IDT Graduate Certificate in K-12 Technology Integration

IDT offers three 12-credit certificates. The certificates provide minimum competencies in the field of instructional design within a given subset of the field (technology integration, corporate training, or eLearning). Certificates are intended for those already working in some capacity as an instructional designer but who lack an advanced degree in instructional design. Those seeking the full set of professional competencies of an instructional designer across all areas in preparation for entering the field of instructional design are encouraged to apply to one of the IDT master's programs instead. Courses taken for a certificate may also be transferred into any of the IDT master's programs at a later date.

Code	Title	Credits
Required Courses		
IDT 520	Instructional Systems Analysis and Design	3
IDT 525	Development, Implementation, and Evaluation of Instructional Materials	3
Select two of the following:		6
