

Doctor of Philosophy in Chemical Engineering

Admission Requirements

The applicant must meet the School of Graduate Studies' current minimum general admission requirements as published in the graduate catalog.

1. B.S. degree in chemical engineering from an ABET accredited program with a GPA of at least 3.3 or a M.S. degree in chemical engineering with a GPA of at least 3.0. Students holding a B.S. degree in a science or other engineering field may be admitted to Qualified Status with an obligation to acquire background undergraduate engineering knowledge. The exact requirements will be determined on a case-by-case basis.
2. Graduate Record Examination General Test (optional).
3. Satisfy the School of Graduate Studies' English Language Proficiency requirements as published in the graduate catalog.

Degree Requirements

1. A minimum of 90 semester credits, including acceptable master's degree work and credits granted for the dissertation and the research leading to the dissertation.
2. Successful completion of an oral comprehensive exam when at least 45 post baccalaureate credits have been completed. This exam will be based on the four core chemical engineering courses and their application to the student's research. The exam will be administered by at least three faculty members from the Department of Chemical Engineering. Candidates who fail the exam will be allowed one opportunity to repeat the exam. The reexamination must take place no later than 13 months after the initial exam attempt.
3. Students must present to their advisory committee an annual oral progress report describing research progress.
4. Preparation and defense of a dissertation documenting original and independent research on a topic related to chemical engineering.

Code	Title	Credits
Required Courses		
CHE 501	Advanced Transport Phenomena	3
CHE 509	Advanced Chemical Engineering Thermodynamics	3
CHE 511	Advanced Chemical Engineering Kinetics	3
CHE 515	Design of Engineering Experiments	3
CHE 562	Seminar in Chemical Engineering	3
CHE 591	Research	36-45
CHE 999	Dissertation	12
At least 9 credits of graduate coursework from outside chemical engineering, which may contribute to a minor or cognate.		9
Additional graduate coursework		9-18
Successful completion of the four core chemical engineering courses with a GPA of at least 3.3.		12
CHE 501	Advanced Transport Phenomena	
CHE 509	Advanced Chemical Engineering Thermodynamics	
CHE 511	Advanced Chemical Engineering Kinetics	
CHE 515	Design of Engineering Experiments	
Total Credits		93-111
