Elective (300 level or higher) 3
Electives/Essential Studies 12

Credits 15

Senior Year
First Semester
Philosophy Elective (300 level or higher) 3
Electives/Essential Studies 12

Credits 15

Second Semester
PHIL 480 Public Philosophy 3
Philosophy Elective (300 level or higher) 3
Electives/Essential Studies 9

Credits 15

Total Credits 120

This plan represents only one way of completing a major in Philosophy and Religious Studies (Philosophy concentration). Students should work closely with faculty advisors to determine how best to meet their individual interests and goals. Students who identify Philosophy and Religious Studies as a major later in their undergraduate careers can complete this concentration. Students who major in Philosophy and Religious Studies are encouraged to explore a wide range of academic topics and fields of study as they select their electives.
Students must complete enough electives to bring total credit hours up to the 120. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

Elective Courses or Courses in Minor | 6 |

**Credits** | 13-14 |

Total Credits | 122-132 |

This plan of study represents just one way in which a student can complete the requirements for the Bachelor of Arts or Science with a major in Psychology within four years. Because of the large number of ways to complete the degree requirements for this major, students should consult their advisor for assistance regarding their specific plan of study.

Students must complete enough electives to bring total credit hours up to the 120. Special Emphasis courses can fulfill an essential studies requirement (example-SOC 110, Introduction to Sociology, will count toward the US Diversity as well as the Social Science area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. ([https://und.edu/academics/essential-studies](https://und.edu/academics/essential-studies))

**Sociology**

Total Credits 17

1 = Or any 400 Sociology course except 475, 492, and 494. A concentration of a minimum of 20 hours in a single supplementary field other than sociology is required of all sociology majors. Students may consider using free electives to add an additional major.

Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

Theatre Arts

B.A. in Theatre Arts with Major in Theatre Arts

First Year
First Semester
THEA 110 Introduction to Theatre Arts 3
THEA 161 Acting I 3
Essential Studies courses 9
Credits 15

Second Semester
THEA 201 Theatre Practicum 1
THEA 230 Text Analysis 3
THEA 260 Costume Craft 3
Essential Studies courses 8
Credits 15

Second Year
First Semester
THEA 225 Makeup for the Stage 3
THEA 270 Stagecraft 3
THEA 300 or THEA 335 Play Direction I or Stage Management 3
Required course in chosen subplan 3
Essential Studies course 3
Credits 15

Second Semester
THEA 330 Contemporary Theatre 3
Required courses in chosen subplan 6
Essential Studies courses 6
Credits 15

Third Year
First Semester
Required courses in chosen subplan 5
Essential Studies/General Elective courses 10
Credits 15

Second Semester
Required courses in chosen subplan 5
Essential Studies/General Elective courses 10
Credits 15

Fourth Year
First Semester
THEA 423 History of the Theatre: Classical, Medieval and Renaissance courses is offered every other fall, so students may need to take the course in the fall of their third year 3
Essential Studies/General Elective courses 12
Credits 15

Second Semester
THEA 424 History of the Theatre: Seventeenth Century to the Present course is offered every other year, so students may need to take it in the spring of their third year 3
Essential Studies/General Elective courses 12
Credits 15

Total Credits 120

Majors are required to meet with their faculty adviser each semester before registering for classes.

Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

Students are also encouraged to study abroad at some point in their studies. They should consult with their adviser to plan for this worthwhile educational experience.

Visual Arts

B.A. with Major in Visual Arts (p. 261)
B.F.A. with Major in Visual Arts - Ceramics Emphasis
B.F.A with Major in Visual Arts - Jewelry & Metalsmithing Emphasis

ART 130 Drawing I 3
Essential Studies Elective 3
Essential Studies Elective 3
Essential Studies Elective 3
Credits 15

Spring
200 Level 2D Studio Art Course 3

1 = Or any 400 Sociology course except 475, 492, and 494. A concentration of a minimum of 20 hours in a single supplementary field other than sociology is required of all sociology majors. Students may consider using free electives to add an additional major.

Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

Students are also encouraged to study abroad at some point in their studies. They should consult with their adviser to plan for this worthwhile educational experience.

### B.M. with Major in Vocal Performance (Odd Fall Entry)

#### Freshman Year

**Fall** | Credits
---|---
MUSC 130 | Music Theory I
MUSC 131 | Aural Skills I
MUSC 133 or MUSC 154 | Keyboard Skills I
MUSC 155 Individual Lessons | 1
Major Ensemble | 1
Essential Studies Lab Science | 4
ENGL 110 | College Composition I
---|---
**Credits** | **15**

**Spring**

MUSC 134 | Music Theory II
MUSC 135 | Aural Skills II
MUSC 136 or MUSC 154 | Keyboard Skills II
MUSC 155 Individual Lessons | 2
Major Ensemble | 1
ENGL 130 | Composition II: Writing for Public Audiences
Essential Studies Social Science | 3
Music Electives | 2
---|---
**Credits** | **16**

#### Sophomore Year

**Fall**

MUSC 230 | Music Theory III
MUSC 231 | Aural Skills III
MUSC 233 or MUSC 254 | Keyboard Skills III
MUSC 255 Individual Lessons | 2
MUSC 256 | Basic Conducting
Major Ensemble | 1
FREN 101 or GERM 101 | First Year French I or First Year German I
COMM 110 | Fundamentals of Public Speaking
---|---
**Credits** | **17**

**Spring**

MUSC 203 | Music and Culture
MUSC 234 | Music Theory IV: Music Theory since 1900
MUSC 235 | Aural Skills IV
MUSC 236 or MUSC 254 | Keyboard Skills IV or Individual Lessons
MUSC 255 Individual Lessons | 2
Major Ensemble | 1
FREN 102 or GERM 102 | First Year French II or First Year German II
---|---
**Credits** | **15**

#### Junior Year

**Fall**

MUSC 242 | Diction for Singers (Italian/German)
MUSC 310 | Music History Survey I
MUSC 355 | Individual Lessons
MUSC 415 | Vocal Literature
Chamber Ensemble | 1
Major Ensemble | 1
Essential Studies Math/Science/Technology | 3
---|---
**Credits** | **16**

**Spring**

MUSC 242 | Diction for Singers (English/French)
MUSC 269 | Opera Workshop
MUSC 311 | Music History Survey II
MUSC 355 | Individual Lessons
MUSC 359 | Junior Recital
Essential Studies Math/Science/Technology | 3
Major Ensemble | 1
Electives | 2
---|---
**Credits** | **16**

#### Senior Year

**Fall**

MUSC 444 | Applied Music Pedagogy
MUSC 455 | Individual Lessons
MUSC 459 | Senior Recital
MUSC 490 Seminar in Music
Major Ensemble | 1
Music Electives | 2
---|---
**Credits** | **15-16**

**Spring**

MUSC 269 | Opera Workshop
MUSC 455 | Individual Lessons
MUSC 459 | Senior Recital
MUSC 490 | Seminar in Music
Major Ensemble | 1
Electives | 2
---|---
**Credits** | **16**

**Total Credits** | **126-127**

---

1 = On Voice. KS = Keyboard Skills or Piano Lessons.

Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)
College of Business and Public Administration

B.ACC in Accountancy (p. 269)

ACCT 497 Accounting Internship 2 5

Credits 6

Senior Year

Fall

ACCT 309 Accounting Information Systems 3
ACCT 511 Taxation of Businesses (also fulfills ACCT 411 Ugrad requirement) 3
ECON 303 Money and Banking 3
MGMT 301 Operations Management 3
Essential Studies 3
Free Elective 1

Credits 16

Spring

ACCT 315 Business Law I 3
ACCT 405 Assurance Services 3
ACCT 503 Advanced Financial Accounting (also fulfills ACCT 411 Ugrad Acct Elective) 3
MGMT 475 Strategic Management (Essential Studies) 3

Free Elective 4

Credits 16

Fifth Year

Fall

ACCT 504 Seminar in Auditing 3
ISBC 510 Business Intelligence 3
BADM 500 The Successful MBA--Executive Skills 2
MGMT 505 Organization Leadership and Ethics 2
Grad Concentration Course 3
Free Elective 3

Credits 16

Spring

ACCT 501 Seminar in Accounting Issues 3
GRAD ACCT Elective 3
Grad Concentration Course 3
Grad Concentration Course 3
Free Elective 3

Credits 15

Total Credits 150

1. Students are encouraged to take ACCT 160 if offered. Free electives may also be used to satisfy some requirements of minors and/or second majors.

2. Three credits of ACCT 497 fulfills one 3-credit undergraduate accounting elective, with the remaining combination of ACCT 497 and ACCT 397 credits representing free elective credits. Internships are not required, but are encouraged. Students who choose not to pursue full-time internship opportunities may substitute an undergraduate accounting elective and an open elective for the 6 internship and coop credits in this plan, and continue fulfilling to balance the 5-year plan with some shifting of courses across semesters.
to balance credit loads. For students electing full-time internships, online, summer, and/or courses offered in accelerated formats may be taken in the semester/summer following a full-time internship to balance credit loads.

Please Note: Students enrolled in the ABM Bachelor/Master of Accountancy program will be able to further accelerate this plan by using an additional 6 credits of graduate course work to fulfill undergraduate credit requirements. Students in both the combined and AMB Bachelor/Master of Accountancy programs should consider the 150 credit requirement to sit for the CPA exam. Depending on the amount of credit earned prior to entering these programs, students may need to complete credits beyond those required by the degrees in order to meet the 150 credits required to sit for the CPA exam.

Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. ([https://und.edu/academics/essential-studies](https://und.edu/academics/essential-studies))

#### Total Credits

120

**COMMENT:** This four year plan results in graduation with 120 credits, but does NOT satisfy all eligibility requirements for taking the CPA exam (150 credit hours are required) Students interested in pursuing the CPA certification are encouraged to consider the combined or ABM BAcc/MAcc programs and view the related 5-year plan.

1. Students must complete enough open electives to bring total credit hours up to 120.

2. The following courses count as accounting electives: ACCT 312, 316, 401, 403, 408, 410, 412, 416, 450, 494, and 497.

3. When offered, students are encouraged to take ACCT 160 to fulfill this requirement.

Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. ([https://und.edu/academics/essential-studies](https://und.edu/academics/essential-studies))

Students must complete enough electives to bring total credit hours up to the 120. Every student must fulfill all University, Departmental, and Essential Studies requirements. ([https://und.edu/academics/essential-studies](https://und.edu/academics/essential-studies))
Business Economics

B.B.A. with Major in Business Economics

Freshman Year

Fall
ENGL 110 College Composition I 3
MATH 103 College Algebra 3
or MATH 146 or Applied Calculus I
or MATH 165 or Calculus I 3
Essential Studies: Fine Arts 3
Essential Studies: Oral Communications 3
Free Elective 3

Credits 15

Spring
ENGL 130 Composition II: Writing for Public Audiences 3
Essential Studies: Humanities 3
Essential Studies: Global Diversity 3
Electives 6

Credits 15

Sophomore Year

Fall
ACCT 200 Elements of Accounting I 3
ECON 201 Principles of Microeconomics 3
Essential Studies: Lab Science 4
Essential Studies: Fine Arts or Humanities 3
Essential Studies: Social Science (Non-Economics course) 3

Credits 16

Spring
ECON 210 Introduction to Business and Economic Statistics 3
ACCT 201 Elements of Accounting II 3
ECON 202 Principles of Macroeconomics 3
ISBC 217 Fundamentals of Computer Information Systems 3
Electives 3

Credits 15

Junior Year

Fall
ECON 303 Money and Banking 3
FIN 310 Principles of Financial Management 3
ECON 308 Intermediate Microeconomic Theory 3
MGMT 300 Principles of Management 3

Credits 15

Spring
ECON 338 International Economics 3
ECON 309 Intermediate Macroeconomic Theory and Policy 3
MGMT 301 Operations Management 3
Electives 6

Credits 15

Senior Year

Fall
ECON 410 Empirical Methods in Economics I 3
ECON Electives 3
Special Emphasis: Advanced Communication ISBC 320 is recommended 3
Electives 6

Credits 15

Spring
MGMT 475 Strategic Management 3
ECON 414 Managerial Economics 3
ECON Electives 6
Electives 2

Credits 14

Total Credits 120

Students must complete enough electives to bring total credit hours up to the 120. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

Economics

B.B.A. with Major in Business Economics

Freshman Year

Fall
ENGL 110 College Composition I 3
MATH 103 College Algebra 3
or MATH 146 or Applied Calculus I
or MATH 165 or Calculus I 3
Essential Studies: Fine Arts 3
Essential Studies: Oral Communications 3
Free Elective 3

Credits 15

Spring
ENGL 130 Composition II: Writing for Public Audiences 3
Essential Studies: Humanities 3

### Sophomore Year

**Fall**
- Essential Studies Oral Communication 3
- Open Elective You must complete enough open electives to bring the total credit hours to 125 1
- TECH 212 Visual Literacy 3
- TECH 311 Computers and Emerging Technologies 3
- ENTR 201 The Entrepreneur and the Enterprise 3

**Spring**
- Essential Studies/Special Emphasis: Quantitative 3
- See recommended list below 3
- Open Elective You must complete enough open electives to bring the total credit hours to 125 1
- TECH 300 Technology and Society 3
- ENTR 306 Accounting and Financial Concepts for Entrepreneurship 3

**Credits** 15

### Junior Year

**Fall**
- Essential Studies Social Science See list of recommended courses below 3
- TECH 362 Intermediate Graphic Design and Print Production 3
- Open Elective You must complete enough open electives to bring the total credit hours to 125 2
- ENTR 305 3
- TECH 332 Industrial Design 3
- TECH 232 Web Design 3

**Spring**
- Open Elective 3
- Essential Studies/Special Emphasis: Global Diversity 3
- Essential Studies/Special Emphasis: United States Diversity 3
- Open Elective You must complete enough open electives to bring the total credit hours to 125 2
- ENTR 366 3
- TECH 342 3

**Credits** 17

### Senior Year

**Fall**
- Tech 322 Fundamentals of Photography (Essential Studies/FA) 3
- Essential Studies/Special Emphasis: Advanced Communication 3
- Essential Studies Social Science (see recommended list below) 3
- TECH 442 Industrial/Applied Graphic Design 3
- TECH 498 Senior Capstone I 1
- ENTR 385 Entrepreneurial Opportunities and Concept Development 3

**Spring**
- Open Elective You must complete enough open electives to bring the total credit hours to 125 3
- Open Elective You must complete enough open electives to bring the total credit hours to 125 3
- TECH 452 Multimedia Production 3
- TECH 422 Advanced Digital Photography and Imaging 3
- TECH 499 Senior Capstone II 3

**Credits** 15

**Total Credits** 125

---

**Strongly recommended courses for your Essential Studies area/open elective:** COMM 102; CSCI 101T; SOC 110; ART 112; ART 114; LEAD 101; ANTH 171; SOC 250; ISYS 320. - Please see your Advisor.

**Human Resource Management**

### B.B.A. with Major in Human Resource Management

#### Freshman Year

**Fall**
- MATH 103 College Algebra 3
- ENGL 110 College Composition I 3
- Essential Studies: Fine Arts 3
- Essential Studies: Social Science (PSYC 111 Recommended) 3
- Free Elective 3

**Credits** 15

**Spring**
- ENGL 130 Composition II: Writing for Public Audiences 3
- ECON 201 Principles of Microeconomics 3
- Essential Studies: Lab Science 4
- Essential Studies: Oral Communication 3
- Essential Studies: Fine Arts or Humanities 3

**Credits** 16

#### Sophomore Year

**Fall**
- ACCT 200 Elements of Accounting I 3
- ECON 202 Principles of Macroeconomics 3
- ISBC 217 Fundamentals of Computer Information Systems 3
- Essential Studies: Humanities 3
- Free Elective 2-3

**Credits** 14-15

**Spring**
- ACCT 201 Elements of Accounting II 3
- ECON 210 Introduction to Business and Economic Statistics 3
- MGMT 300 Principles of Management 3
- Essential Studies: Diversity 3
- Essential Studies: Advanced Communication 3

**Credits** 15

#### Junior Year

**Fall**
- MGMT 301 Operations Management 3
- MGMT 302 Human Resource Management 3
- MKRT 305 Marketing Foundations 3
- Essential Studies: Diversity 3
- Free Elective: (ACCT 315 Business Law Recommended) 3

**Credits** 15

**Spring**
- FIN 310 Principles of Financial Management 3
- MGMT 310 Organizational Behavior 3
- MGMT 400 Organizational Theory and Analysis 3
- Human Resource Management Elective 3
- Free Elective 3

**Credits** 15

#### Senior Year

**Fall**
- MGMT 412 Training and Development 3
- MGMT 407 Wage and Salary Administration 3
- Human Resource Management Elective 3
- Free Elective 6

**Credits** 15

Political Science

B.A. with Major in Political Science

Freshman Year

First Semester Credits
ENGL 110 College Composition I 3
MATH 103 College Algebra 3
POLS 115 American Government I 3
POLS 120 Global Perspectives 3
or POLS 116 State and Local Government

Second Semester Credits
COMM 110 Fundamentals of Public Speaking 3
ENGL 130 Composition II: Writing for Public Audiences 3

Sophomore Year

First Semester Credits
POLS 225 Comparative Politics 3
or POLS 250 Introduction to Public Administration
ECON 201 Principles of Microeconomics 3
ECON 210 Introduction to Business and Economic Statistics 3
Essential Studies: Humanities Recommended: PHIL 110 3
Free Elective 3

Second Semester Credits
POLS 220 International Politics 3
or POLS 215 Politics and Diversity
ECON 202 Principles of Macroeconomics 3
Essential Studies: Lab Science 4
Free Electives 6

Junior Year

First Semester Credits
POLS 300 Introduction Research Methods 3
POLS 310 Introduction to Political Thought 3
POLS 405 Political Behavior Recommended: 300 or above 3
Free Electives 6

Second Semester Credits
POLS 318 American Political Thought Recommended to fulfill a POLS elective 3
POLS 432 Public Policy Making Process Recommended: 300-level or above 3
Free Electives 6

Senior Year

First Semester Credits
POLS Electives 6
Free Electives 9

Second Semester Credits
POLS 495 Senior Colloquium in Political Science and Public Administration Recommended: 300-level or above 3
Free Electives 9

Total Credits 120

Students must complete enough electives to bring total credit hours up to the 120. Every student must fulfill all University, College, Departmental and Essential Studies requirements. (https://und.edu/academics/essential-studies) Some Essential Studies "Special Emphasis" courses may be used to fulfill an essential studies breadth of knowledge requirement also (e.g. HIST 104 -- US History, may count toward the US Diversity special emphasis requirement as well as the Humanities breadth of knowledge requirement). Careful planning may facilitate the completion of a second major or a minor in addition to this major -- within or close to 4 years of study!
The BS in Public Affairs (new name beginning in Fall 2018) allows students to follow a core set of courses that provide a foundation of knowledge in nonprofit or public administration. Students select to either pursue the nonprofit track or public administration track to complement the core coursework. Students pursuing the nonprofit track should consider also pursuing a minor in Nonprofit Leadership. Students pursuing the public administration track should consider extending their course of study for one year to earn a Master in Public Administration degree (4+1 combined program). Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. [https://und.edu/academics/essential-studies]

### College of Education & Human Development

#### B.S. ED. with a Major in Early Childhood Education (p. 280)

- **Freshman Year**
  - **First Semester**
    - ENGL 110: College Composition I 3
    - T&L 252: Child Development 3
    - FA 150 or THEA 110: Introduction to the Fine Arts 3
    - Credits: 18-19
  - **Second Semester**
    - ENGL 130: Composition II: Writing for Public Audiences 3
    - T&L 310: Introduction to Early Childhood Education 3
    - T&L 315: 3
    - COMM 110: Fundamentals of Public Speaking 3
    - Essential Studies: Arts & Humanities (Humanities) 3
    - Essential Studies: Math/Sci/Tech 1
    - Credits: 18-19

#### Early Childhood Education

- **B.S.ED. with a Major in Early Childhood Education**

#### Freshman Year

- **First Semester**
  - ENGL 110: College Composition I 3
  - T&L 252: Child Development 3
  - FA 150 or THEA 110: Introduction to the Fine Arts (We have received approval of this addition from Theater Arts and it will offer our teacher candidates a valuable option to FA 150) 3
  - Credits: 18-19

- **Second Semester**
  - ENGL 130: Composition II: Writing for Public Audiences 3
  - T&L 310: Introduction to Early Childhood Education 3
  - T&L 315: 3
  - COMM 110: Fundamentals of Public Speaking 3
  - Essential Studies: Arts & Humanities (Humanities) 3
  - Essential Studies: Math/Sci/Tech 2
  - Credits: 18-19

#### Sophomore Year

- **First Semester**
  - T&L 250: Introduction to Education 3
  - T&L 313: Language Development and Emerging Literacy 3
  - Essential Studies: Social Science 1
  - Essential Studies: Math/Sci/Tech 2
  - Credits: 12-13

- **Second Semester**
  - T&L 320: Infant and Toddler 3
  - T&L 336: Social and Emotional Development and Guidance of Children 3
  - T&L 328: Survey of Children's Literature 3
  - T&L 335: Understanding Readers and Writers 3
  - T&L 322: Administration and Leadership in Early Childhood Education 3
  - T&L 453: Methods and Materials: Kindergarten 2
  - Credits: 17

| Total Credits | 121 |

Pre-Allied Health Students should also meet with a Pre-Allied health program adviser for selection of Pre-Allied health courses.

Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. [https://und.edu/academics/essential-studies](https://und.edu/academics/essential-studies)

**Total Credits**: 130-131

1 CHEM 121/121L may be taken in lieu of CHEM 221/221L and CHEM 122/122L may be taken in lieu of CHEM 254/254L. 2 CHE 235 and CHE 335 may be taken in lieu of the CHE 232, CHE 331, CHE 332 sequence. 3 CHEM 341/341L may be taken in lieu of CHEM 340/340L. 4 CHE 413/414 may be taken in lieu of CHE 412.

Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

1 – May be waived for transfer students (substitute science credit required). 2 – To meet the University’s Essential Studies Breadth of Knowledge requirements, all students must complete 9 credits of Arts & Humanities Electives (minimum of 2 departments, including 3 Fine Arts credits and 3 Humanities credits) and 9 credits of Social Sciences Electives (minimum of 2 departments). Refer to the online Academic Catalog for a listing of acceptable Essential Studies courses. 3 – Non-EE Elective choices: Engr 201, Engr 202, Engr 203, ME 301, ME/CE 306, and ME 341; Computer Science, Engineering (including EE), Math, and Physics courses approved by advisor, normally 300 level or higher. Math 308 and Math 321 do not meet the requirements of non-EE Elective. CSci 242, CSci 260, and Math 208 are permitted. 4 – EE 481 meets the Essential Studies Special Emphasis requirement for Oral Communication (O). 5 – Maximum of three credits of EE 490 allowed as an independent study, applicable to both EE and non-EE electives. 2 credits of EE 397 Cooperative Education (40 hours/week) is equivalent to 3 credits of the EE Electives with S/U grading, maximum 4 credits of EE 397 is equivalent to maximum of 6 credits of EE Elective. 6 – The Ethics Elective is a 3-credit course that meets Essential Studies requirements in either the Arts & Humanities or the Social Sciences. Ethics Elective choices: Phil 120 Introduction to Ethics (Humanities), CSci 340 (SS), and ME 370 (SS). Some of the following courses may be waived by completing: Introduction to Engineering: ENGR 102 EE 101 Introduction to Electrical Engineering 1 EE 201 Introduction to Digital Electronics 2 EE 201L Digital Electronics Laboratory 1 EE 304 Computer Aided Measurement and Controls 3 EE 397 Cooperative Education 1-2 up to 6 credit hours of non-EE electives III- Grade of “C” or better in all EE courses required for graduation. Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

III-Grade "C" or better in all EE courses required for graduation. 1. May be waived for transfer students (substitute science credit required). 2. To meet the University’s Essential Studies Breadth of Knowledge requirements, all students must complete 9 credits of Arts & Humanities Electives (minimum of 2 departments, including 3 Fine Arts credits and 3 Humanities credits) and 9 credits of Social Sciences Electives (minimum of 2 departments). Refer to the online Academic Catalog for a listing of acceptable Essential Studies courses. 3. Non-EE Elective choices: Engr 201, Engr 202, Engr 203, ME 301, ME/CE 306, and ME 341, Computer Science, Engineering (including EE), Math, and Physics courses approved by advisor, normally 300 level or higher. Math 308 and Math 321 do not meet non-EE elective requirements. CSci 242, CSci 260, and Math 208 are permitted. 4-EE 481 meets the Essential Studies Special Emphasis requirement for Oral Communication (O). 5-Maximum of three credits of EE 490 allowed as an independent study, applicable to both EE and non-EE Electives. 2 credits of EE 397 Cooperative Education (40 hours/week) is equivalent to 3 credits of the EE Electives with S/U grading, maximum 4 credits of EE 397 is equivalent to maximum of 6 credits of EE Elective. 6-The Ethics Elective is a 3-credit course that meets Essential Studies requirements in either the Arts & Humanities or the Social Sciences. Ethics Elective choices: Phil 120 (H, Humanities), CHE 340 (SS), and ME 370 (SS). 7. Total of 6 credit hours of Aviation Electives: Recommended courses are: Avit 250-Human Factors, Avit 309-Flight Physiology, Avit 324-Aircraft Systems, Avit 325-Multi-engine Systems, Avit 327-Gas Turbine Engines, and Avit 428-Transport Category Aircraft Systems. Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)
and Physics courses approved by advisor, normally 300 level or higher. Math 308 and Math 321 do not meet the non-EE elective requirement. CSci 242, CSci 260, and Math 208 are permitted. 4. EE 480 meets the Essential Studies Special Emphasis requirements for Advanced Communication (A) and Senior Capstone (C). EE 480 Prerequisites: EE 421 and EE 421L and two out of the four following classes: EE 401, EE 405, EE 409, EE 452. 5. EE 481 meets the Essential Studies Special Emphasis requirement for Oral Communication (O). 6. Maximum of three credits of EE 490 allowed as an independent study, applicable to both EE and Non-EE electives. Recommended EE elective: EE 550 Bioinstrumentation. 2 credits of EE 397 Cooperative Education (40 hours/week) is equivalent to 3 credits of the EE Electives with S/U grading, maximum 4 credits of EE 397 is equivalent to maximum of 6 credits of EE Elective.

Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

### Notes

1 = Must be completed with a grade of 'C' or better. 2 = Another lab science may be substituted for PHYS 253 or CHEM 122 by petition to the ME Department. 3 = One technical elective can be taken outside of the ME Department within another CEM Department, Math or Physics. The course must be at the 300-level or higher.

Students must complete enough electives to bring total credit hours up to the 125. Special Emphasis courses can fulfill an essential studies requirement (example-History 104, US History, will count toward the US Diversity as well as the Humanities area). Please Note: Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)

Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies) Students must complete enough electives to bring total credit hours up to the 120.
### Sophomore Year

**Fall**
- N&D 250  Consumer Food Issues  3
- N&D 335  World Food Patterns  3
- PPT 301  Human Physiology  4
- COMM 110  Fundamentals of Public Speaking  3
- Essential Studies  3

**Credits**  16

**Spring**
- N&D 260  Principles of Foods and Food Science  3
- MGMT 300  Principles of Management  3
- CHEM 340  Survey of Organic Chemistry  4
- CHEM 340L  Survey of Organic Chemistry Laboratory  1
- Essential Studies  6

Application in February for fall semester admission to professional component

**Credits**  17

### Junior Year

**Fall**
- N&D 325  Nutrition Through the Life Cycle  3
- N&D 344  Nutrition Education and Counseling  3
- N&D 345  Community Nutrition  3
- N&D 498  Supervised Practice in Dietetics Counseling (45 clock hours)  1
- SOC 326 or PSYC 241  Sociological Statistics or Introduction to Statistics  3-4

**Credits**  13-14

**Spring**
- N&D 380  Food Service Production and Management  3
- N&D 441  Nutritional Biochemistry  4
- N&D 494  Research in Nutrition and Dietetics  1
- N&D 498  Supervised Practice in Dietetics Food Production (90 clock hours)  2
- N&D 498  Supervised Practice in Dietetics Community Nutrition (90 clock hours)  2
- PPT 315  Human Pharmacology  3

**Credits**  15

### Senior Year

**Summer**
- N&D 498  Supervised Practice in Dietetics (Foodservice Systems Management)  4
- MED 205  Medical Terminology  1

**Credits**  15

**Fall**
- N&D 350  Medical Nutrition Therapy I  3
- N&D 450  Medical Nutrition Therapy II  3
- N&D 480  Interprofessional Health Care  1
- N&D 498  Supervised Practice in Dietetics Medical Nutrition Therapy (225 clock hours)  7

**Credits**  14

**Spring**
- N&D 488  Foundations of Dietetic Practice  3
- N&D 498  Supervised Practice in Dietetics Practicum (540 clock hours)  12

**Credits**  15

**Total Credits**  125-126

Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies)
Senior Year
Fall
N&D 497 Supervised Practice in Human Nutrition 180-270 clock hours 4-6

Must have a 2.2 GPA, satisfactory completion of service learning requirements, and prior or concurrent completion of N&D 344 and N&D 345. Must have a C or better in your nutrition, foods, and science courses. Application by October 20 for spring supervised practice or by March 20 for summer and fall supervised practice.

Essential Studies (FA/Hum) or Elective 9

Credits 13-15

Spring
N&D 441 Nutritional Biochemistry 4
N&D 494 Research in Nutrition and Dietetics 1

Essential Studies (FA/Hum) or Elective 9

Credits 14

Total Credits 120-123

Option B Courses (choose 5 courses from the list)

BIOL 150 General Biology I
BIOL 151 General Biology II
BIOL 341 Cell Biology
BMB 301 Biochemistry
PPT 315 Human Pharmacology
PPT 410 Drugs Subject to Abuse
PSYC 250 Developmental Psychology
PSYC 355 Adulthood & Aging
SOC 352 Aging & Society
SOC 355 Drugs & Society

Every student must fulfill all University, Departmental, and Essential Studies requirements. (https://und.edu/academics/essential-studies) Students must complete enough electives to bring total credit hours up to the 120.

Social Work

The School of Graduate Studies

Mission
The School of Graduate Studies has responsibility for all graduate work at the University except for that leading to the Doctor of Medicine (M.D.) and Juris Doctorate (J.D.). It is the purpose of the School of Graduate Studies to provide opportunity for advanced study beyond the limits of undergraduate courses, to make available the resources of the University in such combinations as will meet the occupational, intellectual, and cultural needs of qualified post-baccalaureate students, and to encourage original investigation and creative scholarship. The University of North Dakota offers the largest and most diversified graduate school in the region. A number of unique facilities and support resources augment the instructional and research program. In addition, the School of Graduate Studies offers extensive off-campus programs through the Division of Continuing Education.

The School of Graduate Studies: General Information

The School of Graduate Studies provides qualified post-baccalaureate students with the opportunity for advanced study toward a graduate degree or certificate. The School of Graduate Studies promotes excellence in scholarship and creativity, and encourages original research and competency in technical and professional fields. The School of Graduate Studies is responsible for general supervision of all graduate activity in the departments, schools, and colleges of the University.

Graduate level courses are offered through various delivery modes. Opportunities for on-campus, online, and combinations of on-campus/online study exist for many programs. Students should consult with individual programs or the School of Graduate Studies for information regarding on-campus and online programming. Students wishing to enroll in distance courses and programs must follow all School of Graduate Studies policies and procedures.

The School of Graduate Studies is a member of the Midwest Association of Graduate Schools, the Western Association of Graduate Schools, the American Indian Professional Association, the Association for Graduate Enrollment Management, the Center for Academic Integrity, the American Association of Collegiate Registrars and Admissions Officers, and the Midwestern Association of Graduate Admissions Professionals. The School of Graduate Studies is one of the one hundred charter members of the Council of Graduate Schools in the United States.

The Dean is the chief administrative officer of the School of Graduate Studies. School of Graduate Studies policy is set by the Graduate Faculty which is made up of the President, the Vice President for Academic Affairs, the Dean of the School of Graduate Studies, and members of the University faculty who have been approved for membership on the Graduate Faculty. A full listing of the Graduate Faculty is available on the School of Graduate Studies website: http://graduateschool.und.edu. Only members of the Graduate Faculty normally may serve on Faculty Advisory Committees and serve as advisors for graduate students.

School of Graduate Studies: Academic Programs

Graduate degrees are offered within seven Colleges or Schools as listed below:

College of Business and Public Administration: Accountancy, Applied Economics, Business Administration, and Public Administration

John D. Odegard School of Aerospace Sciences: Aerospace Sciences, Atmospheric Sciences, Aviation, Earth System Science, Space Studies

School of Medicine and Health Sciences: Biomedical Sciences, Clinical and Translational Science, Medical Lab Science, Occupational Therapy, Physical Therapy, Physician Assistant Studies, Public Health

The Graduate Committee

The Graduate Committee is the executive council of the Graduate Faculty. In this capacity it is advisory to the Dean of the School of Graduate Studies and serves as the School of Graduate Studies Curriculum Committee. The Graduate Committee is responsible for hearing appeals of decisions on student academic matters rendered by the Dean of the School of Graduate Studies. The voting membership of the Graduate Committee consists of thirteen full members of the Graduate Faculty. These thirteen members of the Graduate Committee are elected by those members of the Graduate Faculty from each of thirteen academic areas, with each person elected to serve a three-year term. Non-voting ex officio members of the Graduate Committee include the Dean of the School of Graduate Studies, any Associate Dean(s), and the appointed graduate student member. The graduate student member must be enrolled in the School of Graduate Studies and will serve a one-year term. The membership roster of the Graduate Committee is available from the School of Graduate Studies and is posted on the School of Graduate Studies website.

Assessment

As an institution of higher education, the university is committed to ongoing assessment of student learning at all levels and in all programs. Assessment of student learning is essential in order for the University to improve educational programs and the experiences of students. Students and faculty are encouraged to respond when asked to participate in surveys and other assessment activities. Students are also encouraged to collaborate in the planning and development of assessment activities and to make suggestions for improvements.

Degrees Granted

The degrees conferred for graduate work are the Master of Arts (M.A.), Master of Physician Assistant Studies (M.P.A.S.), Master of Science (M.S.), Master of Education (M.Ed.), Master of Business Administration (M.B.A.), Master of Engineering (M.Engr.), Master of Environmental Management (M.E.M.), Master of Fine Arts (M.F.A.), Master of Music (M.M.), Master of Occupational Therapy
Minimum General School of Graduate Studies Admission Requirements

1. A four-year bachelor's degree or equivalent from a regionally accredited college or university (for U.S. degrees, accreditation by MSA, NASC, NCA, NEASC-CHE, SACS-CC, or WACS, Sr.). Exceptions to this policy must be approved by the Dean of the School of Graduate Studies. For combined degree programs, refer to the admission requirements under each department.

2. A cumulative Grade Point Average (GPA) of at least 2.75 for all undergraduate work (2.5 for M.Engr.) or a GPA of at least 3.00 for the junior and senior years of undergraduate work (based on A = 4.00).

3. ADMISSIONS TESTS. All graduate admissions tests (GMAT, GRE, TOEFL, etc.) must be sent directly by the Testing Service. The institution code for the University of North Dakota is 6878 for the GRE, TOEFL, and GMAT. The institution code for the MAT is 1380. Photocopies of test scores are not accepted. Not all graduate programs require testing for admission. Please consult the School of Graduate Studies website (http://graduateschool.und.edu) for current information on admission tests.

4. All graduate applicants must demonstrate academic-level proficiency with the English language before they will be considered for approved status admission. This requirement must be met by all applicants, regardless of citizenship, residency, or nation of birth. No applicants will be considered for approved admission status until the English Language Proficiency Requirement has been met. The English Proficiency Requirement will not be waived for any reason. This requirement may be satisfied in any of the following ways:
   a. A bachelor's degree or higher from a recognized institution in the United States, England, Scotland, Ireland, Wales, Jamaica, Australia, New Zealand, or English Speaking Canada;
   b. An overall band score on the IELTS of at least 6.0;
   c. A satisfactory score on the Test of English as a Foreign Language (TOEFL). For the internet-based TOEFL (TOEFL iBT) an overall score of 76 is required.
   d. Successful completion of English Language Service (ELS) Language Center's Intensive Level 112.

The programs below require additional and/or higher scores on the TOEFL test to be considered for admission.

Additional Information

For detailed information students should consult the School of Graduate Studies Section of this Catalog or go to the School of Graduate Studies website at: http://graduateschool.und.edu. Address inquiries to the Dean of the School of Graduate Studies, 264 Centennial Drive, Mail Stop 8178, University of North Dakota, Grand Forks, ND 58202; Telephone (701) 777-2774; or 1-800-CALL-UND; or email at: gradschool@und.edu.

Admissions Policies and Procedures

Application for Admission to School of Graduate Studies (http://und-public.courseleaf.com/graduateacademicinformation/admission/application)

Minimum General School of Graduate Studies Admission Requirements (p. 306)

Categories of Admission (p. 307)

Eligibility for Faculty to Pursue a Graduate Degree (p. 308)

Eligibility to Work for an Advanced Degree (p. 308)

Matriculation (p. 308)
recommendations for each application. Because test scores have expiration dates, a test score must be considered current by the testing agency in order to be used for an application.

Categories of Admission

Applicants for degree or certificate programs may be admitted to Approved, Qualified, Provisional, or Deferred status. The School of Graduate Studies has established minimum academic criteria for admission. Individual departments may have additional requirements. The various categories of admission are detailed in the following paragraphs.

Approved Status

Applicants who have met the minimum admission requirements stipulated by the School of Graduate Studies and have met all departmental requirements for admission may be admitted into Approved status. Admission to this status implies only that a student is permitted to commence graduate work which normally will lead to a degree, diploma, or certificate. However, admission to Approved status does not guarantee that a student will be allowed to become a candidate for a degree or diploma.

Provisional Status

Admission to Provisional status may be granted to an applicant who has not met one or more of the general School of Graduate Studies or program level admission requirements, e.g., low G.P.A., low test scores, lack of a required test, or other concerns about the applicant's ability to succeed in graduate study. Generally, students will not be admitted into Provisional status with more than nine (9) credits of outstanding prerequisites.

Students admitted to Provisional status because of their previous GPA will be eligible for advancement to Approved status after the completion of nine semester hours of graduate level coursework if their GPA for all work attempted is at least 3.00. Students in a Provisional status may be dismissed after one registration if their GPA is below 3.00, or if they have failed to meet other conditions specified at the time of admission.

The first obligation of students admitted to Provisional status is to meet all of the conditions specified at the time of admission. Students in Provisional status are eligible for graduate assistantships and tuition waivers at the discretion of the department.

Conditional Status

Admission to Conditional status may be granted to an applicant who has not met the English Language Proficiency requirement set by the School of Graduate Studies and is enrolled in or will be enrolling in the ELS Language Centers Intensive English Program. Students admitted under conditional status will not be allowed to enroll in courses until after they have passed the ELS Language Center’s Intensive Level 112.

Non-Degree Status

Applicants who wish to enroll in graduate level classes as a non-degree seeking student should seek admission into Non-Degree status. All applicants for non-degree status must have met the English Language Proficiency Requirement, and have a recognized baccalaureate degree. Permission of the academic department will be required to enroll in a class as a non-degree student. Therefore, the applicant should consult with the department(s) offering the courses before completing an application. Subject to the approval of the department and the Dean of the School of Graduate Studies, a maximum of nine (9) semester credits taken as a graduate Non-Degree student may subsequently be counted toward a graduate degree subject to all other regulations. Non-degree students are not eligible for graduate teaching, research, or service assistantships or School of Graduate Studies tuition waivers.

Post-Baccalaureate Status

The purpose of this status is to provide a procedure for individuals to take a limited amount of academic work for cultural, intellectual, continuing education needs, or with the intent to complete prerequisite coursework for an eventual application to a graduate program. A student registered in Post-Baccalaureate status may not change to another status until the completion of the term. Students in Post-Baccalaureate status are not eligible for graduate teaching.

Graduate Teaching Assistants must be proficient English language communicators. Language proficiency will be established on the basis of the Internet Based TOEFL (iBT) by earning a score of at least 26 on the spoken section, or on the basis of the IELTS test by scoring an overall band score of 6.5. The applicant must meet all other admission requirements. Contact the School of Graduate Studies for more information.

Application Policies

Applications are considered only for the program, degree, and admit term indicated on the application. A person must submit separate applications for each program, degree, and admit term he or she wishes to be considered for admission. An applicant may change the program, degree, and admit term of a submitted application one time, but not after an admission decision has been published regarding the application.

Applications for which the School of Graduate Studies has not received all of the required application materials and have a status of incomplete at the fourth week census of the semester indicated on the application are administratively denied.

Some programs have additional admission requirements or require supplemental information at the time of application. Please consult the individual program listings in this catalog or contact the School of Graduate Studies for more information.

Students who meet all of the stated admission requirements are eligible for consideration for Approved Status admission, but are not guaranteed admission. The entering classes will be chosen from all qualified applicants on the basis of the quality of the applicants’ previous work, the adequacy of their preparation for graduate study at UND, and enrollment capacity. The School of Graduate Studies reserves the right to refuse admission to any applicant on the basis of scholastic or other reasons. Applicants who do not meet all of the requirements for Approved admission may be considered for Provisional admission status.

Application Materials

Transcripts, references, and/or any other materials sent prior to submission of an application will be kept active for six months. Applicants should send all application materials directly to the School of Graduate Studies, not to the program to which they are applying.

It is the applicant’s responsibility to ensure that the School of Graduate Studies has received all application materials; therefore, periodically checking on the status of the application by the applicant is advisable. Once an application is complete, it will be forwarded to the program for evaluation. Each graduate program makes its own admission recommendation, but the decision is not final until it has been reviewed and approved by the Dean of the School of Graduate Studies.

The School of Graduate Studies will use transcripts which were received officially so long as the transcripts have been retained according to UND’s Records Retention Policy. Because written statements (statement, goals, essays, etc.) and letters of recommendation are written to a specific program, an applicant must provide new written statements and letters of recommendations for each application. Because test scores have expiration dates, a test score must be considered current by the testing agency in order to be used for an application.

The applicant must meet all other admission requirements. Contact the School of Graduate Studies for more information.
research, or service assistantships or School of Graduate Studies tuition waivers.

Eligibility for Faculty to Pursue Graduate Degree

A faculty member at any rank may take coursework toward a degree at the University if he or she has the approval of the dean of his or her college or school. Members of the Graduate Faculty must also obtain approval of the Graduate Dean. Upon enrollment in a graduate program, graduate faculty membership, and faculty rank or role in any department in which the coursework is being taken, will be suspended. The suspended faculty rank and role, including graduate faculty membership, will be automatically reinstated upon completion of the graduate degree or departure from the degree program. Any member of the faculty may, with the approval of the dean and of the instructors concerned, take courses for credit as non-degree seeking students without changing his or her faculty status. Arrangements to audit classes or to take courses for credit are made through the School of Graduate Studies and/or Registrar’s Office. (Reference: UND Faculty Handbook)

Eligibility to Work for an Advanced Degree

Only those who have been officially admitted to the School of Graduate Studies as Degree Students on the basis of a letter from the Dean of the School of Graduate Studies may work for an advanced degree. Any conditions stipulated in the admission letter must be satisfied according to the terms of the letter. Degree or certificate students who do not satisfy the conditions of the admission letter will be dismissed. Students may petition the School of Graduate Studies for an extension if they are unable to satisfy the conditions of admission. Such petitions must be filed prior to any deadlines that are in the admissions letter.

Matriculation

Delaying or Moving Matriculation

An applicant offered admission to a degree or certificate program in the School of Graduate Studies may request to delay or move his/her matriculation into the program for up to one year. Requests to delay or move matriculation will require approval of the program faculty and the School of Graduate Studies. There is no guarantee that students denied delayed matriculation will be offered admission at a later date.

Matriculation Requirement

Students who do not enroll in program specific coursework as specified in the admission letter the semester that they are admitted, and do not gain approval to delay or move their matriculation, will have their admission offer rescinded. In such instances, a new application for future enrollment will need to be submitted with no guarantee that the application will result in another offer of admission. Academic departments may petition the Dean of the School of Graduate Studies for exceptions to this policy.

Note to International Students

It is strongly recommended that the application be completed three months prior to the term in which the applicant wishes to matriculate.

In general, the following guidelines indicate the level of preparation expected of all international applicants for admission to UND:

**India, Pakistan, Bangladesh, Nepal:** 1st Class Bachelor’s degree in engineering or medicine with a minimum of four years of study; master’s degree in all other fields.

**Other Asian countries:** Bachelor’s degree requiring a minimum of four years of study.

**British or British-patterned education:** Bachelor’s degree with honors with a minimum of four years of study.

**French or French-patterned education:** Diplome with a minimum of four years of post-baccalaureate study.

**Other European, Latin American, Middle Eastern countries or Canada:** University degree requiring a minimum of four years of study.

Three-year Bologna process degrees from countries within the European Union will be considered on an individual basis. Three-year degrees from other countries may also be considered. Applicants may be requested to provide a credential course-by-course transcript evaluation in addition to official transcripts from their university.

All graduate applicants must demonstrate academic-level proficiency with the English language before they will be considered for approved admission status. This requirement must be met by all applicants, regardless of citizenship, residency, or nation of birth. The English Proficiency Requirement will not be waived for any reason.

International students are required to submit a certification of finances to the Office of International Programs after an offer of admission has been made. Approximately $35,000 annually is required for educational and living expenses.

Applicants admitted to a graduate program will be issued an I-20 Form after all required documentation has been submitted.

Creating an Accelerated Bachelor’s/Master’s Program: Two Models

There are two options for creating ABM programs. The first option is a disciplinary model in which a bachelor’s program and a master’s program in the same department or in departments of closely related disciplines establish an ABM degree. Prior to admission of any student into such a degree program, the program must be developed by the cooperative undergraduate and graduate units and approved by the Dean of the College(s), Graduate Committee, Graduate Dean, and University Curriculum Committee.

The other option is to design a specialized plan between the student, the undergraduate department, and the graduate department for those cases in which a student is in a department that has not established a formal ABM program or is in a department in one discipline and wants to take a master’s degree in a different discipline. For this option, an ABM arrangement must be made between the student and the director of the graduate program granting the graduate degree and must be approved by the Department Chair of the undergraduate program, prior to and as part of the application process. The director of the graduate program must recommend admission to the Graduate School.

NOTE: The 4+1 ABM program is only available to students in departments/programs that have chosen to participate and create a 4+1 option. Students interested in a cross-department ABM must first speak to, and request approval from, the Department Chair of their undergraduate program and the Graduate Program Director of the desired graduate program. The decision whether to approve a student’s request is entirely that of the two departments involved.

Admission to an ABM Program: Student eligibility requirements

NOTE: High achieving high school students successfully recruited to the 4+1 ABM program will be in an “identified” status within their undergraduate departments, and should be assigned an advisor familiar with the ABM program in their freshman year. Provided that the student maintains the necessary minimum GPA, the student’s formal admission to the 4+1 ABM program will follow the process outlined below.

- Students must meet all graduate admissions eligibility requirements. Students will not be required to prove English Language Proficiency a second time.
- Students must have completed a minimum of 60 credits, including credits earned from advanced placement and dual credit. Students must apply before completion of the undergraduate degree.
- Transfer students with a minimum of 60 credits, including credits from transfer institution alone or in combination with UND credits—and a minimum cumulative GPA of 3.0/4.0.
- Students must have a minimum cumulative grade point average (GPA) of 3.0/4.0 at UND at the time of admission into the ABM degree program.
- Individual departments may impose stricter minimum admission requirements

Accelerated Bachelor’s/Master’s Application:

- A prospective student that meets the eligibility requirements above should schedule a meeting with his/her Department Chair and/or Director of the Graduate Program to develop a plan of work for his/her bachelor’s and master’s degree programs.
- Before admission to an ABM program can be finalized, students must submit, while still an undergraduate, the standard application for admission to the School of Graduate Studies, including an application, application fee, personal statement, and transcripts. Individual departments may choose to require GRE scores or other information.
- A Program of Study, signed by the applicant, the graduate advisor, and the Director of the Graduate Program must be submitted. If the student is in a specialized plan, the signature of the undergraduate advisor and undergraduate department chair are also required.
- The Program of Study must clearly indicate:
  - The courses (a maximum of 12 graduate credits) that will be double counted for both bachelor’s and master’s degrees. These courses will be taken prior to completing the bachelor’s degree.
  - The Program of Study must clearly indicate:

Accelerated and Combined Degree Programs

Accelerated Bachelor’s/Master’s (ABM) 5 year degree program

The Accelerated Bachelor’s/Master’s (ABM) degree program allows exceptional undergraduate students at UND an opportunity to complete the requirements for both the bachelor’s and master’s degrees at an accelerated pace. These students may double count up to 12 graduate-level credits and obtain a non-thesis master’s degree within 12 months of completing the bachelor’s degree. Master’s thesis degree programs may also participate in the 4+1 ABM, provided that the degree requirements can be completed in the 4+1 timeframe.

This degree program therefore provides an opportunity for the Directors of Graduate Programs at UND to recruit high achieving undergraduates in their major and high achieving high school students to their graduate programs. The degree program may thus be advertised and used as a recruiting tool for prospective undergraduate students. High achieving high school students are identified as students who have a GPA of at least 3.5/4.0 and an ACT score of 25 or higher. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.

Academic Standards, Probation and Dismissal

A cumulative grade point average (GPA) of at least 3.00 for all work taken as a graduate student (2.75 for M.Eng.) while registered in the UND School of Graduate Studies must be maintained in order to remain in satisfactory academic standing in the School of Graduate Studies. In addition to maintaining the required GPA, satisfactory performance also includes, but is not limited to, satisfactory research performance, a satisfactory GPA in the major, satisfactory performance in examinations, such as the comprehensive examination, or satisfactory performance in other specific program requirements.

The academic standing and progress of degree seeking Students will be reviewed by the departments and Faculty Advisory Committee periodically to ensure that appropriate progress is being made toward the degree.

The academic standing of all graduate students whose cumulative GPA falls below 3.00 (2.75 for Master of Engineering program) will be reviewed at the end of each academic term by the Dean of the School of Graduate Studies. Students having accumulated 9 or more credit hours will be placed on academic probation for one semester; students having accumulated fewer than 9 credit hours will be placed on academic probation until either

1. the GPA is raised to at least 3.00 (2.75 for M.Eng.) or
2. 9 graduate credit hours are accumulated, whichever occurs first.

If, at the end of the probationary period, the GPA is still less than 3.00 (2.75 for M.Eng.), the student will be dismissed.

Students may be dismissed from the School of Graduate Studies for failure to maintain the required academic standing as described in this graduate catalog. Dismissal from the School of Graduate Studies will be noted on the transcript. The Graduate Committee will hear grievances brought by graduate students regarding dismissal decisions made by the Dean of the School of Graduate Studies. No decision on dismissal will be reached until a minimum of 9 graduate credits has been accumulated. A student who has been dismissed from the School of Graduate Studies will not be allowed to take any graduate courses or enter any graduate program at the School of Graduate Studies.

Workshops (p. 319)

Academic Standards, Probation and Dismissal

A cumulative grade point average (GPA) of at least 3.00 for all work taken as a graduate student (2.75 for M.Eng.) while registered in the UND School of Graduate Studies must be maintained in order to remain in satisfactory academic standing in the School of Graduate Studies. In addition to maintaining the required GPA, satisfactory performance also includes, but is not limited to, satisfactory research performance, a satisfactory GPA in the major, satisfactory performance in examinations, such as the comprehensive examination, or satisfactory performance in other specific program requirements.

The academic standing and progress of degree seeking Students will be reviewed by the departments and Faculty Advisory Committee periodically to ensure that appropriate progress is being made toward the degree.

The academic standing of all graduate students whose cumulative GPA falls below 3.00 (2.75 for Master of Engineering program) will be reviewed at the end of each academic term by the Dean of the School of Graduate Studies. Students having accumulated 9 or more credit hours will be placed on academic probation for one semester; students having accumulated fewer than 9 credit hours will be placed on academic probation until either

1. the GPA is raised to at least 3.00 (2.75 for M.Eng.) or
2. 9 graduate credit hours are accumulated, whichever occurs first.

If, at the end of the probationary period, the GPA is still less than 3.00 (2.75 for M.Eng.), the student will be dismissed.

Students may be dismissed from the School of Graduate Studies for failure to maintain the required academic standing as described in this graduate catalog. Dismissal from the School of Graduate Studies will be noted on the transcript. The Graduate Committee will hear grievances brought by graduate students regarding dismissal decisions made by the Dean of the School of Graduate Studies. No decision on dismissal will be reached until a minimum of 9 graduate credits has been accumulated. A student who has been dismissed from the School of Graduate Studies will not be allowed to take any graduate courses or enter any graduate program at the School of Graduate Studies.

Accelerated and Combined Degree Programs

Accelerated Bachelor’s/Master’s (ABM) 5 year degree program

The Accelerated Bachelor’s/Master’s (ABM) degree program allows exceptional undergraduate students at UND an opportunity to complete the requirements for both the bachelor’s and master’s degrees at an accelerated pace. These students may double count up to 12 graduate-level credits and obtain a non-thesis master’s degree within 12 months of completing the bachelor’s degree. Master’s thesis degree programs may also participate in the 4+1 ABM, provided that the degree requirements can be completed in the 4+1 timeframe.

This degree program therefore provides an opportunity for the Directors of Graduate Programs at UND to recruit high achieving undergraduates in their major and high achieving high school students to their graduate programs. The degree program may thus be advertised and used as a recruiting tool for prospective undergraduate students. High achieving high school students are identified as students who have a GPA of at least 3.5/4.0 and an ACT score of 25 or higher. Admission is contingent on meeting eligibility requirements at the time of entering the graduate program.
The courses that will be taken after being accepted into the graduate program. These courses will be taken after completing the bachelor’s degree.

The graduation date for the master’s degree that meets the time limit for the ABM program (i.e. completing the non-thesis master’s degree within 12 months for a 4+1 program.)

After review of the materials submitted by the Department Chair and Director of the Graduate Program to the School of Graduate Studies, a letter of acceptance (or denial) to the master’s program, contingent upon meeting the ABM requirements, is issued.

Applications accepted for admission to the Graduate Program will not be matriculated until completion of the bachelor’s degree.

Requirements for Completion of the Accelerated Bachelor’s/Master’s Degree Program:

- Students must complete the bachelor’s degree prior to entering the master’s program. Students in the ABM may not elect to bypass the bachelor’s degree.
- Students must maintain a cumulative GPA of 3.0/4.0 at UND to remain eligible for the ABM degree program.
- Students must maintain a cumulative GPA of 3.0/4.0 or better in the double counted graduate level courses.
- Individual departments may impose stricter minimum GPA requirements.
- No more than twelve (12) credits of graduate work may be counted toward the requirements of both degrees.
- For a 4+1 program, students must complete the master’s degree within 12 months from the completion of the bachelor’s degree for a non-thesis master’s degree.

Continuing Eligibility for Accelerated Bachelor’s/Master’s Degree Programs:

- If a student completes the bachelor’s degree requirements with a cumulative GPA of less than 3.0/4.0, then he/she needs program approval to continue to pursue the ABM degree program.
- If a student becomes ineligible to participate in the ABM degree program, the Director of the Graduate Program must inform the student, the Department Chair, and the School of Graduate Studies in writing of his/her ineligibility.
- A student who is ineligible to participate in (or withdraws from) the ABM program, cannot double count any courses. The courses that were identified as double counted will remain on the undergraduate transcript only.

Exceptions to the Accelerated Bachelor’s/Master’s Degree Program Time Limits:

For those programs with a 4+1 structure, the School of Graduate Studies may grant exception to the above time limits. The Dean will consider and evaluate the specific nature of the extenuating circumstances and the compelling reasons that prompted the Director of the Graduate Program and/or the advisory committee to make the request. Requests may be submitted formally and should explain the extenuating circumstances and provide a reasonable timeline for completing the work within the limits of the extension.

Combined Bachelor’s/Master’s program

The Combined Bachelor’s/Master’s (CBM) program allows undergraduate students at UND an opportunity to complete the requirements for both the bachelor’s and master’s degrees at an accelerated pace. These students may double count up to 6 graduate-level credits for both degrees. The completion of this program differs from the Accelerated Bachelor’s/Master’s program in that it is not constrained to the 4+1 time frame. This format may be used for thesis track or other programs that do not fit in the 4+1 structure.

Admission to a CBM program: Student eligibility requirements

- Students meet all graduate admissions eligibility requirements. Students will not be required to prove English Language Proficiency a second time.
- Students must have completed a minimum of 60 credits, including credits earned from advanced placement and dual credit. Students must apply before the completion of the undergraduate degree.
- Students must have a minimum cumulative grade point average (GPA) of 3.0/4.0 at UND at the time of admission to the program.
- Individual departments may impose stricter minimum admission requirements.

Combined Bachelor’s/Master’s Application:

- Student must submit the standard application for admission to the School of Graduate Studies, including an application, application fee, personal statement, and transcripts. Individual departments may choose to require GRE scores or other information.
- A Program of Study, signed by the applicant, the graduate advisor, and the Director of the Graduate Program must be submitted.
- The Program of Study must clearly indicate:
  - The courses (a maximum of 6 graduate credits) that will be double counted for both bachelor’s and master’s degrees. These courses will be taken prior to completing the bachelor’s degree.
  - The courses that will be taken after being accepted into the graduate program. These courses will be taken after completing the bachelor’s degree.
- After review of the materials submitted by the Department Chair and Director of the Graduate Program to the School of Graduate Studies, a letter of acceptance (or denial) to the master’s program, contingent upon meeting the CBM requirements, is issued.
- Applications accepted for admission to the Graduate Program will not be matriculated until completion of the bachelor’s degree.

Requirements for Completion of the Combined Bachelor’s/Master’s Degree Program:

- Students must complete their bachelor’s degree prior to entering the master’s program. Student in the CBM may not elect to bypass the bachelor’s degree.
- Student must maintain a cumulative GPA of 3.0/4.0 or better in the double counted graduate level courses.
- No more than six (6) credits of graduate work may be counted toward the requirements of both degrees.
- A student who is ineligible to participate in (or withdraws from) the CBM program, cannot double count any courses. The courses that were identified as double counted will remain on the undergraduate transcript only.

Challenge Examinations

Students who believe they are eligible to establish credit for courses because of superior preparation may apply to take challenge examinations. Application should be made on a School of Graduate Studies petition form to the instructor of the course and must be approved by the student’s department and the Dean of the School of Graduate Studies before it may be submitted to the Office of the Registrar. If the application is approved, a committee of that department will administer the examination and will report a grade of either Satisfactory or Unsatisfactory. Challenge examinations will not be permitted for courses which were audited or for courses which were dropped, nor will they be permitted for a student who is not currently enrolled. Certain fees may apply.

Common Course Numbers

Course numbers for certain activities are uniform throughout the School of Graduate Studies and are not listed separately for each department:
Faculty Appointments

Faculty Advisor Appointments

Students must obtain the appointment of an advisor from the major department. The advisor must be a member of the Graduate Faculty and will be appointed by the Dean of the School of Graduate Studies upon the written recommendation of the chairperson, or designate, of the student’s major department. The advisor is responsible to the department and to the School of Graduate Studies for the supervision of the student’s work.

Faculty Advisory Committee Appointments

Once the advisor has been assigned, the student and the advisor must decide who will make up the Faculty Advisory Committee. Once the committee members have been selected by the advisor and the student, the “Request for New Advisor or Committee Appointment” form must be completed and forwarded to the School of Graduate Studies. The Dean of the School of Graduate Studies must approve the committee appointments.

The student along with their committee chair will select a committee member from outside the department who will serve as the Member-at-Large. The member-at-large must hold graduate faculty status. The member-at-large serves as a representative of the School of Graduate Studies and thus has the added responsibility of ensuring that the policies and procedures of the School of Graduate Studies are being followed.

Doctoral students in the College of Education and Human Development are allowed to have only four members on their committee, three members may be from within the student’s department or college and the fourth member serves as the member-at-large.

Doctor of Arts students have the option of a three or five member committee. For five member committees, the students and their advisor will select four of the five committee members for the Faculty Advisory Committee.

Assistantships

Graduate Assistants

The Graduate Assistant (GA) fulfills a unique position in the university because he/she is both a student and an employee. Graduate study and effective service as a Graduate Assistant both require extensive commitment. It is for this reason that limits are placed on the amount of effort (academic credits and teaching/research/service hours) to be spent in each role. Graduate Assistants are normally appointment as half-time assistants, but some may be appointed as quarter-time assistants.

Selection of Graduate Assistants

Applicants for GA positions must meet the eligibility requirements of the specific appointment and will not be subjected to unlawful discriminatory treatment. University educational employment policy states that there shall be no discrimination against persons because of race, religion, age, creed, color, sex, disability, sexual orientation, national origin, marital status, veterans’ status, or political belief or affiliation. North Dakota state law also prohibits discrimination in employment with regards to participation in lawful activity off University property during non-working hours, which is not in direct conflict with the essential business-related interests of the University. Interested students may apply for a GA appointment to the graduate department to which they have been admitted or to service units, which may be related to their major field.

Applications have deadlines, so check with your department 2-3 months prior to the beginning of the semester.

Graduate Teaching Assistants are selected by the department in which the student is pursuing his/her major field of study and in which the teaching assistant duties are to be performed. Graduate Research Assistants are selected by the faculty research supervisor with the concurrence of the student’s major department chairperson. Graduate Service Assistants are selected by the administrator of the service unit.

Applications for Graduate Assistantships are accepted throughout the year. Students should contact the department for information. The following general eligibility requirements are applicable to the award of and retention of any Graduate Assistantship at UND:

• Students admitted to the School of Graduate Studies and notified that they have been granted an appointment or award before they have actually received a bachelor's degree may neither register nor hold appointment or award until they have received the bachelor's degree and fulfilled all requirements for admission to the School of Graduate Studies as a degree student.

• Only degree seeking students in Approved and Provisional status may hold awards or appointments.

• Assistantship appointments will not exceed one-half time in all combinations.

• Students must maintain the credit load requirements defined in the appointment letter to retain appointments or awards.

• Students must maintain a 3.00 GPA to retain appointments or awards.

• A student may be removed from an appointment due to unsatisfactory job performance.
• Student sin good academic standing (i.e., a GPA of 3.00 or higher; 2.75 for Master of Engineering candidates) and who are performing their assigned duties satisfactorily are eligible for reappointment.
• Students who withdraw from or are dismissed from the School of Graduate Studies become immediately ineligible for and may not continue to hold an appointment or award.
• International students must meet specified language proficiency requirements to hold an assistantship.

Graduate assistantship stipends are subject to income tax and tax will be withheld. Tax will not be withheld from scholarships, traineeships, and fellowships, but the stipend may be taxable. Rulings as to the actual taxability of any specific stipend are in the hands of the Internal Revenue Service.

Policy on Outside Employment for Graduate Assistants
The School of Graduate Studies does not encourage outside employment for Graduate Student Assistants. Such employment may limit the ability of the student to make satisfactory progress towards his/her degree. Failure to make satisfactory progress towards his degree can result in coursework becoming obsolete prior to graduation, triggering the need for the additional work of revalidating obsolete coursework. Moreover, failure to make satisfactory progress may also constitute grounds for dismissal.

Graduate assistants are expected to meet the terms of their appointment in areas of teaching, research and/or service. These appointments should not exceed 100%. The Graduate School defines 100% effort for half-time assistants as 50% employment (20 hours per week) and 50% coursework (20 hours per week) or, for quarter-time assistants, as 25% employment (10 hours per week) and 75% coursework (30 hours per week). In unusual circumstances, Graduate Assistants can serve as consultants to projects or activities supported with University administered funds provided all of the following criteria are satisfied: (1) The services of the Graduate Student Consultant are outside of the realm of their Graduate Assistant responsibilities. (2) The services provided are limited in scope and do not involve prolonged teaching or research activities. (3) The combined activities, Assistant + Consulting, cannot exceed 115% effort. (4) The consulting fee is appropriate considering the qualifications of the individual to be utilized, and the nature of the services to be rendered, and (5) the overload must be sanctioned by the Graduate Program Director of the program in which the student is enrolled and approved by the School of Graduate Studies’ Dean. Notice of appointment forms are administered by the School of Graduate Studies.

Appointments of Graduate Assistants
All new graduate student employees are required to complete the E-Verify procedure prior to beginning work. All GA appointments specify a beginning date and a monthly stipend. The employee must sign the E-Verify form before the appointment effectively begins. Appointments end when the department sends a Job Data Change or Separation form to Human Resources with the “Termination” section filled out. All pay and benefits are terminated as of that date or upon graduation should graduation precede the contract termination date. Reappointment is possible, but not guaranteed, and requires satisfactory job performance and at least a 3.00 grade point average.

All GA appointments are initiated by the department using the: (1) Job Data Hire Form; (2) Position Funding Form, GTA appointments are initiated by the major department chairperson and require the approval of the Dean of the college/school in which the instruction occurs and of the Dean of the School of Graduate Studies. GRA appointments are initiated by the research supervisor and require the approval of the major department chairperson and the Dean of the School of Graduate Studies. GSA appointments are initiated by the service unit administrator and require the approval of the Dean of the School of Graduate Studies. All appointments will indicate the person to whom the student is responsible for the performance of the GA duties.

Tuition waivers are awarded by the Department and approved by both the College and the School of Graduate Studies. Students will get a letter by mail informing them of their tuition waiver award.

Formal appointment of all GAs is by virtue of a university contract issued by the Dean of the School of Graduate Studies. The student must sign to accept their contract. Students must have accepted the appointment in order for the paperwork to be further processed by the School of Graduate Studies and forwarded to Payroll.

• All GTA, GRA and GSA appointment forms must be received by the School of Graduate Studies at least two weeks prior to the start of the appointment to ensure enough processing time. Students may not start their appointments until Human Resources has completed the final approval.

The Job Data Change or Separation form is used to make changes to appointments and must come to the School of Graduate Studies for processing. The School of Graduate Studies will forward this paperwork to the Payroll Office. Terminations are processed through Human Resources.

“E-Verify electronically compares information from new employee I-9 forms with records contained in SSA and Department of Homeland Security (DHS) to verify identity and employment eligibility of new employees. Employees may not begin work without a completed I-9 form. See the Payroll website for more information about E-Verify.

Graduate Assistants’ Rights and Responsibilities
“All GAs are responsible for abiding by all policies as outlined in the Code of Student Life. Additionally, they are subject to the ethical precepts and code of their academic profession, through the laws of the State of North Dakota regarding its employees, and through the University of North Dakota policies, which govern their institutional obligations. Violation of these constitutes a basis for disciplinary action in accordance with the procedures set forth herein.” (Section 1-9, Code of Student Life - http://und.edu/student-affairs/code-of-student-life/)

GAs are first and foremost graduate students, and must meet the demands of that role. GA appointments may not exceed 20 hours per week.

In their role as teachers, GTAs are members of the academic staff (but not faculty) of the University, and are accorded the rights and responsibilities of academic freedom as set forth in the “Regulations on Academic Freedom, Tenure, and Due Process” (see the ND State Board of Higher Education Policy Manual, section 605.1 - http://www.ndus.edu/makers/procedures/sbhe/default.asp?PID=53&SID=7&printable=1

International Student Graduate Assistants
International students whose native language is not English normally will not be appointed as a GA until the completion of one year of graduate study at UND in order to provide the department an opportunity to assess the student’s ability in the use of the English language.

Graduate Teaching Assistants must be proficient English language communicators. Language proficiency will be established on the basis of the Internet Based TOEFL (IBT) by earning a score of at least 26 on the spoken section, or on the basis of the IELTS test by scoring an overall band score of 6.5. Departments may have higher minimum score requirements for awarding an assistantship. The applicant must meet all other admission requirements.

The North Dakota State Board of Higher Education policy requires all international students to purchase the health insurance approved by the University. International students must meet specified language proficiency requirements to hold an assistantship. The applicant must meet all other admission requirements.

The School of Graduate Studies will forward this paperwork to the Payroll Office. Terminations are processed through Human Resources.

“E-Verify electronically compares information from new employee I-9 forms with records contained in SSA and Department of Homeland Security (DHS) to verify identity and employment eligibility of new employees. Employees may not begin work without a completed I-9 form. See the Payroll website for more information about E-Verify.

Graduate Assistants’ Rights and Responsibilities
“All GAs are responsible for abiding by all policies as outlined in the Code of Student Life. Violation of these constitutes a basis for disciplinary action in accordance with the procedures set forth herein.” (Section 1-9, Code of Student Life - http://und.edu/student-affairs/code-of-student-life/)

GAs are first and foremost graduate students, and must meet the demands of that role. GA appointments may not exceed 20 hours per week.

In their role as teachers, GTAs are members of the academic staff (but not faculty) of the University, and are accorded the rights and responsibilities of academic freedom as set forth in the “Regulations on Academic Freedom, Tenure, and Due Process” (see the ND State Board of Higher Education Policy Manual, section 605.1 - http://www.ndus.edu/makers/procedures/sbhe/ default.asp?PID=53&SID=7&printable=1

International Student Graduate Assistants
International students whose native language is not English normally will not be appointed as a GA until the completion of one year of graduate study at UND in order to provide the department an opportunity to assess the student’s ability in the use of the English language.

Graduate Teaching Assistants must be proficient English language communicators. Language proficiency will be established on the basis of the Internet Based TOEFL (IBT) by earning a score of at least 26 on the spoken section, or on the basis of the IELTS test by scoring an overall band score of 6.5. Departments may have higher minimum score requirements for awarding an assistantship. The applicant must meet all other admission requirements.

The North Dakota State Board of Higher Education policy requires all international students to purchase the health insurance approved by the institution. International students who are GAs at UND must agree to the deduction of the health insurance premium as a payroll deduction. The policy states that students must carry this insurance from the time of their registration at the institution until termination or completion of their studies.
Grades

Grading System

A graduate student will be allowed credit for a course only when a grade for the course has been reported to the Office of the Registrar. Grades awarded in all courses are indicative of the quality of the work done. Their significance is as follows:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Explanation</th>
<th>Grade Pts. Per Sem. Hr.</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>(Superior)</td>
<td>4 Honor Points</td>
</tr>
<tr>
<td>B</td>
<td>(Excellent)</td>
<td>3 Honor Points</td>
</tr>
<tr>
<td>C</td>
<td>(Acceptable)</td>
<td>2 Honor Points</td>
</tr>
<tr>
<td>D</td>
<td>(Passing, but no graduate credit awarded)</td>
<td>1 Honor Point</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
<td>0 Honor Points</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete</td>
<td></td>
</tr>
<tr>
<td>S</td>
<td>Satisfactory</td>
<td></td>
</tr>
<tr>
<td>U</td>
<td>Unsatisfactory</td>
<td></td>
</tr>
<tr>
<td>W</td>
<td>Withdrawn</td>
<td></td>
</tr>
<tr>
<td>SP</td>
<td>Satisfactory Progress</td>
<td>(995,997,998 &amp; 999)</td>
</tr>
<tr>
<td>UP</td>
<td>Unsatisfactory Progress</td>
<td>(995,997,998 &amp; 999)</td>
</tr>
</tbody>
</table>

Graduate Grade Point Average

A graduate student’s cumulative GPA is based on all coursework, graduate or undergraduate, taken while the student is registered in the UND School of Graduate Studies. Grades of less than “C” are not included in the number of credits accepted for a graduate degree, but they are counted in determining the cumulative GPA.

Credits and grades for courses accepted in transfer, or courses graded on a Satisfactory-Unsatisfactory basis are not counted in determining the GPA.

Incomplete grades will convert to a grade of “F” if a grade is not submitted by the instructor to the Office of the Registrar on or before the deadline written on the “Report of Incomplete Grade” form.

Graduate Cooperative Education

Some departments offer Graduate Cooperative Education. The course must meet the following minimum requirements set by the Graduate Committee:

1. The student must be in Approved status and in good academic standing (minimum 3.00 GPA).
2. The student must have completed a minimum of 9 credits of the Program of Study.
3. The student must have the approval of the Cooperative Experience Program of Study.
4. The student must have the approval of the department, i.e., department chair or graduate director, and of his/her advisor before the co-op begins.
5. The student must have the approval of the School of Graduate Studies prior to beginning the Cooperative Experience.
6. Proper work experience on campus may be acceptable, but not employment in the department granting the co-op credit.
7. Credit will not be allowed for current career track positions.

In Progress Grades

A grade of “SP,” Satisfactory Progress or “UP,” Unsatisfactory Progress may be assigned to Scholarly Project (995), Thesis (998), Dissertation (999), Independent Study (979), Readings for Comprehensive Examination (ENGL 591 Readings for Ph.D. Comprehensive Examinations), Professional Exhibition (ART 599 Professional Exhibition) or Research (leading to the thesis or dissertation). The “SP” or “UP” grade for these activities, which may span several semesters, need not be replaced until the conclusion of the activity, usually a student’s final semester. Grades of “SP” or “UP” are not calculated in term or cumulative GPA values and will be expunged from the record upon submission of final grades for the course.

Repetition of Courses

All courses taken by graduate students, for which a grade of D, F, or U was received, may be repeated once for credit, with only the second grade to count in the grade point average. This option does not apply to a student who has been dismissed. Courses with grades of C or better may not be repeated without the written approval of the Dean of the School of Graduate Studies. It is up to the student to notify the School of Graduate Studies when a course has been retaken so that the grade point average can be recalculated. Courses taken as an undergraduate may not be taken again as a graduate student and used on a program of study.

Incomplete Grades

It is expected that students will complete all requirements for a course during the time frame of the course. For reasons beyond a student’s control, and upon request by the student or on behalf of the student, an incomplete grade may be assigned by the instructor when there is reasonable certainty the student will successfully complete the course without retaking it. The mark “I,” Incomplete, will be assigned only to the student who has been in attendance and has done satisfactory work up to a time within four weeks of the close of the semester, including the examination period, and whose work is incomplete for reasons satisfactory to his or her instructor. Incompletes are entered on the final grade sheet, and instructors must also sign and submit a “Report of Incomplete Grade” form to the Office of the Registrar. The instructor may choose any one of the following options for the deadline to complete the course:

1. The default date as stated in the UND Schedule of Courses.
2. Extend to 12 calendar months after the end of the course.
3. A date of the instructor’s choosing no later than 12 months after the end of the course.

Incomplete grades will convert to a grade of “F” if a grade is not submitted by the instructor to the Office of the Registrar on or before the deadline written on the “Report of Incomplete Grade” form.

The instructor of the course and the Dean of the School of Graduate Studies must approve and sign the Report of Incomplete Grade form for any extension of incomplete beyond the default date listed in the UND Schedule of Courses. It is the student’s responsibility to contact their instructor about an incomplete grade posted on the final grade report.

An “I” may be converted as indicated above but cannot be expunged from the record. Students may not register for courses in which they currently hold grades of incomplete, except for courses that allow repeated enrollment. A student will not be allowed to graduate with an unconverted incomplete grade on the academic record.

Grade Changes

Submitted grades, except for grades of incomplete, are final and may only be changed to correct an error. Grades may not be changed by additional work or submitting additional materials. Students should report any error to their instructor within 90 days of receipt of the grade. The instructor must file a change of grade form with the Registrar signed by the instructor, the department chair, and the dean of the course (Note: For courses receiving graduate credit, the School of Graduate Studies Dean is the dean of the course). Reasons for the change must be fully explained and justified.

In Progress Grades

A grade of “SP,” Satisfactory Progress or “UP,” Unsatisfactory Progress may be assigned to Scholarly Project (995), Thesis (998), Dissertation (999), Independent Study (979), Readings for Comprehensive Examination (ENGL 591 Readings for Ph.D. Comprehensive Examinations), Professional Exhibition (ART 599 Professional Exhibition) or Research (leading to the thesis or dissertation). The “SP” or “UP” grade for these activities, which may span several semesters, need not be replaced until the conclusion of the activity, usually a student’s final semester. Grades of “SP” or “UP” are not calculated in term or cumulative GPA values and will be expunged from the record upon submission of final grades for the course.

Grade Changes

Submitted grades, except for grades of incomplete, are final and may only be changed to correct an error. Grades may not be changed by additional work or submitting additional materials. Students should report any error to their instructor within 90 days of receipt of the grade. The instructor must file a change of grade form with the Registrar signed by the instructor, the department chair, and the dean of the course (Note: For courses receiving graduate credit, the School of Graduate Studies Dean is the dean of the course). Reasons for the change must be fully explained and justified.

Repetition of Courses

All courses taken by graduate students, for which a grade of D, F, or U was received, may be repeated once for credit, with only the second grade to count in the grade point average. This option does not apply to a student who has been dismissed. Courses with grades of C or better may not be repeated without the written approval of the Dean of the School of Graduate Studies. It is up to the student to notify the School of Graduate Studies when a course has been retaken so that the grade point average can be recalculated. Courses taken as an undergraduate may not be taken again as a graduate student and used on a program of study.

Graduate Cooperative Education

Some departments offer Graduate Cooperative Education. The course must meet the following minimum requirements set by the Graduate Committee:

- The student must have completed a minimum of 9 credits of the Program of Study.
- The student must have the approval of the Cooperative Experience Program of Study.
- Proper work experience on campus may be acceptable, but not employment in the department granting the co-op credit.
- Credit will not be allowed for current career track positions.
• No more than 20% of the Program of Study will be allowed for co-op credit.
• The student will be required to present a seminar and submit a written report.
• The co-op experience must be compensated.
• Programs allowing cooperative education experiences must include cooperative experiences in their outcomes-based assessment activities.

The Department’s requirements for registration in Graduate Cooperative Education may be more stringent than the minimums set by the School of Graduate Studies.

Graduate Credit

Graduate credit may be earned only by students enrolled in the School of Graduate Studies and in courses listed in the Graduate section of the Academic Catalog. Graduate level courses outside of a student’s major program are eligible for use in the major or minor of any Program of Study for a Graduate Degree, subject to the approval of the student’s advisor or Faculty Advisory Committee and the Dean of the School of Graduate Studies. All UND courses numbered 300 and above may be applied to the cognate part of a Program of Study. At least one-half of the credits for all degrees must be in courses numbered 300 or higher. Graduate credit will not be given for courses that are not approved for graduate credit at the time that they are taken. Courses taken for undergraduate credit cannot be retaken for graduate credit.

Graduate Credit for Undergraduate Courses

A limited number of upper level undergraduate courses may be approved for graduate credit with approval of the Graduate Committee and University Curriculum Committee. It is understood that the student will be required to do additional work of greater complexity, over and above that typically required for undergraduates.

NOTE: The 300 or 400 level courses listed in this section of the catalog were approved by the Graduate Committee for graduate credit on the basis that the student be required to do additional work, generally of an independent nature.

Graduate Work by Undergraduates

Graduate courses normally are open only to graduate students. An undergraduate senior at UND may enroll in graduate courses (500 level) for graduate credit. All undergraduate students must have the permission of the instructor and School of Graduate Studies Dean to take a graduate course. Requests for approval must be submitted on the “Petition for Graduate Credit as an Undergraduate Student,” which is available from the School of Graduate Studies.

Students classified as Seniors may petition the Dean of the School of Graduate Studies requesting permission to enroll in graduate level courses for graduate credit. For this petition to be considered, the following requirements must be met:

1. The graduate credits being petitioned are not needed to complete requirements for the baccalaureate degree.
2. The graduate course(s) are listed in the current School of Graduate Studies Catalog.
3. The petition is filed by the last day to add a full-term course.
4. The student has senior standing (90 credits).
5. The student’s load is not more than 16 credits in a regular semester or 8 credits in a summer session.
6. The student’s overall GPA is at least 3.00.
7. The course(s) are not taken for S/U grading.

Graduation-Application for Degree or Diploma

Students who expect to receive a degree must complete the online graduation application by the deadline noted in the academic calendar. All graduate students must have been advanced to candidacy the semester preceding the semester in which they expect to graduate.

After the student applies for the degree, the School of Graduate Studies checks the academic record to ensure that the student is eligible to graduate. A new application must be filed if the student fails to graduate. Students applying to earn a master’s or doctoral degree must be registered for the term in which they expect to receive their degree. Students applying to earn a certificate are not required to be registered for the term in which they expect to receive their certificate.

CANDIDACY FOR DEGREES

Admission to the School of Graduate Studies does not imply admission to candidacy for an advanced degree. The rights to candidacy can be earned only by demonstrating the preparation for and ability to pursue graduate work and by fulfilling requirements prerequisite to candidacy. Those requirements are described in detail for each degree. Advancement to candidacy does imply that the student has been judged by the advisory committee and the dean to have satisfactorily completed much of the formal coursework and examination requirements and to be fully qualified to pursue the remaining, usually more independent, portion of the degree work.

Leave of Absence from Graduate Study

 Students who wish to take a leave of absence from their program must notify their graduate program and the School of Graduate Studies by requesting a leave of absence, by completing and submitting to the School of Graduate Studies the Graduate Readmission or Leave of Absence form available on the School of Graduate Studies Web page. The form must be submitted in advance of the leave. Degree and certificate seeking students who do not submit a leave of absence will be required to apply for readmission to the School of Graduate Studies. Applications for readmission will be reviewed by the program and Graduate Dean. Students may be denied readmission based on review of their prior progress and their application for readmission.

Maximum and Minimum Academic Load

A full course load for a graduate student is 9 credit hours in a semester, including summer session. A graduate student may carry no more than 15 credit hours per semester or 15 credits in a summer session without permission of the student’s advisor. Graduate Assistants must carry at least 6 credits each semester, including summer session.

Maximum Period Allowed and Revalidation of Courses

Maximum Period Allowed for Graduate Programs and Revalidation of Courses

Graduate courses more than seven years old are considered obsolete and may not be counted to fulfill course requirements for an advanced degree program. Programs of study more than seven years old are also obsolete.

Obsolete UND graduate courses may be revalidated and may be counted toward an advanced degree on the recommendation of the student’s Faculty Advisory Committee and with the consent of the Dean of the School of Graduate Studies. In no case will more than one-half of a program of study be accepted for revalidation. Revalidation of an obsolete graduate course can be approved only if it can be demonstrated that a student’s knowledge of the subject matter of the course is current. Oral and/or written examination on the subject matter of the course normally is required. Prior approval of the dean must be obtained for the proposed revalidation on the form titled “Revalidation of UND Graduate Course.”
Graduate work from another institution which is obsolete may not be revalidated for a UND graduate degree. Work which was part of a completed prerequisite graduate degree program does not become obsolete.

Minors and Cognates

Some degree programs require or permit academic work outside of the major field of study, which may be called a minor, (at least nine credit hours), or a cognate, (at least six credit hours). Credit hours earned towards a previously awarded degree or certificate cannot apply to a minor or cognate.

A minor is a concentrated study in a specific supporting field at the graduate level. A minor must be titled and identified on the student’s program of study and be approved by a Graduate Faculty member of the minor department/program. The minor will be listed on the student’s transcript, only if the minor has been approved by the State Board of Higher Education. Only courses approved for graduate credit may be included in a minor. If the student is doing a non-thesis option, the Graduate Director of the minor department must sign and approve the program of study. For students writing a thesis or dissertation, one of the student’s advisory committee members must be from the minor department.

A cognate is a selection of courses providing broad support to the major. All courses numbered 300 or above listed in this catalog, including those offered by departments or fields that do not offer graduate courses or graduate degrees, may be included in the cognate. Exceptions may apply to language courses where lower level courses may be allowed to fulfill cognate requirements. (Note: advanced approval of the program and graduate dean is required.) Courses should be taken in two or three departments or fields. A cognate area will not be titled and will not be listed on a student’s transcript. Courses from the student’s major cannot be used as a cognate area. Students wishing to pursue a cognate must fulfill all degree requirements for their program. Courses that are not approved for graduate credit cannot count towards the degree requirements, but may satisfy the cognate requirements.

NOTE: When a graduate student elects to take a 300 or 400 level course that has been approved for graduate credit or a 300 or 400 level course as part of their cognate, it is understood that the student will be required to do additional work of greater complexity, over and above that typically required of undergraduates. Usually, such work is of an independent nature.

Program of Study

Students must submit a Program of Study for approval by the Dean of the School of Graduate Studies which will have been developed in consultation with the advisor and signed by the departmental chairperson (or designate). If a minor is declared, the Program of Study also must be signed by the chairperson of the minor department. The Program of Study should be developed early in the second semester and submitted to the School of Graduate Studies.

The Program of Study is a listing of the courses and credits needed to meet the requirements for the degree and major (area of concentration). In addition to a major, some students elect to obtain a minor (a concentrated study in a specific supporting field) or to take courses in a cognate area (a selection of courses providing broad support to the major). The courses selected for the major, minor, and/or cognate must be included on the Program of Study. It is the student’s responsibility to know what the course and credit requirements are for their department. The student should consult with their advisor or the Graduate Director of their department when preparing their Program of Study. The Program of Study will include academic coursework in one major department, as well as coursework from related departments, i.e., a minor or cognate. At least one-half of the work must be in the major field. If transfer credits are to be included on the Program of Study, make sure they can be applied to the degree. Transfer courses must be listed on the Program of Study exactly as they appear on the transcript with the exception that quarter credits need to be converted into semester credits. For detailed information, refer to the Transfer of Graduate Credits (p. 318) section in the Graduate Catalog.

Nine graduate non-degree credits may be applied to the degree if they are approved on the program of study. Graduate courses more than seven years old are considered obsolete and may not be included on the program of study. However, obsolete courses may be revalidated by submitting a revalidation plan using the form on the School of Graduate Studies website. A revalidation plan must be submitted to the Dean before the revalidation process is undertaken. The revalidation plan must be attached to the Program of Study for approval if the course(s) are to be applied to the degree.

Courses listed on the Program of Study should be grouped into appropriate sections and supply a title for each one: major, minor, cognate, foundations, etc. The number of required credits should be included in the appropriate column, for the total program, the major, the minor, the cognate, and the foundations areas.

All members of the student’s Advisory Committee must sign the Program of Study. Some departments may allow the Program of Study to be submitted prior to selecting a committee. In these cases, only the advisor must sign the Program of Study. Contact the graduate program director with questions about the program’s policy. The graduate program director is also required to sign all Program of Study forms prior to submission to the School of Graduate Studies. Changes to the Program of Study can be made by completing the “Changes to a Program of Study” form found on the School of Graduate Studies Web page. After the advisor signs the form, it should be submitted to the School of Graduate Studies for the Dean’s approval. Do not submit a new program of study, unless there are major changes.

Registration Policies and Procedures

School of Graduate Studies Requirements

Any student who holds a baccalaureate degree and has established status as a Degree, Non-Degree, or Certificate student is eligible to enroll in a graduate course, i.e., a course numbered 500 or higher.

Enrollment in certain courses may be limited to degree seeking students in the specific program in which the course is offered. In some instances, students in Non-Degree status may need to seek approval from the department and/or instructor of the course.

Registration and fee payment procedures are outlined by the Office of the Registrar and published in the Schedule of Classes. Registration is complete only upon payment of tuition and fees. Registration may be cancelled by the Business Office if tuition and fees are not paid.

It is strongly recommended that students consult with their advisor before registering for classes. New students are assigned a temporary advisor at the time of admission. Only work taken as a registered graduate student may be credited toward a graduate degree. Approval of the School of Graduate Studies is required and must occur prior to the time that the class is taken. Graduate credit will not be granted retroactively.

The number of credits for which a student may register is subject to certain limits. Registrations not in compliance with University, School of Graduate Studies, and departmental policies are subject to cancellation by the Dean of the School of Graduate Studies.

Research

Research and Scholarship at UND

The UND community of faculty, students, and staff are committed to the advancement of knowledge through research and scholarship, and to the advancement of the arts and culture through creative endeavors. In 2017, the University embarked on an ambitious plan to join the list of the highest ranked research universities in the nation (Carnegie R1 – Doctoral University, Highest Research Activity). This plan seeks to focus the research of all faculty and students on several Grand Challenges including energy, environmental sustainability, human health, rural communities, autonomous systems including but not limited to Unmanned Aircraft Systems (UAS) and Big Data. These broad, multifaceted and globally important Grand Challenges will be met at UND through the efforts of faculty and students across all academic disciplines. It is expected that the impact of these Grand Challenge efforts on the experience of our graduate students will be life changing both during their studies and throughout their subsequent professional lives. As well as immersion in their disciplinary studies, students will have the opportunity to learn the important skills of collaboration, cooperation across disciplines, and public presentation of
their scholarship. They will also have the opportunity to undertake professional development activities that will better prepare them for life after UND, whether that is in an academic setting, government or the private sector.

**UND School of Graduate Studies**

In addition to providing stipends and tuition waivers to qualified degree seeking students, the School of Graduate Studies supports research with Summer Doctoral Fellowships, which allow Ph.D. candidates to spend full time on their research, and supports doctoral student conference travel and dissertation research.

The School of Graduate Studies provides two primary annual events designed to showcase graduate student research: the SMT (3 Minute Thesis) competition and GRAD (Graduate Research Achievement Day). While GRAD is the largest single research event on the UND campus and features the research and creative scholarship of students, both events focus on communicating the significance and value of graduate student research to nonspecialist audiences, and thus also provide professional development training on successfully and clearly articulating complex research to public audiences. In addition, the School of Graduate Studies provides an annual Professional Development Workshop series, focused on topics ranging from Research Ethics and Methods to Grant Writing to Career Planning; topics may vary each year. Detailed information on these and other programs can be found on the School of Graduate Studies website.

**Office of the Vice President for Research & Economic Development**

The School of Graduate Studies works closely with the Office of the Vice President for Research & Economic Development to provide opportunities for graduate students. The mission of the Office of the Vice President for Research & Economic Development is to serve the broad research community of the University of North Dakota, a community that is instrumental in meeting the strategic aims of the University which are described in the University of North Dakota’s Strategic Plan. The aim is to expand and strengthen the University’s commitment to research, scholarship, and creative activity as a means of sustaining and extending the knowledge base, enriching the teaching and learning environment, and enhancing economic development in the community, region, state, nation, and across the world. The hallmark of a major research university is its ability to link faculty across all of the institution’s disciplines toward the creation of new ideas and the generation of new technologies. The Office of the Vice President for Research & Economic Development takes a variety of steps designed to create and sustain an environment where faculty and students representing varying disciplines can collaborate in the search for solutions to the world’s major problems. To this end, UND research administration develops resources, both human and technical, to enhance research and creative productivity; disseminates information about research and research opportunities; funds research and creative activities by faculty and graduate students; formulates and administers various policies concerning research to ensure that projects conform both to federal and state guidelines and to the intellectual and academic objectives of the University; stimulates private sector relationships leading to commercial development of the products of the university research enterprise; and manages the intellectual property of the University. Two major units reporting to the Office of the Vice President for Research & Economic Development are the Office of Sponsored Programs and the Office of Corporate Engagement & Commercialization.

The Office of Sponsored Programs (OSP) provides information and assistance on funding sources and oversees compliance with all federal, state, and University regulations for conducting research. OSP accomplishes this by developing, implementing, and monitoring policies related to sponsored programs, such as those for the Institutional Review Board, Animal Use and Care Committee, Institutional Biosafety Committee, Radiation Safety and Hazardous Materials Committee, Conflict of Interest Committee, and financial administration of grants and contracts. OSP prepares agreements and contracts, and acts as the University’s representative to all sponsors. Its roles and responsibilities are to assist faculty/staff in locating potential funding sources; to provide information regarding sponsor regulations and proposal preparation; to conduct administrative reviews of proposals; to assure compliance with University and sponsor regulations concerning conflict of interest, export controls, research involving animals, research involving human subjects, and misconduct in science or creative activities. Students wishing more information about sponsored research and compliance should contact the OSP.

The Office of Corporate Engagement & Commercialization (CE&C) is responsible for developing and managing UND research and intellectual property relationships with the commercial sector and supporting the University’s economic development priorities. Based upon State Board of Higher Education policy, UND has detailed policies regarding intellectual property, patents, and copyrights. CE&C is responsible for the protection and commercialization of University research innovations including: aerospace sciences, Unmanned Aerial Systems (UAS); computer sciences; medicine and health sciences; and engineering and physical sciences. CE&C will provide services to draft, file, and prosecute patent applications for UND inventions. CE&C serves as a resource for drafting and negotiating legal agreements, such as confidentiality, material transfer, and licensing agreements, with business partners. CE&C also works closely with the Technology Accelerator, a facility for growing technology companies on the west edge of campus. Students wishing more information about intellectual property rights should contact the CE&C.

**Residence Requirements**

**Residence Requirements**

Some graduate degree programs, especially those with a significant research/creative component, require that students spend a minimum period of time in residence during their course of study. The purpose of residence is to provide an opportunity for sustained and concentrated intellectual effort, to provide for immersion in a research environment, and to permit extensive interaction with fellow students and faculty of the major department.

In order to meet a residence requirement, a student must devote full time to academic study and must be registered for at least nine credits in a semester or six credits in a summer session, or be a graduate assistant.

The Residence Requirements are stipulated for each graduate degree program in this catalog. A year of residence requires two consecutive semesters of residence. Two years of residence requires four consecutive semesters of residence or three semesters and two summer sessions, all without interruption.

Any exceptions to the policies stated above must be approved in advance by the student’s advisory committee, the student’s department, and the Dean of the School of Graduate Studies.

**School of Graduate Studies Standards and Professional Conduct Policy**

This Policy establishes specific standards of professional conduct for students enrolled in the University of North Dakota School of Graduate Studies (“graduate students”). The School of Graduate Studies considers these professional standards to be part of its academic curriculum. The standards contained within this policy are in addition to a set of university-wide policies found in the Code of Student Life that are applicable to all students at the University of North Dakota (“UND”). Alleged violations of the standards of professional conduct established by this policy are addressed using procedures established by The School of Graduate Studies and outlined below.

Graduate students are expected to know all applicable University policies and degree program requirements. Students are encouraged to consult with faculty and staff in these programs should they have questions about specific departmental requirements.

UND expects and will require the cooperation of all its students in developing and maintaining high standards of scholarship and conduct. By accepting admission to a program in the School of Graduate Studies, graduate students...
indicate their understanding, acceptance, and agreement to be governed by these standards of professional conduct. Additionally, graduate students acknowledge the right of the University to take such disciplinary action, including but not limited to suspension or dismissal, as may be deemed appropriate by the School of Graduate Studies for failure to abide by such standards.

The Graduate Environment: An Overview

It is the joint responsibility of faculty and graduate students to work together to foster an environment of professional and ethical conduct. Such an environment encourages freedom of inquiry, fosters mutual respect, and demands high standards of personal and professional integrity. Each party in the graduate process including the faculty, graduate students, the graduate department or program, and the School of Graduate Studies has particular responsibilities in ensuring the creation and maintenance of this environment.

The School of Graduate Studies

In its efforts to ensure quality in all aspects of graduate education, the School of Graduate Studies will provide clear and appropriate avenues of redress wherever particular faculty or student experiences fall short of the standards and expectations articulated in this document.

Graduate Departments, Programs, and Graduate Faculty

Graduate Departments/Programs and Graduate Faculty will provide, at appropriate stages, constructive reports and feedback on the progress of graduate students toward their chosen degree. Graduate programs and faculty are also responsible for ensuring a collegial learning environment in which faculty and students work collaboratively, respectfully, and professionally.

Professional Conduct

Graduate students are at all times expected to conduct themselves in a professional and respectful manner when interacting with fellow students, faculty, and the School of Graduate Studies staff. Graduate students are expected to arrive to class on time, follow deadlines, complete the coursework that is assigned to them, and meet standards of professional behavior, including, but not limited to: being present, as required, to meet the academic and research expectations of the school or department; communicating in a timely, respectful and professional manner; complying with institutional policies and procedures and; participating appropriately in the program’s community.

Guidelines for Addressing Graduate Student Professional Misconduct

In order to protect and promote the ethical pursuit of knowledge, the School of Graduate Studies will enforce student accountability in all cases related to professionalism according to these Guidelines. Students who do not comply with the School of Graduate Studies standards of professional conduct as outlined in this Policy will be subject to the process outlined herein, which may result in disciplinary action or penalty determined by the Dean of the School of Graduate Studies or designee (hereinafter referred to as Graduate Dean).

Dismissal or Discipline for Professional Misconduct: Procedure

The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of the university, department, and program requirements for the degree, fulfillment of minimum progress requirements, and meeting standards of professional behavior. If a graduate student is found in violation of the School of Graduate Studies Standards of Professional Conduct, the graduate student may be subject to:

1. Incident recorded in graduate student’s academic file
2. Revocation of assistantship and tuition support, and/or ineligibility for future School of Graduate Studies scholarships or waivers
3. Revocation of right to complete course evaluation (SELF)
4. Loss of course or research credit
5. Suspension or dismissal from the program
6. Other consequences as determined to be appropriate by the department, program or Graduate Dean.

Faculty will initiate appropriate measures to monitor and report acts of professional misconduct for violation enforcement. A violation may be treated as an academic matter or disciplinary matter. Violations treated as academic matters may result in discipline, up to and including removal from the School of Graduate Studies. Alternatively, a faculty member may refer the case as a disciplinary matter to the Office of Student Rights and Responsibilities under the UND Code of Student Life. Examples of violations that may be referred to as disciplinary matters are repeated or egregious forms of academic dishonesty or behavior that is a violation of the UND code of Student Life.

In the event that a faculty member elects to treat a matter of professional misconduct as an academic matter, the faculty member will follow this process:

1. Where possible and as early as possible, notify the graduate student, the graduate program director, and any relevant program faculty committee, in writing, of the situation and deficiency; providing a detailed explanation of the reason for the notification and all relevant information. At this point, the graduate program director will:
2. Allow the graduate student(s) to respond to the alleged professional misconduct and consider any relevant information or extenuating circumstances provided by the graduate student(s); and;
3. Decide the question of discipline and/or dismissal and communicate the decision to the graduate student(s) and the Dean of the School of Graduate Studies in writing. Such decision must include:
4. a summary of any discussions and information considered;
5. a notification that the graduate student(s) has a right to examine their student file, if requested;
6. information about the graduate student’s right to grieve the decision under appropriate department and college grievance policy and procedures and/or the School of Graduate Studies’ grievance policy and procedures.

Students who wish to grieve an academic decision made by the graduate program regarding an allegation of professional misconduct shall commence by discussion between the student and the graduate program director who communicated the decision. In the absence of resolution by such discussion, the grievance may be advanced by the student beginning at the next level and continuing as necessary through the persons/units/committees in the following sequence: a) advisor or advisory committee; b) the Department Chairperson; c) the College Dean; d) the Dean of the School of Graduate Studies.

The final decisions of the Dean of the School of Graduate Studies may be appealed according to the “Grievance Policy” section of the School of Graduate Studies Policies and Procedures. Please note that the most current version of this policy is in the School of Graduate Studies section of the Academic Catalog and that the most recent version of this policy supersedes earlier versions.

Thesis/Independent Study/ Scholarly Project or Dissertation

Thesis

The student must submit a thesis to the School of Graduate Studies as partial fulfillment of the requirements for the degree. Credit will be given for the writing of the thesis and for the research completed and incorporated into the thesis. The amount of credit may vary from four to nine credits and will be determined by the major department. The thesis, prepared under the guidance of the student’s faculty advisor, must show sound method and demonstrate scholarship. The School of Graduate Studies provides a style manual that may be used, but the faculty advisory committee may select any appropriate style guide or manual to follow.

The topic for a thesis must be approved by the student’s Faculty Advisory Committee. Approval is effected by the student completing a form entitled “Topic Proposal of Thesis,” then submitting the proposal to the Advisory Committee and the Dean of the School of Graduate Studies for their approval. The approved proposal is then filed in the School of Graduate Studies
The topic for an independent study or scholarly project must be approved in advance by the student's advisor. The School of Graduate Studies provides a style guide or manual to follow.

Independent Study or Scholarly Project

The independent study or scholarly project is designed to require the student independently to investigate a topic related to the major field of study. The study need not be an original contribution to knowledge but may be a presentation, analysis, and discussion of information and ideas already in the literature of the field. The requirement is to ensure that a student can investigate a topic and organize a scholarly report on the investigation. Independent studies are single author works; scholarly projects may be team projects.

The topic for an independent study or scholarly project must be approved by the student's advisor. Approval is effected by the student completing a form entitled Topic Proposal of Independent Study, available from the School of Graduate Studies and on the School of Graduate Studies website, then submitting the proposal to the advisor for approval. The proposal, must be approved no later than the semester or prior to the one in which the student expects to graduate, and must be filed in the School of Graduate Studies no later than the deadline specified in the Academic Calendar, or the student will not be permitted to graduate that semester.

Copies of the thesis in its final form must be prepared and presented to the student’s Faculty Advisory Committee in time that they may thoroughly read the thesis prior to the final examination. When the final version of the thesis has been approved by the Committee, it must be submitted electronically to ProQuest for publication and receive the signed approval of the Dean of the School of Graduate Studies by the deadline announced in the Academic Calendar (usually two weeks prior to commencement).

The final copy of the thesis will be printed and bound by ProQuest and cataloged in the University Library. The student may be required to submit additional copies to the department or faculty committee members.

Dissertation

Each candidate for the Doctoral degree must submit a dissertation to the School of Graduate Studies in partial fulfillment of the requirements for the degree. The dissertation is prepared with the guidance and advice of the student’s faculty advisor. The School of Graduate Studies provides a style manual that may be used, but the faculty advisory committee may select any appropriate style guide or manual to follow.

The draft of the dissertation should be presented to the Faculty Advisory Committee sufficiently in advance of the Preliminary Approval deadline that a thorough evaluation may be effected by the entire committee. The committee must be able to read the draft, suggest corrections and changes, and the student must be able to make the corrections, all in time for the committee to indicate its approval of the draft by signing a form titled Preliminary Approval of Dissertation. The student must deposit the approval form in the School of Graduate Studies by the deadline specified in the academic calendar (usually four weeks prior to commencement). The Preliminary Approval assures the student that no major changes will be required in the final copy of the dissertation. Copies of the dissertation in its final form must be presented to the Faculty Advisory Committee in time that they may thoroughly read the dissertation prior to the final examination.

When the final version of the dissertation has been approved by the Committee, it must be submitted electronically to ProQuest for publication in time to receive the approval of the Dean of the School of Graduate Studies by the deadline specified in the Academic Calendar (usually two weeks prior to commencement). The final copy of the dissertation will be printed and bound by ProQuest and cataloged in the University Library. The student may be required to submit additional copies to the department or faculty committee members.

Thesis/Dissertation Defense

The student’s academic advisor must complete the “Notice of Defense” form and secure the necessary signatures. This Notice of Defense along with the Preliminary Approval (if not previously submitted) must be received at the School of Graduate Studies two weeks in advance of your defense. The candidate and committee members must be physically present at the defense unless the program has developed clear guidelines and instructions by which the candidate or committee members may participate at a distance using real-time synchronous technology. Any technology used to facilitate distance participation by the candidate or committee members must be supported by UND, capable of real-time audio and video, compatible with “presentation” software, such as PowerPoint, and must be open and accessible to the candidate, committee and non-committee members.

What is included in the defense varies from department to department. Some departments have students present their dissertation research in a presentation with a question/answer period following. Your advisor should be able to help you prepare. Your examination will be conducted by your Faculty Advisory Committee. It is also open to the other members of the Graduate Faculty and the academic community.

Transfer of Graduate Credits

A limited amount of graduate work completed at a regionally accredited North American institution prior to, or after matriculation in the School of Graduate Studies at UND, may be applied toward a graduate degree at the University of North Dakota. Graduate work is considered for transfer only on an individual basis and only after the student has completed satisfactory work in residence at UND. Those transfer credits approved by the student’s advisory committee and the Dean of the School of Graduate Studies are included in the program of study for the UND graduate degree and only those transfer credits will be recorded on the UND transcript. Students requesting to transfer credits from an international institution will be required to provide a WES credential evaluation.

The basic purpose of the transfer policies is to ensure that transferred work is of comparable content, level, timeliness, and quality to that which would be taken at UND and included on the program of study for the degree. The following policies are generally applicable to the acceptance of the graduate work for transfer to UND:

- The work must have been taken at an accredited North American institution.
- The student must have been enrolled as a Graduate Student.
- The work must have received graduate credit at the institution where it was earned.
- The student must have earned a grade of B or better.
- The work must be less than seven years old at the time the UND degree is awarded with the exception of work that was part of a completed prerequisite degree.
• The amount of transfer credit that will be accepted toward the master’s degree is one-fourth (usually eight semester credits) of the credit hours required for the degree.
• The work credited toward a completed master’s degree may be accepted for a specialist’s diploma or doctoral degree.
• Work beyond the master’s degree must be post-master’s level and from an institution that offers post-master’s degrees in the discipline.
• Work beyond the master’s degree from an institution offering only master’s level work in the discipline may be applied to the minor or cognate areas.

For Master’s degrees requiring up to 36 credits, up to nine credits of transfer credit will be accepted toward the degree. For Master’s degree requiring over 36 credits, one-fourth of the credit hours for the degree may be transferred.

For the Ph.D., only 30 credits may be transferred beyond the credits allowed for the master’s degree, i.e., a total of 60 credits, if the other institution offers Ph.D. level courses in the same discipline.

For the Specialist Diploma, only 15 credit hours will be transferred beyond the credits allowed for the master’s degree, i.e., a total of 45 credit hours.

For the D.N.P., if no pre-requisite master’s degree has been earned, the amount of transfer credits that will be accepted toward the doctoral degree is a maximum of 21 credits.

Courses transferred from another university to a certificate program must meet the conditions of the transfer policy as stated in the “Transfer of Graduate Credits” in the UND Graduate Catalog.

UND Student Health Service Requirements

Required Immunizations

The North Dakota University System (http://www.ndus.edu/makers/procedures/sbhe/default.asp?PID=74&SID=6) policy requires all students to be vaccinated with 2 doses of measles, mumps, and rubella. All newly admitted students ages 21 and younger must provide documentation of a meningitis vaccination given after the 16th birthday. Students are also required to complete the TB (Tuberculosis) Screening Form.

Documentation must be provided by August 1st for Fall Semester, January 1st for Spring Semester, and May 1st for Summer Semester. Failure to comply with the immunization requirements will result in a hold on your account restricting you from registering for the following semester.

Immunization documentation may be submitted via the following options:

Mandatory Immunization and TB screening Forms/Instructions (http://und.edu/health-wellness/student-health_files/docs/instructions-immunizations-tbform.pdf). This form may be printed off, filled out and returned with the appropriate immunization documentation to Student Health Services, 100 McCannel Hall, Stop 9038, Grand Forks, ND 58202 or faxed to 701-777-4835.

OR:

If you have claimed your UND account, you may access our patient portal at myhealth.und.edu to enter your immunizations and upload immunization information electronically. (Use your UND user name and password to log in)

If you have questions, contact UND Student Health Services at 701.777.4500 or 1.800.CALL.UND, ext. 4500.

Exemptions

• Students who are taking courses off campus, such as on-line, correspondence, etc.
• Immunization contraindicated by medical condition
• Student has had one immunization and agrees to have second immunization within one month
• A student’s beliefs preclude participation in an immunization program

If you have medical or religious reasons for not receiving the required immunizations, please complete the Medical/Conscientious Exemption section of the Mandatory Immunization and TB Screening Form. A physician’s signature is required for a Medical Exemption. PLEASE NOTE: By requesting the exemption to immunization, the student may be excluded from all campus activities, including classes, in the event that the North Dakota Department of Health declares the existence of a measles, mumps, rubella or meningitis outbreak at the University. This exclusion shall remain in effect for such time as determined by the North Dakota Department of Health.

Vaccines

In addition to MMR, there is a comprehensive menu of vaccines available at Student Health Services, almost always at a reduced fee. While some vaccines are part of the basic protocol for general health, others are more specific for other purposes, such as foreign travel.

The following vaccines are available:

- Influenza (flu) shots
- Gardasil (HPV)
- Hepatitis A
- Hepatitis B
- Twinrix (combination of Hepatitis A and B)
- Tetanus/diphtheria (Td)
- Tdap (Tetanus, diphtheria and pertussis)
- Pneumovax (PPV23)
- Meningococcus (Tuberculosis test)
- Polio
- Yellow Fever
- Chicken Pox (Varicella)
- Rabies
- Typhoid
- Meningitis (MCV4)*
- Japanese Encephalitis

All vaccinations are done by appointment at Student Health Services.

Withdrawal from the University

A student wishing to withdraw from the University before the end of a semester must begin the withdrawal process by submitting a completed Withdrawal Form to the Office of the Registrar. Failure to do so will result in a grade of F in all classes and no refund of fees. If a student would like to completely withdraw from a degree program, he or she must complete a School of Graduate Studies Withdrawal Form available on the School of Graduate Studies website.

Workshops

Graduate level workshops are short-term organized learning experiences which provide for active, hands-on participation or for concentrated study on a specialized topic. Students register as Continuing Education students and do not have to be formally admitted to the School of Graduate Studies.

Graduate level workshops are offered by the graduate departments under the course number “900-Graduate Workshop.” For each workshop registration, a transcript entry will be made showing the title, credit, and grade for the workshop.

Since graduate level workshops are not designed for the purpose of being a part of a graduate degree program, their credit shall not be applied toward graduate degree requirements.

Research

Research and Scholarship at UND

The UND community of faculty, students and staff are committed to the advancement of knowledge through research and scholarship, and to the advancement of the arts and culture through creative endeavors. In 2017, the University embarked on an ambitious plan to join the list of the highest ranked research universities in the nation (Carnegie R1 – Doctoral University, Highest Research Activity). This plan seeks to focus the research of all faculty and students on several Grand Challenges including energy, environmental sustainability, human health, rural communities, autonomous systems including but not limited to Unmanned Aircraft Systems (UAS) and Big Data. These
broad, multifaceted and globally important Grand Challenges will be met at UND through the efforts of faculty and students across all academic disciplines. It is expected that the impact of these Grand Challenge efforts on the experience of our graduate students will be life changing both during their studies and in their subsequent professional lives. As well as immersion in their disciplinary studies, students will have the opportunity to learn the important skills of collaboration, cooperation across disciplines, and public presentation of their scholarship. They will also have the opportunity to undertake professional development activities that will better prepare them for life after UND, whether that is in an academic setting, government or the private sector.

UND School of Graduate Studies

In addition to providing stipends and tuition waivers to qualified degree seeking students, the School of Graduate Studies supports research with Summer Doctoral Fellowships, which allow Ph.D. candidates to spend full time on their research, and supports doctoral student conference travel and dissertation research.

The School of Graduate Studies provides two primary annual events designed to showcase graduate student research: the Graduate Student Symposium (GRAD) and GRAD (Graduate Research Achievement Day). While GRAD is the largest single research event on the UND campus and features the research and creative scholarship of students, both events focus on communicating the significance and value of graduate student research to nonspecialist audiences, and thus also provide professional development training on successfully and clearly articulating complex research to public audiences. In addition, the School of Graduate Studies provides an annual Professional Development Workshop series, focused on topics ranging from Research Ethics and Methods to Grant Writing to Career Planning; topics may vary each year. Detailed information on these and other programs can be found on the School of Graduate Studies website.

Office of the Vice President for Research & Economic Development

The School of Graduate Studies works closely with the Office of the Vice President for Research & Economic Development to provide opportunities for graduate students. The mission of the Office of the Vice President for Research & Economic Development is to serve the broad research community of the University of North Dakota, a community that is instrumental in meeting the strategic aims of the University which are described in the University of North Dakota’s Strategic Plan. The aim is to expand and strengthen the University’s commitment to research, scholarship, and creative activity as a means of sustaining and extending the knowledge base, enriching the teaching and learning environment, and enhancing economic development in the community, region, state, nation, and across the world. The hallmark of a major research university is its ability to link faculty across all of the institution’s disciplines toward the creation of new ideas and the generation of new technologies. The Office of the Vice President for Research & Economic Development takes a variety of steps designed to create and sustain an environment where faculty and students representing varying disciplines can collaborate in the search for solutions to the world’s major problems. To this end, UND research administration develops resources, both human and technical, to enhance research and creative productivity; disseminates information about research and research opportunities; funds research and creative activities by faculty and graduate students; formulates and administers various policies concerning research to ensure that projects conform both to federal and state guidelines and to the intellectual and academic objectives of the University; stimulates private sector relationships leading to commercial development of the products of the university research enterprise; and manages the intellectual property of the University. Two major units reporting to the Office of the Vice President for Research & Economic Development are the Office of Sponsored Programs and the Office of Corporate Engagement & Commercialization.

The Office of Sponsored Programs (OSP) provides information and assistance on funding sources and oversees compliance with all federal, state, and University regulations for conducting research. OSP accomplishes this by developing, implementing, and monitoring policies related to sponsored programs, such as those for the Institutional Review Board, Animal Use and Care Committee, Institutional Biosafety Committee, Radiation Safety and Hazardous Materials Committee, Conflict of Interest Committee, and financial administration of grants and contracts. OSP prepares agreements and contracts, and acts as the University’s representative to all sponsors. Its roles and responsibilities are to assist faculty/staff in locating potential funding sources; to provide information regarding sponsor requirements and proposal preparation; to conduct administrative reviews of proposals; to assure compliance with University and sponsor regulations concerning conflict of interest, export controls, research involving animals, research involving human subjects, and misconduct in science or creative activities. Students wishing more information about sponsored research and compliance should contact the OSP.

The Office of Corporate Engagement & Commercialization (CE&C) is responsible for developing and managing UND research and intellectual property relationships with the commercial sector and supporting the University’s economic development priorities. Based upon State Board of Higher Education policy, UND has detailed policies regarding intellectual property, patents, and copyrights. CE&C is responsible for the protection and commercialization of University research innovations including: aerospace sciences, Unmanned Aerial Systems (UAS); computer sciences; medicine and health sciences; and engineering and physical sciences. CE&C will provide services to draft, file, and prosecute patent applications for UND inventions. CE&C will define and market technology portfolios of inventions to promote new business ventures and build business alliances to accelerate commercialization of valuable UND research output including transition of inventions to the marketplace. Services include fostering research relationships with commercial partners, performing analysis of patentability, value, and marketability to identify strategic direction as a licensing, joint venture, or spin-off company opportunity. CE&C serves as a resource for drafting and negotiating legal agreements, such as confidentiality, material transfer, and licensing agreements, with business partners. CE&C also works closely with the Technology Accelerator, a facility for growing technology companies on the west edge of campus. Students wishing more information about intellectual property rights should contact the CE&C.

Academic Grievance

Guidelines for Graduate Student Grievance Hearings, University of North Dakota

The Graduate Committee hears grievances brought by graduate students seeking redress on academic decisions made by the Graduate Dean. This document sets out the procedures for the consideration and hearing of student grievances.

I. PRINCIPLES UNDERLYING STUDENT GRIEVANCE HEARINGS

1. The procedures should be fair and transparent;
2. Student grievances should be dealt with within a reasonable time, decisions should not be rushed, and all information relevant to reaching a fair decision should be taken into consideration;
3. A grievant may be accompanied by an advisor, who may be a lawyer, when appearing at any grievance hearing;
4. The principal parties should have equal access to relevant information and documentation;
5. An individual’s privacy and confidentiality should be respected, subject to the need for an open and fair investigation.
6. Procedures should ensure that, where a grievance is upheld, appropriate action is taken;
7. Members of a student grievance hearing panel should disclose any professional or personal relationship they may have with any of the parties;
8. Members of a student grievance hearing panel should recuse themselves if they have a conflict of interest and/or may have difficulty objectively reviewing the facts and information presented.

II. SCHOOL OF GRADUATE STUDIES STUDENT GRIEVANCE DOMAIN AND PROCEDURES

1. The Graduate Committee will review written student grievances concerning academic decisions made by the Graduate Dean.
2. The Graduate Committee does not review the substance of grievances of course grades, allegations of academic dishonesty or scientific misconduct, matters relating to employment or assistantships, or allegations of discrimination. If it has been determined by the relevant administrators...
or committees that situations such as these have occurred, the Graduate Committee may review whether actions of the Graduate Dean were made on sufficient grounds.

a. Grade grievances are subject to review by the College in which the course is offered.

b. Allegations of academic dishonesty, scientific misconduct, and discrimination are subject to review by the College in which the academic dishonesty, scientific misconduct, or discrimination is said to have taken place.

c. A Student who disputes an academic decision should first discuss his or her concerns with the Dean of the School of Graduate Studies or his or her designee.

d. Seven copies of the Request for Grievance Hearing must be submitted to the Chair of the Graduate Committee no later than 20 days after receiving notification of the action that the student is seeking to overturn or changed. The request should identify:

   a. Issues raised by the grievant;
   b. All efforts made to resolve the dispute informally and formally;
   c. Information directly relevant to the Panel’s review of the grievance;
   d. Relevant witnesses or individuals whom the Graduate Dean may call during the hearing;
   e. Any other relevant pertinent evidence or documents; and
   f. The desired outcome the student is seeking as a result of a grievance hearing.

4. A Panel consists of the Chair or Vice Chair of the Graduate Committee acting as non-voting Chair of the Panel, four voting members of the Graduate Committee and one voting graduate student (normally the Graduate Committee student member). Each Student Grievance Hearing will be heard by a separate Panel appointed by the Graduate Committee Chair. When establishing Panels, the Graduate Committee Chair will consider the expertise and experience of the members, their familiarity with student grievance hearings, the breadth of background they bring to the Panel, and the potential for perceived conflicts of interest. In the process of setting Panels, Panel members should indicate if they have any potential conflicts of interest. In the event that the Chair of the Graduate Committee is associated with the grievant’s department, or in some other way has a conflict of interest, delegation of Panel members will fall to the Vice Chair of the Graduate Committee. The grievant and the Graduate Dean may each disqualify, for any reason, up to two of the Graduate Committee members from serving on the Panel.

III. FILING A GRIEVANCE

1. A student who disputes an academic decision should first discuss his or her concerns with the Dean of the School of Graduate Studies.

2. The student must file seven copies of a Request for Grievance Hearing (see section III. D, below) stating the grounds and argumentation in support of a grievance to the Chair of the Graduate Committee, not to exceed 10 double-spaced pages excluding attachments. The Chair of the Graduate Committee will review the request to make certain it grieves an action of the Graduate Dean. Grievances that are not within the jurisdiction of the Graduate Committee will be dismissed and returned to the student.

3. A grievance hearing is not a rehearing of the case. The following shall be allowed as grounds for grievance:

   a. Action of the Graduate Dean not being commensurate with the problem being addressed.
   b. Decisions contrary to the weight of evidence.

4. Seven written copies of the Request for Grievance Hearing must be submitted to the Chair of the Graduate Committee no later than 20 days after receiving notification of the action that the student is seeking to overturn or changed. The request should identify:

   a. The disputed academic decision (within the jurisdiction of the Graduate Committee);
   b. The person that made the decision;
   c. The date the decision was made;
   d. All efforts made to resolve the dispute informally and formally;
   e. Information directly relevant to the Panel’s review of the grievance;
   f. Relevant witnesses or individuals whom the grievant may call during the hearing;
   g. Any other relevant pertinent evidence or documents; and
   h. The desired outcome the student is seeking as a result of a grievance hearing.

5. The Graduate Committee chair will notify the student in writing of his or her decision regarding the Request for Grievance Hearing within 5 days of receiving the request. If the Graduate Committee chair approves the Request for Grievance Hearing, the student will receive a list of prospective members of the Panel with the letter notifying them of the chair’s decision. The Recording Secretary will also send the Request for Grievance Hearing and supporting information to the Dean of the School of Graduate Studies within 5 days of the approval decision.

6. Within 10 days of receiving notice of the grievance from the Recording Secretary, the Graduate Dean will provide six copies of a written response (and supporting documents) to the Graduate Committee Chair and one copy to the grievant. The response may not exceed 10 double-spaced pages excluding attachments. The request should identify:

   a. Issues raised by the grievant;
   b. All efforts made to resolve the dispute informally and formally;
   c. Information directly relevant to the Panel’s review of the grievance;
   d. Relevant witnesses or individuals whom the Graduate Dean may call during the hearing;
   e. Any other relevant pertinent evidence or documents; and
   f. The desired outcome the Graduate Dean is seeking as a result of a grievance hearing.

IV. INITIAL REVIEW OF GRIEVANCES

Within 10 days of receiving the Graduate Dean’s response, the Chair of the Graduate Committee will appoint a Panel, as outlined above and communicate the names of the Panel members to the grievant and the Graduate Dean. The grievant and the Graduate Dean must inform the Chair of the Graduate Committee within 5 days if he/she wishes to disqualify any prospective Panel members. Once the Panel has been established, a date for the hearing will be set. The Chair of the Panel will send notice of the hearing to the student and the Graduate Dean. The notice will include the date, time, location and procedures of the hearing. The Chair of the Panel may invite others to provide information at the hearing. The grievance hearing will be normally scheduled within 10 days of the Graduate Dean’s written response to the filed grievance.

V. MEDIATION

At any time the parties may consider mediation of outstanding issues. None of the parties or the Graduate Committee will conduct the mediation. All applicable timelines remain in effect, unless extended by the Chair of the Graduate Committee.

VI. GRIEVANCE HEARING

1. If either party intends to submit supplemental materials (six copies) to the Panel for consideration, he/she must also provide hard copies to the other parties to the hearing. All copies must be provided at least 5 days prior to the scheduled hearing. These materials may not exceed 10 double-spaced pages excluding attachments. Failure to provide copies in time may result in the materials not being considered by the Panel.

2. Hearings will be conducted in a manner conducive to ascertaining the facts of the case. Parties to the grievance will be provided an opportunity to:

   a. Be present and hear all arguments and oral statements made to the Panel during the hearing;
   b. Make arguments, present oral statements and written documents, and call witnesses with regard to issues of fact relevant to the grounds for grievance; and
   c. Ask questions of other witnesses, either directly or through the Chair (to be determined by the Chair).

3. Each party may be accompanied at the hearing by an advisor, who may be a lawyer. The advisors are not allowed to address the Panel, question witnesses, or take an active Graduate Academic Information role in the proceedings. The advisor is simply there to provide advice to a party. The Graduate Dean will not bring a lawyer unless the grievant indicates he/she intends to bring a lawyer. If the grievant intends to bring a lawyer, he/she should notify the Graduate Dean and the Chair of the Graduate Committee 5 days prior to the start of the hearing.

4. At any time, the Chair of the Panel may consult an advisor or a lawyer, call witnesses, or ascertain information deemed relevant to the grievance. The Chair of the Panel is authorized to request the appearance of additional
witnesses or the submission of additional information necessary to clarify an already introduced issue. The Panel may address questions to any person participating in the hearing.

5. The Panel may establish time limitations for the oral presentations of the parties. As a regular order of business, each party will have 30 minutes for presentation, inclusive of time allocated to allowing witnesses to speak. It is recommended that long statements by witnesses be presented in written form as attachments to the original grievance or response.

6. The formal rules of evidence do not apply to Grievance Hearings. All information not repetitious or irrelevant may be admitted, subject to guidelines of time and length.

7. No witness will be allowed to attend the hearing before he or she testifies or until he or she has been released.

8. Hearings will be closed to the public unless the student wishes them to be open. If the hearings are open, great care must be exercised by all who speak to protect the privacy of others who are not parties to the proceedings.

9. In hearings involving a single incident with more than one student, a single hearing may be scheduled for all of the students. If the Chair determines that it would be in the best interest of individuals involved, separate hearings may be provided. When collective hearings are held, individual findings, decisions, and recommendations will be rendered. Students who do not file a grievance will not automatically benefit from a grievance filed by another student.

10. The hearing will be recorded. Both parties may access the recording, after the final report is issued, by contacting the Recording Secretary of the Graduate Committee.

11. The Chair may require someone to leave the hearing whose conduct or presence may impede the hearing process.

12. All documents, recordings and findings will be subject to the university’s records retention policy.

VII. ORDER OF PROCEEDINGS IN A GRIEVANCE HEARING

1. The Chair will begin the hearing with a brief opening statement. The Chair will then ask each person in the room to introduce himself or herself for the record. The Chair will state the reason for the hearing, describe the role of the Panel and explain the procedures to be followed. The Chair will ask the student filing the grievance whether he or she wishes the hearing to be open or closed. If the student requests a closed hearing, only the Recording Secretary, the principal parties, the Panel and, if applicable, their advisors shall remain. Witnesses will only be allowed in the room when they are presenting, but may be asked to remain available to answer additional questions later in the proceedings.

2. Following the Chair’s summary, and unless otherwise determined by the Chair of the Panel, the order of presentation will be:
   a. Grievant presents case, including witnesses and other evidence (30 minutes). Members of the Panel may ask brief questions to clarify a point, but in general the student should be allowed to present without interruption. Witnesses must exit after providing their information, and should not be allowed to speak with each other until released. They should be available for questions later;
   b. Graduate Dean presents case, including witnesses and other evidence (30 minutes). Members of the Panel may ask brief questions to clarify a point, but in general the Graduate Dean should be allowed to present without interruption. Witnesses must exit after providing their information, and should not be allowed to speak with each other until released. They should be available for questions later;
   c. Panel members question either party and witnesses. Determination of the order of questions, requesting the presence of witnesses, and managing the dialog during the hearing is done at the discretion of the Chair in consultation with other members of the Panel;
   d. Summary by the Graduate Dean (5 minutes);
   e. Summary by the Student (5 minutes);
   f. Declaration by the Chair that the hearing is concluded.

VIII. FINDINGS, DECISIONS, AND RECOMMENDATIONS OF THE PANEL

1. Upon completion of the hearing, the Panel will meet in closed session for deliberations. If the student requests an open hearing, then deliberations will also be open. If the process requires more time than originally scheduled, the Panel may suspend its discussion and reconvene at an agreed upon later date and time. A simple majority vote of the Panel is required for all findings, decisions, and recommendations.

2. If, in the course of deliberations, the Panel determines it would like to obtain additional information from either party, or from any other individual that the Panel feels could provide useful information, the Chair of the Panel will reopen the hearing at a mutually convenient time for all parties.

3. The Panel Chair will prepare a written final decision, to include:
   a. A statement addressing the subject of the grievance;
   b. A decision that indicates whether the grievance is upheld, denied, or if a modified solution to the situation is recommended;
   c. (Optional) recommendations, if appropriate, for further actions by University authorities.

4. All members of the Panel sign the Decisions, Findings, and Recommendations document.

5. The Panel will provide the grievant and the Graduate Dean with a copy of the decision of the Panel within 10 days from the date of the conclusion of the hearing.

IX. SUBSEQUENT HEARINGS

1. The Panel acts on behalf of the Graduate Committee. The student may grieve the decision of the Panel to the Student Academic Standards Committee.
Departmental Courses, Programs

The following graduate degree and certificate programs are offered through the UND School of Graduate Studies.

The University publishes electronically an official Schedule of Courses before the beginning of each academic term. It lists the class period, building, and room assigned to each course offered that semester or summer session.

Accountancy (p. 324) | MAcc (p. 326)

Aerospace Sciences (p. 327) | PhD (http://und-public.courseleaf.com/graduateacademicinformation/departmentalcoursesprograms/spacestudies/ss-as-phd)

Art and Design Visual Arts (p. 329) | MFA (p. 329)

Accountancy

Master of Accountancy (p. 326)

Courses

ACCT 501. Seminar in Accounting Issues. 3 Credits.
- Addresses current issues in accounting and develops appropriate professional judgment through researching and applying accounting standards. Prerequisite: Permission of MAcc director. F.S.

ACCT 502. Financial Reporting and Decision Making. 3 Credits.
- This course provides an overview of financial accounting terminology and concepts, financial statements, and the financial reporting process. Emphasis is placed on the decision usefulness of financial statement information and the financial reporting process as a means of communicating information about firms. Prerequisite: Successful completion of Ivy Software's "Business Math and Statistics - Graduate" self-paced course or demonstrated equivalent competencies. F.S.

ACCT 503. Advanced Financial Accounting. 3 Credits.
- Accounting for inter-corporate investments, business combinations, and other advanced financial accounting topics. Prerequisite: Permission of MAcc Director. F.S.
ACCT 504. Seminar in Auditing. 3 Credits.
Expands understanding of the auditing function and provides a framework for analyzing contemporary auditing and assurance issues. Prerequisite: Permission of MAcc Director. F.

ACCT 506. Accounting Systems. 3 Credits.
This course examines business processes and controls within the context of enterprise resource planning systems (ERP), with an emphasis on the financial cycle. Prerequisite: Permission of MAcc Director. S.

ACCT 507. Advanced Managerial Accounting. 3 Credits.
Functional uses of accounting in management of the enterprise.

ACCT 508. Fraud Examination. 3 Credits.
Focuses on understanding types of fraud as well as collecting and evaluating evidence relating to preventing and detecting frauds. Evidence gathering methods will include the examination of documents, publicly available information, and standard practices for interviews and interrogations. Prerequisite: ACCT 405 or equivalent.

ACCT 509. Accounting Information for Decision and Control. 3 Credits.
Management accounting concepts and their application in internal planning, control, and decision-making. Prerequisite: ACCT 502. F,S.

ACCT 510. Taxation of Individuals. 3 Credits.
This graduate-level course covers federal taxation of individuals. Prerequisite: Permission of MAcc Director. F.

ACCT 511. Taxation of Businesses. 3 Credits.
This graduate-level course covers federal taxation of business organizations. Prerequisite: Permission of MAcc Director. S.

ACCT 512. Accounting for Governments & Nonprofits. 3 Credits.
This course covers accounting for governmental and nonprofit entities, including fund accounting. Prerequisite: Permission of MAcc Director. S.

ACCT 521. Financial Accounting I. 3 Credits.
This is a first course in financial accounting for graduate students that has a preparer orientation, but also provides a foundation for analyzing financial statements. Specific content focuses on assets and current liabilities as well as the formats and uses of the primary financial statements. Prerequisite: Permission of MAcc Director. F,S,SS.

ACCT 522. Financial Accounting II. 3 Credits.
This is the second course in the financial accounting sequence for graduate students. The course has a preparer orientation, but also provides a foundation for analyzing financial statements. Prerequisite: ACCT 521 or Permission of MAcc Director. F,S,SS.

ACCT 523. Financial Accounting III. 3 Credits.
This course is part of the graduate financial accounting sequence. The course has a problem-solving orientation, and involves the application of accounting principles to complex transactions and topics including deferred taxes, leases, and pensions. Prerequisite: ACCT 522 or permission of the Director of the Master of Accountancy program. F,S,SS.

ACCT 525. Audit & Assurance Services. 3 Credits.
Examines the role that assurance services play in improving the quality of information and its usefulness for decision making. Materiality and risk assessment are considered along with processes and controls in relation to financial statement audits. Prerequisites: ACCT 522 and ACCT 506, or Permission of MAcc Director. S.

ACCT 526. Advanced Business Law for Accountants. 3 Credits.
Examines legal topics relevant to accountants and financial professionals including securities law, commercial paper, secured transactions, professional liability, corporations and partnerships. Prerequisite: Permission of MAcc Director. S.

ACCT 527. IT Governance and Audit. 3 Credits.
This course introduces topics related to information technology governance and audit, and their roles in internal control and risk management in accounting. Prerequisite: Admission into the Master of Accountancy program or permission of the Director of the Master of Accountancy program. On demand.

ACCT 560. Personal Accountability & Ethics. 3 Credits.
Examines foundations of ethical behavior with an emphasis on personal accountability. Issues, regulations, and cases relevant to accountants and auditors are examined. Approaches for dialogue in the context of ethical issues are introduced. Includes a service project component. Prerequisite: Permission of MAcc Director. F.

ACCT 561. Accounting Ethics and Leadership. 3 Credits.
Accounting professionals have a special role in assuring the quality of financial reports, and in conveying useful information to stakeholders throughout society. Identifying, and being able to effectively respond to, ethical issues are important skills for accounting professionals. This course explores the concepts of ethical thinking, professional behavior, integrity, and independence, as well as specific principles as identified in the Codes of Professional Conduct. The ethical tone of an organization is set by its leaders, and thus an understanding of leadership, and how managers can effectively lead others in a responsible manner, is important to understand from both the perspective of being a leader, and working with leaders in an organization. Prerequisite: Admission into the Master of Accountancy program or permission of the Director of the Master of Accountancy program. F,S,SS.

ACCT 575. Special Topics. 3 Credits.
Specific topic will vary from offering to offering at the discretion of the department. Prerequisites and/or corequisites may be required depending upon the special topic selected. Course may be repeated up to a total of nine credits with permission of department. Prerequisite: Permission of department. Repeatable to 9 credits.

ACCT 590. Contemporary Readings in Accounting. 2 Credits.
Review of outstanding monographs and other writings in the field of accounting.

ACCT 591. Accounting Research. 1-6 Credits.
Individual student projects designed to develop skills in accounting research.

ACCT 592. Research in Federal Tax. 1-4 Credits.
Research in Federal Income Tax with emphasis on corporations and shareholders. Prerequisite: ACCT 411 or equivalent. Repeatable to 4 credits.

ACCT 593. Research in Business Law. 1-4 Credits.
Individual projects designed to develop basic skills in legal research.

ACCT 597. Graduate Accounting Internship. 1-6 Credits.
Compensated work experience in various areas of accounting. Must follow processes and meet internship requirements of the Department of Accountancy and CoBPA. Prerequisite: Permission of MAcc Director. Repeatable to 6 credits. S/U grading. F,S,SS.

ACCT 996. Continuing Enrollment. 1-12 Credits.
Repeatable. S/U grading.

ACCT 997. Independent Study. 2 Credits.
The independent study requires the student to investigate a topic in accounting and to prepare a formal report satisfactory to the MAcc Program Director.

ACCT 998. Thesis. 1-15 Credits.

Undergraduate Courses for Graduate Credit

ACCT 309. Accounting Information Systems. 3 Credits.
The application of systems design and use from the accountant’s perspective. Coverage includes computerized and manual accounting systems, elements of internal control, flowcharting, and the interface of accounting and management information systems. Prerequisites: ACCT 301 and Junior or Senior Standing; declared CoBPA majors only. F.

ACCT 312. Fund Accounting. 3 Credits.
Financial accounting, control, and reporting for governmental and not-for-profit entities. Prerequisites: ACCT 201 and ACCT 218; Junior or Senior Standing; declared CoBPA majors only. F.

ACCT 320. Cost Accounting. 3 Credits.
Principles and techniques used to account for and analyze costs incurred to produce products or services. Prerequisite: ACCT 201. Prerequisite or Corequisite: ACCT 218. F.

ACCT 401. Advanced Accounting. 3 Credits.
Special problems in accounting including consolidated statements, partnerships, and foreign exchange. Prerequisites: ACCT 302; Junior or Senior Standing; declared CoBPA majors only. F.

ACCT 403. Contemporary Accounting Theory. 3 Credits.
A study of the emerging issues and the problems facing the accounting profession with special emphasis on the authoritative pronouncements as designated by the American Institute of CPAs and the Financial Accounting Standards Board. S-U grading not allowed. Prerequisite or Corequisite: ACCT 401 or consent of instructor; declared CoBPA majors only. F.

University of North Dakota
Master of Accountancy

Admission Requirements

Admission to Approved status requires:

1. A four-year bachelor’s degree from a recognized college or university.

2. Completion of the Graduate Management Admission Test (GMAT) with a score that equals or exceeds an overall score of 500. In certain circumstances, applicants may substitute the GRE for the GMAT. The requirement for test scores will be waived for applicants holding a graduate degree or a bachelor degree and a cumulative GPA of 3.0/4.0 at the time of admission to the ABM program. Undeclared applicants may substitute the GRE for the GMAT.

3. An overall grade point average of at least 2.75 in the undergraduate degree program (based on a 4.00 scale), or a 3.00 GPA, or equivalent, for the last two years.

4. Satisfy the School of Graduate Studies’ English Language Proficiency requirements as published in the graduate catalog.

5. For either the Professional Accountancy Track or the Practitioner Track only, a bachelor’s degree in accounting, or coursework including intermediate accounting, audit, cost/managerial accounting and taxation that is deemed equivalent by the MAcc Program Director.

Applicants for combined admission and the Accelerated Bachelor’s/Masters’ (ABM) 5 year degree program will be eligible only for the Professional Accountancy Track. Applicants with a bachelor’s degree with a major in accounting or equivalent coursework will be eligible only for the Professional Accountancy Track or the Practitioner Track. Applicants who fail to meet the minimum grade point or GMAT requirements, but who otherwise show high potential for success may be considered for admission to Provisional Status with the approval of the MAcc Program Director and the Department Chair.

Combined Admission

The intent of the combined BAcc/MAcc program is to allow qualified students to complete the requirements for both degrees in one year beyond that required to receive the baccalaureate degree. All requirements for both degrees must be met, and up to six credits of prior-approved graduate accounting coursework, preferably at the 500-level, may be double-counted toward each of the two degrees.

UND students currently completing their junior year (90 credits) towards an accounting undergraduate degree may apply to the MAcc under combined admission. Combined admission to the MAcc program may be granted to accounting students with a minimum of 90 credits completed and both an overall grade point average of 2.75 (based on a 4.00 scale) and 3.00 GPA average for all courses with an accounting prefix completed at the date of application and admission. The GMAT requirement will be waived for those applying for combined admission.

ABM 5 Year Degree Program Admission

The ABM degree program allows exceptional undergraduate students at UND an opportunity to complete the requirements for both the bachelor’s and master’s degrees at an accelerated pace. All requirements for both degrees must be met, and these students may double count up to 12 graduate-level credits towards the requirements for both their Bachelor in Accountancy and their Master of Accountancy degree requirements. ABM students must obtain their Master of Accountancy degree within 12 months of completing the Bachelor of Accountancy degree, provided that the degree requirements can be completed in that timeframe.

High achieving high school students (GPA of at least 3.5/4.0 and an ACT score of 25 or higher) will initially be considered for “identified” status and become eligible for formal admission when they meet the same criteria that undergraduates must meet for admission into the ABM program. Admission is a competitive process. The following are minimum eligibility requirements:

1. Students must meet the School of Graduate Studies admissions eligibility requirements.

2. Students must have completed a minimum of 60 credits, including credits earned from advanced placement and dual credit. Students must apply before completion of the undergraduate degree.

3. Transfer students with a minimum of 60 credits—whether from the transfer institution alone or in combination with UND credits—must have a minimum cumulative GPA of 3.0/4.0 at the time of admission to the ABM program.

4. Students must have a minimum cumulative GPA of 3.0/4.0 at UND at the time of admission into the ABM program.
